Browsing Tips

- You can browse the catalog by selecting a **product category, supplier name** or **page number** in the bookmark window. Your location in the bookmark structure is marked in blue. To get a larger view of the page, click the bookmark window icon to close the bookmark pane or use the magnifying glass on your tool bar to make the page bigger. Click the bookmark window icon to show the bookmark pane when you are done viewing the page. **bookmark window icon** **magnifying glass**
- Select the product pages you'd like to view or select **"Catalog Indexes".** For a detailed view of all the products, click on the page number you wish to view.
- All **blue part numbers** in this catalog have links. Click on the part number to view the product details, inventory status, and add it to your order. If you are unable to see the blue part numbers, scroll your mouse over the part numbers and a "W" will appear on the cursor indicating it has a link.
- Catalog products without a direct link can also be displayed and ordered by typing the part number into the **search box** on Mouser's home page.

For PLDs, Mouser is the **logical choice.**

Mouser is now your authorized source for Altera.
As a pioneer and leading manufacturer of PLDs, Altera's FPGAs, CPLDs, and IP solutions forge the next evolution in electronic design. Mouser stocks a full range of products, including Cyclone, Max, Startix, Arria, and more. Mouser is also your source for the latest Altera development tools, starter kits and Quartus® II design software.

When it comes to an ever-expanding selection of the newest products and technologies, Mouser delivers with no minimums, same-day shipping and the clear speed-to-market advantage design engineers demand. Plus, we back it all with unsurpassed support. Get your hands on what's next from Mouser.

Embedded

ANAREN INTEGRATED RADIO MODULES, ANTENNAS, AND DEVELOPMENT KITS

Leveraging Anaren's decades of experience in microwave and RF technology and Texas Instruments' world-renowned semiconductor technology, AIR offers you these top-level advantages:

Easy integration/implementation on existing, two-layer PCB
Virtually no RF engineering experience necessary
Tiny 9mm x 12mm x 2.5mm and 9mm x 16mm x 2.5mm footprints, across product family
FCC Part 15 and Industry Canada RSS-210 compliant, with no additional "Intentional Radiator" certification required
Choose embedded or connectorized antenna
100% RF-tested in production
Low power consumption

Choice of frequencies to match your application:
- A1101R04C: 433-434.4MHz FCC compliant; device operating range 400-450MHz
- A1101R08A and A1101R08C: 868MHz
- A1101R09A and A1101R09C: 902-928MHz
- A2500R24A and A2500R24C: 2400-2483.5MHz

A1101R04C

The A1101R04C is a high-performance, FCC-certified connectorized radio module that incorporates the Texas Instruments CC1101 transceiver chip in the industry's smallest package (9mm x 12mm x 2.5mm).

MOUSER STOCK NO.	Anaren Part No.	Description	Form Factor	Price Each
620-66089-0406	66089-0406	Antenna for Module 04C	--	2.08
620-A1101R04C00GM	A1101R04C00GM	400MHz Radio Only	Connector	15.46
620-A1101R04C-EM1	A1101R04C-EM1	400MHz Evaluation Module With Radio For TI CC1101DK	Connector	42.79
620-A1101R04C-EZ4A	A1101R04C-EZ4A	400MHz Target Board With Radio For TI EZ430 Development Kit	Connector	42.79
620-A1101R04C-EZ4E	A1101R04C-EZ4E	400MHz Target Board With Radio For TI EZ430 Development Kit	Connector	42.79

A1101R08A and A1101R08C

The A1101R08A/B are high-performance, ETSI compliant radio modules and connectorized radio modules that incorporates the Texas Instruments CC1101 transceiver chip in the industry's smallest package (9mm x 16mm x 2.5mm).

620-A1101R08C00GM	A1101R08C00GM	800MHz Radio Only	Connector	15.46
620-A1101R08A00GM	A1101R08A00GM	800MHz Radio Only	Antenna	15.46
620-A1101R08C-EM1	A1101R08C-EM1	800MHz Evaluation Module With Radio For TI CC1101DK	Connector	42.79
620-A1101R08A-EM1	A1101R08A-EM1	800MHz Evaluation Module With Radio For TI CC1101DK	Antenna	42.79
620-A1101R08A-EZ4A	A1101R08A-EZ4A	800MHz Target Board With Radio For TI EZ430 Development Kit	Antenna	42.79
620-A1101R08A-EZ4E	A1101R08A-EZ4E	800MHz Target Board With Radio For TI EZ430 Development Kit	Antenna	42.79
620-A1101R08C-EZ4A	A1101R08C-EZ4A	800MHz Target Board With Radio For TI EZ430 Development Kit	Connector	42.79
620-A1101R08C-EZ4E	A1101R08C-EZ4E	800MHz Target Board With Radio For TI EZ430 Development Kit	Connector	42.79

A1101R09A and A1101R09C

The A1101R09A/C are high-performance, FCC-certified radio modules and connectorized radio modules that incorporates the Texas Instruments CC1101 transceiver chip in the industry's smallest package (9mm x 16mm x 2.5mm).

620-66089-0906	66089-0906	Antenna for Module 09C	--	2.82
620-A1101R09C00GM	A1101R09C00GM	900MHz Radio Only	Connector	15.46
620-A1101R09A00GM	A1101R09A00GM	900MHz Radio Only	Antenna	15.46
620-A1101R09C-EM1	A1101R09C-EM1	900MHz Evaluation Module With Radio For TI CC1101DK	Connector	42.79
620-A1101R09A-EM1	A1101R09A-EM1	900MHz Evaluation Module With Radio For TI CC1101DK	Antenna	42.79

ANTENOVA GPS Modules and Chip Antennas

antenova®

GPS RADIONOVA RF M10382 ANTENNA MODULE WITH U-BLOX 6

Antenova's GPS RADIONOVA® M10382 is a single package solution that combines a full GPS engine and antenna on a small SMD module. The M10382 is a highly integrated GPS RF Antenna Module suitable for L1-band GPS and A-GPS systems. The device combines the high performance **U-Blox 6** GPS position engine with Antenova's high efficiency antenna technology in a small SMD module. M10382 also benefits from novel external matching that ensures easy tuning for each platform.

For quantities greater than listed, call for quote.

GIGANOVA® WIRELESS ANTENNAS

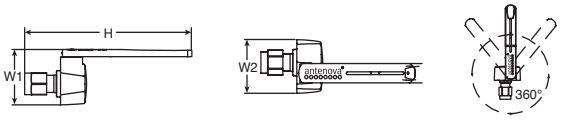
Antenova offers the gigaNOVA® range of market leading standard antenna solutions for 2.3GHz, 2.4GHz, 2.5GHz, 5GHz, GPS, GSM and ISM900 bands. Designed for ease of integration into wireless devices, they are the smart choice for GPS, Bluetooth, Wi-Fi, ZigBee, WiMAX and cellular M2M applications. The gigaNOVA® line of antennas offers external swivel antennas and internal SMD and snap-in antennas.

gigaNOVA® External Antennas

Intended for SMA mounting

Specifications:

- Frequency: 2.4GHz
- Operating Temperature: -40°C to + 85°C
- Impedence: 50Ohm
- Antenna type: Swivel



For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Antenova Part No.	Weight (gram)	Dimensions W1 x W2 x H	Description	Price Each 1	Price Each 10	Price Each 50

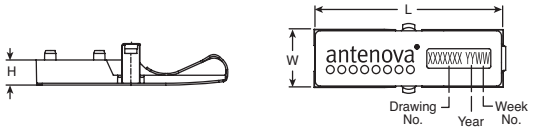
gigaNOVA® Internal Snap-In Antennas

Specifications:

- Frequency: 2.4GHz, 868/915MHz or Pentaband (GSM850/GSM 900/DCS1800/PCS 1900/WCDMA)
- Operating Temperature: -40°C to + 85°C
- Impedence: 50Ohm
- Antenna type: Snap-in



For quantities greater than listed, call for quote.

gigaNOVA® Internal SMD Chip Antennas

Antenova's Reflexus A10315 and Calvus A10340 are the newest addition to their gigaNOVA Internal SMD Chip Antenna offering. The two new cellular penta-band SMD antennas are designed for ease of integration into wireless devices. The Reflexus A10315 and Calvus A10340 antennas are ideally suited for an extensive range of embedded cellular applications such mobile handsets, femto base stations, vehicle tracking, remote monitoring and other M2M applications.

BLUEGIGA Bluetooth, Wi-Fi Modules and Devices

bluegiga

RoHS Compliant **This product is RoHS compliant.**

BLE112 4.0 LOW ENERGY BLUETOOTH MODULE

Bluetooth Low Energy Modules are single mode devices targeted for low power sensors and accessories. Bluetooth Low Energy Modules offer all Bluetooth low energy features—radio, stack, profiles, and application space for customer applications—so an external processor is not needed.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Bluegiga Part No.	Fig.	Bluetooth Specification	Bluetooth Class	Antenna Option	Chip	Firmware	Price Each 1	25	50	100

WT41 LONG RANGE BLUETOOTH MODULE

WT41 is truly a long range Bluetooth module offering impressive 1,000 meters range between two WT41 Bluetooth modules. The module utilizes Bluegiga's sophisticated radio frequency design methodologies and offers OEM's a trouble free product even with tight integration with surrounding electronics.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Bluegiga Part No.	Fig.	Bluetooth Specification	Bluetooth Class	Antenna Option	Chip	Firmware	Price Each 1	25	50	100

WT32 BLUETOOTH AUDIO MODULE

WT32 is the latest generation of Bluetooth modules. It provides highest level of integration with integrated 2.4GHz radio, DSP, battery charger, stereo codec and antenna ready to hit mono and stereo applications. WT32 is also fully ready to support the latest Bluetooth 2.1 + EDR standard.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Bluegiga Part No.	Fig.	Bluetooth Specification	Bluetooth Class	Antenna Option	Chip	Firmware	Price Each 1	25	50	100

WT21 BLUETOOTH HCI MODULE

WT21 is intended at Bluetooth applications where a host processor is capable of running the Bluetooth software stack. WT21 only implements the low level Bluetooth Host Controller Interface (HCI) but still offers advantages of a module - easy implementation and certifications.

For quantities greater than listed, call for quote.

WF111 WI-FI RADIO MODULES

WF111 is a fully integrated single 2.4GHz band 802.11 b/g/n module for portable and battery powered applications, where Wi-Fi connectivity is needed.

NEW PRODUCT

Features:

- IEEE802.11b/g/n
- Max. Data Rate: 72.2Mbps
- Dimensions: 12 x 19 x 2.1mm
- SDIO Drivers for Linux 2.6 and 3.x kernels

For quantities greater than listed, call for quote.

WF121 WI-FI STAND ALONE MODULES

WF121 is a stand-alone Wi-Fi module providing fully integrated 2.4GHz 802.11 b/g/n radio and a 32-bit microcontroller (MCU) platform for embedded applications requiring simple, low-cost and low-power wireless TCP/IP connectivity, also providing flexible interfaces for connecting to various peripherals.

NEW PRODUCT

Features:

- IEEE802.11b/g/n
- Max. Data Rate: 72.2Mbps
- Dimensions: 15.4 x 26.2 x 2.1mm
- Embedded Bluegiga Wi-Fi Software

For quantities greater than listed, call for quote.

CEL Embedded RF Wireless Products

CEL California Eastern Laboratories

802.15.41 ZIGBEE SOLUTIONS

RoHS Compliant **This page of product is compliant.**

CEL California Eastern Laboratories

CEL's comprehensive line of ZigBee solutions includes ICs, modules, and software application packages designed for use in mesh, point-to-point, and point-to multipoint systems. They provide a fully integrated, easy-to-use transceiver solution for IEEE 802.15.4 networks. CEL ZigBee modules and ICs are ideal for remote sensing, AMR/AMI, home and building automation, and security applications.

Integrated RF Transceiver/MCU for ZigBee/IEEE 802.15.4/SNAP Networks

Key Features:
- Industry leading RF Link Budget @ 106dB
- Embedded 8051 Compatible MCU with 96KB/8KB Flash/RAM
- Scalable Data Rate: 250kbps for ZigBee, 500kbps
- Voice Codec Support
- 4 Level Power Management Scheme
- Single Voltage Operation of 1.9V to 3.3V
- Hardware MAC

For quantities greater than listed, call for quote.

DIGI INTERNATIONAL Embedded RF Wireless Products

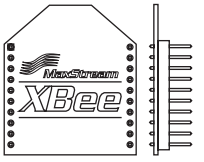
Products may be RoHS compliant. Check mouser.com for RoHS status.

Easy-to-Use! No configuration is necessary for out-of-box RF operation. Simply feed data into one module, then the data is sent out the other end of the wireless link. If more advanced functionality is needed, the modules support an extensive set of AT commands.

MaxStream 900MHz solutions are certified for use in North American, but integrators in Europe must use Digi RF 2.4GHz solutions.

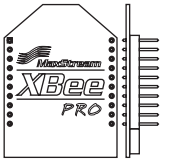
XBee Specifications:
- Indoor/Urban Range: Up to 133' (40m)
- Outdoor Line-of-Sight Range: Up to 400' (120m)
- Transmit Power: 1.25mW (+1dBm)
- Power-Down Current: <10µA
- Operating Frequency: 2.4GHz
- RF Data Rate: 250,000bps
- Receiver Sensitivity (1% PER) -96dBm in boost mode

RoHS Compliant



XBee-Pro Specifications:
- Indoor/Urban Range: Up to 300' (100m)
- Outdoor Line-of-Sight Range: Up to2 miles (3200m)
- Transmit Power: 63mW (+18dBm)
- Power-Down Current: <10µA
- Operating Frequency: 2.4GHz
- RF Data Rate: 250,000bps
- Receiver Sensitivity (1% PER) -102dBm

RoHS Compliant



XBEE® & XBEE-PRO® ZB RF MODULES

XBee and XBee-PRO ZB embedded SMT RF modules provide cost-effective wireless connectivity to electronic devices. They are interoperable with other ZigBee PRO feature set devices, including devices from other vendors. Programmable versions of the XBee-PRO ZB module make customizing applications easy. Programming directly on the module eliminates the need for a separate processor.

XTEND™ OEM RF MODULE

The XTend OEM RF Module provides unprecedented range in a low-cost wireless data solution. The module is easy-to-use, requires minimal power and provides reliable delivery of critical data between devices. Its small form factor saves valuable board space. Due to innovations stamped in its design, the XTend Module supplies 2-8x the range of other modules operating within the unlicensed 900MHz frequency band. The range gained by OEMs and integrators is due to proprietary technologies embedded into each module such as: superior RX (receiver) sensitivity, interference immunity, modulation/demodulations techniques, etc. No configuration is necessary for out-of-box RF communications. The module's default configuration supports a wide range of data system applications. Advanced configurations can be implemented using simple AT or binary commands.

DLP DESIGN RFID and ZigBee™ Modules

Products may be RoHS compliant. Check mouser.com for RoHS status.

DLP USB/MICROCONTROLLER MODULE

The DLP-2232MSPF combines the same USB interface used in the DLP-2232H and the DLP-1232H modules with a Texas Instruments microcontroller with internal FRAM to form a rapid development tool. The MSP430FR5739 microcontroller is preprogrammed with basic functionality for accessing the port pins and can be reprogrammed with user firmware via a 12-pin header using the MSP-FET430UIF device programmer/debugger (purchased separately).

DLP-RFID1 RFID READER AND WRITER

The DLP-RFID1 is a low-cost, USB-powered module for reading from and writing to ISO 15693, ISO 18000-3, and Tag-it™ intelligent RFID transponder tags. It has the ability to both read and write up to 256 bytes of data in addition to reading the unique identifier (UID/SID). All of the DLP-RFID1's electronics and antenna reside within the compact unit, and all operational power is taken from the host PC via the USB interface. The range of the internal antenna is up to 4 inches depending upon the size of the tag being read.

Retail Version

Applications:
- Real-Time Security
- Personal Identification
- Pharmaceutical Tracking
- Inventory/Asset Management and Tracking
- Library/Book Management & Tracking
- Baggage Tagging
- Sports Event Timing

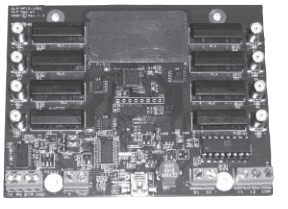
DLP-RFID-LP8C 8-CHANNEL RFID READER/WRITER

The DLP-RFID-LP8C is a low-cost, USB-powered module for reading from and writing to ISO 15693, ISO 18000-3 and Tag-it™ intelligent RFID transponder tags via up to eight external antennas. It has the ability to both read and write up to 256 bytes of data in addition to reading the unique identifier (UID/SID). All of the DLP-RFID-LP8C's electronics reside on a single, compact PCB; and all operational power is taken from the host Windows/Windows CE/ Linux PC via the USB interface. Up to eight external antennas can be connected via standard SMA connectors.

DLP-RFID-LP8C



Features:
- ISO 15693, 18000-3, 14443, Tag-it™ HF-I Compatible
- Can read the UID/SID of up to 15 Tags Simultaneously
- 13.56MHz Reader/Writer
- 8 Channels for External Antenna Connections
- FCC/IC/CE Modular Approvals in Place
- USB Port Powered from Windows, CE or Linux PC
- Both USB and RS232 Interfaces Provided
- USB Interface; No Driver Development Required for Windows, CE or Linux PC
- Operating Temperatures: 0°C to 70°C
- Dimensions: (L x W x H) 4.36" x 3.32" x 0.6

For quantities greater than listed, call for quote.

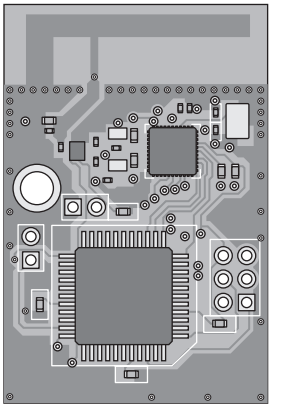
DLP 802.15.4/ZIGBEE™ READY MODULE

The DLP-RF2 OEM Module is a short-range, low-power, 2.4GHz, unlicensed worldwide ISM band transceiver designed around the IEEE 802.15.4 Wireless Standard. It supports point-to-point and star network configuration using preprogrammed firmware.

RoHS Compliant



DLP-RF2 - 2.4 GHZ OEM RF Transceiver Module

The DLP-RF2 combines a Freescale™ MC13192 2.4GHz Direct-Sequence, Spread-Spectrum RF Transceiver IC and Freescale MC9S08GT60 microcontroller to form an IEEE 802.15.4 compliant, ZigBee™ ready, short-range transceiver module. The DLP-RF2 connects to user electronics via a standard, 20-pin male header.

The MC9S08GT60 microcontroller is preprogrammed with DLP Design's Serial Interface Packet Processor (SIPP™ firmware) for accessing the transceiver functions via simple serial calls. Interface to an external serial host microcontroller/DSP/FPGA, etc. is accomplished via a simple 2-wire (RX, TX, and ground) interface.

MURATA WIRELESS SYCHIP HIGH POWER ZIGBEE

NEW SUPPLIER

Features:

- Low power operation: Sleep-1.2μA, Transmit- 165A@20dBm, Receive - 31mA
- Allows customers to use the ARM Cortex M3 processor for their own applications
- Best-in-class radio receive sensitivity at -103dBm
- FCC certified

For quantities greater than listed, call for quote.

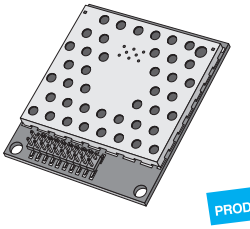
NEW PRODUCT

Compact AC4490 900MHz transceivers can replace miles of cable in harsh industrial environments. Using field-proven FHSS technology that needs no additional site licensing*, AC4490s reject interference, enable co-located system operation, increase output power and maintain data integrity.

AC4490s feature drop-in installation and a number of on-the-fly control commands, providing OEMs with a versatile interface for any application. They can be used as direct wire replacements, requiring no special host software for communication. All frequency hopping, synchronization and RF system data transmission/reception is performed by the transceiver.



NEW PRODUCT

High-performance AC4790 transceivers utilize Laird's "masterless" protocol, allowing each transceiver to communicate with any other in-range transceiver for true peer-to-peer operation.

AC4790's protocol features a dynamic addressing scheme, which simplifies the most efficient transmission path, so OEMs can design routing sequences that optimize the RF network. This makes AC4790 ideal for a wide variety of RF network. This makes AC4790 ideal for a wide variety of industrial applications that must rely on smooth, constant data flow.

AC4486/4868 SERIES - OEM TRANSCEIVER MODULES

Compact 868MHz transceivers can replace miles of cable in harsh environments. Using field-proven RF technology which needs no additional ETSI (Europe) licensing, OEMs with little or no previous RF experience can easily and quickly make existing systems wireless.

LAIRD TECHNOLOGIES Wireless System Modules

WIRELESS ETHERNET BRIDGE CONNEXLAN 400

Based on Laird Technologies' WISM+ 802.11 embedded module, the CL400 series of wireless Ethernet bridges provide outstanding data throughput over long ranges in a ruggedized industrial package. The CL400 Ethernet Bridge products are ideal for users looking for a simple to use wireless Ethernet bridge. Available with an AC power adapter, standard RJ-45 Ethernet jack and antennas, the CL400 come prepackaged with all necessary accessories. With no configuration necessary, users can simply plug in their Ethernet cable and apply power and have a wireless bridge at distance up to 1 mile and speeds up to 11Mbs. Optimized for point-to-point bridge connections the CL400 starter packs come pre-configured to communicate come pre-configured to communicate over a WPA2-CCMP encrypted secure 802.11 RF channel. The intelligent devices will optimize link speeds according to the RF conditions and distances between the units.

Features:

- Easy to use, no configuration necessary
- Standard 10/100 RJ-45 Ethernet Jack
- Auto Sensing interface for connection to peripherals or network devices
- Optimized RF Data rates dependant on conditions
- AES encrypted wireless link
- RF Speeds up to 11Mbps
- Line of sight distances up to 1 mile

FLEXRF® 915MHZ AND 2.4GHZ WIRELESS MODULES

Laird Technologies' fifth generation 2.4GHz FHSS module sets the standard for industrial RF communication. Based on proprietary FlexRF™ technology, this globally-accepted module will exceed most OEM application and performance requirements. Embedded with Laird Technologies' robust server-client protocol, the LT2510 permits each module to communicate with any other in-range module for true peer-to-peer operation. "Out of range" modules can be reached via a meshing topology. The configuration and test software enables OEMs to structure and optimize the network to suit their application.

Laird Technologies' third generation 915MHz FHSS module sets yet another standard for industrial RF communication. Based on proprietary FlexRF™ technology, this globally-accepted module will exceed most OEM application and performance. From the OEM integrator's point of view, the LT1110's interface (API, configuration, etc) is 100% compatible with the LT2510 allowing the OEM to choose either 915MHz or 2.4GHz. The enhanced API commands provide packet routing control and network intelligence. With its field-proven proprietary FHSS RF protocol and increased penetration at 915 MHz, the LT1110 rejects RF noise, excels in multipath scenarios, allows for co-located systems, and provides an extremely reliable communication link.

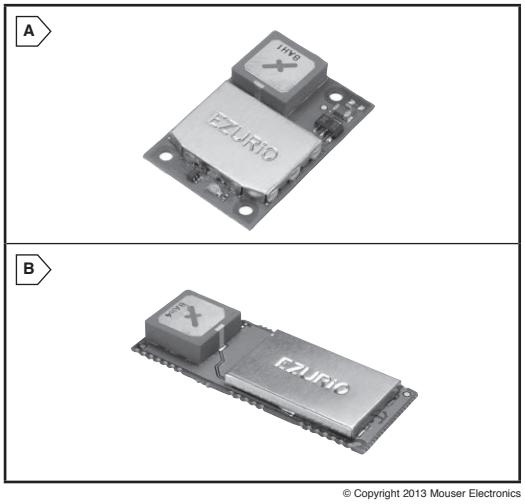
BLUETOOTH MODULES

Laird's Bluetooth embedded modules are designed with compatibility in mind. Laird's Bluetooth Intelligent Serial technology. The pin configuration and physical dimensions of both the Wireless Module (BISM) are the same giving you the choice of wireless.



MOUSER STOCK NO.	Laird Tech Part No.	Fig.	Description	Price Each
239-BTM431	BTM431	-	Bluetooth AT Data Module, Internal Antenna w/ BISM II	23.65
239-BTM443	BTM443	-	Bluetooth AT Data Module, Internal Antenna, Enhanced	25.92
239-DVK-BTM431	DVK-BTM431	-	Bluetooth Dev Kit for BTM431	176.55
239-DVK-BTM443	DVK-BTM443	-	Bluetooth Dev Kit for BTM443	176.55
239-TRBLU23-00200	TRBLU23-00200	A	BISMII Bluetooth v2.0 Module	45.27
239-TRBLU23-00300	TRBLU23-00300	A	BISMII - uFL connector	45.27
239-BTM411	BTM411	-	Class 2 Bluetooth AT Data Module, Internal Antenna	23.65
239-DVK-BTM411	DVK-BTM411	-	Bluetooth AT Data Module, Internal Antenna Dev Kit	176.55
239-BTM402	BTM402	A	BISM II - Power Amp (PA)	49.51
239-BISMS02BI	BISMS02BI	B	Surface Mount BISM II	35.16
239-BISMS02BI-NA	BISMS02BI-NA	B	Surface Mount BISM II - uFL connector	35.16
239-BRBLU03-010A0	BRBLU03-010A0	-	High Speed Bluetooth USB Adapter	48.39
239-BTM410	BTM410	-	BlueTooth DATA Module AT Module	21.21
239-DVK-BTM410	DVK-BTM410	-	Dev Kit/BlueTooth DATA Module AT Module	176.55
239-BTM421	BTM421	-	BlueTooth DATA Module HCI	23.65
239-DVK-BTM421	DVK-BTM421	-	Dev Kit/BlueTooth DATA Module HCI	176.55
239-BTM511	BTM511	-	BlueTooth Multimedia, (formerly BlueTooth Voice)	28.42

LINX TECHNOLOGIES RF Modules and Dev Systems

Products may be RoHS compliant. Check mouser.com for RoHS status.

Linx RF modules make it easy and cost-effective to add wireless capabilities to your product. Linx modules contain all the components necessary for the transmission of RF. Since no external components (except an antenna) are needed, the modules are easily applied, even by persons without previous RF design experience. This conserves valuable engineering resources and greatly reduces the product's time to market.

PROPRIETARY WIRELESS MODULES

PRODUCT NEW

USB INTERFACE MODULES

The Linx QS Series USB module allows the rapid addition of USB to virtually any device. Housed in a compact SMD package, the module provides a complete solution for converting between USB and serial sources, including microprocessors, RS-232/RS-485 level converters, or RF modules.

For quantities greater than listed, call for quote.

LS RESEARCH Wireless Modules and Dev Kits

LS RESEARCH
Wireless Product Development

TIWI-BLE TRANSCEIVER MODULES

Features:
- 2.4GHz IEEE 802.11 b/g/n
- Bluetooth 2.1+EDR, Power Class 1.5
- Full support for BT4.0 BLE and ANT
- Miniature footprint: 18mmx13mm
- Terminal for PCB/Chip antenna feeds
- Integrated band-pass filter
- Worldwide acceptance: FCC (USA), IC (Canada), and CE (Europe)
- Based on Texas Instruments WL1271L Transceiver
- Seamless integration with TI OMAP™ application processor
- SDIO host data path interfaces
- RoHS compliant

Si-FLEX

Ti-Wi

Ti-Wi BLE

NEW! TECHNOLOGY

PROFLEX ZIGBEE TRANSCEIVER MODULES

Features:
- 2.4GHz Output Frequency
- 100mW output power
- Long range: 4000 feet
- Miniature footprint: 0.9"x1.63"
- Integrated PCB F antenna or U.FL connector for external antenna
- Worldwide acceptance: FCC, IC and ETSI
- Powerful Texas Instruments 256k MSP430 with 802.15.4 MAC or ZigBee Stack
- LSR serial interface based on 802.15.4 MAC
- Low power operation
- RoHS compliant

For quantities greater than listed, call for quote.

SI-FLEX

The SiFLEX module is a high performance 900MHz IEEE 802.15.4 radio (AT86RF212 and RF amplifier circuit) and microcontroller (ATXMEGA256A3) in a cost effective, pre-certified footprint. Full debug and programming capabilities are included to develop custom applications. Easily load the ZigBee or MAC stack onto the module and create your own network.

Features:
- 900MHz DSSS 802.15.4/ZigBee/6LoWPAN Transceiver
- Very Versatile, Ultra Low Power Microcontroller Platform
- Serial Communications API (UART)
- Simple SiFLEX Network Protocol: Star Networks, Simple Repeating, AES Encryption, Data Rate up to 1Mbps
- Open Hardware Platform to Enable User Developed Application Code

Specifications:
- 250mW RF Output Power
- RF Sensitivity up to -102dBm
- FCC/IC Approved (pending)
- 2.0V to 3.45V Operation
- 256K Flash/16K RAM/4K EEPROM
- Power Consumption: 300mA in Transmit, 30mA in Receive, <5uA in Sleep

For quantities greater than listed, call for quote.

TIWI

TIWI5 Transciever Module

Features:
- 802.11 a/b/g/n and Bluetooth® 2.1+EDR, 3.0, 4.0 (BLE), and ANT compliant
- 2.4 and 5.8GHz operation
- Supports requirements for WiFi Protected Access (WPA and WPA2.0) and IEEE 802.11i
- Supports requirements for WiFi Protected Access (WPA and WPA2.0) and IEEE 802.11i
- Works with IEEE std 802.1x for VPN
- Terminal for PCB/Chip antenna feeds
- Integrated band-pass filters
- Cost saving module level certification accepted worldwide: FCC (USA), IC (Canada), and ETSI (Europe)
- Compact design based on Texas Instruments WiLink™ 6.0 WL1273L transceiver
- Seamless integration with TI OMAP™ application processors
- SDIO host data path interfaces
- Bluetooth advanced audio interfaces
- Low power operation modes
- RoHS compliant

Specifications:
- Vcc min: 3.0V
- Vcc max: 4.8V
- Temp range: -40 to +85°C
- Miniature footprint: 18mmx13mm
- Low height profile: 1.9mm

For quantities greater than listed, call for quote.

TIWI-R2 Transceiver Module

The TiWi-R2 module is a high performance 2.4GHz IEEE 802.11 b/g/n Bluetooth 2.1+EDR radio in a cost effective, pre-certified footprint. The module realizes the necessary PHY/MAC layers to support WLAN applications in conjunction with a host processor over a SDIO interface. The module also provides a Bluetooth platform through the HCI transport layer.Both WLAN and Bluetooth share the same antenna port.

Features:
- IEEE 802.11 b,g,n,d,e,i, compliant
- Typical WLAN Transmit Power: 20.0dBm, 11Mbps, CCK (b) 14.5dBm, 54Mbps, OFDM (g) 12.5dBm, 65Mbps, OFDM (n) Output Power: 9.5dBm, Class 1.5
- Bluetooth 2.1+EDR, Power Class 1.5
- Typical WLAN Transmit Power: - 89dBm, 8% PER,11Mbps - 76dBm, 10% PER, 54Mbps - 73dBm, 10% PER, 65Mbps

Specifications:
- Miniature footprint: 18mmx13mm
- Low height profile: 1.9mm
- U.FL connector for external antenna
- Terminal for PCB/Chip antenna feeds
- Integrated band-pass filter
- Worldwide acceptance: FCC (USA), IC (Canada), and ETSI (Europe)
- Compact design based on Texas Instruments WL1271WSP Transceiver
- Seamless integration with TI OMAP™ application processor
- SDIO Host data path interfaces
- Bluetooth Advanced Audio Interfaces
- Low power operation mode
- Streamlined development with LSR design services
- RoHS compliant

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	LS Research Part No.	Description	Price Each 1	50	100	1000

TIWI-SL Transciever Module

Features:
- IEEE 802.11 b/g compliant.
- Typical WLAN Transmit Power: +19.0dBm, 11Mbps, CCK (b) +15dBm, 54Mbps, OFDM (g)
- Typical WLAN Sensitivity: -85dBm, 8% PER,11Mbps -70dBm, 10% PER, 54Mbps

Specifications:
- Miniature footprint: 14mmx21mm
- Low height profile: 2.3mm
- Operating Voltage: 2.9V to 3.6V
- Operating temperature: -40°C to +85°C
- Embedded network stack
- Wireless Security WEP, WPA Personal, WPA2 Personal
- Terminal for PCB/Chip antenna feeds
- Compact design based on Texas Instruments CC3000 transceiver
- SPI host interface
- Simple integration with microcontrollers and microprocessors
- Worldwide acceptance: FCC (USA), IC (Canada), and ETSI (Europe)
- Streamlined development with LSR design services
- RoHS compliant

For quantities greater than listed, call for quote.

maestro SIRFSTAR III GPS MODULES

Specifications:
- Channels: 20 Parallel tracking
- Correlators: 200,000+
- Frequency: L1 - 1575MHz
- Sensitivity: Tracking: -159dBm, Acquisition (cold start): -142dBm
- Positional Accuracy (horizontal): <2.5m CEP (autonomous), <2m CEP SBAS
- Time to First Fix:
  - Hot Start: <1s
  - Warm Start: <32s
  - Cold Start: <35s
- NMEA Message Switchable: GGA, GSA, GSV, VTG, RMC, GLL
- Baud Rate: 4800 (default) to 115200
- Serial Ports: 3.3V CMOS Compatible
  - Tx0: NMEA output
  - Rx0: NMEA input
- Input Voltage: 3 to 3.6VDC
- Current Draw:
  - Acquisition: 31mA
  - Tracking: 26mA
  - Standby: 20µA

For quantities greater than listed, call for quote.

MICROCHIP RF Wireless Products

IEEE STD. 802.11 WI-FI® MODULES

Microchip has added 802.11 wireless communications to its lineup of wireless technologies for the embedded market. Microchip has a Wi-Fi PICtail development board that adds 802.11 capabilities to Microchip's development platforms for the PIC18, PIC24, PIC32, and dsPIC family of microcontrollers. The PICtail development board contains the MRF24WB0MA FCC and Wi-Fi certified module. The Wi-Fi PICtail allows designers to quickly create a direct connection to the Internet by seamlessly connecting to standard 802.11b/g access points. In managing the connection, the MRF24WB0MA module controls the MAC and baseband layers and is connected to the host MCU via an SPI port. The 8/16 or 32-bit Microchip MCU that resides on the Microchip development board controls the TCP/IP networking stack and runs the system application.

Features:

- Compatible with PIC18, PIC24, PIC32 and dsPIC microcontrollers
- IEEE 802.11b compliant wireless solution compatible with b/g/n routers
- Supports infrastructure and Adhoc networks
- MRF24WB0MA small footprint module integrated antenna, MAC, Baseband, RF and power amplifier
- MRF24WB0MA/B module is FCC, IC, Wi-Fi certified, and ROHS, CE and ETSI compliant, providing considerable cost savings and quick time-to-market
- License Free TCP/IP stack supporting standard suite of Internet Protocols
- Built-in EZConfig application to facilitate network provisioning without a keyboard or display
- Built-in ZeroConf (Bonjour, Avahi) application to simplify human interaction
- Supports WEP, WPA, and WPA2 security protocols on module
- Solutions as simple as a single PIC plus WiFi module with power and passives

STAND-ALONE LIN 2.1/SAE J2602 TRANSCEIVERS

Features:

- Compliant with LIN Bus Specifications 1.3, 2.0 and 2.1 and are compliant to SAE J2602
- Support Baud Rates up to 20 Kbaud with LIN-compatible output driver
- 43V load dump protected
- Very low EMI meets stringent OEM requirements
- Very high immunity to RF disturbances meets stringent OEM requirements
- Wide supply voltage, 6.0V-27.0V continuous
- Extended Temperature Range: -40°C to +125°C
- Interface to PIC® MCU EUSART and standard USARTs

2.4GHZ IEEE STD. 802.15.4™ RF TRANSCEIVER MODULES

IEEE Std 802.15.4™ is created to address low-cost, low-data rate, and low-power design application for short-range Wireless Personal Area Networks (WPAN). The IEEE 802.15.4 defined standard for wireless connectivity among fixed, portable, and moving devices in a WPAN environment is the foundation for network protocols such as standard based ZigBee® and Microchip's Wireless proprietary MiWi™ and MiWi P2P.

The AC164134 PICTail Plus 2.4GHz RF card includes the Microchip MRF24J40MA transceiver module. The MRF24J40MA is an agency certified module with an integrated PCB antenna mounted on a PICTail Plus edge connector board for the Explorer 16 Development environment.

Features (MRF24J40):

- 2.4GHz IEEE 802.15.4 compliant
- Supports MiWi™, MiWi P2P and ZigBee
- In-line/stand-alone encryption
- Automatic MAC retransmit
- 18mA(RX)/22mA(TX)/2μA(Sleep)

Features (MRF24J40MA and MRF24J40MB):

- Microchip's MRF24J40 2.4GHz transceiver
- Integrated PCB antenna
- FCC (U.S.A.), IC (Canada), and ETSI (Europe) certified

BLUETOOTH EVALUATION KIT

The Microchip Bluetooth® Evaluation Kit is an expansion board used for evaluating and adding Bluetooth® wireless technology on 16/32-bit PIC MCUs and dsPIC DSCs. The evaluation kit consists of the Microchip Bluetooth® PICtail™ Plus Daughter Board, and the PIC24FJ256GB110 and PIC32MX795 USB Plug-in Modules, both of which come pre-programmed with the dotstack™ Bluetooth® demonstration Stack and SPP (Serial Protocol Profile). This kit requires an Explorer-16 Development Board to complete the board configuration.

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-DM183036	DM183036	Bluetooth evaluation board supports a wide range of PIC24, dsPIC and PIC32 devices	117.69

SUB-GHZ TRANSCEIVER RADIO AND PICTAIL PLUS DAUGHTER BOARDS

The Industrial, Scientific and Medical (ISM) unlicensed Sub-GHz radio frequency bands are used for many short-range, low data-rate, and low-power wireless applications. Microchip provides stand alone transceivers and receiver products along with our family of rfPIC transmitter with embedded PIC® microcontroller. These radio solutions are ideal for AMR Metering, Consumer Electronics, Home, Business, Industrial Automation, Automotive and Medical applications.

The MRF49XA ia a fully integrated Sub-GHz RF transceiver supporting the 434/868/915MHz ISM frequency band. The MRF49XA supports FSK modulation with FHSS capability is ideal for two-way, short-range wireless applications.

The MRF89XA is a single chip FSK/OOK transceiver capable of operating in the 863-870MHz and 902-928MHz license-free ISM frequency bands, as well as the 950-960MHz frequency band. The low-cost MRF89XA is optimized for very lowpower consumption (3mA in Receiver mode). It incorporates a baseband modem with data rates up to 200kb/s. Data handling features include a 64-byte FIFO, packet handling, automatic CRC generation and data scrambling. Its highly integrated architecture allows for minimum external component count while still maintaining design flexibility.

Each of the MRF49XA PICtail/PICtail Plus Daughter Boards (579-AC164137-1 and 579-AC164137-2) are a demonstration and development daughter board for the MRF49XA ISM Band Sub-GHz RF Transceiver. The daughter board can plug into multiple Microchip Technology demonstration and development boards. For example, for 8-bit microcontroller development using the PIC18 Explorer Board (DM183032) or 16-bit microcontroller development using the Explorer 16 Development Board (DM240001).

NORDIC SEMICONDUCTOR 2.4GHz, Sub-2.4GHz, & Bluetooth ICs

RoHS Compliant This page of product is compliant.

ULTRA LOW POWER 2.4GHZ RF TRANSCIEVER IC

Features:
- On-air compatible in 250kbps and 1Mbps with nRF2401A, nRF2402, nRF24E1 and nRF24E2
- 5V tolerant inputs

Applications:
- PC peripherals
- Gaming
- Sports and fitness
- Consumer electronics

For quantities greater than listed, call for quote.

2.4GHZ RF AUDIO STREAMER ICS

Features:
- Low cost, low power 2.4GHz RF solution for streaming uncompressed CD quality audio
- Embedded custom protocol stack for audio streaming based on Adaptive Frequency Hopping (AFH) for optimal co-existence performance
- I2S interface for direct audio interfacing with an external ADC/DAC

Applications:
- Gaming microphones
- Home karaoke microphones
- Subwoofers

For quantities greater than listed, call for quote.

BLUETOOTH LOW ENERGY

Features:
- Fully qualified Bluetooth® v4.0 low energy Connectivity IC with integrated Radio, Link Layer, and Host stack
- Optimized for Peripheral (Slave) role operation
- Fully integrated, low tolerance 32kHz RC oscillator eliminating the need for external 32kHz crystals
- Simple serial interface (ACI) supporting a range of different external application microcontrollers
- Includes temperature sensor

Applications:
- Mobile phone accessories
- Proximity tags and watches
- Sports, fitness, and healthcare sensors
- PC peripherals
- Consumer electronics (CE) remote controls
- Home and industrial automation

For quantities greater than listed, call for quote.

NXP SEMICONDUCTOR Wireless Solutions

RoHS Compliant **This product is RoHS compliant.**

WIRELESS MICROCONTROLLER

JN5148 Single Chip JenNet, ZigBee PRO and IEEE802.15.4 Solution

The JN5148 is an ultra low power, high performance wireless microcontroller targeted at JenNet and ZigBee PRO networking applications. The device features an enhanced 32-bit RISC processor offering high coding efficiency through variable width instructions, a multistage instruction pipeline and low power operation with programmable clock speeds. It also includes a 2.4GHz IEEE802.15.4 compliant transceiver, 128kB of ROM, 128kB of RAM, and a rich mix of analogue and digital peripherals. The large memory footprint allows the device to run both a network stack (e.g. ZigBee PRO) and an embedded application or in a coprocessor mode. The operating current is below 18mA, allowing operation direct from a coin cell. Enhanced peripherals include low power pulse counters running in sleep mode designed for pulse counting in AMR applications and a unique Time of Flight ranging engine, allowing accurate location services to be implemented on wireless sensor networks. It also includes a 4-wire I2S audio interface, to interface directly to mainstream audio CODECs, as well as conventional MCU peripherals.

Features:
- Single chip integrates transceiver and microcontroller for wireless sensor networks
- Large memory footprint to run ZigBee PRO or JenNet together with an application
- Very low current solution for long battery life
- Highly featured 32-bit RISC CPU for high performance and low power
- System BOM is low in component count and cost
- Extensive user peripherals

Applications:
- Robust and secure low power wireless applications
- ZigBee PRO and JenNet networks
- Smart metering (e.g. AMR)
- Home and commercial building automation
- Location Aware services (e.g. Asset Tracking)
- Industrial systems
- Telemetry
- Remote Control
- Toys and gaming peripherals

For quantities greater than listed, call for quote.

ZIGBEE PRO EVALUATION KIT

Jennic's JN5148-EK010 ZigBee PRO evaluation kit provides a complete environment for the development of ZigBee PRO applications based on the JN5148 wireless microcontroller. The kit contains a complete package of hardware and software, including five wireless sensor nodes, an unrestricted software developer kit (SDK), an example code.

MOUSER STOCK NO.	NXP Part No.	Description	Price Each
771-JN5148EK010596	JN5148-EK010,596	Evaluation Kit for JN5148 family of wireless microcontrollers	691.86

WIRELESS MODULES

The JN5139-xxx-Myy family is a range of surface mount modules that enables users to implement systems using Jennic's own JenNet networking stack or IEEE802.15.4 with minimum time to market and at the lowest cost. They remove the need for expensive and lengthy development of custom RF board designs and test suites. The modules use Jennic's JN5139 wireless microcontroller to provide a comprehensive solution with high radio performance and all RF components are included. All that is required to develop and manufacture wireless control or sensing products is to connect a power supply and peripherals such as switches, actuators and sensors, considerably simplifying product development.

JN5139 Family - Supports ZigBee Network Stacks

PANASONIC Bluetooth Modules and Mesh Networks

Panasonic

Make Your Product Powered by Panasonic

Modules That Exceed Expectations! Panasonic Electronic Components provides powerful, highly flexible, cost effective RF Modules for a wide variety of wireless Personal Area Network (PAN) applications. New extended range products and small footprints combined with network firmware flexibility make Panasonic an industry leader in the development of cutting edge RF Module technology.

BLUETOOTH RF MODULES

Panasonic's unique Easy-To-Use (ETU) series of modules, plug directly into evaluation kits with the added benefit of header connectors that simplify prototype wiring and field trials. Based on IEEE 802.15.1, Bluetooth was developed for the purpose of sending larger amounts of data quickly from computers to PDAs to cell phones or other portable handheld devices. Key features include high data rate, frequency hopping, very small form factor and modest power consumption.

RoHS Compliant

PAN1325A/PAN1315A

Panasonic's new PAN1315 Host Controlled Interface (HCI) Bluetooth RF module brings Texas Instrument's seventh generation Bluetooth core integrated circuit, the CC2560, to an easy to use module format. This module has been designed to be 100% pin compatible with the next generation of Bluetooth Low Energy devices. This unique design feature enables designers to seamlessly transition between Bluetooth Classic and Low Energy modules.

802.15.4 MESH NETWORKS

A wireless mesh network based on the SNAP® (Synapse Network Application Protocol) software stack is instant-on, self-forming, and self-healing. Creating applications to run on the nodes forming the network is fast, efficient, updated over-the-air, and does not require embedded programming skills. In fact, users can administer and manage a SNAP based network without actually having to know anything about the details of wireless networks. This approach makes wireless technology accessible to a much broader range of users, including monitoring and control in consumer, commercial, industrial, and government markets. Uses range from building automation (lighting, security, HVAC) to industrial control and machine communication, medical monitoring, security applications and home automation.

RoHS Compliant

The PAN4561 is a brand new extended range 2.4GHz, ISM, SNAP® software enabled RF module with an industry-leading small footprint size of 35mm x 15mm x 3.5mm!

PAN4555 802.15.4 Short Range Low Power 2.4GHz ISM Band Transceiver

PHOENIX CONTACT Wireless I/O Systems

RoHS Compliant **This product is RoHS compliant.**

900MHZ TRUSTED WIRELESS ETHERNET RADIO

The RAD-ISM-900-EN-utilizes the MOTR-9™ radio platform, a 1W frequency-hopping, spread spectrum transceiver operating in the license-free 902-928MHz ISM band. The MOTR-9 features user configurable over-the-air data rates up to 500kbps with adjustable packet sizes to move data quickly and minimize latency. Like other devices in the RAD-Line product group, the unit supports master, slave and repeater operational modes and has integrated RS-232 and RS-422/485 serial ports allow the incorporation of serial data into an Ethernet network.

Features:
- 1 watt transmit power
- Interference free frequency Hopping Spread Spectrum Technology
- License free 902 - 928MHz ISM Band
- Temperature Range: -40°±60°C
- Programmable via any web browser
- 128/192/256-bit AES encryption

RoHS Compliant

MOUSER STOCK NO.	Phoenix Type	Fig.	Description	Price Each
651-2900016	RAD-ISM-900-EN-BD	A	Trusted Wireless Ethernet Radio (TWE) with MOTR-9 Technology for ethernet and Serial data over a secure radio connection.	1855.38

900MHZ ONE-WAY WIRELESS SYSTEMS

With these unidirectional radio systems it is possible to record and safely transmit an analog and two digital sensor signals. With very simple installation, it is possible to collect signals where cables cannot be laid or can only be laid with great difficulty. In addition to point to point connections, the possibilities also exists of constructing multi-receiver systems. The sets include a receiver, transmitter, and antennas with connecting cable.

Features:
- 1 watt transmit power
- Interference free - Frequency Hopping Spread Sprectrum technology
- Licence free 902 - 928MHz Industrial, Scientific, and Medical (ISM) band
- Class I, Division 2 approved for hazardous area installation (UL, CUL and CSA approved)
- Temperature Range: -40°C to +70°C
- Easy to use, wire in - wire out, no setup or programming
- Range: 600 - 1000ft in plant, no line of sight

RoHS Compliant

MOUSER STOCK NO.	Phoenix Type	Fig.	Description	Price Each
651-2867102	RAD-ISM-900-SET-UD-ANT	B	24V DC set with one 4-20mA and 2 discrete signals. DIN rail mount	1495.99

651-2867034	RAD-ISM-900-SET-DC-UD	C	12-30V DC set for one 4-20mA and 2 discrete signals. Weatherproof NEMA 4X conduit mount transmitter, DIN rail mount receiver.	1495.99
651-2867047	RAD-ISM-900-RX	-	Spare Receiver to expand point to multipoint connections. DIN Rail mount	745.79

900MHZ TWO-WAY WIRELESS SYSTEMS WITH EXPANDABLE I/O OPTIONS

Besides duplex operation, the bi-directional radio system offers the possibility of lining up additional moudules for recording and outputting analog and digital signals. This unique design gives the user flexibility to add on multiple channels of I/O to the pared transceivers in combinations. They are ideal for moving numerous signals within high interference environments without costly cable and conduit runs.
The sets include a receiver, transmitter, and antennas with connecting cable.

Features:
- 1 watt transmit power
- Interference free - Frequency Hopping Spread Sprectrum technology
- Licence free 902 - 928MHz Industrial, Scientific, and Medical (ISM) band
- Range: 600 - 1000ft in plant, no line of sight
- Class I, Division 2 approved for hazardous area installation (UL, CUL and CSA approved)
- Up to 8 expandable I/O modules per transceiver on common power
- Max 33 analog or 66 discrete signals in one direction
- Dry contact LINK diagnostic output
- Temperature Range: -40°C to +70°C

RoHS Compliant

MOUSER STOCK NO.	Phoenix Type	Fig.	Description	Price Each
651-2867270	RAD-ISM-900-SET-BD-BUS-ANT	B	9-30V DC set with one 4-20mA in/out and 2 discrete signals in/out with bus connection for power and communicatrion. DIN Rail mount.	2823.20

2.4 GHZ POINT TO MULTIPOINT BLUETOOTH WIRELESS DATA PSI BLUETOOTH CONVERTER

The PSI Bluetooth converter provides a quick and easy wireless connection between serial interfaces of RS-232, RS-422, and RS-485 2-wire standard. Data connections can be established to third party devices or the PSI Bluetooth RS-232 adapter. This module has been specifically designed to meet the requirements of industrial enviornments and supports operation without software drivers thanks to its full integrated protocol stacks.

Features:
- Din Rail Mount
- Supply of 24V DA or AC
- Transmission speeds of up to 187.5kbps
- Integrated Bluetooth path diagnostics
- Class I, Division 2 approved for hazardous area installation (UL, CUL and CSA approved)
- Can be set to V.24(RS-232), RS-422, or RS-485
- Supports all popular 10/11-bit UART data formats
- Bluetooth access protected by password, fixed device pairing or device access list
- Scalable transmission power (-28dBm - +20dBm)

RoHS Compliant

MOUSER STOCK NO.	Phoenix Type	Fig.	Description	Price Each
651-2708517	PSI-WL-RS232-RS485/BT	E	Bluetooth converter for wireless RS 232, RS 422, and RS 485, MCX connection for external antenna	477.42

FL COM SERVER - SERIAL RS-232 DEVICE SERVER FOR 10/100BASE-T(X)

The FL COM SERVER converts a serial RS-232 interface to Ethernet. It allows easy integration of RS-232 devices into 10/100Base-T(X) networks.

Features:
- Supports all common Network Protocols
- Diagnostic display
- Integrated surge voltage protection
- 10/100 Base T(X) Auto Detect
- Din Rail Mount
- 22.5 Housing width

RoHS Compliant

REDPINE SIGNALS Wireless Solutions

REDPINE SIGNALS® DRIVING WIRELESS CONVERGENCE®

Redpine technology spans the complete end-to-end wireless solution and includes an extensive patent portfolio on OFDM, MIMO, embedded processor architectures and low-power techniques. The company's offerings include both the hardware and the software as differentiated sub-systems to provide flexibility and ease of integration to the system integrator. This single-stop approach enables Redpine to deliver an optimal wireless solution to meet customer's requirements at an optimal price point.

N-LINK™ SERIES

The nLink™ family of IEEE802.11n single stream modules designed to provide high throughputs at ultra low power consumption. The modules have an integrated MAC, baseband processor, RF transceiver and power amplifier. An integrated processor allows for providing a rich set of peripherals with minimal load on the host processor. The small form factor enables the customer to use these modules in handhelds and other portable consumer electronic products. The modules allow for interfacing with the host over SDIO and SPI.

Features:

- 802.11n features for high throughput and extended range
- Host interface through SDIO and SPI
- Bluetooth coexistence
- Ultra low power operation
- Complete WLAN software along with host driver for Windows Embedded CE, Windows Mobile, Windows XP, and Linux OS
- Single supply 3.1 to 3.6V operation

For quantities greater than listed, call for quote.

CONNECT-IO-N™ SERIES

The Connect-io-n™ products are highly integrated single stream 802.11n modules designed to provide future-proof 'plug-and-play' Wi-Fi connectivity to embedded devices. They all feature standard UART or SPI interfaces to a host microcontroller and include all the functionality required in a WLAN client. They also include a full networking stack running on the embedded processor within Redpine's chipset, enabling network connectivity into numerous embedded systems with no additional burden on their microcontrollers. The Connect-io-n series includes variants offering single or dual-band operation and choice of form-factor.

Features:

- Compliant to 802.11b/g and single stream 802.11n
- 2.4/5GHz, 802.11n RF transceiver with power amplifier
- Highly integrated 2.4GHz/5GHz transceiver with direct conversion architecture
- Self-contained serial-to-wireless functionality - requires very little host processor bandwidth
- WPA/WPA2-PSK, WEP and TKIP modes of security
- Host Interface: UART and SPI, selectable through a hardware pin
- Integrated TCP/IP stack with option to bypass in SPI mode through software configuratio
- Ultra low power operation with power save modes
- Single supply 3.1 to 3.6V operation
- 65Mbps Data Rates

Specifications:

- Network Standard Support: IEEE 802.11b/g/n
- Data Rates: 802.11n: 6.5, 13, 19.5, 26, 39, 52, 58.5, 65Mbps
  802.11g: 6, 9, 12, 18, 24, 36, 48, 54Mbps
  802.11b: 1, 2, 5.5, 11Mbps
- Modulation Techniques: OFDM with BPSK, QPSK, 16-QAM, and 64-QAM 802.11b with CCK and DSSS
- Network Protocols: TCP, UDP, IPv4, ARP, ICMP, DHCP Client
- Supported UART baud rates: Supports standard baud rates from 9600bps to 3.6Mbps
- Operating Temperature: Industrial Grade -40ºC to +85ºC

WISECONNECT™ SERIES

WiSeConnect™ modules are fully integrated 802.11 a/b/g/n modules with advanced features for M2M, industrial, medical, enterprise and IOT (Internet of Things) applications. Powered with WiFi-Direct™, it can directly communicate with smart-phones and tablet PCs without an Access Point based infrastructure. Integrated with Enterprise Security as well as TCP/IP and WLAN stacks, it can be designed quickly into any Host platform for secure and standards based Wi-Fi connectivity in a variety of environments.

Features:

- 802.11a/b/g/n, operation over 2.4 and 5Ghz bands
- WiFi-Direct™, Access Point and Client mode
- Enterprise Security - EAP-TLS, EAP-TTLS, EAP-FAST, PEAP-MSHCAP-V2
- Integrated TCP/IP stack, HTTP Server/Client, DHCP
- Host interface through UART and SPI
- Integrated antenna and uFL connector for external antenna
- Ultra low power operation with power save modes

Specifications:

- Network Standard Support: IEEE 802.11b/g/n
- Data Rates: 802.11n: 6.5, 13, 19.5, 26, 39, 52, 58.5, 65 Mbps
  802.11g: 6, 9, 12, 18, 24, 36, 48, 54 Mbps

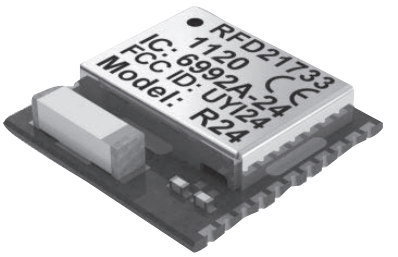
RF DIGITAL Wireless Modules and Kits

RF DIGITAL
WWW.RFDIGITAL.COM

RoHS Compliant **This product is RoHS compliant.**

RF Digital manufactures an extensive line of fully integrated, low cost, high quality, high performance, configurable Wireless RF Transmitter, Receiver & Transceiver Modules, suitable for nearly every type of application.

2.4 GHZ SERIAL TRANSCEIVERS



Complete Compliance Approved & Certified, READY-TO-USE, 2.4 GHz wireless solution with built-in RFDP8 interference-tolerant user application protocol. Includes RFID, 32 Bit ESN, Logic Switch Transmitter / Receiver, 9600-8N1 Serial UART Transceiver and many easy-to-use addressable network modes. No development required at all, no RF layout, no code writing, all features are built-in. Be up and running with a wireless solution in minutes.

The RFDANT's Revolutionary Patent Pending design enables it to reach distances of 2,000 feet, while still being an Ultra Low Power device. This huge range is reached without any power amplifiers at all, it's unique design is responsible for it reaching these great distances without any extra battery drain or extra power. The RFDANT makes it easy for you to satisfy GREEN directives due to its unique design and ultra high performance. The RFDANT fits in the palm of your hand and looks like an Antenna, but of course it is much more since it is the whole radio and processing system in one unit. There are no RF cables at all, simply connect +V, GND, and a few logic signal wires based on your application and you are done. There is no need for PCB layout either. You can directly connect to the 11 pin, 8 inch cable extending out of the bottom of the RFDANT.

Features:

- Runs on a single coin cell for years
- WiFi interference tolerant
- Heavy 2.4GHz noise and interference tolerant
- No external parts required
- No RF layout required
- Easy and ready-to-use, hand-held, eval and application boards available
- Ultra small 15mm x 15mm footprint
- Fully contained, truly finished, ready to use module
- CE/ETSI/IC & FCC Certified and Approved
- Typical range: 500ft (150m)
- 2uA ultra low power modes
- Only 14mA current consumption at 0dbm TX and 17mA at RX

RFM 802.15.4, FHSS and 802.11

RFM offers a complete line of spread spectrum wireless products for industrial and factory applications. Using both patented frequency hopping technology and open-standard direct sequence technologies, these products fall in two categories: ready-to-use devices for systems integration, and design-in OEM modules for custom applications.

802.15.4 ZIGBEE PRO MODULES

RFM's ZPM3750 module is a standards-based wireless transceiver designed for Smart Energy and other short range wireless markets that require low power consumption, high transmit power (20dBm typical) and high receiver sensitivity (-103dBm). The ZPM3750 is based upon the IEEE 802.15.4 wireless network specification and includes the ZigBee PRO stack. The module can be used to develop applications supporting the ZigBee PRO Smart Energy and Home Automation application profiles. The ZPM3750 module operates in the 2.4GHz unlicensed ISM frequency band for worldwide deployment.

Contains:

- (2) ZPM3570 development boards
- (2) USB and 2 serial cables
- 9V batteries and wall-mount power supplies
- Antennas and RF cables
- Program CD with software and manuals
- Quick Start Guide

For quantities greater than listed, call for quote.

802.15.4 PRODUCTS

RFM's LPR2430 Series of 802.15.4 2.4GHz modules is comprised of the low-power LPR2430/LPR2430A and the extended range LPR2430ER/LPR2430ERA. The RFM LPR2430 Series modules are easy to integrate and provide robust wireless communications in applications where meshing is not needed or desired.

TRANSCEIVER MODULES

The DNT90 FHSS transceiver module provides a low-cost, versatile solution for wireless data communications in the 900MHz ISM band. The DNT90 RF output power can be set at 40 or 158mW. The DNT90 receiver input is protected by low-loss SAW filter, providing an excellent combination of receiver sensitivity and out-of-band interference rejection. The DNT90 module includes analog, digital and serial I/O, providing the flexibility to serve applications ranging from cable replacements to sensor networks. The DNT90 transceiver module is easy to integrate and provides reliable wireless communications up to 5 miles in line-of-sight installations.

For quantities greater than listed, call for quote.

802.11 PRODUCTS

RFM's WSN802G is a 2.4GHz IEEE 802.11g Radio Transceiver Module that enables OEMs to build low-power wireless local area networking (WLAN) and sensor monitoring solutions for the global market. The WSN802G delivers an exceptionally low power profile and long battery life capabilities in a fully functional, certified radio module that is easily interfaced to existing 802.11. b/g infrastructure for a wide variety of sensor monitoring and WLAN applications.

RFM Short Range Radios and RFICs

Products may be RoHS compliant. Check mouser.com for RoHS status.

VIRTUAL WIRE RADIO RF MODULES

Features:

- Integrated RF IC with quartz SAW filtering and frequency control components in a single hybrid
- High Data rates for data, control and digitized voice transmissions
- Stable, sensitive receiver technology with excellent "channel capture" performance
- Ultra Low current consumption for operation from small 3V batteries
- Very small, low-profile package to make "watch size" applications practical
- Rugged, self-shielding, metal-ceramic hybrid package
- Wide operating temperature range for industrial and outdoor applications
- Easy to optimize for a wide range of application requirements
- Easy certification to stringent short-range radio regulatory requirements
- No external RF filters, IF filters, resonators or crystals are required

For quantities greater than listed, call for quote.

RFICS

Features:

- Integrated PLL, IF, Baseband Circuitry
- Support for Multiple Channels
- Wide Frequency range
- Wide operating supply voltage
- Frequency Hopping Spread Spectrum capability
- Low current consumption
- Very few external components required
- Small size plastic packages

For quantities greater than listed, call for quote.

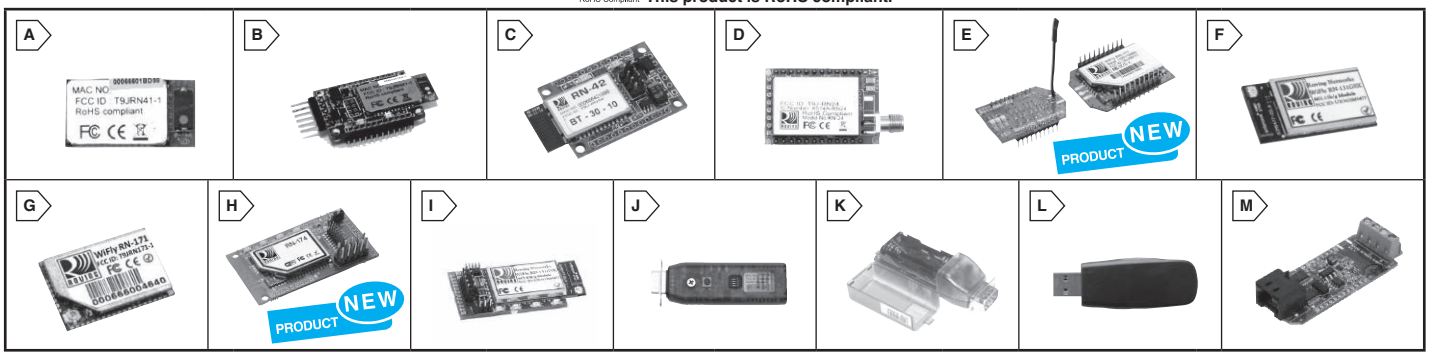
ROVING NETWORKS Adapters and Modules

ROVING networks WIRELESS FOR LESS

RoHS Compliant **This product is RoHS compliant.**



ROVING NETWORKS EMBEDDED MODULES AND ADAPTERS

Bluetooth Modules

The RN-41 Class 1 module is available with on board chip antenna and is both FCC/CE certified and bluetooth SIG registered.
The RN-24 super module has voltage regulation, status LEDs, thru hole pins/headers, and chip (S) or SMA (E) Antenna options.

Features:

- Postage stamp sized modules, 15mm x 22mm
- Castellated SMT pads for easy and reliable PCB mounting
- Bluetooth v1.1, 1.2, and 2.0/EDR compliant
- On board ceramic ANT(S) and external SMA ANT(E) versions
- On board bluetooth stacks/profiles make integration simple (no host code)
- Low power consumption, 1mA standby, 25mA connected
- Sustained data performance of >100kbps bi-directional
- Advanced features such as auto pairing and auto connect master
- Fully configurable with simple AT style commands locally over UART and remotely over Bluetooth
- Complete embedded solution, simplest mode requires only 4-pin connection (TX, RX, VCC, GND)

For quantities greater than listed, call for quote.

WiFly™ 802.11b/g GSX Embedded Module

The new WiFly GSX Module is a stand alone, embedded wireless 802.11b/g WiFi module that uses 100m WATT when active and 10m WATT in sleep mode. This GSX Module incorporates a 2.4GHz radio, processor, TCP/IP stack, real-time clock, crypto accelerator, power management and analog sensor interfaces. Because of its small form factor and extremely low power consumption, the RN-131G is perfect for mobile wireless applications such as asset monitoring, GPS tracking and battery sensors. The RN-134 Super Module is built upon Roving Networks RN-131 WiFly GSX module. The RN-134 is a field ready, WiFi certified 802.11b/g solution.

For quantities greater than listed, call for quote.

SI100X/1X SINGLE CHIP WIRELESS MCU

The Si100x/1x family is the lowest power single chip MCU with integrated sub-GHz RF transceiver. It has been designed to address the specific requirements of low power embedded systems requiring a RF bi-directional communication link such as metering, in-home utility monitoring, wireless security panels, wireless sensors, home & building automation, and access control.

Specifications:
- Peak MIPS: 25
- Communications: I2C, SPI, UART
- Timers (16-bit): 4
- QFN-42 Package Style

For quantities greater than listed, call for quote.

SKYETEK Developer Kits and Modules

skyetek

SKYEMODULE™ DEVELOPER KITS

The SkyeTek™ Developer Kit is a complete RFID development tool kit that enables quick demonstrations, proof-of-concepts, and trials when integrating RFID into numerous applications and products.
The SkyeTek™ Developer Kit includes all the components needed to get started, including: reader modules, sample tags, RFID antennas, connectors, demo software, device drivers, design guides, application notes, and more.

SKYEMODULE™ EMBEDDED RFID READERS

SkyeTek's SkyeModules are space, cost and power efficient RFID reader modules for highly performing embedded RFID applications. SkyeTek's Advanced Universal Reader Architecture (AURA)™ and robust software drive powerful functionality into an extremely small form factor. This functionality allows a diverse range of companies, primarily OEMs and systems integrators, to add RFID as a feature to their products, services and applications.

SKYEMODULE™ MULTI-PLEXER ACCESSORIES

SkyeTek offers the SkyePlus™ MXH and MXU antenna multiplexers to expand the reader's capability by adding up to 8 antennas.
The addition of multiplexers can help significantly reduce overall solution cost and are best used in applications that require multiple read-points.

For quantities greater than listed, call for quote.

ZIGBEE® CHIPSET

- Zigbee Complies with EN 300 220 and FCC CFR 47. Part 15
- IEEE 802.15.4 Compliant

TEXAS INSTRUMENTS Wireless Modules

RoHS Compliant **This product is RoHS compliant.**

For a complete listing of Texas Instruments Low Power Wireless Development Tools visit **mouser.com/ti**

- Evaluate the SmartRF®04 products. Right out of the box, the user can do range testing (PER testing) and transfer data from one PC to another using the SmartRF®04DK. This enables the user to quickly find out how well the SmartRF®04 products fit the intended application. A number of demonstration applications serve to highlight the innovative features of the SmartRF®04 ICs.
- Perform RF measurements. Using SmartRF® Studio, the user can configure the radio ICs with parameters that suit the intended application and easily measure sensitivity, output power and other RF parameters.

The CC2530ZNP Mini Development Kit is designed for engineers who want to get familiar with the ZigBee Network Processor concept without having to port a lot of software to get up and running. The ZigBee Network Processor allows adding ZigBee interface to any application using a simple serial interface. The development kit comes with three target boards which allow users to set up a small ZigBee network. Two boards can be mobile using two AAA batteries provided in the kit sensor boards include accelerometer, temperature sensor, and light sensor that can be used in conjunction with led lights and push buttons to develop simple demo applications.

SimpleLink™ CC3000 Wi-Fi is a self-contained wireless solution that simplifies the process of implementing Internet connectivity. SimpleLink Wi-Fi minimizes host microcontroller (MCU) software requirements making it the ideal solution for embedded applications using any low-cost/low-power MCU. The SimpleLink CC3000 Wi-Fi solution is provided as a module to reduce development time, lower manufacturing costs, save board space, ease certification, and minimize RF expertise required. Additionally, it is provided as a complete platform solution including software drivers, sample applications, API guide, user documentation and a world-class support community.

The eZ430-RF2500 is a complete wireless development tool for the MSP430 and CC2500 that includes all the hardware and software required to develop an entire wireless project with the MSP430 in a convenient USB stick. The tool includes a USB-powered emulator to program and debug your application in-system and two 2.4-GHz wireless target boards featuring the highly integrated MSP430F2274 ultra-low-power MCU.

The eZ430-RF2500-SEH is a complete Solar Energy Harvesting development kit to help create a perpetually powered wireless sensor network based on the ultra-low-power MSP430 microcontroller. The Solar Energy Harvester module includes a high-efficiency solar (2.25x2.25") panel optimized for operating indoors under low-intensity fluorescent lights, which provides enough power to run a wireless sensor application with no additional batteries. Inputs are also available for external energy harvesters such as thermal, piezoelectric, or another solar panel.

CC85XXDK will let the user fully evaluate PurePath Wireless technology and the CC8520 for wireless audio applications. Audio interfaces available with the kit include S/PDIF optical + coax input/output, line input/output, headphone output and microphone input. A TLV320AIC3101 audio codec is mounted on the PurePath Wireless Audio Evaluation Board, which also has connectors compatible with other TI Codecs. CC85XXDK works with PurePath Wireless Configurator PC tool which helps designers configure and test PurePath Wireless Audio devices.

TOUMAZ Low Power Wireless System on Chip

RoHS Compliant **This product is RoHS compliant.**

The TELRAN TZ1053 is an easy to use single chip radio for point to point and star wireless sensor networks. With an exceptional ultra low power consumption of ~3mW in continuous Tx/Rx and the ability to operate from a single 1V button cell, it leads its class as a low power sub 1GHz radio transceiver

Features:

- ISM band Radio:
  EU: 862-870MHz, USA: 902-928MHz, Japan: 950-956MHz
- Bidirectional secure wireless transceiver with AES 128 encryption in hardware
- Single battery cell: supply 1.08V – 1.5V
- Peak Tx/Rx current 3.3mA/3.1mA
- NSP protocol giving robust and easy to use radio network
- Point to point and star network supported
- Raw data rate 50kbps
- Range:10m to 100m los
  (100m with 0dBi antenna, >10m with chip antenna on TDK)
- Simple configuration through system commands via UART/SPI
  No compilers needed
- Over the Air (OTA) configuration and programming of sensor node
- Local processing of compact algorithms (up to 2k byte) on sensor node
- Interfaces – GPIO x5/SPI/UART/I2C compatible
- 3V tolerant digital I/Os
- Unique 48-bit fuse ID, 128 bit customer field
- Temperature range -40°C to +85°C
- 32-pin VQFN 5x5x0.9mm

Applications:

- Remote control for consumer electronics
- Environmental monitoring
- Smart metering
- Health and Lifestyle monitoring
- Wireless keyboard/mouse/PC peripherals
- Home, car and personal security
- Toy control
- Remote keyless entry
- Hand held wireless terminals
- Professional sports monitoring
- Physical activity monitoring

DEVELOPMENT KITS

The TELRAN development kit (TDK) comprises a TELRAN USB basestation, TELRAN RF module and a detachable sensor development board with 3 axis accelerometer and 16 way IDC port replicator/expansion connector including a UMI pin-out compatible subset (for smart metering applications). The communication range can easily be extended by using external LNA and PA circuits and a choice of on-board or external antenna.

TRIQUINT SEMICONDUCTOR Evaluation Boards

TriQuint SEMICONDUCTOR

RoHS Compliant **This product is RoHS compliant.**

WJ Communications, Inc. is a leading provider of (RF) solutions serving multiple markets targeting wireless communications, RF identification (RFID), broadband cable, defense, and homeland security. WJ addresses the RF challenges in these multiple markets with its highly reliable amplifiers, mixers, RF integrated circuits (RFICs), RFID reader modules, chipsets, and multi-chip (MCM) modules.

WIRELESS PRODUCTS

W2SW0001 802.11 Module

The W2SW0001 System-in-Package (SiP) is a complete IEEE 802.11b/g radio solution. Unlike a typical module, the W2SW0001 includes all radio components, clocking and regulation for a complete WLAN radio subsystem. Integration of the W2SW0001 is a simple process of connecting our SiP to your product's interfaces, antenna port and single 3.3vdc power supply. Wi2Wi has developed SW drivers available for several processors and operating systems and other custom drivers can also be developed under a services agreement. Please check with Wi2Wi, Inc. Sales Representatives regarding pricing for SW Drivers.

Features:

- Small form factor SiP solution, 9.5mm x 9.5mm x 1.4mm, 81 Pin LGA, .75mm pitch
- Low power consumption and power save mode
- Full support for 802.11 e(QOS) and 802.11i (Security)
- Integrated RF-friendly LDO for single rail operation
- Integrated PA, EEPROM, Balun, and clocking
- Optimized front-end design for receive sensitivity
- Full driver support for popular OSs for processor family, Linux/WinCE support for many other ARM-9 based processors. Please check with Wi2Wi, Inc. Sales Representatives for pricing on SW Drivers
- Includes both an SDIO and GSPI interface

RoHS Compliant

For quantities greater than listed, call for quote.

WiFi and Bluetooth Modules

The W2CBW00x Series System-in-Package (SiP) is a complete IEEE 802.11b/g +Bluetooth™ radio solution. The W2CBW00x series includes all radio components, clocking and regulation for a complete WLAN radio subsystem. Also included in our solution is Wi2Wi's coexistence solution for simultaneous operation of Wi-Fi™ and Bluetooth™ Radios. By selecting the W2CBW00x series, a developer can significantly reduce their development costs and the technical risks associated with coexistence.

Features:

- Small form factor SiP solution
- Low power consumption and power save mode
- Full support for 802.11 e(QOS) and 802.11i (Security)
- Integrated RF-friendly LDO for single rail operation
- Integrated PA, EEPROM, Balun, and clocking
- Optimized front-end design for receive sensitivity, plus full coexistence support
- Full driver support for popular OSs for the Marvell PXA processor family, Linux support for many other ARM-9 based processors. Please check with Wi2Wi, Inc. Sales Representatives for pricing on SW Drivers.
- Includes both an SDIO and a GSPI interface for Wi-Fi, and a UBS and UART interface for BT

NAVIGATION PRODUCTS

W2SG0084 GPS Module

This specification provides a general guideline on the performance and the integration of the Wi2Wi Inc. 48 Channel GPS Receiver Module Solution. The new solder-down module, based on SiRF Star IV Chipset is a drop in replacement for the W2SG0004, is targeted to assist companies to easily integrate GPS functionally into their products. This is accomplished by reducing their development times and cost by using a complete, small form factor, low power, ready to integrate GPS Receiver System Solution.

Features:

- Pin Compatible Replacement for W2SG0004
- GPS technology based upon by the CSR/SiRF™ SiRFStar IV™
- Compact design for easy integration: 11.2mm x 12mm x 2.5mm
- Ultra-low power consumption
- High sensitivity navigation engine (PVT) tracks as low as -163dBm
- 50Ω Antenna Launch
- 48 verification channel GPS receiver
- SBAS (WAAS or ENGOS) support

RoHS Compliant

For quantities greater than listed, call for quote.

MULTI-RADIO

The W2CBWG01 is a fully integrated 802.11b/g WLAN, Bluetooth™ and GPS solutions designed specifically for ultra-mobile portable electronics. It has been integrated with Intel's Atom processor based Menlow platform for UMPC/MID market.

Features:

- Uses half height Mini-Card form factor
- Certified Bluetooth™ and Wi-Fi™ radio solution with coexistence
- Integrated ultra low power consumption GPS
- INTEL McCaslin platform I/O Pin Definition

Interfaces:

- SDIO 1.1 interface for 802.11 Wi-Fi™
- USB 2.0 Interface for Bluetooth™
- UART NMEA for GPS
- 50Ω Antenna Launch for each Radio
- Please check with Wi2Wi, Inc. Sales Representatives for pricing on SW Drivers.

RoHS Compliant

For quantities greater than listed, call for quote.

WIZNET Network Internet and TCP/IP MCUs

INTERNET MCUS

Features:

- 10BaseT/100BaseTX Ethernet PHY embedded
- Power down mode supported for saving power consumption
- Hardwired TCP/IP Protocols: TCP, UDP, ICMP, IPv4 ARP, IGMP, PPPoE, Ethernet
- Auto Negotiation (Full-duplex and half duplex), Auto MDI/MDIX
- ADSL connection with PPPoE Protocol with PAP/CHAP Authentication mode support
- 8 independent sockets which are running simultaneously
- Full-duplex UART
- Programmable Watchdog Timer

PRODUCT NEW

MOUSER STOCK NO.	WIZnet Part No.	MCU Architecture	Package	SRAM (KB)	Code Memory (KB)	Timers/ Counters	Clock Frequency Max. (MHz)	Operating Supply Voltage (V)	Price Each

MICROCHIP XLP ENERGY HARVESTING KIT

The XLP 16-bit Energy Harvesting Development Kit is a true development platform for realizing energy harvesting applications. It is based on Microchip's PIC® MCUs with nanoWatt XLP Technology and Cymbet's EVAL-08 Solar Energy Harvester.

Included in the Evaluation Kit:

- Cymbet Eval-08 Solar Energy Harvesting Board and Cable
- XLP 16-bit Development Board
- PIC24F16KA102 Microcontroller
- PICkit 3 Programmer/Debugger
- USB Cables
- XLP 16-bit Energy Harvesting Development Kit user guide

CYMBET CORPORATION — ENERGY HARVESTING KITS AND MODULES

The EnerChip EH CBC5300 is a self-contained Energy Harvesting power module in a 24-pin DIP configuration. The CBC5300 module is designed to accept a wide range of energy transducer inputs, store the harvested power, and deliver managed power to the target system. The purpose of this module is to enable system designers to quickly develop Energy Harvesting applications.

TEXAS INSTRUMENTS — EZ430-RF2500-SEH DEVELOPMENT TOOL

The eZ430-RF2500 is a complete wireless development tool for the MSP430 and CC2500 that includes all the hardware and software required to develop an entire wireless project with the MSP430 in a convenient USB stick. The tool includes a USB-powered emulator to program and debug your application in-system and two 2.4-GHz wireless target boards featuring the highly integrated MSP430F2274 ultra-low-power MCU.

micropelt TE POWER-MOTE THERMAL ENERGY HARVESTER

Features:

- Eliminate battery replacement
- Operates from waste heat or cold
- Starts operating from a low delta-T
- Output Supply: 2.4V
- Software for thermal/power analysis and temperature monitoring
- Operating Temp (Max): Hot Side: 105, Ambient Air: 85

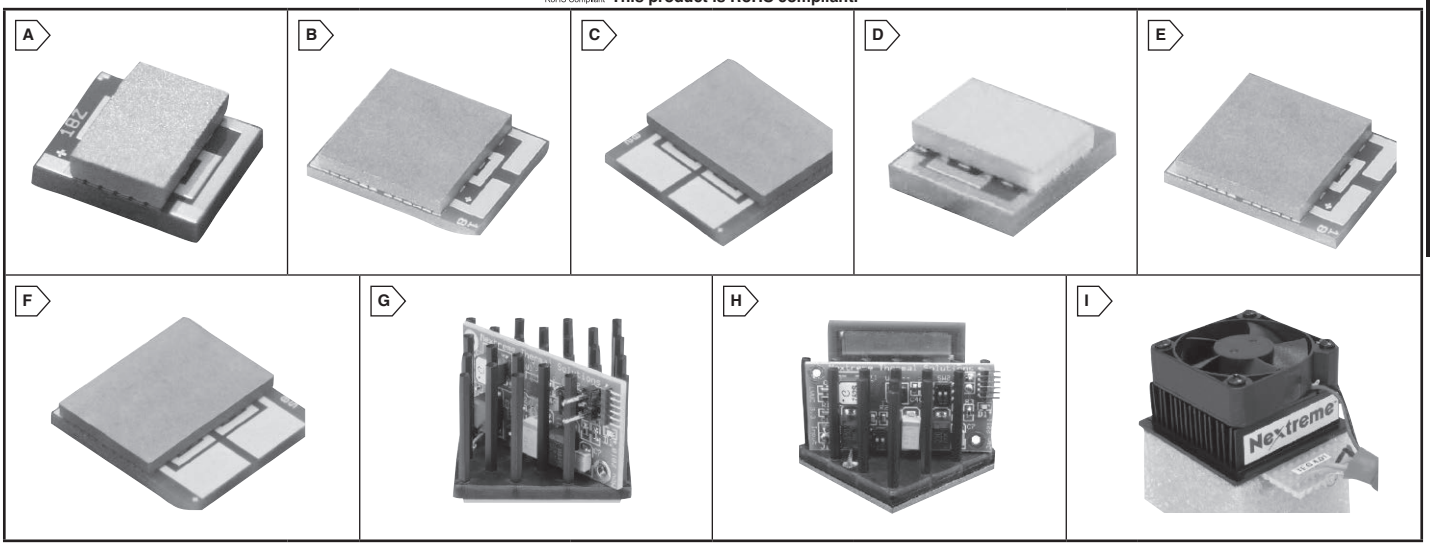
Nextreme THERMAL SOLUTIONS



THERMOELECTRIC COOLING

Nextreme HV Series Thermoelectric Coolers are part of a new line of thin-film, high voltageand high heat pumping thermoelectric coolers (TECs) that are designed for the cooling andtemperature control of photonics and optoelectronic devices. Nextreme has developed theHV Series Thermoelectric Coolers to address electronics cooling applications with high heat flux and larger heat pumping requirements. The HV Series removes unique voltage and current requirements as barriers to the integration of thin-film thermoelectrics into electronics.

The size, input power requirements, and heat pumping capability of the OptoCooler™ HV14make it particularly well suited for devices such as laser diodes and high brightness LEDs.

Applications:
- Semiconductor optical amplifiers (SOA)
- Laser Diodes
- High Brightness LEDs
- VCSELs
- Photo-detectors

RoHS Compliant

For quantities greater than listed, call for quote.

THERMOELECTRIC POWER GENERATION

Nextreme eTEG™ HV Thermoelectric Power Generators are the next generation of high voltage, thinfilm thermoelectric generators developed to address micro-powerapplications. The Nextreme eTEG™ HV Thermoelectric Power Generators can convert waste heat from thermal sources into usable electricity as an energy source. Manufactured using semiconductor fabrication techniques, the eTEG is scalable, cost-effective, and can be utilized in a broad range of markets and applications including automotive, government and aerospace, thermal batteries, medical implants, and wireless sensor networks.

At the core of the eTEG™ module is Nextreme's breakthrough Thermal Copper Pillar Bump, a structure made from thin-film thermoelectric material embedded into flip chip interconnects (in particular, copper pillar solder bumps) used in electronic and optoelectronic packaging. The device generates electricity via the Seebeck Effect, where electricity is produced from a temperature differential applied across the device.

Applications:
- Automotive
- Aerospace
- Thermal batteries
- Medical implants
- Wireless sensor networks

RoHS Compliant

For quantities greater than listed, call for quote.

pandaboard.org PANDABOARD MOBILE DEVELOPMENT PLATFORM

Features:
- Core Logic: OMAP4 applications Processor
- Memory: 1GB DDR2 RAM
- Full Size SD/MMC card port
- 10/100 Ethernet
- USB: (1) USB 2.0 OTG port, (2) USB 2.0 High-speed port
- Interface: (1) General Purpose Expansion Header (I2C, GPMC, USB, MMC, DSS, ETM)
- Camera Expansion Header
- Display Connectors: HDMI v1.3, DVI-D. LCD Expansion
- Audio Connectors: 3.5" In/Out, HDMI audio out
- Wireless Connectivity: 802.11b/g/n (WiLink™ 6.0)
- Debug options: JTAG, UART/RS-232, 1 GPIO button
- Graphics APIs: OpenGL ES v2.0, OpenGL ES v1.1, OpenVGv1.1, and EGL v1.3

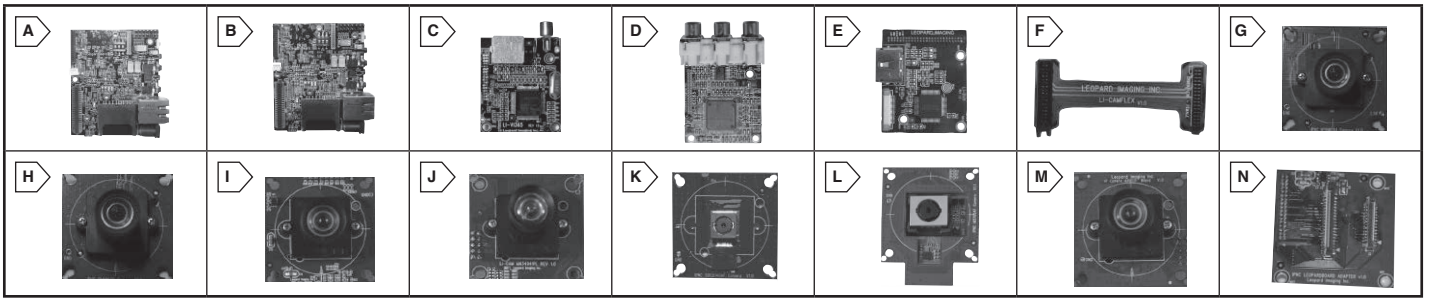
LEOPARD IMAGING DEVELOPMENT BOARDS



Leopardboard 365 Features:
- ARM926EJ-S Core: 216, 270, 300MHz
- Enhanced Video Processing Subsystem with Face Detection module
- Video Processing Subsystem (VPSS)
- HD Video Codecs: H.264, MPEG4, MJPEG, WMV9/VC1, MPEG2
- Audio Codecs: MP3, WMA, AAC, Audio Echo Canceler (AEC)
- 10/100 Ethernet Port
- USB 2.0 (can be used to power the board or as expansion)
- JTAG and Serial ports for debugging
- SD memory card support (also supports SDIO)
- Stereo audio In/Out
- Composite TV/Component HD TV Output, LCD/DVI Interface

Leopardboard 368 Features:
- 432-MHz ARM926EJ-S Clock Rate
- Two Video Image Co-processors (HDVICP, MJCP) Engines
- Supports a Range of Encode, Decode and Video Quality Operations
- Video Processing Subsystem
  - HW Face Detect Engine
  - Resize Engine from 1/16x to 8x
  - 16-Bit Parallel AFE (Analog Front-End) Interface Up to 120MHz
  - 4:2:2 (8-/16-bit) Interface
  - 8-/16-bit YCC and Up to 24-Bit RGB888 Digital Output
  - 3 DACs for HD Analog Video Output
  - Hardware On-Screen Display (OSD)
- Capable of 1080p 30fps H.264 video processing
- Peripherals include EMAC, USB 2.0 OTG, DDR2/NAND, 5 SPIs, 2 UARTs, 2 MMC/SD SDIO, Key Scan
- Pin-to-pin and software compatible with DM365
- 3.3-V and 1.8-V I/O, 1.35-V Core

ARDUINO Development Boards and TinkerKits

Arduino provides open-source electronics prototyping platforms based on flexible, easy-to-use hardware and software. Arduino prototyping platforms are intended for artists, designers, hobbyists, and anyone interested in creating interactive objects or environments. Arduino's prototyping platforms can sense the environment by receiving input from a variety of sensors and can affect their surroundings by controlling lights, motors, and other actuators. Arduino projects can be stand-alone or they can communicate with software running on a computer.

TINKERKITS

TinkerKit simplifies electronic prototyping throughout a wide variety of sensors and actuators soldered on orange-coloured boards you can hook up to the Arduino through the Sensor Shield and three-pin cables. A little signal amplifier helps to stabilize the signals running on the cables, ensuring clean analysis from the sensors even on long distances (1m-5m). TinkerKit has been conceived for school teaching and museum exhibitions, allowing the setup of interactive environments on the run, without using soldering iron or breadboard. TinkerKit is the result of years of award-winning experience in Interaction Design. For a long time it has been developed as an internal tool, improved bit by bit project by project, client by client.

CONNECT ONE WI-REACH™ CLASSIC MOBILE HOTSPOT

Wi-REACH™ Classic is a compact, battery-operated, mobile WiFi hotspot. Wi-REACH™ Classic combines the connectivity of WiFi with the excellent mobile coverage of 3G/4G cellular and transforms an existing 3G USB modem into a personal Wi-Fi cloud that can be shared between up to 10 Wi-Fi devices. Its built-in rechargeable battery delivers four to five hours in normal use and can be recharged using the built-in USB connector.

For quantities greater than listed, call for quote.

CONNECT ONE iCHIP

iChip™ updateable Internet Controller™ chips provide a cost-effective and reliable solution for embedding IP-based communication and other network services in low-cost, non-PC devices running M2M (machine-to-machine) applications. iChip mediates the connection between a host device and the Internet, operating as an embedded device server. It eliminates the need for Internet programming and avoids the hassle, risks and costs of a development project. Instead, you are assured a fast design-in, with predictable timing and budget. Typical design time is one man-month.

For quantities greater than listed, call for quote.

CONNECT ONE EMBEDDED WIFI MODULES

Connect One embedded WLAN modules enable devices to easily connect to IP Networks over an 802.11b/g Wireless LAN with no driver development or WiFi certifications. All modules include the Connect One iChip™, complete with full TCP/IP and SSL stacks and an 802.11b/g chipset. Modules have serial, SPI, USB and RMII interfaces. Nano WiReach WiFi is pin-compatiable with the Nano LANReach LAN module. Nano socket iWiFi is pin compatiable with the Nano SocketLAN LAN module. This allows customers to design a simple PCB for either LAN or WiFi connectivity.

For quantities greater than listed, call for quote.

CONNECT ONE EMBEDDED LAN MODULES

Connect One offers a line of secure embedded Ethernet modules that enable devices to easily connect to IP Neetworks over a 10/100Base T Ethernet LAN. Both modules include the iChip™ CO2144 complete with full TCP/IP and SSL stacks and a 10/100Base T Ethernet Phy with RJ45 connector. Nano LANReach is pin-compatiable with the Nano WiReach WiFi module. Nano SocketLAN is pin compatiable with the Nano SocketWiFi WiFi module. This allows customers to design a single PCB for either LAN or WiFi connectivity.

CONNECT ONE SECURE iLAN

Secure iWiFi™ and secute iLAN are serial-to-WiFi and serial-to-LAN device servers that enables installed serial devices to connect via their existing serial port to the internet over a wired or wireless LAN. They include a full TCP/IP stack, SSL, and multiple bundled applications such as email, FTP, web server, etc. Secure iLAN and iWiFi eliminates the need for any hardware modifications to the host device. Simply connect to a serial cable from Secure iLAN or iWiFi RS232 or RS485 connector to your device. Your device is ready to connect to the wired/wireless LAN.

DIGI INTERNATIONAL Embedded Modules

Products may be RoHS compliant. Check mouser.com for RoHS status.

DIGI CONNECT ME® FAMILY WIRED AND WIRELESS EMBEDDED MODULES

The industry's first interchangeable secure wired and wireless embedded modules with plug-and-play functionality and comprehensive development tools make it easy to add embedded web-enabled wired and wireless network connectivity. Based on a unique common platform design approach, the Digi Connect® ME and Digi Connect® Wi-ME embedded modules offer complete "drop-in" integration. This allows you to build future-proof products based on a single design supporting secure wired 10/100Base-T and 802.11b wireless Ethernet connectivity. The family of Digi Connect® embedded modules makes all of this possible without the traditional complexities of hardware and software integration work, and at a fraction of the time and cost required to create custom solutions.

For quantities greater than listed, call for quote.

DIGI CONNECT WI-ME™

The Digi Connect Wi-ME (Wireless Micro Embedded) is a fully customizable and secure 802.11b wireless device server. It is based on the common platform design approach of the Digi Connect family of embedded products, which minimizes design risk and reduces time to market by allowing customers to easily accommodate both wired and wireless network functionality in a single future-proof product design.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Digi Part No.	Fig.	Description	Price Each

DIGI CONNECT WI-WAVE

Built on Digi's own 802.11b/g wireless LAN technology, Digi Connect Wi-Wave is the industry's first off-the-shelf WLAN radio card specifically designed to meet the long-term product availability and specific operating temperature requirements of embedded designs and their extended product life cycles.

DIGI CONNECT EM™

The Digi Connect EM (Embedded Module) device server delivers true Web-enabled device networking that is easy and cost-effective to implement, while being powerful enough to meet future performance needs. Built on leading 32-bit ARM technology using the network-attached NetSilicon NS7520 microprocessor and featuring a wide variety of connectivity options, the Digi Connect EM provides the freedom and flexibility of complete custom product development.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Digi Part No.	Fig.	Description	Price Each 1	Price Each 5

CONNECTCORE 9P 9215

The ConnectCore 9P 9215 module delivers a powerful, secure, and compact network-enabled 150MHz NS9215 processor solution with ARM9 core, a rich set of peripherals and unique interface flexibility. With leading features like an on-chip AES encryption engine, two independent and fully programmable flexible interface modules and Digi's patented dynamic power management options, it is the ideal solution for today's networked embedded applications. ConnectCore Wi-9P 9215 is the industry's first 802.11a/b/g embedded core module for secure wireless networking and integrated application processing. The ConnectCore Wi-9P 9215 is pre-certified for 802.11a/b/g networking by the FCC in North America and other regulatory organizations in Europe and Japan. The ConnectCore Wi-9P 9215 features two Flexible Interface Modules (FIMs) built into Digi's ARM9 microprocessor that allow customers to use application-specific interfaces such as Secure Digital, Controller Area Network (CAN), 1-Wire, additional UARTs and others.

DIGI INTERNATIONAL External Device Servers

Products may be RoHS compliant. Check mouser.com for RoHS status.

DIGI ONE® SP

Efficient RS-232/422/485 serial-to-Ethernet connectivity for applications requiring simple and cost-effective data communications.
- Cost-effective serial-to-Ethernet connectivity
- 1 RS-232/422/485 switch selectable DB-9 serial port
- Compact form factor – only 3.7in. (9.4cm) in length

The Digi One SP device server easily allows any device with a serial port to be connected to Ethernet. The compact design of the Digi One SP delivers cost-effective performance and capability in one of the smallest form factors available. The Digi One SP delivers efficient serial-to-Ethernet connectivity and is ideal for applications where TCP Socket, UDP Socket, or UDP multicast functionality is needed.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Digi Part No.	Description	Price Each
860-70001851	70001851	Digi One SP	175.67
860-70001999	70001999	Digi One SP IA with Din Rail Kit	242.89

DIGI PORTSERVER® TS

Standard multiport RS-232/422/485 serial-to-Ethernet connectivity that is ideal for applications requiring low port count and seamless integration into existing application.
- Standard, reliable serial-to-Ethernet connectivity
- 1/2/4 ports; RS-232 RJ-45 serial
- 9-30VDC power supply
- Easy configuration using installation CD

PortServer TS delivers standard serial-to-Ethernet connectivity simply and reliably. It easily addresses the growing need to connect individual devices to the network over industry standard Ethernet in many applications.
PortServer TS is ideal for applications requiring COM ports or where TCP/UDP Sockets, or UDP multicast functionality is required. It includes Digi's patented RealPort® COM port redirector technology which makes it possible to establish a connection between the host and networked serial device by creating a local COM or TTY port on the host computer, allowing existing software applications to work without modification.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Digi Part No.	Description	Price Each
860-70002041	70002041	Digi PortServer TS 1 (1 Port)	324.21

DIGI PORTSERVER® TS W MEI

Universal, high-performance RS-232/422/485 serial-to-wireless connectivity. Advanced features include WEP (64- and 128-bit), SSH, easy management and many more.
- Easily connect serial devices to an 802.11b wireless Ethernet network
- Switch selectable RS-232/422/485 serial RJ-45
- WEP encryption (64-/128-bit)
- 1/2/4 port models available

The PortServer TS W MEI family of device servers makes it easy to network-enable serial devices to a wireless 802.11b infrastructure. Users will appreciate the new external antenna and hidden wireless card offered by the versatile one-, two-, and four-port solutions.
PortServer TS W MEI also delivers easy installation through an auto-run wizard on the CD for Microsoft® and UNIX® platforms, RS-232/422/485 serial ports for connectivity to almost any serial interface, and many advanced networking features.

For quantities greater than listed, call for quote.

860-70001954	70001954	Digi PortServer TS 1W MEI (1 Port)	771.47

DIGI ONE® IA

The Digi One IA device server delivers easy and reliable serial-to-Ethernet and Modbus-to-Modbus/TCP connectivity solutions for industrial automation applications
- Switch selectable RS-232/422/485 for use with virtually any device with a serial port
- Extended input voltage of 9-30VDC with screw terminal connections
- 32ºF to 140ºF (0ºC to 60ºC) operating temperature to meet the demands of the factory floor
- An industrial strength, ergonomic enclosure designed to mount vertically on a standard 35mm DIN rail, saving valuable cabinet space
- Industry-leading low latency to meet the strict data throughput requirements for CNC/DNC equipment and other applications

For quantities greater than listed, call for quote.

860-70001862	70001862	Digi One IA	389.48

DIGI CONNECT® WI-SP

The industry's first secure 802.11b wireless device server delivers leading network-to-serial connectivity and strong WPA2/802.11i security.
- Compact design with integrated mounting tabs
- Switch selectable RS-232/422/485 interface
- Enterprise-class WPA2/802.11i wireless security
- Product integration and customization flexibility

The Digi Connect Wi-SP is the industry's first wireless device server providing enterprise-class wireless security through a complete set of strong encryption and authentication services, which are compliant with the WPA2 and 802.11i standards.

For quantities greater than listed, call for quote.

860-DC-WSP-01-S	DC-WSP-01-S	Digi Connect Wi-SP	404.46

DIGI PORTSERVER® TS MEI

Universal, high-performance device servers for RS-232/422/485 serial-to-Ethernet connectivity. Advanced features include SSH v2, SNMP, PPP, port buffering and many more.
- Standard, reliable serial-to-Ethernet connectivity
- 1/2/4 serial port models available
- Switch selectable RS-232/422/485 RJ-45 serial

PortServer TS MEI (Multi-Electrical Interface, RS-232/422/485) makes it easy to connect any serial device to your network. Available in 1, 2 and 4 port models, it combines the inherent benefits of data networking with proven asynchronous connectivity to deliver powerful, yet simple Ethernet connectivity for all your serial devices.
PortServer TS MEI delivers universal and powerful features including data security via SSH v2, port buffering, and full SNMP management, making it ideal for applications like console management where device management and monitoring are critical.

For quantities greater than listed, call for quote.

860-70001805	70001805	Digi PortServer TS 1MEI (1 Port)	389.48

DIGI PORTSERVER® TS M MEI MODEM

Device server with internal modem provides both IP networking and standard phone line dial-up connectivity for remote access to RS-232/422/485 serial devices.
- Device server with internal modem
- Modem connection can act as backup during network failure
- Access remote devices and IP networks via internal modem

The new PortServer TS M MEI family offers Ethernet and RS-232/422/485 serial connections, with the addition of an internal modem. The one-and three-port device servers are ideal for applications requiring both IP networking and standard phone line dial-up connectivity for remote access to serial devices.
The embedded modem adds another level of flexibility to the PortServer TS line. It allows remote hosts to dial in to a serial device attached to a device server, as well as the serial device to dial out to a remote location using a standard phone line. The modem helps to create a PPP connection so that applications and devices can communicate via an IP network, even when the primary LAN or WAN is not available.

For quantities greater than listed, call for quote.

860-70001898	70001898	Digi PortServer TS 1M MEI (1 Port)	649.49

DIGI PORTSERVER® TS P MEI

Designed for universal, high-performance RS-232/422/485 serial-to-Ethernet where traditional power alternatives such as powered Ethernet and powered serial are required.
- Supports powered Ethernet and powered serial
- One, two or four RS-232/422/485 ports

The PortServer TS P MEI family makes it easy to connect RS-232/422/485 serial devices to an IP network. By supporting versatile powering options like powered Ethernet and powered serial, PortServer TS P MEI can adapt to many applications where traditional power alternatives are required.
PortServer TS P MEI delivers universal, high performance multiport serial-to-Ethernet connectivity. It is ideal for applications requiring COM ports, serial tunneling, or where TCP/UDP Socket functionality is needed.

For quantities greater than listed, call for quote.

DIGI EASYPOWER™

The Digi EasyPower family provides simple, safe and efficient device power over existing LAN data cabling (Ethernet). It is ideal for applications where power outlets are not available at the optimal device location.
- Provides simple, safe and efficient device power over Ethernet
- 1/6 power and data ports
- IEEE 802.3af compliant

The Digi EasyPower provides one or six data/Ethernet ports for connecting powered Ethernet devices to the corporate hub/switch. The Digi EasyPower has two ports for each device. One port provides power and can transmit/receive data to the powered Ethernet device. The second port connects to the corporate hub/switch for Ethernet connectivity.
The Digi EasyPower makes powering device servers easy and cost-effective. There is no need to provide separate power supplies for the Digi One® IAP, PortServer® TS P MEI family and Digi Connect® 50. The Digi EasyPower is fully compatible with the IEEE 802.3af standard.

For quantities greater than listed, call for quote.

DLP DESIGN USB Interface Products

RoHS Compliant **This product is RoHS compliant.**

"Add USB to your next project--it's easier than you might think!"

DLP Design's USB Interface products provide a high-speed, hot-swappable, user-friendly connection between your electronic device and a host PC. The USB interface will provide up to 500mA at 5 volts of power for your electronics. These boards make the extremely complex USB Interface easy for just about anyone to start using, without requiring any in-depth prior knowledge.

DUAL CHANNEL USB ADAPTERS

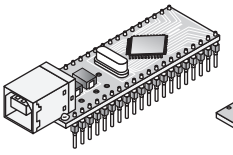
626-DLP2232M-G

The DLP-2232M uses FTDI's FT2232C 3RD generation Dual Channel USB-FIFO/UART and offers a simple solution for interfacing ASIC/MCU/FPGA/DSP based designs to a host computer via USB. Each channel can be configured for either USB-UART or USB-FIFO via the on-board setup EEPROM. Rev 3 silicon from FTDI. No in-depth knowledge of USB required!

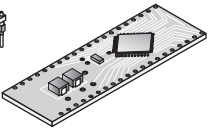
626-DLP2232ML-G

Same functional design as the DLP-2232M, the DLP-2232ML is perfect for space constrained designs.

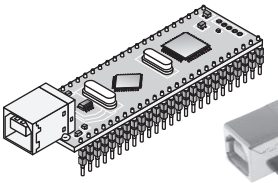
- Dual channel, each can be configured for USB-FIFO or USB-UART
- Up to 8 megabit per second data rate
- USB 1.1/2.0 Compatible



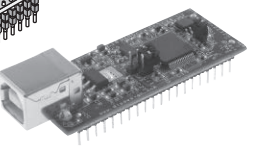
626-DLP2232M-G



626-DLP2232ML-G



626-DLP2232PB-G



626-DLP2232H

626-DLP2232PB-G/626-DLP2232PB-CCS

The DLP-2232PB uses FTDI's 3RD generation FT2232C USB IC and a PIC Microchip 16F877A to form a rapid prototyping development tool. On-board firmware uploader included - no device programmer required!

626-DLP-2232H

The DLP-2232H is DLP Design's premier USB-to-UART/FIFO interface module based on FTDI's 5th generation USB 2.0 High Speed (480Mb/s) silicon. The DLP-2232H is manufactured in a lead-free, RoHS-compliant, compact 40-pin, 0.1-inch spaced standard 0.6 inch wide DIP footprint.

USB ADAPTER BOARDS

DLP-USB245M-G

- Add USB connectivity to your next project
- Up to 8 megabit per second data rate
- USB 1.1 compliant
- Simple FIFO interface to MCU, FPGA, CPU, etc.
- Rev 2 silicon from FTDI
- No in-depth knowledge of USB required
- RoHS Compliant

The DLP-USB245M USB-FIFO adapter offers a simple straight-forward solution for interfacing ASIC or MCU based designs to USB. It comes complete with royalty-free drivers for most common operating systems. Features include an easy to use FIFO-like interface, a data transfer rate of up to 8 megabits per second and a standard .6 inch, 24-pin DIP footprint.

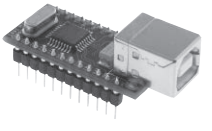
DLP-USB232M-G

- Easily convert legacy RS-232 devices to USB
- Up to 3 megabaud data rate
- USB 1.1 compliant
- Full handshaking and modem interface signals
- Rev 2 silicon from FTDI
- No in-depth knowledge of USB required
- RoHS Compliant

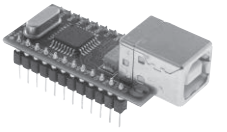
The DLP-USB232M USB-UART Adapter PCB is the ideal solution for upgrading legacy RS232 designs to USB. It comes complete with royalty-free drivers for most common operating systems. Features include data transfer rates of up to 3 million baud, a full set of modem handshaking controls and a standard .6 inch, 24-pin DIP footprint.

626-DLP-USB232R

The DLP-USB232R is DLP Design's smallest USB-to-serial UART interface module, and it utilizes the popular FT232R IC with the FTDIChip-ID™ feature from FTDI. In addition to enabling standard USB-to-serial designs, both asynchronous and synchronous bit-bang interface modes are available.



626-DLP-USB232M-G



626-DLP-USB245M-G

626-DLP-USB1232H

The DLP-USB1232H is DLP Design's premier USB-to-UART/FIFO interface module based upon FTDI's fifth-generation USB 2.0 High Speed (480Mb/s) silicon. The DLP-USB1232H is available in a lead-free, RoHS-compliant, compact, 18-pin, 0.1-inch spaced standard DIP footprint.

USB TO SERIAL ADAPTER

This USB-to-serial adapter is designed to easily connect a microcontroller/DSP/FPGA/etc to a host PC or upgrade a legacy RS232 device to USB with minimal design effort. Virtual Com Port (VCP) drivers are provided royalty-free that make the DLP-TXRX look like a standard Windows/Linux/Mac RS232 port to the users host program. An attractive quantity discount structure makes this module suitable for incorporation into low- and medium-volume finished products.

DLP DESIGN USB Interface Products

RoHS Compliant **This product is RoHS compliant.**

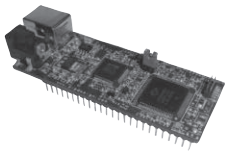
"Add USB to your next project-it's easier than you might think!"

DLP Design's USB Interface products provide a high-speed, hot-swappable, user-friendly connection between your electronic device and a host PC. The USB interface will provide up to 500mA at 5 volts of power for your electronics. These boards make the extremely complex USB Interface easy for just about anyone to start using, without requiring any in-depth prior knowledge.

USB MICROCONTROLLER DEVELOPMENT BOARDS

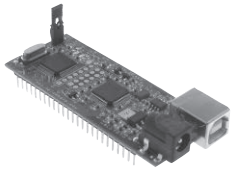
DLP-2232H-PSOC5

- Cypress CY8C5588 Programmable System-on-Chip (PSoC®) 5 containing:
  - 32-bit ARM Cortex-M3 CPU Core
  - Up to 67MHz Operation
  - 256KBytes Flash Program Memory
  - 64KBytes SRAM Memory
  - Internal Non-Volatile Configuration Memory for All Programmable Features
  - One Configurable Delta-Sigma ADC with 8- to 20-Bit Resolution
  - Two Configurable SAR ADC's with 8- to 12-bit Resolution
  - Four 8-bit DAC's Configurable for Current or Voltage Mode Operation
  - Four Camparators and Four OpAmps
  - Four Configurable Multifunction Analog Blocks
  - 24 Programmable Logic Device (PLD-Based) Universal Digital Blocks (UDB)
- High-Speed USB 2.0 Interface Featuring FTDI FT2232H Silicon- Both Parallel and Serial Interfaces are Supported
- 40 User I/O Channels plus 2 Output/Dedicated Peripheral Usage Pins
- USB Port Powered or 5V External Power Barrel Jack
- USB 1.1- and 2.0-Compatible Interface
- Small Footprint: 3.0 x 1.2-inch PCB and Standard 50-Pin, 0.9-inch DIP Interface



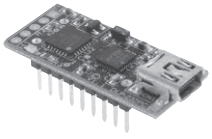
DLP-2232MSP

The DLP-2232MSP combines the same USB interface used in the DLP-2232H and the DLP-1232H modules with a Texas Instruments microcontroller to form a rapid development tool. The MSP430F2618 microcontroller is preprogrammed with basic functionality for accessing the port pins and can be reprogrammed with user firmware via a 10-pin header using a device programmer (purchased separately).



DLP-232PC

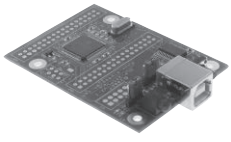
- Single byte commands to all functions
- Designed to fit into a standard 18 pin, 0.3-inch wide DIP footprint providing 14 I/O channels
- PIC18F2410 Microcontroller can be reprogrammed with user firmware
- Microcontroller communicates with host PC at up to 460,800 baud data rate
- USB 1.1/2.0 Compatible
- Rev 3 silicon from FTDI
- No in-depth knowledge of USB required



Measuring in at only 1.375x0.6 inches, this new module is our lowest cost and smallest USB to Microcontroller module to date. The DLP-232PC uses single byte commands and FTDI's Virtual COM Port (VCP) drivers to provide an easy to use USB interface to a PIC 18F2410 microcontroller. Features include 14 I/O channels (8 can be used for analog inputs measuring 0-5 volts), a standard 0.3 inch wide DIP footprint and preprogrammed firmware for easy access to the I/Os and external digital temperature sensors (purchased separately).

DLP-245PL-G

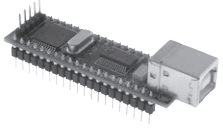
- Simple USB-FIFO interface to PIC Microchip 18F8722 microcontroller
- 50 I/O pins (including A/D inputs) plus 8-bit data bus
- Example source code provided for Token firmware feature
- Up to 2 megabit per second data rate to host computer
- USB 1.1/2.0 compatible
- Rev 2 silicon from FTDI
- No in-depth knowledge of USB required
- RoHS Compliant



The DLP-245PL is a powerful integrated module based on the DLP-USB245M USB-FIFO adapter coupled with a PIC 18F8722 MPU and royalty free USB drivers. The 18F8722 microcontroller is preprogrammed with basic functionality for accessing the port pins and can be reprogrammed with user hex code via a 5-pin header that is compatible with Microchip's MPLAB ICD2 device programmer/ debugger (purchased separately). Refer to the datasheet for full details.

DLP-245PB-G

- Simple USB-FIFO interface to PIC Microchip 16F877A microcontroller
- Plugs into a standard 40-pin, 0.6in. wide DIP socket
- Example source code provided for Token firmware feature
- Up to 2 megabit per second data rate to host computer
- USB 1.1/2.0 Compatible
- Rev 2 silicon from FTDI
- No in-depth knowledge of USB required



The DLP-245-PB-G is a powerful integrated module based on the DLP-USB245M USB-FIFO adapter coupled with a PIC 16F877 MPU and royalty free USB drivers. It plugs into a standard 40 pin 0.6in wide DIP socket and is ideal for rapid prototyping and development of USB / PIC based designs. Token I/O code pre-programmed into the 16F877's ROM for basic port pin input/output capability including access to the A/D, EEPROM, and external digital temperature sensors. The 16F877's Flash ROM can be easily erased and reprogrammed if required using the optional DLP-Flash Programmer. Refer to the datasheet for full details.

For quantities greater than listed, call for quote.

MAVRK DEVELOPMENT KIT MODULES

The DLP-MAV-LCD1 combines a 2x16 character LCD module with a 5 switch joystick. Demonstration firmware that runs on the MAVRK main processor will be made available for developers wishing to incorporate this module into their project. The firmware will adhere to the communications requirements imposed by the MAVRK main processor and is completely compatible with the MAVRK (purchased separately) platform.

MOUSER STOCK NO.	DLP Part No.	Description	Price Each
626-DLP-MAV-LCD1	DLP-MAV-LCD1	Module for Texas Instruments MAVRK Development Platform: 2x16 LCD Module with a 5 switch joystick	74.86

FPGA MODULES

Features:

- Micron 32M x 8 DDR2 SDRAM Memory
- Built-In Configuration Loader; Writes the Bit File Directly to SPI Flash via High-Speed USB 2.0 Interface
- 63 User I/O Channels: 24 Differential Pairs and 8 Global Clocks
- 66MHz Oscillator
- 133MHz DDR2 Interface Reference Design Provided
- USB Port Powered or 5V External Power Barrel Jack
- USB 1.1 and 2.0 Compatible Interface
- Small Footprint: 3.0 x 1.2-inch PCB and Standard 50-Pin, 0.9-inch DIP Interface

For quantities greater than listed, call for quote.

DLP-D USB BASED SECURITY DONGLE

The DLP-D Security Dongle is pre-programmed with a unique identification number (Serial Number) that is readable over USB but cannot be altered by any means. Since each serial number is unique, this device provides a way of linking application software to a specific hardware dongle with a high level of security.

Features:

- Hard-coded, unique serial number
- USB 1.1 and 2.0 compatible interface
- Small size; easily fits on key chain
- 3rd-Party support for application development

Applications:

- Access control
- Copy protection

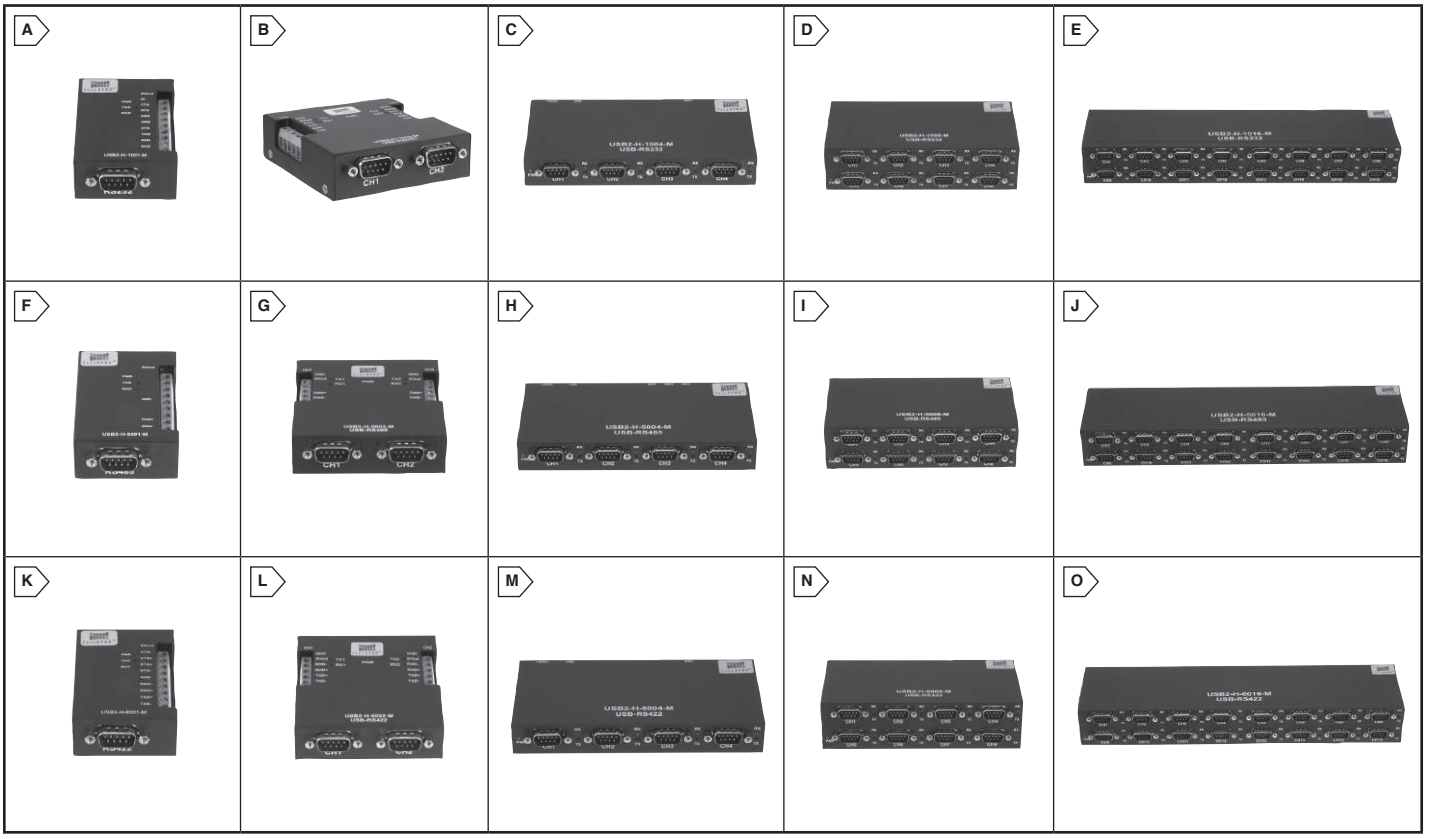
EasySYNC USB Interface Products

RoHS Compliant **This product is RoHS compliant.**

EasySYNC Ltd is a supplier of communications and instrumentation products with specialist expertise in serial connectivity solutions based on USB, CAN and RS232 /RS422 / RS485 interfaces.



HI-SPEED USB TO PORT INDUSTRIAL ADAPTER

The USB2-H-100X-M modules are a family of communication devices. This model, USB2-H-100X-M, provides a simple method of adapting many legacy RS232 serial devices to a modern USB port. This is accomplished by incorporating the industry standard FTDI USB2.0 Hi-Speed serial bridge chip. The integrated electronics of the USB2-H-100X-M utilise the FTDI FT4232H, FT2232H or FT232H plus RS232 level shifters and TXD/RXD LEDs to provide a visual indication of data traffic through the module.

For quantities greater than listed, call for quote.

The USB2-H-600X-M family are a USB to RS422 level serial UART adaptor incorporating FTDI's FT4232H, FT2232H and FT232H Hi-Speed USB2.0 (480Mb/s) to serial UART interface IC device. The FTDI Chips handle all the USB signaling and protocols. The adaptor provides a fast, simple way to connect devices with an RS422 interface to USB. The integrated electronics of the USB2-H-100X-M utilise the FTDI FT4232H, FT2232H or FT232H and includes RS422 level shifters plus TXD/RXD LEDs to provide a visual indication of data traffic through the module.

FTDI USB Interface Products

RoHS Compliant **This product is RoHS compliant.**

FTDI USB-UART AND USB INTERFACE IC'S

FTDI X-CHIP SERIES IC'S - Full Speed USB IC Devices (FT200X, FT201X, FT220X, FT221X, FT230X, FT231X, FT240X):

Made up of 13 different package options, the X-Chip series complements FTDI's existing FT-R and FT-H offerings. The series supports a broad selection of interface types such as basic UART, full UART, FIFO and I²C, as well as FTDI's proprietary FT1248 I/O (including provisions for enhanced SPI). Devices in this series are capable of data rates of up to 3.4 Mbits/s, while maintaining low power consumption, <8mA (typical) when fully active and <125uA (typical) while in suspend mode. In addition, this series can detect a charging port and cause logic to switch from data transfer to charging mode. As with all FTDI IC's these devices are offered with a range of Royalty free FTDI developed drivers for 32 and 64-bit OS including Windows (2000, XP, VISTA, 7), Linux, Mac OS, Android and WinCE.

FTDI FT232 - Full Speed USB to Serial UART IC Devices:

The FT232 USB to UART device includes an internal 3V3 regulator and USB Transceiver that provides USB 1.1/2.0 full speed physical interface. The UART will operate from 300Baud to 3MBaud. The FT232RL/RQ also include an internal EEPROM and clock circuitry plus the FTDI Chip-ID security mode. The devices are offered with a range of Royalty free FTDI developed drivers for 32 and 64 bit OS including Windows (2000, XP, VISTA, 7), Linux, Mac OS, Android and WinCE.

FTDI FT2232D - Full Speed Dual UART/FIFO IC Devices:

The FT2232D device features two multi-purpose UART/FIFO controllers which can be configured individually in several different modes. As well as a UART interface, a FIFO interface and the Bit-Bang IO mode of the FT232 and FT245 devices, the FT2232D offers a variety of additional new modes of operation including a Multi-Protocol Synchronous Serial Engine (MPSSE) interface which is designed specifically for synchronous serial protocols such as I²C, JTAG and SPI bus. The FT2232D has an extended temperature range (-40ºC to +85ºC) and adds CPU FIFO mode.

FTDI Hi-Speed Single/Dual/Quad USB IC Devices (FT232H, FT2232H, FT4232H):

FTDI's Hi-Speed IC's are USB 2.0 Hi-Speed devices operating at 480Mbps. In addition to the standard UART mode, each of these devices supports FTDI's bit-bang modes and contains our multi-protocol synchronous serial engine(s) (MPSSEs) to allow communication using JTAG, I²C and SPI protocols. The FT2232H and FT232H also include standard FIFO and the FT232H supports FTDI's FT1248 mode.

FTDI DB9-USB RETROFIT ADAPTERS

The DB9-USB range of modules provide a simple and fast method of migrating existing DB9 based connector UART interfaces to USB 2.0. The modules feature a USB 2.0 mini-B connector within a module which fits a standard 9-pin DB9 connector footprint. The DB9-USB family consist of 6 modules. Two of these operate at RS232 voltage levels while four of them operate at digital voltage levels (a choice of 5V or 3.3V).

FTDI USB-COM-PLUS MODULES

The USB-COM-PLUS modules provide a simple method of adapting legacy serial devices with RS232, RS422, RS485 interfaces to modern USB ports. The USB-COM-PLUS modules provide either single, dual or quad port options. Single port modules feature a USB 2.0 Full Speed (12Mb/s) interface while all multiport modules feature a USB 2.0 Hi-Speed (480Mb/s) interface. All modules are powered from the USB port. Maximum baud rates for RS232 versions are 1MBaud and for the RS422/485 versions are 3MBaud (single channel) and 10MBaud (multi-channel). The modules operating temperature range is -40°C to +85°C and are CE/FCC approved.

FTDI FT4232H USB HI-SPEED SERIAL/HUB MODULE

The FT4232H based USB Hi-Speed Serial/Hub Module is a USB interface expansion module targeted at connecting to the FTDI V2DIPx modules to expand the number of interfaces. However, it is not limited to this application. It can also be used as a hub device or an FT4232H evaluation module. The module has a USB 2.0 Hi-Speed hub chip which supports up to three external downstream USB ports: 2 via dual USB connector and 1 via the DIL connector pins.

FTDI MORPH-IC-II FPGA DEVELOPMENT MODULE

The Morph-IC-II is a USB based FPGA development module featuring the Altera Cyclone-II FPGA with the FTDI FT2232H USB to UART/FIFO/JTAG/SPI/I2C converter IC. The module provides integration of Hi-Speed USB capability (480Mbit/s) with an FPGA, to enable ultra-fast software based FPGA configuration/reconfiguration and communication using the FTDI royalty free drivers.

FTDI USB CABLE ASSEMBLIES WITH EMBEDDED ELECTRONICS

FTDI offers a wide range of USB based converter cables offering a variety of connectivity options. Connectivity options include conversion from USB to RS232, RS422, or RS485 and TTL based signaling interfaces. The cables feature integrated electronic assemblies featuring FTDI IC's simple easy-to-use connectivity for many USB conversion applications.

LANTRONIX Embedded Device Servers

RoHS Compliant **This page of product is compliant.**

Lantronix offers Ethernet and 802.11 wireless networking solutions for end users and manufacturers alike. Their embedded modules enable OEMs to add full Ethernet and/or wireless connectivity to their products so they can be managed over a network or the Internet – at a fraction of the time and expense required to develop an in-house solution. And Lantronix products offer the highest levels of data security available today.

XPICO DEVICE SERVER MODULE

The chip-sized xPico is an extremely compact networking solution that enables Ethernet connectivity on virtually any device with a serial interface. The included Lantronix device server application and full IP stack allow seamless remote access to device data simplifying design integration while providing robust connectivity. As the smallest embedded device server in the world, xPico can be utilized in designs typically intended for chip solutions.

Features:
- Chip-sized footprint: 24mm x 16.5mm
- Complete device server application with full IP stack and web server
- Serial data rate of up to 921Kbps
- Security: 256-bit AES Encryption
- Internal storage capacity: 384KB for web pages

Development Kit Contents:
- xPico Module
- xPico Evaluation Board
- 3.6V-wall-mount power supply AC/DC, 1A
- RS-232, DB9F/F, 10ft, null modem cable
- Ethernet cable 10ft

XPORT® PRO™

The thumb-sized XPort® Pro™ is Lantronix' most powerful, self-contained embedded networking module. Footprint compatible with the popular XPort® and running either Linux or Evolution OS™ operating systems, the XPort Pro eliminates the complexity of designing network connectivity into a product and allows you to deploy advanced applications on the edge device itself.

✻ XPort® Pro™ Module Sold Separately. ✻ ✻ Sold Separately for Development Kits.

XPORT®/XPORT® AR - EMBEDDED DEVICE SERVERS

XPort® is the most compact, integrated solution available to web-enable any device with a serial interface. By simply adding XPort to a product design, device manufacturers can now offer Ethernet connectivity as a standard feature within weeks—instantly increasing product value, enhancing end-user experience and facilitating new service delivery options.

XPort® Features:
- Remote command and control of edge devices
- Real-time edge device status via e-mail alerts
- 256-bit AES encryption for secure communications
- EMC/EMI-compliant; RoHS-compliant

XPort® AR Features:
- A fully programmable device computing platform based on corporate IT standards – Cisco®-like CLI, XML, RSS
- Provide robust "data center grade" security, including SSL and SSH, for networked devices
- Offer true IEEE 802.3af compliant pass-through Power over Ethernet (PoE)

MATCHPORT® AR LINUX SOFTWARE DEVELOPER'S KIT

The MatchPort® AR Linux Software Developer's Kit (SDK) is a highly-integrated embedded hardware and software suite that allows Linux developers to easily create value-added applications on Lantronix' small yet powerful embedded networking module. Built on the stable 2.6 Linux kernel, the SDK includes all the components required for building secure network enabled products using the Linux OS.

✻ Must be ordered separately for the MPDK1000-LNX-02 kit.

MATCHPORT™ - EMBEDDED WIRED AND WIRELESS DEVICE SERVERS

MatchPort b/g Features:
- Extremely affordable embedded 802.11 b/g wireless networking
- Bulletproof security with IEEE 802.11i-PSK, WPA-PSK, TKIP and optional 256-bit AES end-to-end encryption
- Full TCP/IP stack, web server and Windows deployment software
- Up to 230Kbps data rate
- FCC Class B, UL and EN EMC and safety-compliant

MatchPort® b/g Pro Features:
- Adds WiFi to devices with the highest WPA2/802.11i enterprise-grade security and authentication protocols
- Lantronix SmartRoam™ technology provides seamless mobile connectivity and improved reliability
- Includes full TCP/IP stack, CGI, AJAX web server and Windows deployment software
- Powerful applications customization platform with 32 Bit 159 MIPS (Dhrystone 2.1) Processor, 8MB Flash/8 MB SDRAM
- Built-in Ethernet to wireless bridging

MatchPort AR Features:
- Application-ready, secure SSL/SSH networking module for high-volume applications
- Built-in CGI and AJAX web server
- Pin compatible family includes 802.1 b/g wireless
- Ethernet MAC/PHY; add only RJ45 jack and magnetics to device's PCB

MatchPort NR Features:
- Interface: CMOS (Asynchronous) 3.3V-level signals, rate is software selectable (300 bps to 921,000 bps)
- Serial Line Formats: 7 or 8 data bits, 1-2 Stop bits
- Modem Control: DTR, DCD
- Flow Control: XON/XOFF (software), CTS/RTS (hardware), none

LANTRONIX Embedded and External Device Servers

Products may be RoHS compliant. Check mouser.com for RoHS status.

PREMIERWAVE EN

PremierWave™ EN delivers a new dimension of WiFi networking with the highest levels of security to virtually any device or electronic product. It provides affordable connectivity in a compact form factor, enabling OEMs to add WiFi or wired Ethernet networking to their products on a single PCB design.

Features:

- 802.11 abgn solution with Dual Band Radio (2.4GHZ and 5GHz)
- Linux Operating System with IPV6
- Includes full TCP/IP stack, web server
- Powerful applications customization platform with 32 Bit ARM9 Processor
- Virtual IP (VIP) Access™ for gaining remote connectivity even behind firewalls
- Low power consumption modes
- Robust set of interfaces which include Ethernet, Serial, USB, I2C, and SPI

RoHS Compliant

For quantities greater than listed, call for quote.

EMBEDDED DEVICE SERVERS

XPort® Direct+™ Features:

- Delivers high-performace Ethernet connectivity and web server capabilities
- Powerful and affordable networking for any device with a serial interface on its microcontroller
- Integrated module with RJ45 and dedicated networking SoC
- Web server, TCP/IP protocol stack and Windows deployment software
- Up to 921Kbps data rate
- Compact low profile (<12mm)
- 2 x 12 pin, 2mm headers
- Three GPIO pins
- RS-232/RS-485 ready
- 256-bit AES encryption for secure communications

EXTERNAL DEVICE SERVERS

PREMIERWAVE® XC GSM/GPRS DEVICE SERVER

Lantronix PremierWave® XC GSM/GPRS Device Server is a high performance, multi-port secure device server that offers Ethernet or GSM/GPRS connectivity for remote access and easy management of machines and equipment over the network and across the Internet. This device server provides bullet-proof security by offering a variety of robust data encryption and authentication options.

Features:

- Provide network connectivity to virtually any device with a serial port
- Standard and customizable serial data rates from 300 to 921 Kbps
- Quad-band: 850/900/1800/1900 MHz
- Modes: Software selectable RS-232/422/485
- SSL v3, SSH v2 Client & Server, Supports up to 1024-bit certificates
- Antenna: 2dBi, 50 Ohm, SMA Connector

XSENSO™ ANALOG DEVICE SERVER

xSenso™ is a compact DIN-rail or wall mount solution that enables sensors with analog outputs (voltage or current) to easily and transparently send real-time data to any node on the network or over the Internet.

Features:

- Channels: (2) Differential inputs (screw terminal connections)
- Authentication, up to 256-bit encryption, SSL, SSH
- Dynamic web based monitoring, charting, and data logging
- Email and text message alert notification

UDS/MSS100/EDS1100 - External Device Servers

The UDS single-port and dual port device servers provide a quick, simple and cost-effective way to bring the advantages of data accessibility and remote management to equipment not currently connected to a network. The MSS100 is a fast, easy way to connect virtually any device with a serial port to a network, so it can be managed remotely.

WiBox® - Wireless External Device Servers

WiBox® dual-port device servers enable you to connect serial devices to 802.11b/g wireless networks, quickly and easily. By merging wireless communications and Lantronix device server technology, WiBox simplifies connectivity to devices in applications where mobility is required or cabling is impractical.

Features:

- Enables access to remote devices while minimizing costly cabling
- Provides network mobility for untethered communication
- Two DB9 DTE serial ports supporting RS-232, RS-422 or RS-485 communication
- Compact size enables it to fit almost anywhere
- Industry standard 802.11b/802.11g wireless interface
- Secure wireless communication: IEEE 802.11i-PSK, WPA-PSK, TKIP
- 256-bit AES – end-to-end encryption
- Ethernet-or-wireless bridging

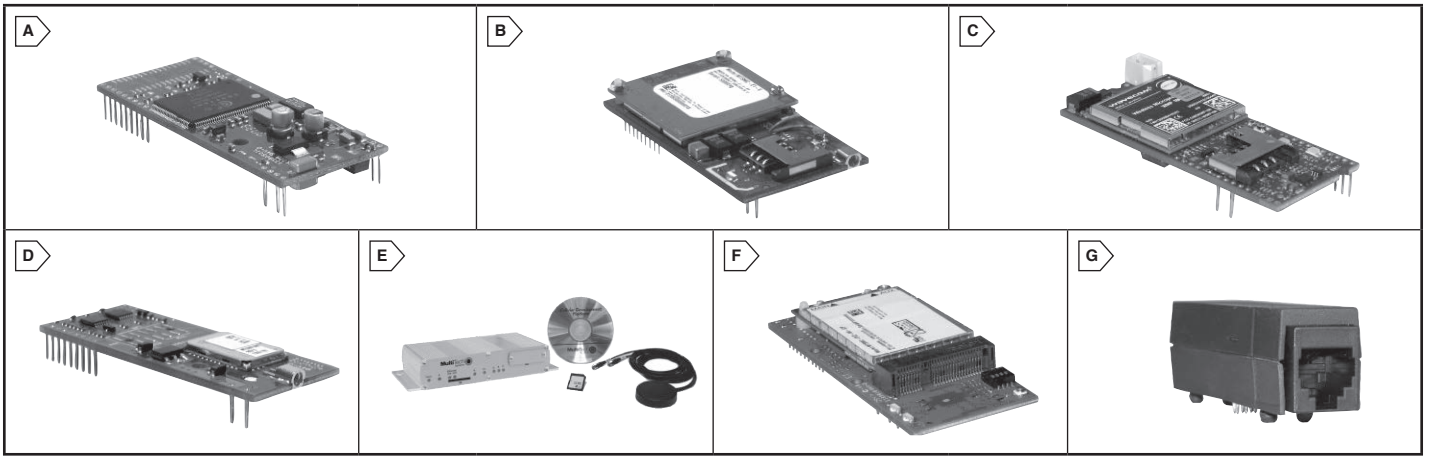
MULTI-TECH Universal Sockets and Embedded Modems

Products may be RoHS compliant. Check mouser.com for RoHS status.



UNIVERSAL SOCKET MODULES

Multi-Tech's Universal Socket is a flexible, comm-port architecture that provides cellular, Ethernet, PSTN or Wi-Fi® network access with interchangeable modules.

- Interchangeable socket module
- Quick-to-market
- Global approvals
- 2 Year Warranty
- Easy migration to future networks
- Universal Socket

For quantities greater than listed, call for quote.

RJMODEM™

The Multi-Tech Serial Data RJModem creates communication-ready devices by integrating modem functionality into the most compact, integrated device. The first-of-its kind RJ11 form factor includes the controller, data pump, DAA and RJ-11 connector providing device manufacturers with the ability to integrate dial-up connectivity into any product design.

- RJ-11 Form Factor
- Global approvals
- Easy migration to future networks

NETBURNER Embedded Modules

Products may be RoHS compliant. Check mouser.com for RoHS status.

NetBurner
Networking in 1 Day!

32-BIT 10/100 ETHERNET CORE PROCESSOR MODULES

NetBurner core modules allow you to quickly and easily create an embedded product, create a network-enabled product, or add network connectivity to an existing product. These modules can be used as the main processor or as a secondary network co-processor. Features include: 10/100 Ethernet, digital, analog and serial control.

32 BIT MOD5213 HIGH PERFORMANCE EMBEDDED PROCESSOR MODULE

Process Specifications:
- 32-bit Freescale ColdFire 5213 running at 66MHz

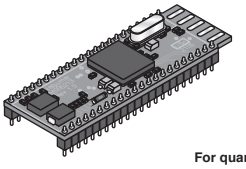
Hardware Specification:
- 32KB SRAM
- 256KB Flash
- MAC Module and HW Divide
- Low-power optimization
- Four 32-bit timer channels with DMA capability
- Four 16-bit timer channels with capture/compare/PWM
- 4-channel 16-bit/8-channel 8-bit PWM generator
- Two periodic interrupt timers (PITs)
- 4-channel DMA controller
- 8-channel 12-bit ADC
- Up to 33 general-purpose I/O
- System integration (PLL, SW watchdog)
- CAN 2.0B controller with 16 message buffers
- Three UARTs with DMA capability

Software Development:
- NetBurner Development Kit includes: Mod5213 Development Board, Real-Time OS, C/C++ Compiler, Integrated Development Environment (IDE), Graphical Debugger, configuration and deployment tools.

Connectors:
- Two standard single row 20-pin 0.1" headers
- PIN Dimensions: 1.9" x 0.6"

Physical Characteristics:
- Industry Standard 40-pin DIP
- Dimensions: 2.0" x 2.6"

Power Requirements:
- DC Input Voltage: 4V - 7V, or 3.3V Regulated
- Operating current: 120mA Environmental
- Operating Temperature: -40°C ~ +85°C



RoHS Compliant

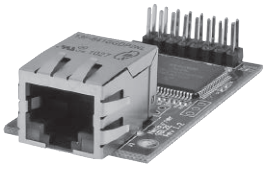
SBL2E SERIAL TO ETHERNET MODULE

Features:
- 32-bit Freescale Coldfire 52236 @ 50MHz
- Two TTL serial ports
- RS-232, RS422/485 ready (require external level shifter)
- Four 12-bit analog to digital inputs
- Up to 10 General Purpose I/O Signals
- 10/100 Ethernet
- Serial to Ethernet over TCP or UDP
- DHCP/Static IP Support
- Baud rates up to 115,200 bps
- Custom serial packetization options
- Hardware and software flow control
- Web Based Configuration

Development Kit Contents:
- SBL2e-200IR
- SBL2e-ADPT-100CR evaluation board



For quantities greater than listed, call for quote.

SB7X 32-BIT SERIAL-TO-ETHERNET PROCESSOR BOARDS

SB70 Processor Board Features:
- Processor: 32-bit Freescale ColdFire 5270 with integrated 10/100 Ethernet MAC
- Speed: 145MPS @ 150MHz
- Network Interface: 10/100BaseT with RJ-45 Jack
- Flash Memory: 512KB
- SDRAM: 2MB
- Power Requirements: 480mA @ 5V
- LEDs: Link, Speed/Data, Power
- Network Protocols: ARP, DHCP, BOOTP, TCP, UDP, ICMP, Telnet, HTTP, SNMP
- Dimensions: 3.25" x 2"

SB72 Processor Board Features:
- Speed: 63MPS @ 66MHz
- Network Interface: 10/100BaseT with RJ-45 Jack
- Serial Ports Supported: RS-232, RS-422, RS-485, TTL
- Flash Memory: 512KB
- SDRAM: 8MB
- Power Requirements: 480mA @ 5V
- LEDs: Link, Speed/Data, Power
- Network Protocols: ARP, DHCP, BOOTP, TCP, UDP, ICMP, Telnet, HTTP, SNMP
- Dimensions: 3.25" x 2"

Development Kit Contents:
- SBXX Processor Board
- Adapter board to assist in development. It is not required to operate. The adapter board includes a switching power supply, RS-232 level shifters and two DB-9 connectors
- CD-ROM containing source code, development tools, manuals and documentation
- Cross-wired and straight-through twisted pair network cables
- Serial cable
- 12 VDC power supply (US and Canada only)

RoHS Compliant

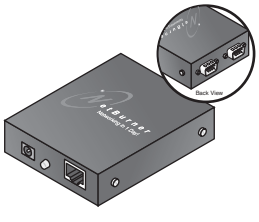
SB72-EX DUAL PORT SERIAL-TO-ETHERNET EXTERNAL DEVICE

SB72-EX to Network-Enable Existing Applications:
The SB72-EX network-enables serial devices right out of the box. No programming or development is required; the SB72-EX is pre-programmed to convert RS-232, RS-422, RS-485, and TTL data to Ethernet, enabling communication with the serial device over a network or the Internet. The onboard web server provides easy device configuration using a standard web server.

Hardware Specifications:
- 10/100BaseT with RJ-45 connector
- 32-bit Motorola ColdFire 5272 with integrated 10/100 Ethernet
- 2MBytes flash, 8MBytes of SDRAM
- Power: 12V, 500mA
- Operating Temperature: 0°C to 70°C
- Dimensions: 4.2" x 3.0"
- Weight 5 oz
- UL and CUL approvals
- LEDs: Link, Speed/Data, Power
- The 2 UARTS can be configured:
  Two RS-232 ports
  One RS-232 port, one RS-485/422 port (full or half duplex)

Network Protocols Supported:
- ARP, DHCP, BOOTP, TCP, UDP, ICMP, Telnet, HTTP, SNMP

Note: additional protocols supported with development kit.



RoHS Compliant

Nurve Networks XGS DEVELOPMENT SYSTEMS

Package includes:
- XGS board completely assembled
- 350+ page printed manual covering hardware, software and numerous programming tutorials
- 9V USA compliant wall adapter power supply
- A/V cable
- XGS game controller
- DB9 PC serial port to XGS header converter
- DVD-ROM with numerous examples and complete driver library Including; Graphics, Sound, Keyboard, SD card, Serial Comms, Mechatronics, and lots more

XGS AVR 8-Bit Development System

Nurve Networks CHAMELEON SYSTEM

The Chameleon is a credit card sized computer with 2 microprocessors.
The Chameleon has numerous I/O interfaces, including composite video for NTSC/PAL generation, VGA, audio out, and PS/2 .
The dual processor design of the Chameleon allows for video, audio, and I/O tasks to be offloaded to the Propeller chip via a high speed SPI interface.
Alternatively, both processors can be independently programmed and used.

Package includes:
- Mini solderless breadboard 1.25" x 2" (affixes to right hand side of Chameleon)
- 150+ page electronic manual covering hardware, software, and numerous programming tutorials
- DVD-ROM including all tools, and numerous examples with complete driver

Chameleon AVR 8-Bit System
- Chameleon AVR 8-Bit is 100% code compatible with the Arduino board
- Chameleon comes with the Arduino bootloader pre-loaded, so development can be done with the Arduino tool, and programs loaded directly to the Chameleon

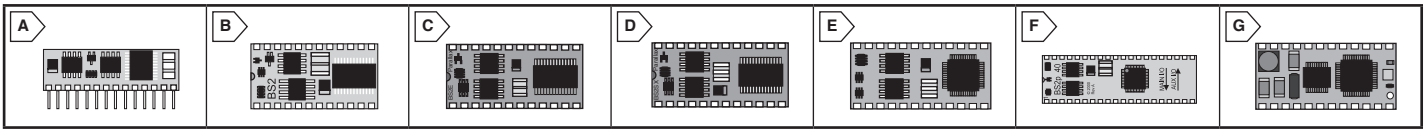
PARALLAX BASIC Stamp Modules and Accessories

Products may be RoHS compliant. Check mouser.com for RoHS status.

BASIC STAMP MODULES

BASIC Stamps are small computers with 8 or 16 I/O lines that can be connected to TTL level devices and also, with a few extra components, solenoids, relays, and RS232 networks. Their simple language and easy interfacing make BASIC Stamps ideal for many applications for industrial, educational, and hobbyist customers. BASIC Stamps require only editor software, a prototype area, and cable to get started. Each BASIC Stamp has on board it's own non-volatile EEPROM, voltage regulator, resonator, and microcontroller.



• Operating Temperature at 70% Non-Condensing Humidity: 0°C to +70°C

† Plus 2 Dedicated Serial I/O Pins

For quantities greater than listed, call for quote.

BASIC STAMP DISCOVERY KIT - SERIAL (WITH USB ADAPTER AND CABLE)

Our most popular BASIC Stamp microcontroller is the BS2-IC module. Widely used in education, hobby, and industry, this module has enough program space, execution speed, and I/O pins for many applications. Now featured with the What's a Microcontroller curriculum and parts kit, this Starter Kit has our highest recommendation. The Discovery Kit is an incredible value!

Build over 40 Hands On Projects

With the latest edition of this kit, you will receive the What's a Microcontroller? (WAM) parts and text making the Discovery Kit a bona fide "Getting Started" kit. With the WAM kit you'll get your feet wet through a series of over 40 activities designed to provide you with the best possible introduction to the world of BASIC Stamp modules. The text contains clear explanations, defines electronics terms in a friendly manner, and most importantly builds your confidence so you can start building your own electronics inventions.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Parallax Part No.	Description	Price Each
619-EDSTR-KIT	27207	Basic Stamp Discovery Kit Serial with USB Adapter	171.19

UNDERSTANDING SIGNALS PARTS AND TEXT/PARALLAX OSCILLOSCOPE

The Understanding Signals Parts and Text Kit adds a 144-page student guide and many electronic components to the Parallax USB Oscilloscope. Learn how to generate, view, and measure a variety of wave forms. Each activity includes a BASIC Stamp®-controlled example circuit and code, directions for configuring the oscilloscope and placing the probes, and screen-captures of the Parallax USB Software interface displaying the signal.

A Board of Education with a BASIC Stamp 2 or a HomeWork Board is needed to run the experiments in this kit.

STAMPWORKS EXPERIMENT KIT

It's easy to get started micro-controlling your world with StampWorks. The StampWorks manual includes 35 experiments based on the BASIC Stamp® 2 microcontroller and the Professional Development Board (included). StampWorks gives you the hardware, the electrical components and, most importantly, the know-how to become a confident embedded programmer. Working your way through StampWorks you will learn about efficient embedded design, connecting circuits and "smart" sensors to the BASIC Stamp, adding computer control to your projects, and "Power PBASIC" programming techniques.

After you've worked your way through StampWorks you'll be able to: flash LEDs, use 7-segment and LCD displays, monitor one or several push-buttons or switches, add sounds and sound effects to your projects, build a simple light-controlled Theremin, control servos and stepper motors, measure temperature, voltage, and so much more! When you are finished, you will be able to write your own BASIC Stamp programs to control your hobby, engineering, and student projects using a variety of electronic circuits - and you'll be able to do it with the confidence.

SX TECH TOOL KIT/SX CHIPS/PROGRAMMERS AND PROTO BOARDS

The popular SX Tech Tool Kit is an excellent starting point to get you developing SX projects with Parallax's SX-Key programming tool. Upon receiving the kit, you will be able to program SX chips within the hour. A power supply is not included.

The SX-Key is Parallax's primary development tool for the SX line of microcontrollers, supporting every chip that is commercially available. Using the free SX-Key software, the SX-Key programming tool can program SX chips in-system and perform in-circuit source-level debugging. Also at the user's fingertips is an on-board programmable clock. The frequency output of this clock is adjusted from the software with a slider bar between 400kHz and 100MHz. The software operates on Win98/NT/2K/XP platforms.

For quantities greater than listed, call for quote.

Products may be RoHS compliant. Check mouser.com for RoHS status.

RCM2XXX RABBITCORE MICROPROCESSOR MODULES

The RabbitCore family of microprocessor core modules is designed to facilitate rapid development and implementation of embedded systems. The RabbitCore mounts on a user-designed motherboard and acts as the controlling microprocessor for the user's system. Small in size but packed with powerful features, these core modules give designers a complete package for control and communication.

RCM21XX RabbitCore

RCM3000 AND RCM3010 RABBITCORE

The RCM3000 RabbitCore is our powerful and feature-packed 10Base-T Ethernet microprocessor core module. Powered by the new Rabbit 3000™ - the "EMI-Free microprocessor"—the RCM3000 is the ideal option for designers who want to rapidly develop and implement embedded systems with fully integrated Ethernet connectivity. Measuring only 2.73" x 1.85" (69 x 47mm), the RCM3000 operates at 3.3V (with 5 V-tolerant I/O) and features 6 serial ports. Built-in low-EMI features, including a clock spectrum spreader, help designers eliminate the kind of emissions-related problems that frequently derail tight development schedules.

For quantities greater than listed, call for quote.

RCM3200 RABBITCORE MODULES

The RCM3200 RabbitCore microprocessor core module is the ideal option for designers who want to rapidly develop and implement embedded systems with fully integrated 10/100Base-T Ethernet connectivity. Measuring only 2.73" x 1.85" (69 x 47mm), the RCM3200 operates at 3.3V (with 5 V-tolerant I/O), runs at up to 44.2MHz, and features 6 serial ports. Built-in low-EMI features, including a clock spectrum spreader, practically eliminate EMI problems, helping OEMs pass CE and regulatory RF emissions tests.

For quantities greater than listed, call for quote.

RCM3305 AND RCM3315 RABBITCORE MODULES

The RCM3305 and RCM3315 microprocessor core modules are an ideal solution for designers who want to rapidly develop serial Flash and 10/100Base-T Ethernet into their embedded application. The RCM3305/3315 offer 4-8 MByte of serial Flash.

For quantities greater than listed, call for quote.

Products may be RoHS compliant. Check mouser.com for RoHS status.

RCM3400 AND RCM3410 RABBITCORE MODULES

The RCM3400 analog RabbitCore provides a known-good processor and analog input subsystem for OEMs to quickly integrate into custom designs. The RCM3400 features a low-EMI Rabbit 3000-based CPU subsystem running at 29.4 MHz, with 512K Flash / 512K SRAM or 256K Flash / 256K SRAM, 5 serial ports, and 8 channels of programmable gain analog input in an extremely small footprint (1.37" x 1.16" / 34 x 29mm).

For quantities greater than listed, call for quote.

RCM3600 AND RCM3610 RABBITCORE MODULES

The RCM3600 RabbitCore is the lowest priced Rabbit 3000 microprocessor based core module designed for a wide variety of applications.

Design Advantages:
- Ready-made platform for fast time-to-market, up to 3 months design integration time savings
- Compact size
- Dynamic C® development environment for real-time development and debugging
- Exceptionally fast performance for math, logic, I/O

Applications:
- Handheld devices and Instrumentation
- Remote Data Logging

RoHS Compliant

RCM3750 RABBITCORE MODULE

The RCM3750 features 10/100Base-T connectivity, 512K Flash / 512K SRAM, 4 serial ports, and an extremely small footprint (2.95" x 1.20" / 75 x 30mm). Extensive demo programs, application templates, and optional software modules enable rapid development of secure network embedded systems. Built-in low EMI features, including a clock spectrum spreader, practically eliminate EMI problems, helping OEMs pass European CE and other regulatory RF emissions tests.

Applications:
- Remote Date Logging
- OEM Serial to Ethernet products
- Network-Enabling Security
- Acess Systems
- Building Automation
- Industrial Controls

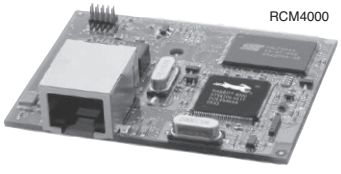
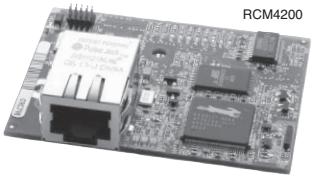
RCM4000 RABBITCORES – EMBEDDED NETWORKING AND CONTROL

The new Rabbit 4000 is a high-performance, low-EMI microprocessor designed specifically for embedded control, communications, and Ethernet connectivity. The Rabbit 4000 outperforms most 16–bit processors without losing the efficiency of an 8–bit architecture. Extensive integrated features, glueless architecture and 10Base-T Ethernet facilitate rapid hardware design, while a new C-friendly instruction set promotes efficient development of even the most complex applications.

The Rabbit RCM4XXX series of RabbitCore modules enable powerful embedded networking and control in a small package. RabbitCores mount directly onto a user designed motherboard, and can interface with CMOS-compatible digital devices via the user's motherboard. Programs are developed with our industry-proven Dynamic C development system that includes an editor, compiler, and in-circuit debugger.



RCM4000



RCM4200

Application Possibilities:
- Wireless device/data management
- Serial-to-Ethernet applications
- Remote monitoring and communications
- Web-enabling devices
- Device/data management and control
- Device-level control
- Remote data logging
- Asset management
- Security Access Systems

RCM5600W - MINI-MICROPROCESSOR WI-FI CORE MODULE

The MiniCore RCM5600W module offers 802.11b/g Wi-Fi connectivity which includes WPA2, WPA and WEP security standards, allowing easy integration and interoperability within Wi-Fi networks. With six serial ports, four configurable as SPI, the RCM5600W can easily embed into any existing or new design and is pin compatible with current and future MiniCore products.

A Development Kit offers the essential hardware tools and includes the Dynamic C® software development system. The Kit contains a prototyping and interface board with USB connections that will allow you to evaluate and debug the RCM5600W.

SILEX TECHNOLOGY Device Servers & Embedded Modules

Silex Technology Inc. provides networking and wireless solutions for virtually any printer, USB device, Serial device, as well as Embedded Wireless and Embedded Ethernet solutions. Silex products provide secure wireless and wired connectivity for a wide range of devices in a number of different applications, including medical, weights and measures, printers, enterprise and home networking, transportation, and much more.

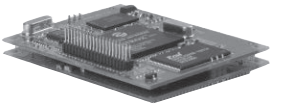
WIRELESS/WIRED SERIAL DEVICE SERVER

Silex serial device servers allow you to connect any RS-232 or UART-compatible serial device. They include a comprehensive TCP/IP protocol stack plus extensive management tools to make it easy to connect and manage multiple serial device servers over a network. For maximum flexibility, Silex offers both wireless serial device servers and serial to Ethernet (wired) device servers with external or embedded form factors.

SX-500

The SX-500 is an external 802.11b/g wireless or 10base-T/100base-T wired serial server with advantages such that include:

- Industry-leading security including WPA, WPA2, and WEP, plus 802.1x authentication with the most commonly used EAP types
- Easiest way to connect an existing RS-232 device to a wireless or wired network
- Rugged pre-plated galvanized steel enclosure with IP40 industrial grade rating



For quantities greater than listed, call for quote.

EMBEDDED WIRELESS MODULES

Silex offers both intelligent and radio-only embedded wireless modules to meet almost any wireless application. Their intelligent embedded wireless modules feature a complete TCP/IP networking stack plus the industry's most extensive wireless security, while their radio modules offer full 802.11a/b/g connectivity in mini PCI or SDIO form factors.

SX-10WAG/WG

Designed specifically for embedded applications, the Silex SX-10WAG and SX-10WG are Mini PCI radio modules that provide superior features such as:

- FCC Limited Modular Approval for simplification of OEM FCC testing requirements
- Meets a wide range of global regulatory certifications/standards
- Includes antenna with cable (no need to source separate antenna) and supports diversity antenna configurations

SX-560

Features the most extensive wireless security in the industry, including 802.1x Extensible Authentication Protocol (EAP) with all major EAP types and WPA2, WPA2-PSK, WPA, WPA-PSK, and WEP wireless security. The SX-560 is a powerful programmable 802.11a/b/g wireless embedded module with major competitive advantages like:

- Very low power consumption for applications like battery operated devices
- Linux operating system with user programmability

PRINT AND USB DEVICE SERVER

Silex MFP/AIO print servers are the only print servers designed specifically to handle all types of USB printers, including virtually any inkjet, multifunction peripheral, or all-in-one printer. This capability is made possible by Silex's SX Virtual Link software, which exactly emulates a hardwired USB port and thereby ensures compatibility with virtually any printer driver.

The SX-2000WG features 802.11b/g wireless capabilities to allow you to locate your high-speed USB printer anywhere in your home or office. Its advantages include:

- Virtual Link software for compatibility with almost any Inkjet /MFP/AIO USB printer
- Transparent operation with your Windows and MacOS X applications
- Can connect up to 14 additional USB devices (scanners, network storage, etc) to the network

For quantities greater than listed, call for quote.

ETHERNET CONVERTERS

Silex's Ethernet converters make it easy for you to migrate your existing Ethernet devices into new environments. Simply plug the converter into your device, and you're up and running on your new network in minutes with no software modifications required.

SX-2600CV

The SX-2600CV is an IPv4 to IPv6 converter that ensures that your Ethernet devices will be compatible with current and future TCP/IP networks. Its advantages include:

- Makes existing network devices operable in IPv6 environments
- Works in environments that support both IPv4 and IPv6
- Easy to install and use with software transparent operation devices will be compatible with current and future TCP/IP networks.

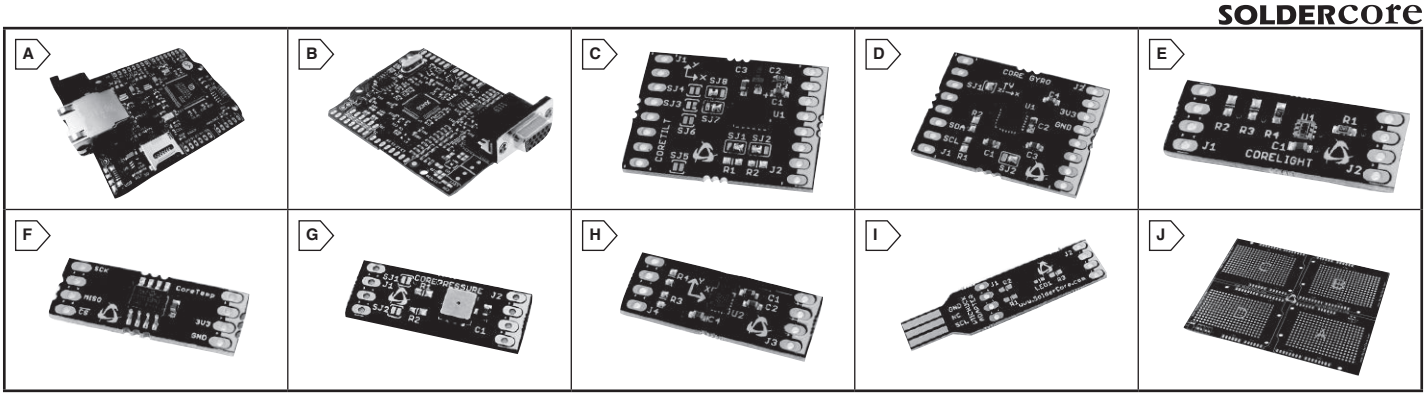
SOLDERCORE Development Boards

SOLDERCORE



SOLDERCORE MAIN BOARD

SC-CPU SolderCore Main Board is a complete development platform consisting of an Arduino form-factor microcontroller "CPU" board with a new and exciting software development environment called CoreBASIC. The SC-CPU SolderCore Main Board features a TI LM359D92 Cortex-M3 processor capable of running at clock speeds of up to 80MHz and provides a compact, flexible solution for rapid product development. SolderCore is compatible with a large range of third party plug-in PCBs to expand its capabilities.

Features:

- 80MHz ARM Cortex-M3 processor
- 512kB of flash
- 20 user-programmable I/O pins + 6 power pins; can be programmed to perform alternative functions including I2C, SPI, UART, PWM, CCP, ADC, QEI, and CAN
- Micro-AB USB On-The-Go connector
- Spring-loaded microSD card holder
- 2.2mm barrel jack for power supply, 6 - 9V; reverse polarity protected
- Standard Cortex 10-pin JTAG connector
- Two power indicator LEDs
- Five user programmable LEDs
- Reset button

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	SolderCore Part No.	Fig.	Description	Price Each

PROTEUS SHIELD

SolderCore SC-TRANS Proteus Shield - Arduino Form-Factor Translator Board can be used to reliably and safely connect 3.3V and 5.0V Arduino form factor development modules. This allows SolderCore to be used with the huge array of existing Arduino shields, without the worry of damaging the shield or the SolderCore. Furthermore, it allows the SolderCore range of shields to be used with 5.0V Arduino processor modules. SolderCore SC-TRANS Proteus Shield - Arduino Form-Factor Translator Board uses a 22-bit bidirectional voltage translator IC to bridge the 3V3/5V gap. The device is predominantly designed for digital signal conversion, however, a basic buffered signal conversion for analog signals is also provided.

Features:

- Bi-directional 3.3V to 5.0V translation
- Supports open drain/collector and standard push pull CMOS I/O
- Support for analog signals

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	SolderCore Part No.	Fig.	Description	Price Each
940-SC-TRANS	SC-TRANS	-	Proteus Shield - Voltage Translator Shield	32.05

SENSE-CORE MODULE ADAPTER BOARD

SolderCore SC-SENSE SenseCore Adapter Board is a SolderCore shield developed for rapid sensor integration. SenseCore features 4 Sensor Expansion Interface (SExI) compliant sockets, for connection to 4 full or 8 half non stacked sensor boards. SolderCore SC-SENSE SenseCore Adapter Board provides a neat and rapid test platform for an array of plug-in digital (UART, I2C, and SPI) and analog sensors.

Features:

- Neat and rapid test platform for plug-in digital (UART, I2C, and SPI) and analog sensors
- 4 full-width SExI-compliant interfaces
- I2C sensors can be stacked on top of one another
- Bus expander for implementation of SPI device select and UARTs; thus only
- Two lines and power required to interface to four full-width SExI-compliant sensor boards
- Optional IRQ line for interrupt driven communication to bus expander
- Flexible power supply, for compatibility with 3.3V and 5V systems

For quantities greater than listed, call for quote.

ADLINK Technology Embedded Computer Modules

RoHS Compliant **This product is RoHS compliant.**

ADLINK's Rugged by Design boards and systems support an endless array of applications. From delicate procedures, such as blood separation, to the frontlines of a military engagement, ADLINK boards and systems provide unsurpassed reliability and quality.

SINGLE BOARD COMPUTER

The CoreModule® line of a PC/104 compatible single board computer offers ultra low voltage performance with advanced networking, high-performance graphics and all of the PC-compatible component subsystems.
The ReadyBoard™ line of EPIC single board computers is powered by high-performance, low-power processors with advanced networking and all of the PC-compatible component subsystems with PC-style connectors.

For quantities greater than listed, call for quote.

COMPUTER-ON-MODULES

Ampro by ADLINK™ products include the most rugged computer-on-module (COM) offerings in the industry, featuring the most popular form factors and designed to provide fast time-to-market.
Our ETX® modules are available for Extreme Rugged™ applications, with an array of features all the while providing the ability to upgrade your core system without a complete redesign.

For quantities greater than listed, call for quote.

976-BATTMAN	BattMan	Smart Battery Reference Platform for COM Express Modules (equip two batteries)		673.03

EXTREME RUGGED™ COMPUTERS-ON-MODULES

Our Extreme Rugged boards and systems are designed for harsh environments from the ground up. To support the extremes of shock, vibration, humidity, and temperature, care is given to component selection, circuit design, PCB layout and materials, thermal solutions, enclosure design, and manufacturing process. Robust test methods, including Highly Accelerated Life Testing (HALT), ensure optimal product design phases and meet stringent requirements such as -40°C to +85°C operating temperature range(1), MIL-STD, shock & vibration, and long-term reliability.

For quantities greater than listed, call for quote.

ADLINK Technology Embedded Computer Modules

RoHS Compliant **This product is RoHS compliant.**

ADLINK's Rugged by Design boards and systems support an endless array of applications. From delicate procedures, such as blood separation, to the frontlines of a military engagement, ADLINK boards and systems provide unsurpassed reliability and quality.

PCI-TO-PCI EXPANSION SYSTEMS

With its state-of-the-art StarFabric high-speed serial link technology, you can expand your PCI bus of a host computer to an external chassis, which accommodates four or 13 additional PCI slots. This advanced technology provides full 32-bit/33 MHz PCI bandwidth (132MB/s) and amaximum of 10M distance between host computer and expansion chassis. The ADLINK PCI-to-PCI expansion system utilizes the concept of "serialized bridge" to provide complete hardware and software transparency to your host system.

For quantities greater than listed, call for quote.

ADLINK'S SMART PANEL

Smart Panel is a system on display providing internet access through wired or wireless connectivity with computing power on a display unit. Like a system on chip (SOC), the Smart Panel's many benefits increase the speed of electronic device development. ADLINK's Smart Panel is the first display module combining independent computer power and internet access. Its highly integrated design makes it easy to implement in fully customized systems.

RABBIT Single Board Computers

LP3500 FOX

The LP3500 Fox is a low-power single-board computer designed to operate reliably virtually any place it is deployed, especially where power is limited, such as in portable, hand-held, battery-powered, and remote monitoring systems. The LP3500 features built-in analog and digital I/O and consumes less than 20mA when fully operational and less than 100µA in power-save mode.

BL4S100 & BL4S200 SINGLE BOARD COMPUTERS

The BL4S100 is a low-cost Rabbit® 4000 microprocessor based single-board computer series that delivers ZigBee and Ethernet capability. On-board ZigBee RF modules offer mesh networking functionality to make networking easy to deploy and simple to maintain. With both Ethernet and ZigBee connectivity integrated onto the BL4S100, the series delivers a low-cost platform to design a ZigBee enabled Ethernet network.

Rabbit's BL4S200 series of single-board computers deliver the features and wireless connectivity to support networking for industrial control applications. In addition to the Ethernet and Fast Ethernet versions, the BL4S200 offers a choice of Wi-Fi and ZigBee enabled wireless networking options. The BL4S200 provides reliable hardware that has been certified by the FCC and other international agencies.

BL1800 JACKRABBIT

The Jackrabbit is RABBIT's most compact and lowest cost C-programmable single-board computer. The Jackrabbit is the perfect solution for applications that have significant cost and size constraints but need a dependable SBC. Fast number crunching is provided by a Rabbit 2000 microprocessor operating at up to 29.5MHz.

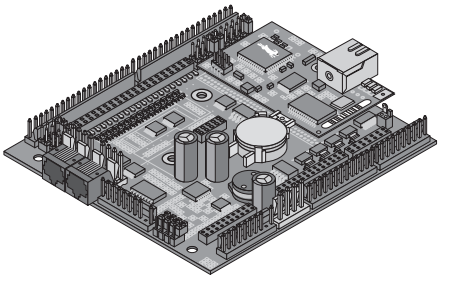
RABBIT Single Board Computers and Software

BL2600 WOLF - MODELS BL2600, BL2610

The BL2600 Wolf single-board computer provides embedded systems engineers a complete and expandable performance package. Two standard models-one with 10/100 Ethernet and one without 10/100 Ethernet - feature the Rabbit 3000® microprocessor at 44.2 and 29.4 MHz respectively, with at least 512K Flash and 512K SRAM (standard).

Programming the BL2600

Programs are developed and debugged using industry-proven Dynamic C® software, which runs on a Windows PC. The programming device is connected via a serial cable, a USB cable, or Ethernet. Comprehensive debugging support includes break points, watch expressions and many other extensive features oriented toward real-time embedded systems programming. An extensive library of drivers and sample programs is provided, including a royalty-free TCP/IP stack for network and Internet communications. Full source code is provided for most library routines.



For quantities greater than listed, call for quote.

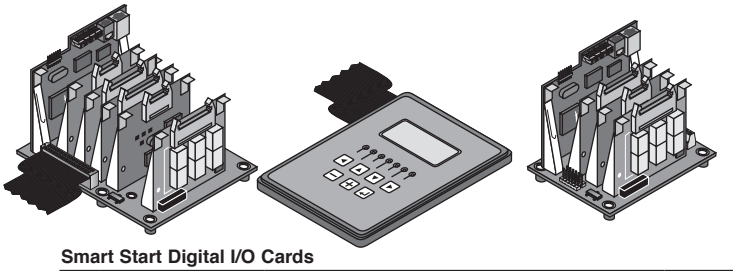
694	20-101-0542	1.27mm Connector for 10/100Base-T Option	26.75
812	20-101-0581	Connectivity Kit	19.26

SR9000 SMART START SYSTEM

The Smart Start is a modular and expandable embedded control system designed for demanding real-time control and data acquisition applications. Multiple I/O card options-including digital, A/D, D/A, and relays-allow users to closely match their specific I/O needs. The Smart Star CPU card comes in both Ethernet and non-Ethernet versions, and a cost-effective keypad/display is also available.



Ethernet connectivity - CPU card with or without Ethernet
Flexible functionality - modular configuration to easily interchange or replace individual I/O cards
Multiple I/O card options - digital I/O, A/D, D/A, relay
Expandable - up to 168 I/O
Cost-effective - low cost per I/O
Optional keyboard/display - backlit 122 x 32 pixel graphic LCD with 7 user-relegendable keys, 7 LEDs

Smart Start Backplane

BL2500 COYOTE

Gives OEM designers extremely low-cost embedded control for high-volume applications such as product control, factory equipment control, access control, HVAC, and vending machines. Two standard models—one with Ethernet, one without—feature the Rabbit 3000™ microprocessor at 29.4 MHz, with 256K Flash and 128K SRAM.

Complete Kits For New Users

3M TOUCH SYSTEMS Multitouch Capacitive Displays

RoHS Compliant **This product is RoHS compliant.**

15" MICROTOUCH DISPLAY AND BASE

Features:
- Capacitive touch screen
- All glass surface with 3M ClearTek hard coat
- 91.5% light transmission
- 225-nit brightness with touchscreen
- Bolt down bottom mount
- Peripheral attachment system
- VESA mounting compatible, 75mm
- Video Cable Connector: 15-pin D-Sub
- Power Supply: 12VDC
- Display Area WxH (mm): 304.1 x 228.1
- Dimensions WxHxD (mm): 408 x 398 x 258.7
- Frame Color: Black

For quantities greater than listed, call for quote.

22" MULTITOUCH DISPLAY

Features:
- Capacitive touch screen
- All glass surface with 3M ClearTek hard coat
- 91.5% light transmission
- 225-nit brightness with touchscreen
- VESA Pattern: 100mm x 100mm
- Video Input: DVI and VGA
- Power Supply: 12VDC
- Display Area WxH (mm): 473.8 x 296.1
- Dimensions WxHxD (mm): 500 x 328.4 x 51.87

For quantities greater than listed, call for quote.

22" MULTITOUCH DISPLAY

Features:
- Projected capacitive matrix Touch Screen
- 10 finger touch response
- All glass surface with 3M ClearTek hard coat
- Over 3300 touch sensing points
- VESA Pattern: 100mm x 100mm
- Video Input: DVI and VGA
- Power Supply: 12VDC
- Display Area WxH (mm): 473.8 x 296.1
- Dimensions WxHxD (mm): 500 x 328.4 x 51.87

22" MULTITOUCH DISPLAY AND BASE

Features:
- Projected capacitive matrix Touch Screen
- 20+ finger touch response
- All glass surface with 3M ClearTek hard coat
- Over 3300 touch sensing points
- Works with nitrile, latex, and vinyl gloves
- VESA Pattern: 100mm x 100mm
- Video Input: DVI(HDCP) and VGA
- Power Supply: Internal 110/220VAC
- Display Area WxH (mm): 473.8 x 296.1
- Dimensions WxHxD (mm): 513.2 x 337.8 x 60.2

For quantities greater than listed, call for quote.

4D SYSTEMS Display Modules and Controllers

4D SYSTEMS
TURNING TECHNOLOGY INTO ART

RoHS Compliant **This product is RoHS compliant.**

4D Systems designs and manufactures intelligent, cost effective modules for any embedded microprocessor based system or as an independent stand alone system.
Our All-in-One smart display modules offer a simple 2 wire interface to any host processor and the command set is easy to use and understand.

EMBEDDED GRAPHICS PROCESSORS AND CONTROLLERS

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	4D Systems Part No.	Description	Price Each 1	5	10
971-DIABLO-16	DIABLO-16	16 Bit Embedded Graphics Controller	24.11	22.99	21.98
971-GOLDELOX	GOLDELOX	QFN28 Package, Supports OLED and LCD displays with an 80-Series 8 bit wide CPU Interface	12.03	11.47	10.97
971-PICASO	PICASO	4DGL Controller, Supports OLED and LCD displays with an 80-Series 16 bit wide CPU Interface	18.07	17.24	16.48
971-UVGA-III	µVGA-III	Tiny VGA Graphics Controller for QVGA, VGA, WVGA	58.27	55.70	54.11

ARDUINO SHIELDS

Features:

- Powered by the 4D-Labs GOLDELOX-SGC processor
- On-board micro-SD memory card adaptor for storing of icons, images, animations, etc. Supports standard and high capacity (HC-SD) memory cards
- Easy 5 pin interface to any host device: VCC, TX, RX, GND, RESET
- 5-Way multifunction Joystick switch directly connected to Arduino D2, D3, D4, D5 and D6 pins

For quantities greater than listed, call for quote.

AMULET TECHNOLOGIES Graphical Display Solutions

Amulet Technologies
Empowering Flat Panel Displays

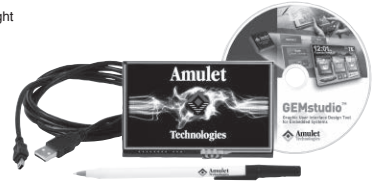
Products may be RoHS compliant. Check mouser.com for RoHS status.

Amulet Technologies offers graphical display solutions that include chips and LCD modules. All feature the solutions patented Amulet Graphical Operating System (OS). All offer easy hardware integration path from prototype to production. The chips include a dedicated GUI microprocessor, LCD controller, and graphical library. The GUI is visually created with HTML based development tools for rapidly creating good looking and feature-rich graphical user interfaces (GUI's). Amulet's expertise is graphical LCD integration and control.

GRAPHICAL OS LCD STARTER KIT - The fastest path for integrating a graphical user interface (GUI) into embedded products

Kits Include:

- Integrated TFT LCD display with white LED backlight
- Integrated touch panel and controller board
- USB PC Interface Cable
- 30-Day Trial of GEMstudio™ GUI, Amulet's embedded graphical user interface (GUI) design tool.



671-STK-480272C
Shown

PRODUCT NEW

Use this starter kit to evaluate the GRAPHICAL OS hardware and software, and to create the user-interface for your end product. Then use the module kit, and Graphical OS controller chip to go from prototype-to-production.

MOUSER STOCK NO.	Description	Price Each

GEMBOARD DISPLAY DRIVER BOARD

GEMboard can support a wide variety and growing list of 5.7" TFT panels. This board includes those unique electro-mechanical features to accommodate the FPC, touch panel and LED backlight for many popular 5.7" displays. The GEMboard also includes the Amulet Graphical Chip, a 32 megabit serial flash for storing GUI pages, a 64 megabit SDRAM, two touch panel connectors as well as two LED backlight connectors to accommodate a variety of 5.7" displays.

Features:

- Amulet AGB75LC04-QU-E 208 PQFP Graphical OS ChipTM
- Integrated resistive 4 or 5 wire touch pane; decoder with two touch panel connectors
- Supports LCDs with LED backlight 75mA or 200mA and two backlight connectors locate on backside of PCBA
- Storage Capacity-32megabit Serial Flash (GUI page storage)
- 64megabit SDRAM (frame buffer)
- Serial Interfaces-3.3v UART, USB, RS232
- Kit includes 33 pin conductor flat panel cable
- Auxiliary FPC pad can support a variety of larger panels that use 31 pin conductors.

671-CBC-2	Display Driver Board	202.23

GRAPHICAL OS CONTROLLER CHIPS

Combination LCD Controller and user-interface engine makes it easy to integrate LCD's into embedded products that use 8/16/32-bit micros and DSP's. Replaces traditional LCD controller chip. Eliminates need for complex code to draw each pixel on LCD. Chips render graphical user interface (GUI) pages containing graphic images, widgets, and other UI objects directly to LCD. Works with monochrome, and color displays. Rapidly create GUI using HTML-based development platform. Development software can be purchased separately or comes bundled with the Graphical OS Starter Kit (left).

GRAPHICAL OS LCD MODULE KITS - The most complete LCD solution for production

Amulet color modules are production ready GUI solutions that can significantly reduce time-to-market and initial project resource requirements for embedded product manufacturers. Compatible with GEMstudio™, Amulet modules can be easily programed with smartphone-like Graphical User Interfaces which can be effortlessly updated and modified.

GEMmodules™ Include:

- Integrated TFT LCD display with white LED backlight
- Integrated touch panel
- Controller board with Amulet Color Graphical OS Chip™
- On-board memory -64Mb Serial Flash for storing GUI pages

Features:

- Royalty-free Graphical Operating System™
- Supports foreign language character sets (Unicode)
- Built-in font converter
- Color Depth - up to 24bit + 8bit alpha; for best performance, 8-bit palette is recommended
- Graphics supported include: GIF, JPEG, PNG, and more

DISPLAYTECH COG Graphic Displays & RGB Backlights

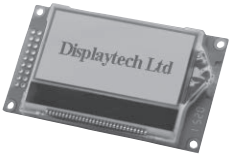
Displaytech AMERICAS a seacomp company

RoHS Compliant **This product is RoHS compliant.**

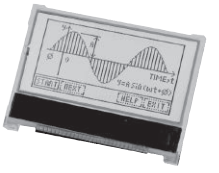
A

B

C



D



Chip On Glass (COG) Graphic Displays: By attaching the driver directly to the LCD glass it is possible to improve dot density over conventional heat seal or zebra technology. This results in the user's ability to achieve a more compact design saving space, weight, and cost. Displaytech, Ltd. is continuously expanding the range of its standard COG graphic modules, with resolution from 128 x 32 to 240 x 128 dots. These displays are offered with White LED backlight or an industry first RGB Backlight.

DISPLAYTECH COG RGB LED BACKLIGHT

RGB Backlights:
Displaytech Ltd. introduces its new line of RGB backlights, with composite red, green, and blue LED's. The three colors can be connected to be turned on individually or in combination to achieve a variety of backlight colors. For example, users can offer a product with green backlight for good conditions and red for alerts or alarms.

✻ With FPC Interface

INTEGRATED TFT DRIVER BOARDS

NEW! TECHNOLOGY

Recognizing the difficulty some customers face with products going EOL too soon, Displaytech presents its line of Integrated TFT Driver Boards. These capable embedded boards simplify design and development, provide faster time to market, and offer long term continuity of supply.

For quantities greater than listed, call for quote.

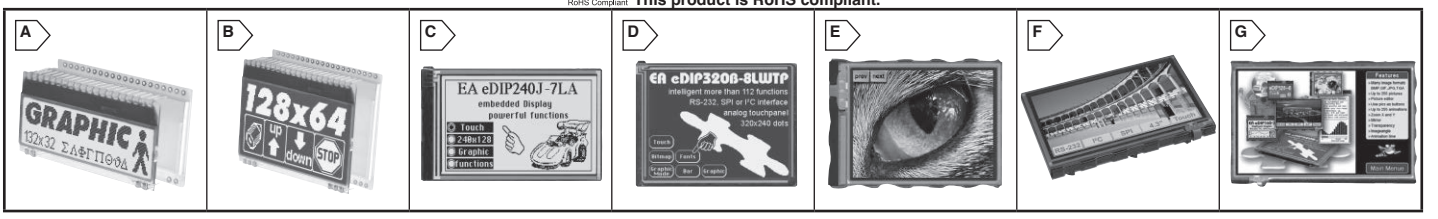
ELECTRONIC ASSEMBLY Modules and Accessories

ELECTRONIC ASSEMBLY

RoHS Compliant **This product is RoHS compliant.**



DOG M MODULES

- Runs on 3.3V systems without auxiliary power
- Also used on traditional 5V systems (character type only).
- 4-bit, 8-bit and SPI interface (4-wire)
- 4-bit, 8-bit and SPI interface (4-wire)
- Ultra-flat at 2.0 mm without backlight or 5.8 mm including LED backlight
- Typical power consumption of only 250µA in full operation
- Easy installation by simply soldering into the board
- Graphic: SPI interface only
- Graphic: 150uA (DOGM132-5) 250uA (DOGM128-6)

For quantities greater than listed, call for quote.

EPSON ELECTRONICS AMERICA Graphic Controllers

EPSON®

The EPSON LCD Controller family of products offers operating system independent display solutions for embedded markets, such as Mobile Communications, Hand-Held PCs, Office Automation, and other embedded devices. EPSON LCD controllers feature high-performance and low power consumption and include support for the most popular RISC processors. EPSON LCD Controllers support a wide range of LCD panels, including those from small to large scale and those from monochrome to color.

Support for the most popular RISC processors, in addition to all LCD panel types, provides the OEM with complete flexibility. EPSON innovative features such as EPSON Independent Simultaneous Display, SwivelView™, 2D Acceleration, "Picture-In-Picture Plus", integrated USB Client, Digital Camera Interface, and Power Saving technology combine to provide an ideal display solution for a wide variety of applications.

EPSON VOICE GUIDANCE IC

The S1V3S344 features high-compression, high-quality audio decoding functions, built-in voice data flash memory, and a DA converter, making it ideal for use in voice guidance products. The voice data creation tool for EPSON voice guidance LSI allows easy creation of high-quality voice data without the need for studio recording. All functions are controlled by commands via a serial interface for easy addition to any existing system incorporating a host.

FUJITSU LCD Touch Panels and Accessories

Products may be RoHS compliant. Check mouser.com for RoHS status.

FUJITSU TOUCH PANELS

Features:

- Superior long life using a unique construction method offering improved life over typical technologies; by sensing data input only on the glass layer typically a 10x improvement in product life is achieved.
- Excellent specification and high quality
- Anti-Newton ring technology
- High reliability materials
- 1.1mm glass with AG topcoat

RoHS Compliant

HANTRONIX LCD Display Modules

Products may be RoHS compliant. Check mouser.com for RoHS status.

HANTRONIX DISPLAY MODULES

The Hantronix Advantage is the ability to add value and provide a competitive-edge for their customers in the global market. As a partner-supplier, they are committed to delivering additional value to your business. All Hantronix production facilities are ISO9001 certified and utilize the most modern production equipment to produce the highest quality displays. Hantronix offers one of the largest selection of standard LCD's in the industry. Power Supply Voltage (VDD) is +5.0V.

Our TFT displays deliver amazingly high contrast ratio, crisp color-saturation, exceptional viewing angles, and super bright WLED backlight performance. Additionally, most of our displays are available with integrated touch panel options. Some ideal applications for our TFT displays include instrumentation, industrial controls, handhelds, medical, control/home automation, and POSITIVE/retail applications.

INFOVUE™ HIGH/LOW TEMPERATURE LCD DISPLAYS

Features:
- -40°C to +85°C
- High-resolution, high-duty daylight visibility
- Available from 8 x 1 character display up to a 320 x 240 graphic display
- Available in either positive or negative image display
- Wide variety of color choices when paired with LED backlights

Applications:
- Appliances
- Industrial controls
- Medical equipment
- Military applications

For quantities greater than listed, call for quote.

QUASARBRITE™ HIGH TEMP LED DISPLAYS

Features:
- Bright, crisp display performance in market-leading temp ranges up to 105°C
- Available in sizes from 0.28 to 4 inch character height
- Compatible with standard drivers
- Available in any standard color

Applications:
- Aircraft, ground vehicles and GPS
- Heavy motor control technologies
- Oil field and gas flow metering
- Displays on ovens, microwaves, etc.

Markets:
- Industrial controls
- Military
- Appliances

MITSUBISHI DISPLAY KITS

Mitsubishi offers TFT LCD Design Accelerator Kits to cover the most popular resolutions and interfaces, including XGA, SVGA, VGA, WXGA, WVGA in either LVDS or CMOS interface. The kits include everything you need to quickly build and demo your TFT LCD design. The Mitsubishi TFT LCD Design Accelerator Kits include a video controller, signal converter, LED backlight drivers, AC power adapter, cables, and more.

Kit Contains:

- Video controller, USB in , DVI out
- Signal converter, DVI in, LVDS/CMOS out
- LED backlight driver, 2 strings
  -4 strings LED driver by special request
  -CCFL inverter by special request
- AC power adapter
- Cabling, adapters
- Demo LCD display stand
- User manual

For quantities greater than listed, call for quote.

LCD TFT DISPLAYS

Features:

- 8, 16 or 24 bit digital interfaces
- Wide viewing angle
- Available with and without touch screens
- Wide operating temperature
- High brightness LED backlights
- Available with or without controllers

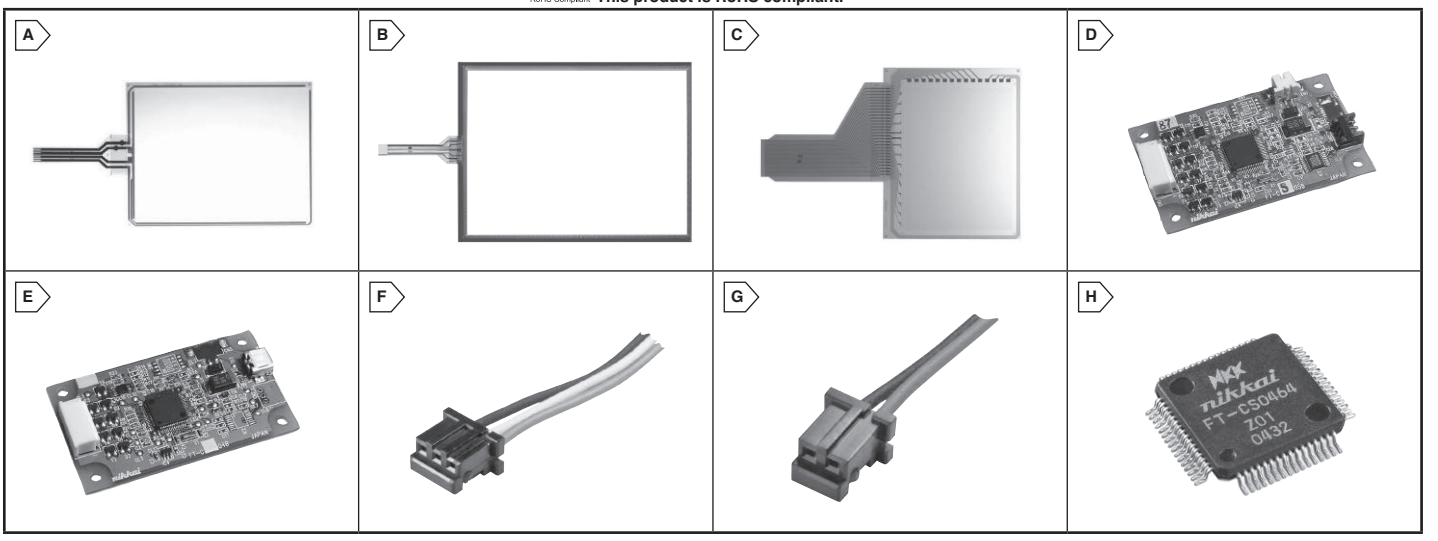
NKK SWITCHES Touch Screens

RoHS Compliant **This product is RoHS compliant.**



SERIES FT RESISTIVE TOUCH SCREENS 5 WIRE, 4 WIRE AND DIGITAL SOLUTIONS

Additional benefits of NKK's 5-wire touch screens include:

- Screens highly resistant to static electricity and noise pollution
- Drift-free operation despite any temperature fluctuation
- Greater touch point density translating to more precision and reduction of false actuations
- Quicker response time

Applications:

- Information Kiosks
- Industrial Automation
- Banking, Exchange Management Systems
- Broadcast
- Office Automation
- Medical Equipment
- Hand-held Devices
- Hospitality and Restaurant
- Gaming

Distinctive Characteristics:

- Wide Range of Available Sizes
- Custom Solutions a Specialty
- Digital and Analog Solutions
- Controllers Available
- Anti-Newton Ring (ANR) Technology
- Design Minimizes Visual Artifacts
- RoHS Compliant

LCD Touch Panel Control Board

Distinctive Characteristics:

- Interface: USB and RS232C
- High Speed and Accuracy
- Built-in Calibration Function
- Data Function Removal Built In to Eliminate Noise
- High Quality and Reliability
- Easy Integration Replacing Mouse Functionality
- Compatible with Control Board USB/RS232C
- Device Driver Compatible with Vista and Windows XP Operating Systems

For quantities greater than listed, call for quote.

IC & Accessories

Distinctive Characteristics:

- AT713 Receptacle Connector
  This Receptacle Connector with code connects to RS232C communication of the controller boards.
- AT714 is a Receptacle Connector with code to connect to power source of the control boards
- The IC is for use with the 5- and 4-wire transparent touch screens, and is available for those who prefer to design their own controller boards. When the screen is touched, it recognizes the position of the touch by the level of analog voltage detected by the A/D.
- The A/D converter receives the value and sends a set of coordinate values as serial data or US

For quantities greater than listed, call for quote.

LCD Drivers and Controllers

SUPERTEX - EL BACKLIGHTING DRIVER INTEGRATED CIRCUITS AND DEMO BOARDS

HV809 Features:
Input voltage up to 200V DC, 400V peak-to-peak output voltage, output load up to 350nF (100 in2 for 3.5nF/in2 lamp), adjustable output lamp frequency, adjustable On/Off pulsing frequency

HV823 Features:
180V peak-to-peak output voltage, large output load capability, adjustable output lamp frequency adjustable converter frequency, enable/disable function low current draw under no load condition.

HV826 Features:
1.8V to 3.5V operating supply voltage, adjustable output frequency, adjustable switch frequency, output voltage regulation, enable/disable function

HV833 Features:
1.8V to 6.5V operating supply voltage, serparately adjustable lamp and converter frequency, <100nA shutdown current, output voltage regulation, enable/disable function, output timing for high efficiency

HV830 Features:
2.0V to 9.5V operating supply voltage, 200V peak-to-peak typical output voltage, large output load capability, permits the use of high-resistance elastomeric lamp connectors, adjustable output lamp frequency, adjustable converter converter frequency, enable/disable function, low current draw under no load condiction, very low standby current

HV850 Features:
Designed to drive EL lamps of up to 2.0in2, with capacitive values up to 4.5nF, no external components needed when using an external EL clock frequency, low noise and enable function

HV857/HV857L Features:
Audible noise reduction, lamp aging compensation, wide input voltage range, 190V peak-to-peak output voltage, single cell lithium ion compatible, 150nA shutdown current, separately adjustable lamp and converter frequencies, output voltage regulation, split supply regulation

LITE-ON LED Displays

RoHS Compliant **This product is RoHS compliant.**

Providing high contrast, high brightness and wide viewing angle, Lite-On LED displays are available in a wide range of sizes, brightness and orientations. Displays can be stacked vertically or horizontally and are designed for numeric indication on applications requiring low current or low power consumption.

STMICROELECTRONICS LED DRIVERS

STMicroelectronics offers a large portfolio of compact and efficient LED drivers and solutions, fully addressing the lighting market and featuring all the functions needed to ensure greater power savings.

- ST's LED Drivers (Power Logic) comprise a complete set of state-of-the-art ICs designed for LED driving
- Targeted applications include home audio/video equipment (DVD players, set-top boxes), white goods, industrial display and instrumentation

MOUSER STOCK NO.	ST Micro Part No.	Description	Price Each
511-EVALHVLED805	EVALHVLED805	Demonstration board for use with HVLED805 PWM current mode LED driver	26.75
511-EVALHVLED815W10	EVALHVLED815W10	Demonstration board for use with HVLED 815W10 off-line LED driver	108.55
511-EVALHVLED815W15	EVALHVLED815W15	Demonstration board for use with HVLED815W15 off-line LED driver	108.55
511-STEVAL-ILL019V1	STEVAL-ILL019V1	Demonstration board that creates a flyback converter using the L6562A, to supply outputs for 4 RGGB LED modules	133.35
511-STEVAL-ILL020V1	STEVAL-ILL020V1	Demonstration board for the use of LED7706 to supply LED arrays used to backlight LCD panels	63.19
511-STEVAL-ILL021V1	STEVAL-ILL021V1	Demonstration board for the use of LED7707 to supply LED arrays used to backlight LCD panels	63.19
511-STEVAL-ILL027V2	STEVAL-ILL027V2	Demostration board for the use of L6562A as a single-stage, high power factor offline LED driver	68.16
511-STEVAL-ILL028V1	STEVAL-ILL028V1	STP1612PW05 RGB PWM LED Driver Demonstration Board	138.02
511-STEVAL-ILL032V1	STEVAL-ILL032V1	STP24DP05BTR Multicolor LED Matrix Demonstration Board	284.05
511-STEVAL-ILL035V1	STEVAL-ILL035V1	LED7708 16-Channel LED Driver with Boost Controller Demonstration Board	153.52
511-STEVAL-ILL039V1	STEVAL-ILL039V1	Demostration board for the use of STLDC08 step-up controller for 2 LEDs	51.47
511-STEVAL-ILL039V2	STEVAL-ILL039V2	Demostration board for the use of STLDC08 step-up controller for 4 LEDs	51.47
511-STEVAL-ILL043V1	STEVAL-ILL043V1	L6562A 75W High Power Flyback LED Driver Demonstration Board	210.47

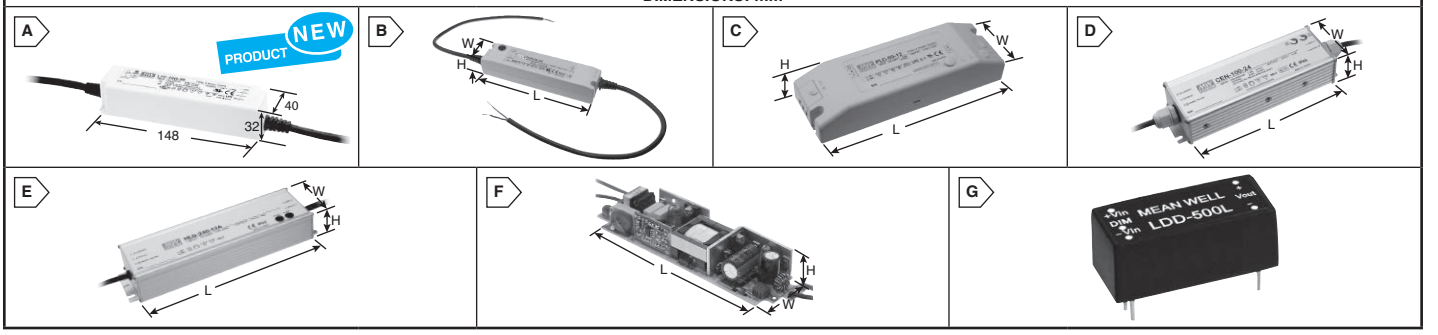
MEAN WELL Switching Power Supplies

RoHS Compliant **This product is RoHS compliant.**

DIMENSIONS: mm



MEAN WELL 16W SINGLE OUTPUT SWITCHING POWER SUPPLY

Features:
- Protections: Short circuit, Over current, Over voltage, Over temperature
- Built-in active PFC function
- Class II power unit, no FG
- Class 2 power unit
- Suitable for LED lighting and moving sign applications
- Compliance to worldwide safety regulations for lighting

For quantities greater than listed, call for quote.

MEAN WELL 20W SINGLE OUTPUT LED POWER SUPPLY

Features:
- Built-inconstant current limiting circuit with adjustable OCP level
- Protections: Short circuit, Over load, Over voltage, Over temp.
- Input Range: 90-277VAC
- Built in active PFC function

MEANWELL LDD-L /LDD-H SERIES DC-DC CONSTANT CURRENT LED DRIVER

Features:
- Built-in PWM and remote ON/OFF control
- Protections: Short circuit, Over temperature
- Cooling by free air convection
- Compact size
- Low cost, high reliability
- Suitable for driving illumination LED
- 3 years warranty
- Fully encapsulated with IP67 level

MEAN WELL 15-154W SINGLE OUTPUT LED/ENCAPSULATED POWER SUPPLIES

Features:

- Suitable for LED lighting and moving signs
- Short circuit and over voltage protection
- Fully isolated plastic case
- Cooling by free air convection
- 100% full load burn-in test
- EN61347-2-13 approved

CE

CATALYST QUAD-MODE™ CHARGE PUMP/PARALLEL CONFIGURATION

Fractional charge pumps with regulated output current

Catalyst Semiconductor's innovative, patented Quad-Mode™ charge pump switching architecture delivers high effiency levels normally associated with inductive-based LED drivers, which elminating the high-profile inductors and unwanted EMI. Most charge pump LED drivers today offer three modes of operation corresponding to the ratio of the output voltage to the input voltage: 1x, 1.5x and 2x. Catalyst's Quad-Mode™ architecture incoporates a fourth mode of operation, 1.33x, without the need for the additional capacitor required by all existing four-mode charge pumps. The 1.33x fractional operating mode also reduces the input switching currents seen at the battery, minimizing the oversupply noise - a critical parameter in devices such as cell phones. Catalyst Quad-Mode™ LED Drivers deliver 10% greater efficiency compared to traditional charge pumps, extending battery life with no added cost or components.

CALIFIA LIGHTING LED Light Fixtures and Kits

P3000 PENINSULA'S SERIES

The Peninsula's durable plastic construction makes it an economical lightweight luminaire delivering a wide range of semi-diffused light output.

Features:
- Semi Diffused
- Directional Efficiency
- Low Profile
- Long Life
- Instant On
- Mercury Free
- Lead Free
- No UV

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Bivar Part No.	Fig.	Color Temp.	Lumen Output	Efficacy (lm/W)	Color Rendering Index (CRI)	Power (W)	Input Voltage	Price Each 1	Price Each 10

C5000/C5400 COASTLINE SERIES

The Coastline series delivers high brightness performance in a very low-profile aluminum housing, making concealed placement a breeze. Suitable for all commercial and industrial applications, specifically banks, restaurants, retail, enclosures, and medical test labs.

Features:
- HB LEDs
- Low Profile
- Narrow Beam
- Built-in Dimmer
- Instant On
- Mercury Free
- Lead Free
- No UV

For quantities greater than listed, call for quote.

B7000 BAYFRONT SERIES

The Bayfront features a sturdy aluminum housing for greater durability and a diffused lens to maximize light output uniformity.

Features:
- Diffused Lens
- Directional Efficiency
- Low Profile
- Long Life
- Instant On
- Mercury Free
- Lead Free
- No UV

For quantities greater than listed, call for quote.

CREE High Power LEDs

XLAMP MC-E SERIES

Features:

- Forward Current (Max.): 700mA per LED die
- Forward Voltage (white die) @ 700mA: 3.4V
- Forward Voltage (color die) @ 700mA: 2.3-3.7V
- Individually addressable LEDs

For quantities greater than listed, call for quote.

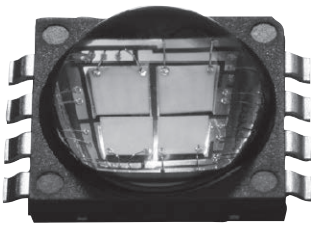
A



XLAMP MT-G SERIES EASYWHITE™ LEDS

The XLamp MT-G EasyWhite LED is optimized for high-output, small-form-factor, directional-lighting applications.

Features:

- Max. Operating Power: 25W
- Voltage Options: 6V, 36V
- Effective Thermal Resistance: 1.5°C/W
- High lumen density: 1550 lumens @ 25W @ 85°C
- Viewing Angle: 120°
- Minimum 80CRI @ 2700K and 3000K CCT

Applications:

- Directional retrofit lamps
- Accent and track
- Retail display
- Down lights
- Hospitality
- Museums and art galleries

For quantities greater than listed, call for quote.

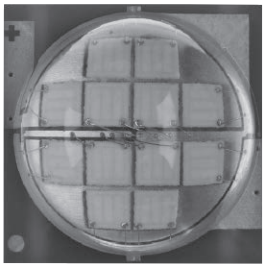
B



XLAMP MP-L SERIES EASYWHITE™ LEDS

The XLamp MP-L EasyWhite LED offers the performance, color consistency and lumen density to displace conventional light sources, in a breakthrough 12mm x 13mm package design. Combining Cree EasyWhite technology with up to 1500 lumens of light at 250mA, the MP-L EasyWhite LED simplifies system design and increases color consistency enabling new applications
previously achievable only through the use of multiple LED components

Features:

- High lumen density
- Wide Viewing Angle: 125°
- Color: Easywhite™

Applications:

- Commercial/residential directional lighting
- LED retrofit bulbs
- General indoor/outdoor illumination

For quantities greater than listed, call for quote.

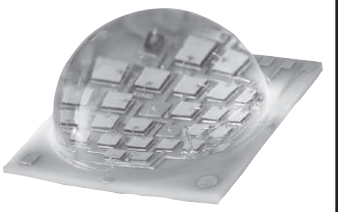
C



XLAMP CXA2011 SERIES

High-lumen, non-directional LED Arrays

Features:

- Forward Voltage: 40V
- Forward Current (Max.): 1000mA
- Reverse Current: 0.1mA
- Temperature coefficient of voltage: -35mV/°C
- Viewing Angle: 120°
- Top side solder connections
- Thermocouple attachment point

Applications:

- Surface-mount downlights
- Recessed can lights
- Pendant lights
- A19 replacement bulbs
- Exterior area lights
- Commercial wall pack

For quantities greater than listed, call for quote.

CREE High Power LEDs

XLAMP MX-3 SERIES

Enhanced light uniformity and LED-to-LED color consistency

Features:
- Forward Current (max.): 400mA
- Forward Voltage @ 350mA: 3.7
- Viewing Angle: 120°

Applications:
- LED light bulbs
- Cove lighting and wall washing
- Under-cabinet lighting
- Retail and refrigerated display
- Fluorescent replacement

For quantities greater than listed, call for quote.

XLAMP MX-6S SERIES

Designed for indoor LED lighting, with better color consistency and higher reliability than incumbent solutions.

Features:
- Forward Current (Max.): 175mA
- Forward Voltage @ 60mA: 20
- Viewing Angle: 120°

Applications:
- Indoor commercial
- Kitchen under-cabinet
- Refrigerated display
- Fluorescent replacement
- LED light bulbs

For quantities greater than listed, call for quote.

XLAMP ML-B SERIES

Features:
- Forward Current (Max.): 175mA
- Forward Voltage @ 80mA: 3.5V
- Viewing Angle: 120°

Applications:
- T5/T8 bulbs; fluorescent replacement
- Under-cabinet lighting
- Retail and refrigerated display
- Panel lights

For quantities greater than listed, call for quote.

XLAMP ML-E SERIES

Lighting-class performance in a 1/2-watt LED

Features:
- Forward Current (max.): 500mA
- Viewing Angle: 120°

Applications:
- T5/T8 bulbs; fluorescent replacement
- Under-cabinet lighting
- Retail and refrigerated display
- Panel lights

NEW PRODUCT

XLAMP XB-D SERIES

48% Smaller footprint than XLamp XP Series

Features:
- Cree's smallest lighting class LED: 2.45 x 2.45mm
- 1 A maximum drive current
- Low thermal resistance: 6.5 °C/W
- Wide viewing angle: 115°
- Reflow solderable - JEDEC J-STD-020C compatible

XLAMP XP-C SERIES

Combines the proven lighting-class performance and reliability of the XLamp XR-E LED in a package with 80% smaller footprint.

Features:
- Viewing Angle: 110-125°

Applications:
- Portable
- Backlighting
- Signage
- Retail display

For quantities greater than listed, call for quote.

XLAMP XP-E SERIES

80% smaller footprint than the X-Lamp XR-E.

Features:
- Viewing Angle: White - 115°
- Viewing Angle: Colored LEDs - 130°

Applications:
- Portable
- LED light bulbs
- Architectural
- Signage
- Retail display
- Transportation
- Emergency vehicle

For quantities greater than listed, call for quote.

XLAMP XT-E SERIES

XLamp XT-E is Cree's highest performing silicon carbide-based LED technology

Features:

- Wide viewing angle: 115-140°
- Thermal resistance: 5°C/W
- Maximum drive current: 1.5A
- Reflow solderable - JEDEC J-STD-020C Compatible

NEW PRODUCT

XLAMP XT-E SERIES ROYAL BLUE LEDS

Features:

- Available in 2.5nm wavelength bins
- High lumen density
- Characterized and binned at 85°C
- Exceptionally wide viewing angle (140°)
- Electrically isolated thermal path

For quantities greater than listed, call for quote.

CREE LED Lighting Modules

A

B

C

LMH2 MODULES

Features:

- Industry-leading module efficacy (light source + driver) at 80lm/W
- 850lm and 1250lm lighting units, the first members of an extended family of modules
- Cree TrueWhite® Technology; >90 CRI for all available CCT
- Power input of 120V/60Hz or 277V/60Hz
- Supports dimming to 5%
- UL approval (120 and 277V)
- California Title 24 compliance (120 and 277V)
- LED LM-80 data available
- Optional heat sink

For quantities greater than listed, call for quote.

LMR4 MODULES

Features:

- Cree TrueWhite technology
- Comprehensive solution with driver electronics, optics and core thermals
- 700 & 1000lm @ 2700, 3000, 3500, 4000K CCT
- Supports dimming to 5% of rated light output
- Designed to last at least 35,000 hours at L70
- Versatile form factor
- Cree IES LM-80 data in support of U. S. DOE ENERGY STAR® qualification
- The LMR4 (120V) is UL-recognized and California Title 24-compliant, and the LMR4 (230V) complies with multiple international standards
- 90mm aperture
- CRI: ≥90

For quantities greater than listed, call for quote.

LMR2 MODULES

Features:

- Cree TrueWhite technology
- Comprehensive solution with driver electronics, optics and core thermals
- 650lm @ 2700, 3000, 3500, 4000 K CCT
- Supports dimming to 5% of rated light output
- Designed to last at least 35,000 hours at L70
- Versatile form factor for small-aperture designs
- Cree IES LM-80 data in support of U.S. DOE ENERGY STAR® qualification
- The LMR2 (120V) is UL-recognized and California Title 24-compliant, and the LMR2 (230V) complies with multiple international standards (pending)
- 58mm aperture
- CRI: ≥90

For quantities greater than listed, call for quote.

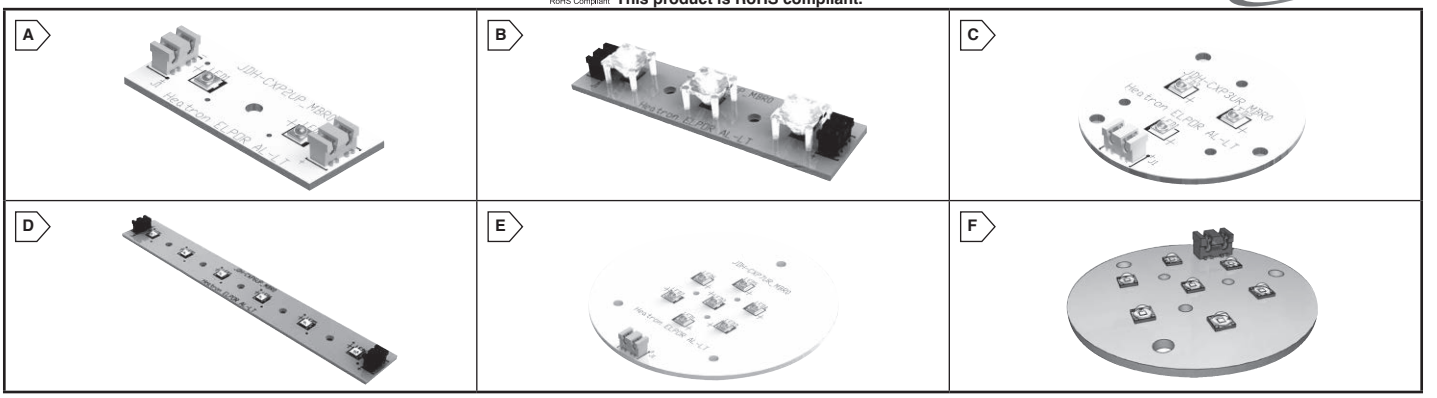
HEATRON LED Light Engines

RoHS Compliant **This product is RoHS compliant.**



HEATRON INNOVATION SERIES

Heatron's Innovation Series of Standard Light Engines were developed specifically for luminaire manufacturers allowing easy integration into any of their products. The Innovation Series is perfect for proof of concept, prototype or production builds without the NRE and tooling associated with LED development. These light engines are available in multiple color temperatures using Cree XPE and XPG emitters along with Lumileds Rebel and Rebel ES footprints. Heatron's linear light engines are available with a range of Carclo optics and our round light engine are available with a range of Khatod optics.

2-Up Linear Light Modules ✻ With lens

HEATRON LED INNOVATION KITS

Heatron's LED Innovation Kit gives you everything you need to move your next solid state lighting project from concept to production. The Innovation Kit gives you ten light engines there are designs and each of the five comes with 3000K Cree XPG and 4000K Lumileds Rebel emitters. Each light engine also comes with leads and a easy to use connector so that you can easily switch between light engines.

For quantities greater than listed, call for quote.

ILLUMITEX LEDs

RoHS Compliant **This product is RoHS compliant.**

Illumitex LEDs are high power LEDs which integrate optics directly on the LED package—eliminating the need for secondary optics while delivering maximum lumens to the intended task surface. Digital Distribution™ (DD) technology can create luminaires with 50% - 90% of light within the beam angle to produce the sharpest cut-offs available.

*Digital Distribution: percentage of light within the beam angle

Available Spectra:

F1: General Purpose and High Efficiency Growth
F3: General Purpose, Best for Germination, Flowering
F6: For Compact Plants, Especially Seedlings
F7: For Strong Suppression of Height Elongation

F5 Spectra:

450nm Blue: Supplements Blue-Deficient Lighting (e.g. High Pressure Sodium)
624nm Red: Supplements Red-Deficient Lighting (e.g. Metal Halide)
660nm Deep Red: Supplements Red-Deficient Lighting; Best for Night Interruption
730nm Far Red: Promotes Flowering of Short-Day Plants (Photosynthetically Active)

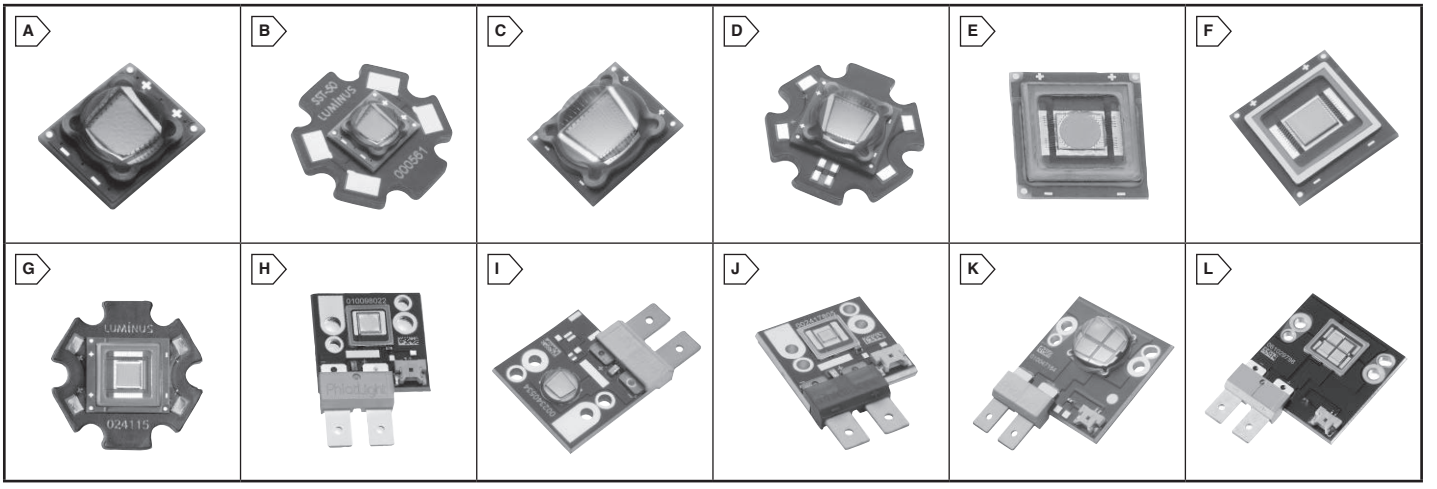
LUMINUS DEVICES Big Chip LEDs

LUMINUS
LEADER IN BIG CHIP LEDS



SST-50 SERIES

Features:
- Thermal Resistance: 2.45C°/W
- 60,000 hour L70 lifetime
- Drive Voltage: 2.5 - 3.9 volts DC
- Drive Current Range: 1.75 - 5.0 Amps

For quantities greater than listed, call for quote.

MOLEX Helieon™ Light Modules

molex one company › a world of innovation

RoHS Compliant **This product is RoHS compliant.**

MOLEX LED ARRAY HOLDERS

- Compression contacts to power array
- Double-ended wire-trap terminal to attach power source
- Releasable wire trap for rework or replacement
- Snap lock feature for optional optic
- High-temperature thermoplastic housing
- Screw-mount attachment method for securing array to heat sink

For quantities greater than listed, call for quote.

HELIEON™ SUSTAINABLE LIGHT MODULES

Features:

- Integrated solid state lighting solution for OEM fixture manufacturers, lighting designers and architects
- Multiple product options compatible with a single thermal and electronic driver system design
- Separable socketed plug-and-play solution(socket and module) with a turn-and-click installation process
- Uniform high-quality illumination with beam control optics (24, 32 and 50 degree options)
- High system efficacy enables luminaires with operating efficiencies of >50 lm/W
- Color controlled to a single 3-step MacAdams ellipse
- UL recognized (pending)
- Three year limited warranty
- Recyclable components, Pb and Mercury free, RoHS compliant

Benefits:

- Simplifies the design integration effort and accelerates time to market
- Enables flexibility to change the lighting experience after installation
- Enables separation of source and fixture,emulating traditional lighting with a familiar turn-and-click installation process
- Delivers clean white light without pixilation for precision lighting effects
- Meets or exceeds global regulatory requirements such as Energy Star, Title 24, Part L and others
- Uniform consistent white light between luminaires in the lighting installation
- Streamlines the UL-listing process for the luminaire
- Enables luminaire manufacturers to design with confidence
- Reduces environmental and disposal issues, delivering a sustainable solution

Applications:

- Down lights
- Task and accent lighting
- Spot and track lights
- Troffers and interior-area lighting
- Retail and display lighting
- Hospitality lighting
- Architectural lighting
- Decorative lighting
- Museum lighting

Notes:

1. Driving these high-current devices at low currents can result in variations in performance. For low-current operation, pulse width modulation is recommended.
2. A maximum duty cycle of 10% is recommended when operating the Helieon module at the maximum peak pulsed current specified.
3. LEDs are not designed to be driven with a reverse voltage. TYPICAL PRODUCT PERFORMANCE Helieon™ Sustainable Light Module

MAXIMUM PRODUCT RATINGS

Parameter	Maximum Rating
Maximum DC Forward Current	2000mA
Minimum DC Forward Current(1)	600mA
Maximum Peak Pulsed Current(2)	2800mA
Maximum Reverse Voltage(3)	-20V
Operating Temperature	-40°C to +95°C
Storage Temperature	-40°C to +105°C

For quantities greater than listed, call for quote.

Z-POWER LEDS

Z-Power LEDs from Seoul Semiconductor have a low thermal resistance. They are environmentally friendly, and have a low energy consumption with a high output.
Compatible Heat Sinks can be found in our Thermal Management Section of this Catalog.

For quantities greater than listed, call for quote.

ACRICH SERIES AC LEDS

Designed for AC source operations and high flux output applications, Acrich is semi-permanent and environmental friendly semiconductor lighting that can be used in AC without additional devices. Acrich's thermal management performance exceeds other power LED solutions. This series incorporates state of the art SMD design and thermal emission material. These LEDs are ideal light sources for general illumination applications.

For quantities greater than listed, call for quote.

Lenses for High Power LEDs

RoHS Compliant This product is RoHS compliant.

DBM REFLEX LIGHTING SOLUTIONS LENSES FOR HIGH POWER LEDS

Specifications:

- Optical grade PMMA lens material allows use of high current and temperature conditions
- Epoxy or Polyurethane adhesive can be used to fasten the lens to PCB
- Note - Not made to handle cyanoacrylate (superglue) adhesive

NEW PRODUCT

DIMENSIONS: mm

For quantities greater than listed, call for quote.

BIVAR LED Panel Mount Indicators and LEDs

RoHS Compliant **This product is RoHS compliant.**

NYLON HOUSING PANEL MOUNT INDICATORS

The Nylon Panel Mount Indicators feature fast press-fit, simple installation for general signal indication that does not require additional water, dust, or moisture proofing from the operating area.

For quantities greater than listed, call for quote.

METAL HOUSING PANEL MOUNT INDICATORS

The Metal Panel Mount Indicators offer a threaded metallic housing that provides positive locking for constant vibration, ideal for a robust environment. The durable metallic housing can sustain extreme heat, cold, and harsh environments, and does not require any additional water and/or moisture protection.

For quantities greater than listed, call for quote.

QUICK MOUNT NYLON PANEL MOUNT INDICATORS

The Quick Mount Nylon Panel Mount Indicator Series features a unique, quick locking mechanism, called "Quick Nut," to provide instant panel hook-up that does not require water or moisture protection. The housing and lens are made of ESD-protected material. A diffused lens provides uniform illumination and wide angle viewing capability.

For quantities greater than listed, call for quote.

IP67-RATED PANEL MOUNT INDICATORS

The IP67-Rated Panel Mount Indicators feature a forward voltage of 8-48V VAC/VDC, and a watertight seal from the front panel, ideal for waterproof and moisture protection. The housing and lens are made of ESD-protected material and the threaded housing provides positive locking for constant vibration, making these indicators ideal for use in a robust environment. A diffused lens provides uniform illumination and wide angle viewing capability.

For quantities greater than listed, call for quote.

FLEXIBLE LIGHT PIPE LENSES

BIVAR Flexible Light Pipe Lenses are designed for light pipes that return flexibility to the designer and eliminate components and costly assembly steps. The result is a practical and economical indication solution. Light pipes are the perfect solution for moving light from the source to the destination. Bivar's light pipes act as a conduit for the light allowing for distances of a few millimeters up to 100 meters.

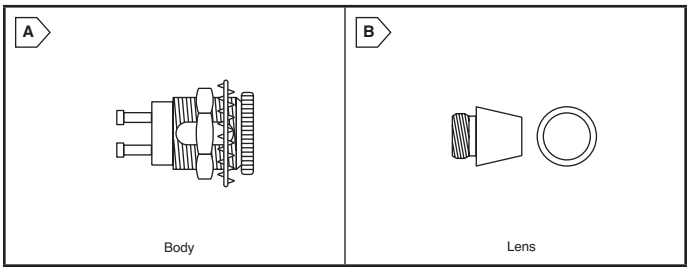
CHICAGO MINIATURE Indicators and Lamp Holders

Chicago Miniature Lighting, LLC
Lighting the world since 1910

Products may be RoHS compliant. Check mouser.com for RoHS status.

GEMLITE SUBMIDGET INDICATORS



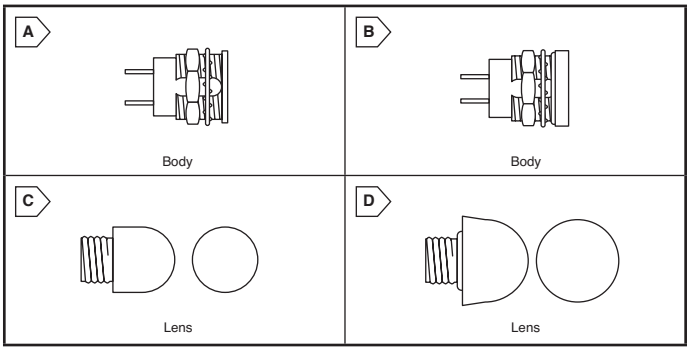
Specifications:

- Mounting hole: .313"
- Mounting centers: .469" min.
- Panel thickness: .218" max.
- Lock washer: nickel plated bronze
- Hex nut: nickel plated brass
- Lens: high temperature lexan
- Lens shank: nickel plated brass
- Housing material: black nickel plated brass
- Electrical rating: up to 30V, up to 1W

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Fig.	Description	Price Each		
			1	10	100
606-5160-458	A	T-1 sub-midget flange base indicator, body	10.69	9.27	8.91
606-160A-604R	B	Translucent red lens for 5160-48, lens	1.59	1.38	1.33
606-160A-604G	B	Translucent green lens for 5160-48, lens	1.59	1.38	1.33
606-160A-604Y	B	Translucent yellow lens for 5160-48, lens	2.29	1.98	1.90
606-160A-604W	B	Translucent white lens for 5160-48, lens	1.59	1.38	1.33

MIDGET FLANGE RELAMPABLE INDICATORS



Specifications:

- Mounting hole: .484"
- Mounting centers: .750" min.
- Panel thickness: standard=.265" watertight=.188"
- Terminals: tin plated brass
- Housing material: black anodized aluminum
- Hex nut/lock washer: chrome treated steel
- O-rings (5139 only): neoprene
- Electrical rating: up to 30V, up to 2W
- Lens: high temperature lexan

For quantities greater than listed, call for quote.

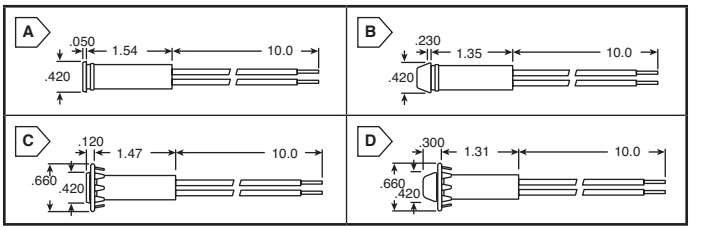
GLO-LITE NEON INDICATORS

DIMENSIONS: in.



Specifications:

- Mounting hole: 6063 Series - .375"/6073 Series - .500"
- Mounting centers: 6063 Series - .500"/6073 Series - .688"
- Panel thickness: 6063 Series - 1.25"/6073 Series - .078"
- Bezel (6073 only): chrome plated brass
- Wire leads: 22AWG stranded black 105°C PVC
- Electrical: 125VAC, built-in 30KΩ 1/4W resistor
- UL Recognized, CSA Certified

For quantities greater than listed, call for quote.

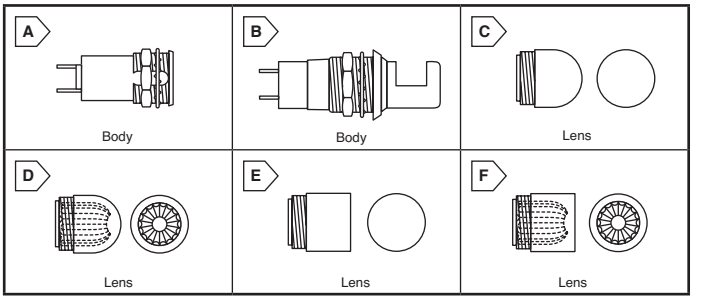
T-2 AND T-3 1/4 MINIATURE RELAMPABLE INDICATORS

(For use with Bayonet Incandescent and Neon Lamps)



Specifications:

- Mounting hole: .688"
- Mounting centers: .960" min.
- Panel thickness: .406" max.
- Lock washer: chromate treated steel
- Housing material: 5100 Series - glass filled polyester
  5200 Series - phenolic
  900-200 Series - black anodized aluminum
- Hex nut: zinc plated steel
- Lens (5100 and 5200 Series): high temperature lexan

Body

CREE Thru-Hole LEDs

RoHS Compliant **This product is RoHS compliant.**

HIGH BRIGHTNESS 4MM OVAL LEDS

Features:

- C4SMF: Matched 105x50-degree radiation pattern
- C4SMK: Matched 115x65-degree radiation pattern

Applications:

- Full-color digital signs

For quantities greater than listed, call for quote.

TRI-COLOR RGB SMD LED

These high performance tricolor SMT LEDs are designed to work in a wide range of applications. A wide viewing angle and high brightness make these LEDs suitable for outdoor and full color video signage applications.

DIALIGHT IP67/NEMA 4X Panel Mount LED Indicators

Dialight
A Roxboro Group Company

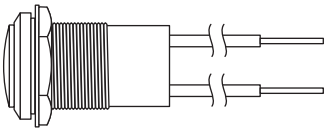
RoHS Compliant **This product is RoHS compliant.**

657 SERIES PANEL MOUNT INDICATORS

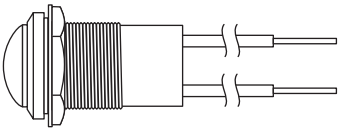
Features/Benefits:

- IP67/NEMA 4X
- Cool-to-the-touch Operation
- Daylight Viewable
- Resistant to shock and vibration
- Anti-Caplillary Wire
- LED Technology engineered for up to 100k hours of operation

A **Flat Lens**



B **Domed Lens**



For quantities greater than listed, call for quote.

INSPIRED LED Arrays, Modules and Light Bars

inspired LED

UNDER CABINET LIGHT PANELS

Light Panels are ideally suited for under the counter task lighting applications, kitchen lighting, jewelry lighting, decorative lighting and reading lighting. Light Panels are brushed aluminum in color to blend with today's kitchen styles. Components are sold as a kit and can be also purchased individually to create a system.

Features:

- Easy Installation
- Low Cost Modular Design
- Highly Efficient Power Supply
- Both Warm and Cool Color Light Options
- Low Energy Consumption
- Built in On-Off Switch for 1 Watt Light Panel
- Long Life:
  1 Watt - 80,000HRs
  2 Watt - 100,000HRs
- UV and IR free

RoHS Compliant

LED Backlighting Kit

A TV Back Light from Inspired LED can reduce eye strain by providing bias lighting in the form of an easy to install adhesive backed LED Light Strip. Bias Lighting serves to moderate or bias the range of motion in the iris muscles in the eye, which limits the size of the pupil. The frequent and sometimes dramatic variation in picture brightness from scene to scene in video programs can cause eyestrain and fatigue in an otherwise dark display environment. Our TV Back Light will provide enough light for your eyes to get their color reference, and you'll find that pictures seem a little crisper and colors more vivid.

INSPIRED LED Length Flexible Light Strips

RoHS Compliant **This product is RoHS compliant.**

FLEX STRIPS WITHOUT CONNECTORS

Series:

Bright Flex Strips - Ideal For Long Runs
Super Bright Flex Strips - Designed For More Light
Ultra Bright Flex Strips - High density light strip

Luminous Flux:

- Warm White - 2.5lm
- Cool White - 4.1lm
- Red - 1.2lm
- Green - 1.2lm
- Blue - 1lm

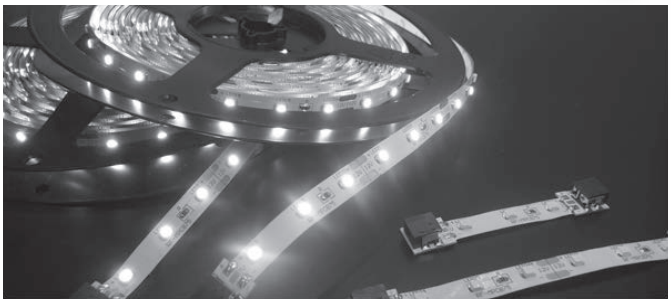
NEW PRODUCT

Features:

- Warm White, Cool White, Monochrome
- 100,000 Hours
- UV and IR Free
- 12 Volts DC, Standardized Connectivity
- Adhesive Tape Backing

Applications:

- Under Cabinet Lighting
- Kitchen Lighting
- Display Case Lighting
- Decorative Lighting
- Enclosure Lighting



For quantities greater than listed, call for quote.

LITE-ON LED Arrays and Light Bars

RoHS Compliant **This product is RoHS compliant.**

LED ARRAYS

Features:

- Rectangular light bar
- Large, bright, uniform light emitting areas
- Low power requirement
- Excellent ON-OFF contrast
- Can be used with panel and legend mount
- Easy mounting on P.C. Board
- Categorized for light output

For quantities greater than listed, call for quote.

LIGHT BARS

Features:

- Rectangular light bar
- Large, bright, uniform light emitting areas
- Low power requirement
- High brightness and high contrast
- Solid state reliability
- Easy mounting
- Categorized for luminous intensity

For quantities greater than listed, call for quote.

ROHM SEMICONDUCTOR ULTRA-COMPACT SURFACE MOUNT REMOTE CONTROL PHOTORECEIVER MODULE

ROHM's RPMS2401-H19 photoreceiver, utilizing original miniaturization technology, features the smallest[1] mounting area in the world. In addition, the S/N ratio in broad daylight is significantly improved due to ROHM's unique optical technology.

[1]January 2007 ROHM study

LEDENGIN HIGH-POWER UV LEDs

Features:

- Surface mount ceramic package with integrated glass lens
- Very low Thermal Resistance (3°C/W)
- JEDEC Level 1 for Moisture Sensitivity Level
- Reflow solderable (up to 6 cycles)

PRODUCT NEW

LUMINUS DEVICES HIGH-POWER UV LEDS

Applications:

- Curing Inks, Coatings, and Adhesives
- Inspection
- Machine Vision
- Fiber-coupled Illumination
- Specialty Projection Systems for Maskless Lithography - Optically matched to TI0.95"DMD
- Rapid Prototyping and 3D Printing
- Medical and Scientific Instrumentation

PRODUCT NEW

For quantities greater than listed, call for quote.

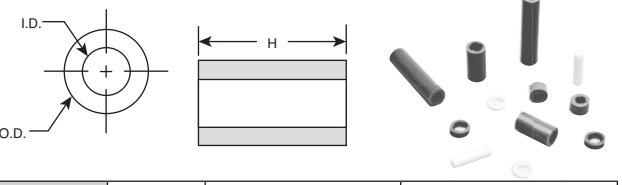
RoHS Compliant **This product is RoHS compliant.**

NYLON TUBULAR SPACERS

Universal Spacers give users an extremely wide selection of tubular spaces for mounting PCS discrete devices in any lead pattern and elevation. Seventeen basic I.D./O.D. combinations with heights ranging from .030" (.76) through 1.250" (31.8), in .005" (.13) increments are available from factory stock or within two weeks. Such a broad selection permits the user to choose the most suitable sizes for strength, elevation and ease of assembly, as well as providing for proper filleting and cleaning.



900 Series

KEYSTONE LED Holders and Spacer Mounts

KEYSTONE ELECTRONICS CORP.

RoHS Compliant **This product is RoHS compliant.**

"SNAP-IN" T-1 AND T-1 3/4 LED HOLDERS

- Material: Nylon 6/6, Black

For quantities greater than listed, call for quote.

MOUSER STOCK NO. Mfr.	Mfr. Part No.	Fig.	LED Size	Color	Mounting Hole Size (in.)	Min. Mounting Center (in.)	Panel Thickness (in.)	Price Each 1	100	500	1000

"UNIVERSAL" SPACER MOUNTS FOR TRI-LEAD T-1 (3MM) AND T-1 3/4 (5MM)

- Unique design separate leads and retains Tri-Lead (and/or Bi-Lead) components
- Designed for PC board mounting of Tri-Lead (and/or Bi-Lead) T-1 and T-1 3/4 LEDs
- Provides height control, lead retention and stability
- Also suitable for mounting lamps, resistors, transistors, diodes, capacitors, etc.
- Material: Black PVC, UL Rated 94V-0

"SELF-ALIGNING" SPACER MOUNTS FOR BI-LEAD T-1 (3MM) AND T-1 3/4 (5MM)

The spacer features an internally tapered barrier which guides the leads and eliminates the possibility of crimping and shorting. The internal configuration also assures positive self-alignment on .100 centers.

- No special tools required
- Cost and labor saving
- Material: Natural Nylon
- UL Rated 94V-2

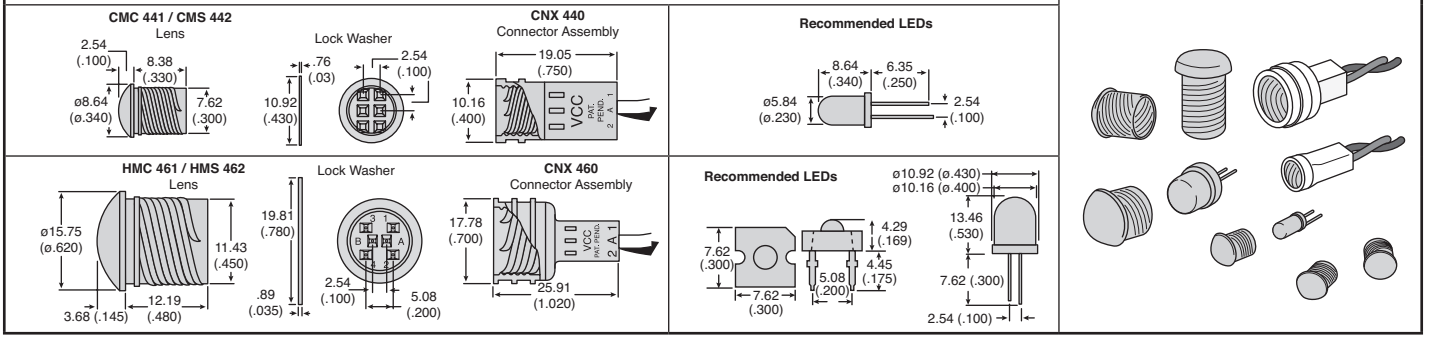
VCC LED Assemblies and Mounting Components

VCC OPTOELECTRONICS

RoHS Compliant **This product is RoHS compliant.**

DIMENSIONS: mm (in.)



CABLE ASSEMBLIES FOR 5MM AND 10MM LED LIGHTS

Features:
- 180° viewing angle for LED that have 20 to 20K mcd
- Lens threads into holder for easy assembly
- Sealed style exceeds NEMA 4 for dust, water, and ice

Additional Options:
- Can be made with 3 or 4 wire configuration
- 24AWG stranded wire

Pre-wired Solderless LED Holders - Twist Fit

For quantities greater than listed, call for quote.

CABLE ASSEMBLIES FOR 5MM LED LIGHTS WITH BUILT-IN RESISTOR

Features:
- Made for CMC441 and CMC442 Lenses
- Lens threads into holder for easy assembly
- Sealed style exceeds NEMA 4 for dust, water, and ice
- Internal Resistor to make LED to power source easy

Additional Options:
- Other resistance available
- Lead lengths from 4 to 24 inches
- 2 or 3 Position Headers available
- Custom Color wire available

For quantities greater than listed, call for quote.

VCC LED Assemblies and Mounting Components

VCC OPTOELECTRONICS

RoHS Compliant **This product is RoHS compliant.**

PRE-WIRED SOLDERLESS LED INTERCONNECTIONS

Material Specifications:

- Panel connector socket and ring: thermoplastic
- Header connector: thermoplastic (UL Listed materials)
- Terminals: phosphor bronze, tin plated
- Wire: 24AWG, 7 strand copper, insulated
- For **Locking Header** use Mouser Stock No.: 538-22-23-2021
- For **Plain Header** use Mouser Stock No.: 538-22-03-2021

Electrical Specifications:

- Terminal: 3A continuous service
- Unique three-finger design mates to round, square, or rectangular leads .017" to .025"

Insert LED into connector. Install lens in panel opening. Press connector and lens together.

MOISTURE SEALED LENSES & LIGHTPIPES

VCC LSS Series Moisture-Sealed Litepipes® provide a display panel moisture seal and 180° viewing angle with VCC's SMS 172 Series panel lens. Panel assembly is easily accomplished by slipping the unit through a .171" panel opening, sliding the retaining ring over the Litepipe® barrel, and pressing the ring on while holding the lens surface tightly against the panel. The gasket is compressed as the ring is forced into place against the rear of the panel.

Features:

- LED Size: 3mm
- Mounting Hole: 0.171in.
- Diameter: 4.91mm

VCC LED Lenses and Mounting Components

VCC OPTOELECTRONICS

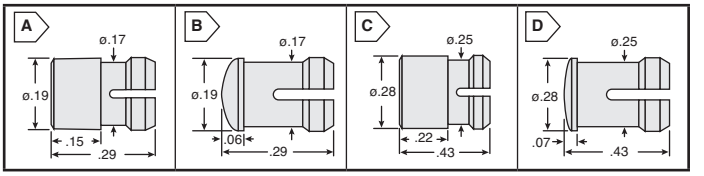
RoHS Compliant This product is RoHS compliant.

CLIPLITE® ROUND LENS MOUNTS FOR T1 AND T1-3/4 LEDS

Features:
- Provides 180° viewing angles for LEDs
- Easy snap-mount method for front panel assembly
- ESD protection for LED and internal components to 16K volts
- Lens utilize striated lines and fresnel rings to increase apparent brightness up to 125%

Specifications:
- Lens material: Polycarbonate

DIMENSIONS: in.



T1 (3mm)

For quantities greater than listed, call for quote.

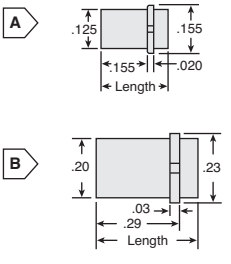
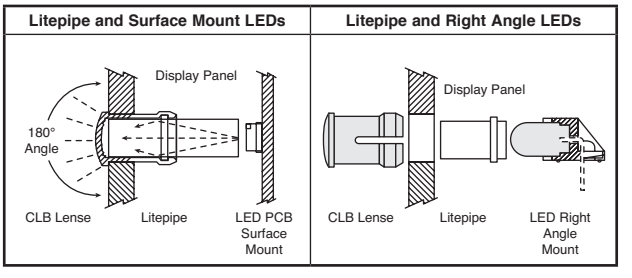
Material Specifications:
- Litepipe: acrylic (optical grade)

Mounting Specifications:
- **T1 (3mm)**: mates with lens SMB 200. Panel mounting hole .171 (4.3mm) on 1/4" centers. Panel thickness 1/32" to 1/8". Litepipe lengths from .200" to 1.200".
- **T1-3/4 (5mm)**: mate with lens CLB 300 and SQB 400. Panel mounting hole .250 (6.35mm) on 3/8" centers. Panel thickness 1/32" to 1/4". Lengths from .360" to 1.360". For panels less than 3/16" use SPC 125 spacer.

Standoff Specifications:
- Use VCC's standoff to adjust the height of a standard LED above the PCB and maintain a maximum .050" clearance between litepipe and LED

DIMENSIONS: in.





T1 (3mm) LSV Series LEDs

VCC LED Litepipes® and Mounting Components

VCC OPTOELECTRONICS

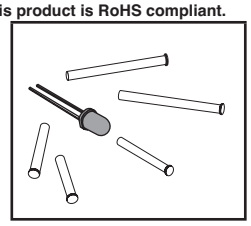
RoHS Compliant This product is RoHS compliant.

2.5MM "MICRO" LITEPIPE® ASSEMBLIES

Material Specifications:
- Litepipe®: Acrylic (optical grade)
- Grommet: Polyethylene (black)

Mounting Specifications:
- Panel hole: Round .102" Dia. (2.59mm)
- Panel thickness: 1/32" to 1/8"
- Use grommet retainer (RTN100)

Standoff Recommendation:
- Use standoff to adjust height of standard LED above PCB in order to maintain a maximum .050" clearance between LITEPIPE and LED



Surface Mount LED Application	Through-Hole LED Application

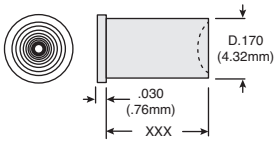
LITEPIPES® FOR SURFACE MOUNT LEDS

Material Specifications:
- Litepipe®: Acrylic (optical grade)
- Grommet: Polyethylene (black)
- Spring Clip: Spring steel, Nickel plated

Mounting Specifications:
- Panel hole: Round .171" Dia. (4.32mm)
- Panel thickness: .062" min. (1.57mm)
- Litepipes® from .200" to .500" use grommet retainer
- Litepipes® from .500" to 2.00" the spring clip is recommended for rigidity

Features:
- Surface mount, vertical and horizontal 3mm LEDs, litepipes for blending multicolor LEDs are available on special request



DIMENSIONS: in. (mm)

FLEXIBLE LIGHTPIPE FOR SMD AND THRU-HOLE LEDS

Features:
- Immune to electromagnetic interference (EMI)
- Graceful degradation under "extreme" bending conditions
- Diffused light output pattern—no hot spots or narrow field of view
- Works with CLB300, CLF280, CLR301 and SQB400 panel lenses

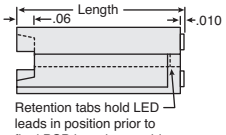
PCB STANDOFFS FOR BI AND TRI-LEAD COMPONENTS

Standoffs are designed for printed circuit board mounting of multi-lead devices ie. LEDs. They cope with various problems in mounting passive components. They include height control, lateral stability, lead retention, lead shorting, and solder flux removal. Device height control is simplified with mounts ranging in lengths from .12" to 1.0"

- Material: thermoplastic (black) UL 94V-0

DIMENSIONS: in.



Retention tabs hold LED leads in position prior to final PCB board assembly.

AVAGO Fiber Optics

Products may be RoHS compliant. Check mouser.com for RoHS status.

AVAGO FIBER OPTICS

Avago Technologies is the world's leading provider of fiber optic transmitters, receivers and transceivers for Networking and Storage solutions. Avago Technologies offers unmatched quality with high-volume, low-cost manufacturing techniques.

Fiber Optic Components for Industrial, Automotive and Consumer Applications

Optical Transmitters

Optical transmitters use either a light emitting diode (LED) or the laser diode as the light source. These devices are packaged in plastic housings and support various common connector types.

For quantities greater than listed, call for quote.

Optical Receivers

The PIN optical receiver converts the modulated light coming from the optical fiber back into a replica of the original signal applied to the transmitter.

For quantities greater than listed, call for quote.

Avago Technologies offers unmatched quality with high-volume, low-cost manufacturing techniques.

DIGITAL PROXIMITY AND ANALOG AMBIENT LIGHT SENSOR

Features:

- Integrated module with built-in IR LED, IR Detector, Digital Signal Conditioning ASIC and Analog ALS
- Package size: L 6.1mm x W 3.9mm x H 1.75mm
- Sensor power supply voltage range: 1.7V to 2.5V
- I2C Bus power supply voltage range: 1.7V to 3.6V
- Broad VLED range for PS: 2.5V to 5V
- PS Shutdown Current 1µA Typical
- ALS approximate the Human Eye response
- Low sensitivity variation across various light sources
- ALS Output linearity up-to 5k Lux range
- Operational under sunlight (PS)
- Artificial light Immunity
- Low crosstalk between Emitter and Detector
- Programmable LED driving current and burst pulse control (PS)
- Interrupt logic with Programmable Threshold
- Lead-free and ROHS Compliant

Applications:

- PDA and mobile phones
- Portable and Handheld devices
- Personal Computers/Notebooks
- Amusement/Games/Vending Machines
- Contactless Switches

RoHS Compliant

For quantities greater than listed, call for quote.

SIGNAL CONDITIONING IC OPTICAL PROXIMITY SENSORS WITH DIGITAL I²C INTERFACE

Features:

- Low power consumption
- Complete shutdown mode
- Supply voltage : 2.4V to 3.6V
- Operational in sunlight conditions up to 100klux (with HSDL-9100)
- Artificial light immunity
- Analog and Digital output available
- Wide bandwidth Trans-impedance amplifier
- External capacitor and resistor for integration and gain controls
- Flexibility to enhance detection distance up to 200mm with HSDL-9100 or further with external discrete pair
- Small 2mm x 2mm QFN 8-pin package
- Design flexibility to pair with Avago Proximity Sensors or discrete pair solution

Applications:

- PDA and mobile phones
- Digital Camera
- Portable and Handheld devices
- Personal Computers/Notebooks
- Amusement/Games/Vending Machines
- Industrial Automation
- Contactless Switches
- Sanitary Automation

RoHS Compliant

For quantities greater than listed, call for quote.

FIBER OPTIC TRANSCEIVERS

Avago Technologies portfolio of optical transceivers include ATM/SONET, Ethernet, Storage, Parallel and WDM Transceivers

Avago Technologies is the leading supplier of fiber optic transceivers, with manufacturing and testing procedures that produce the industry's most reliable devices. Avago's broad portfolio of Ethernet, SONET and Fibre Channel transceivers supports all speeds and includes transmitters and receivers for industrial and automotive applications. The company's support and order fulfillment organizations provide unmatched service and delivery worldwide.

LITE-ON LED Optocouplers

RoHS Compliant **This product is RoHS compliant.**

The Lite-On Optocoupler products feature high collector emitter and I/O isolation voltages. They are suitable for a wide-range of applications and are ideal as signal transmitters between circuits of different potentials and impedances. All Lite-On optocouplers have safety approval certificates from VDE, CSA, UL, TUV, BSI, FIMKO, NEMKO, DEMIKO and SEMIKO.

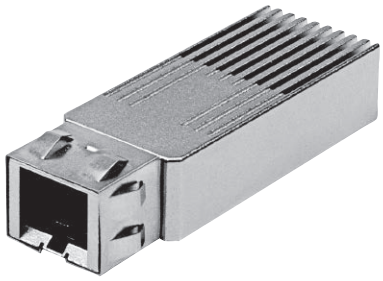
OMRON Optical Modules

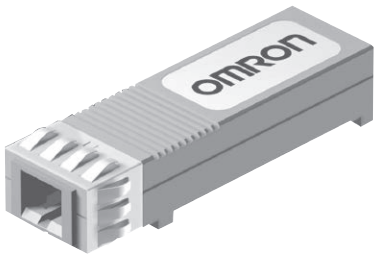
RoHS Compliant **This product is RoHS compliant.**

OMRON ELECTRONIC COMPONENTS

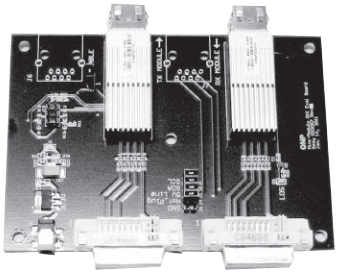
A



B



C



Omron applies a comprehensive mix of manufacturing and technological skills to innovative solutions to the Video Over Fiber market.
Omron's SX Series High Speed Optical Modules enable the transmission of High Definition video over long distances for use in:

- Operating rooms
- Emergency rooms
- Remote video consultations
- Automated homes
- Information sharing
- Training and collaboration
- Digital signage
- Security

OMRON ONP SX4 SERIES: MINI-MODULES FOR DVI

The SX4 mini-module series for DVI is an optical subassembly module that transmits four video or data channels over one multimode fiber. Each channel is capable of transmitting up to 1.65Gbps (model = V) or 3.5Gbps (model = D). With a microcontroller preprogrammed for optimal optical transmission on board, TX-SX4 module is a fully integrated electrical to optical transmitter versatile enough to be designed into a variety of systems.

Specifications:
- Number of channels: 4
- Directivity: Unidirectional
- Fiber type: One multimode fiber
- Data input: PECL, CML, and LVDS
- Data output: CML
- Electrical connector type: FPC (ZIF)

Features:
- Multiple signals over one multimode fiber
- Integrated microcontroller for laser driver control & TIA/LA
- ~ 0.5W power consumption
- Metal enclosure with SC optical interface
- Ideal for DVI applications

For quantities greater than listed, call for quote.

OMRON ONP SX51 SERIES: DATA MODULES FOR KVM

The SX51 data module series for KVM is an optical communication module that transmits over 14Gbps of data. The TX Data Module transmits up to four 3.4Gbps data channels PLUS two side-band channels (one each direction), all on a single multimode fiber. With integrated drivers and amplifiers, the TX Data Module eliminates the need for in-house optical design expertise.

Specifications:
- Number of channels: 6
- Directivity: Bidirectional
- Fiber type: One multimode fiber
- Data input: TMDS, HDMI
- Data output: TMDS, HDMI
- Electrical connector type: Plug down (PCB)

Features:
- 5 transmit lanes and 1 return lane over a single multimode fiber
- Low power consumption (1W)
- Up to 1000M
- Mechanical enclosure serves as heat sink while allowing for FCC part 15 Class A compliance
- No manipulating or compressing the data
- Small footprint
- High-speed CML inputs

For quantities greater than listed, call for quote.

RENESAS/CEL Optocouplers

RoHS Compliant **This product is RoHS compliant.**

California Eastern Laboratories

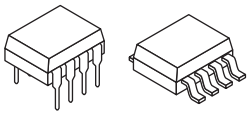
RENESAS/CEL SINGLE TRANSISTOR OPTOCOUPLERS

Applications:
Can be used as an interface circuit for various instrumentations and control equipment in the following:
- AC line/digital logic
- Twisted pair line receiver
- Digital logic/digital logic
- Telephone/telegraph line receiver

Features:
- High isolation voltage
- High current transfer ratio
- Low cost
- High speed switching

Safety Standards:
UL = UL Recognized (UL File No: E72422(S))
UL/BSI = UL Recognized and BSI Approved
UL File No.: E72422(S)/BSI Approved No.: 7112/7420

LEAD-FREE RoHS Compliant



DC Optocouplers, Low Speed Logic Applications

◆ Surface Mount — For quantities greater than listed, call for quote.

TAOS Opto Components

Products may be RoHS compliant. Check mouser.com for RoHS status.

TAOS' intelligent opto sensors simplify analog-to-digital conversion of light and are designed to reduce the need for signal conditioning or pre-processing circuitry in light-centric systems. TAOS' light sensing solutions improve system performance and reduce design-cycle time giving designers the flexibility they require.

LIGHT-TO-VOLTAGE CONVERTERS

TAOS Inc.'s Light-to-Voltage (LTV) solutions combine a photodiode and transimpedance amplifier on a single monolithic IC
The LTV family provides a linear analog voltage output that is proportional to light intensity which is normally fed to an ADC for digital processing

LIGHT-TO-FREQUENCY CONVERTERS

The LTF sensor performs the functions of light sensing, signal conditioning, and A/D conversion in a single monolithic IC
The LTF device converts light intensity to a digital format for a direct interface to a microcontroller

MOUSER STOCK NO.	Fig.	Minimum Full Scale Frequency	Dark Signal Frequency	Spectral Response (nm)	Programmable	Price Each 1	10	100	500

LIGHT-TO-DIGITAL CONVERTERS

TAOS Inc.'s Light-to-Digital Converters combine a broadband photodiode (350nm to 1100nm) with a visible light blocking photodiode in a single CMOS integrated circuit

MOUSER STOCK NO.	Fig.	Conversion Time(ms)	Dynamic Range (lux)	ADC Digital Output	Operating Voltage (Typ.)	Price Each 1	10	100	500

COLOR SENSORS, 2.7V TO 5.5V

The integrated color LTV sensors combine a photodiode, color filter, and transimpedance amplifier on a single die TAOS solution requires fewer components, saves board space and reduces assembly cost over a discrete photodiode approach

MOUSER STOCK NO.	Fig.	Output	Colors	Op. Temperature Range (TA)	Voltage Range	Price Each 1	10	25	50

DIGITAL PROXIMITY DETECTOR

The TSL2671 family of devices provides a complete proximity detection system and digital interface logic in a single 6-pin package. The device includes a digital proximity sensor with integrated LED driver for the required external IR LED.

MOUSER STOCK NO.	Fig.	Programmable Wait Time	Output Current	Op. Temperature Range (TA)	Voltage Range	Price Each 1	10	25	50

VISHAY Optocouplers

Products may be RoHS compliant. Check mouser.com for RoHS status.

PHOTO TRANSISTOR OUTPUT (CONT.)

◆Surface Mount Devices

Safety Standards:
- UL = UL Recognized (UL File No: E76222)
- UL/VDE = UL Recognized (E76222) and VDE Recognized
- UL/BSI/VDE = UL Recognized (E76222), BSI and VDE Recognized

RoHS Compliant

For quantities greater than listed, call for quote.

VISHAY Opto Components

RoHS Compliant **This product is RoHS compliant.**

FULLY INTEGRATED PROXIMITY AND AMBIENT LIGHT SENSOR WITH INFRARED EMITTER AND I²C INTERFACE

◆Surface Mount Devices

Features:
- Built in infrared LED and photo pin diode for proximity function
- Built in ambient light photo pin diode with close to human eye sensitivity characteristics.

Applications:
- Proximity sensor for mobile devices (e.g. smart phones, touch phones, PDA, GPS) for touch screen locking, power saving, etc
- Integrated ambient light function for display/keypad contrast control and dimming of mobile devices
- Proximity/optical switch for consumer, computing and industrial devices and displays
- Dimming control for consumer, computing and industrial displays

VISHAY Opto Components

RoHS Compliant **This product is RoHS compliant.**

IR RECEIVERS FOR 3D TV

Vishay Intertechnology has developed two infrared receivers speifically for the LCD shutter glasses used with 3D-ready TV sets. These receivers are designed to be assembled into active 3D glasses, where they received infrared signals from the TV set and ensure the glasses' LCD shutters open and close in proper synchronization to create the 3D effect.

Features:
- Eliminates possible interference from TV and set-top box remote control signals
- Eliminates interference with remote control emitters and receivers
- Enables more streamlined designs for 3D glasses

RECEIVERS

Features:
- High sensitivity for a large transmission range (35m/120ft)
- Available for carrier frequencies from 30kHz up to 56kHz
- No external components necessary
- Output compatible for use with a micro-controller
- Relevant quality certifications ISO 9001, QS9000VDA6.1

Applications:
- TV sets
- Video recorders
- Satellite receivers
- DVD players
- Slide projectors
- Air-conditioners
- Sensors and Light barrier systems for long distances

AMBIENT LIGHT SENSOR

Features:
- Adapted to human eye responsivity
- High photo sensitivity
- Supression filter for near infrared radiation
- Floor life: 168 h, MSL 3, acc. J-STD-020
- AEC-Q101 qualified

Applications:
- Automotive sensors
- Ambient light sensors
- Mobile phones
- Notebooks
- Computers
- Cameras
- PDA's

For quantities greater than listed, call for quote.

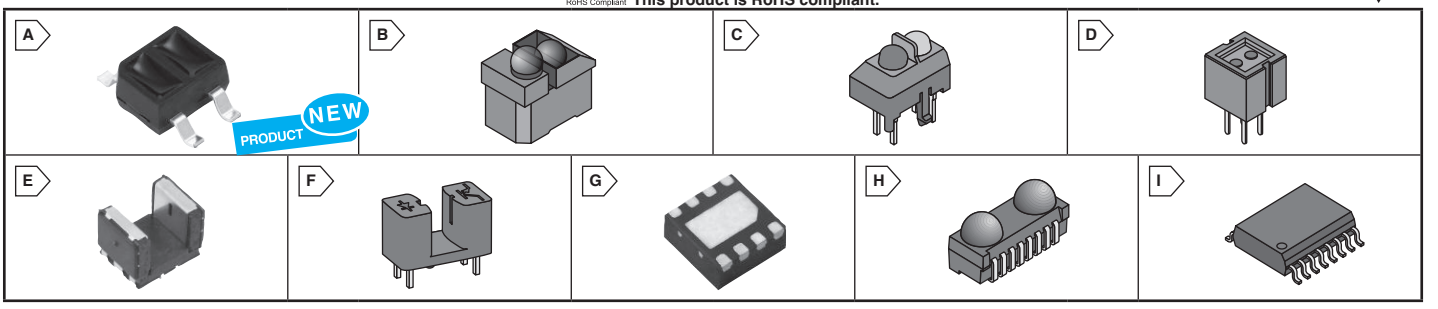
VISHAY Opto Components

RoHS Compliant **This product is RoHS compliant.**



Vishay is a leading manufacturer of optical sensors. These sensors integrate an infrared emitter and photo detector in a single package. The most common types of optical sensors are transmissive and reflective sensors. Both types detect the presence of an object without any mechanical or electrical contact. The output signal of the sensor is used to control various functions of an application.

REFLECTIVE SENSORS

Reflective sensors incorporate an infrared emitter and photo detector adjacent to each other. When an object is in the sensing area, the emitted light is reflected back towards the photo detector, the amount of light energy reaching the detector increases. This change in light energy or photo current is similarly used an input signal in the application.

TCND3000 is a reflective optical sensor for applications using the HALIOS® (High Ambient Light Independent Optical System) principle. It consists of an infrared emitter and a photodetector forming the optical sensing path. According to the HALIOS principle a second infrared emitter is used for compensation of disturbing ambient light.

Features:

- Detector type: pin photodiode
- Dimensions (L x W x H in mm): 4.83 x 2.54 x 2.21
- Peak operating distance: 20mm
- Peak operating range: 10mm to 20mm
- Typical output current under test: IC > 5.6µA
- Daylight blocking filter
- Touch distance: 10mm (1)
- Proximity distance: 20mm (1)
- High ambient light suppression for sunlight: ≥200klx
- High ambient light suppression for CIE standard illuminant A: ≥100klx

For quantities greater than listed, call for quote.

782—TCND3000		B	5	10	±20	0.01	5.6	885	----	2.83	2.55	2.15	2.01

Applications:

- Position sensor for shaft encoder
- Detection of reflective material such as paper, IBM cards, magnetic tapes etc.
- Limit switch for mechanical motions in VCR
- General purpose - wherever the space is limited
- Optoelectronic scanning and switching devices i.e., index sensing, coded disk scanning etc. (optoelectronic encoder assemblies).

For quantities greater than listed, call for quote.

TRANSMISSIVE SENSORS

Transmissive sensors, also called interrupter sensors, incorporate an infrared emitter and photo detector that face each other as shown. When an object is located between the emitter and detector in the sensing path, it interrupts or breaks the optical beam of the emitter. The light energy reaching the detector changes. This change in light energy or photo current is used to affect an event in the application.

Applications (TCPT1300):

- Automotive optical sensors
- Accurate position sensor for encoder
- Detection of motion speed

Applications (TCST1230):

- Optical switch
- Shaft encoder

For quantities greater than listed, call for quote.

IR CODE LEARNING IC

Vishay Semiconductors' VSOP98260 Preamplifier Circuit is designed for use in an IR learning application together with a photo PIN diode or IR LED as optical detector. Compatible with all data formats for IR remote controls and immune to current caused by light sources such as tungsten bulbs or fluorescent lamps. This IC takes the signal from the IR detector and then shapes and amplifies the signal. This will modulate any signal from 20 - 60kHz, and could replace up to 17 discrete components, and the output will accurately correspond to the carrier frequency and data burst length of the input signal.

PRODUCT NEW

IrDA - TRANSCEIVERS

Vishay's infrared data transceivers enable short-distance wireless communication. Design engineers in the growing handheld market trust in their performance and rely on the application engineering support that only Vishay provides. Vishay offers a transceiver for every application.

Applications:

- Mobile Phone
- PDAs
- Notebook Computers
- Digital still and video cameras
- Printers, fax machines, photo copiers, screen projectors
- Data Loggers
- GPS
- Medical data collection
- Kiosks, POS, point and pay devices including IrFM - applications
- Internet TV boxes, video conferencing systems

For quantities greater than listed, call for quote.

IrDA - ENCODER/DECODER

The TOIM4232 Endec IC provides proper pulse shaping for the SIR IrDA front end infrared transceivers as of the 4000-series. For transmitting the TOIM4232 shortens the RS232 output signal to IrDA compatible electrical pulses to drive the infrared transmitter. In the receive mode the TOIM4232 stretches the received infrared pulse to the proper bit width depending on the operating bit rate. The IrDA bit rate varies from 2.4 kbit/s to 115.2 kbit/s. The TOIM4232 is using a crystal clock 3.6864 MHz for its pulse stretching and shortening. The clock can be generated by the internal oscillator. An external oscillator can be used too. The TOIM4232 is programmable to operate from 1200 bit/s to 115.2 kbit/s by the communication software through the RS232 port. The output pulses are software programmable as either 1,627 us or 3/16 of bit time. The typical power consumption is very low with about 10 mW in operational state and in the order of a few microwatts in standby mode.

Features:

- Pulse shaping function (shortening and stretching) used in SIR IrDA applications
- Directly interfaces the SIR transceiver TFD..- and TFB..- series to an RS232 port
- Programmable baud clock generator (1200Hz to 115.2kHz), 13 baud rates
- 3/16 bit pulse duration or 1.627µs pulse selectable
- Low operating current

For quantities greater than listed, call for quote.

AVR 8-BIT RISC MICROCONTROLLERS

Atmel's low power, high performance AVR microcontrollers handle demanding 8 and 16-bit applications. With a single-cycle instruction RISC CPU, innovative picoPower® technology, and a rich feature set, the AVR achitecture ensures fast code execution combined with the lowest possible power consumption.

tinyAVR - 1KB-8KB Flash Programmable Memory

Atmel tinyAVR devices are optimized for applications that require performance, power efficiency, and ease of use in a small package. All tinyAVR devices are based on the same architecture and compatible with other AVR devices. Integrated ADC, EEPROM memory and Brown out detector let you build applications without adding external components. tinyAVR offers flash memory and on-chip debug for fast, secure, cost-effective in-circuit upgrades that significantly cuts your time to market.

megaAVR - 4KB-256KB Flash Programmable Memory

When your designs need some extra muscle, you need the megaAVR. Ideal for applications requiring large amounts of code, the megaAVR offers substantial program and data memories with performance up to 20 MIPS. Innovative picoPower technology minimizes power consumption. All megaAVRs offer self-programmability for fast, secure, cost-effective in-circuit upgrades. You can even upgrade the flash while running your application.

For quantities greater than listed, call for quote.

ATMEL Microcontrollers

RoHS Compliant **This product is RoHS compliant.**

AVR 8-BIT WIRELESS RISC MICROCONTROLLER

The ATmega128RFA1 is a low-power CMOS 8-bit microcontroller based on the AVR enhanced RISC architecture combined with a high data rate transceiver for the 2.4 GHz ISM band. It is derived from the ATmega1281 microcontroller and AT86RF231 radio tranceiver.

For quantities greater than listed, call for quote.

XMEGA 8-BIT AVR MICROCONTROLLERS

AVR XMEGA microcontrollers have the same acclaimed characteristics as the established AVR devices, and operate from just 1.6 volts with up to 32MIPS at 32MHz. The XMEGA devices are general purpose microcontrollers well suited for a variety of applications including audio systems, ZigBee®, power tools, medical, board controllers, networking, metering, optical transceivers, motor control, white goods and any battery powered product.

For quantities greater than listed, call for quote.

ATUCXXL3U MICROCONTROLLERS

The high-performance 32-bit AVR microcontroller is designed for cost-sensitive embedded applications that require low power consumption, high code density, and high performance. The device includes USB Full-speed device interface.

AT32UC3A0/A1 MICROCONTROLLERS

Designed for high data throughput, low power consumption and outstanding computing performance, the A0 and A1 Series features high connectivity with USB device and host, Ethernet MAC and SDRAM interfaces. These communication features, together with fast flash and large internal SRAM, make it ideally suited for data-intensive applications.

For quantities greater than listed, call for quote.

AT32UC3A3/A4 MICROCONTROLLERS

The AVR UC3 A3/A4 Series is designed for exceptionally high data throughput with Hi-Speed USB device and host, SD/SDIO card, Multi-Level-Cell (MLC) NAND flash with ECC and SDRAM interfaces. With its multi-layered AVR databus, 128KB on-chip SRAM split into 3 banks for higher throughput, and multi-channel peripheral and memory-to-memory DMA controller, the A3/A4 offers outstanding data transfer rates.

For quantities greater than listed, call for quote.

AT32UC3L MICROCONTROLLERS

The AVR UC3 L-Series is Atmel's first picoPower 32-bit microcontroller that runs on 165µA/MHz in active mode, 600nA with RTC running, and down to 9nA with all clocks stopped. The UC3 L-Series includes a built-in Capacitive Touch Peripheral and FlashVault allowing secure on-chip storage of software IP.

ATMEL AVR Development Tools and Accessories

RoHS Compliant **This product is RoHS compliant.**

NEW! TECHNOLOGY NEW PRODUCT

MOUSER STOCK NO.	Atmel Part No.	Description	Price Each
Starter Kits			
556-ATAVRRZUSBSTICK	ATAVRRZUSBSTICK	The AVR RZUSBSTICK consists of one USB stick with a 2.4GHz transceiver and USB connection to your PC. The AT86RF230 transceivers high sensitivity gives the longest range for wireless products while the AT90USB1287 incorporates fast USB On-The-Go.	41.46
556-ATSTK500	ATSTK500	Starter kit and development system for AVR Flash microcontrollers to develop prototypes and test new designs. The STK500 interfaces with AVR Studio ®, Atmel's Integrated Development Environment (IDE) for code writing and debugging.	84.26
556-ATSTK600	ATSTK600	Complete starter kit and development system for the AVR and AVR32 Flash microcontrollers. Designed to give designers a quick start on the AVR, combined with advanced features for using the starter kit to prototype and test new designs. Socket and adapter boards are sold separately at mouser.com.	212.66
556-ATSTK600-SC11	ATSTK600-SC11	STK600 Socketcard SOIC-14/20/24/34 Wide Adapter	52.16
556-ATSTK600-RC54	ATSTK600-RC54	STK600 20-pin TinyAVR Routing Card	16.56
556-ATSTK600-RC49	ATSTK600-RC49	UC3 D4 Series 48-pin TQFP Socket Card	16.56
Xplained Kits			
556-AT32UC3A3-XPLD	AT32UC3A3-XPLD	The UC3-A3 Xplained features the AT32UC3A3256 device which is optimized for high speed communication and protocol conversion	31.03
556-AT32UC3L0-XPLD	AT32UC3L0-XPLD	The UC3-L0 Xplained features the AT32UC3L064, which is a picoPower device optimized for low power control applications	52.92
556-ATXMEGAB1-XPLD	ATXMEGAB1-XPLD	The XMEGA-B1 Xplained Kit features the ATxmega128B1 microcontroller with a 4x40 LCD, 4 Qtouch Sensors, light sensor, temp sensor, and USB interface	33.93
556-ATXMEGAA3BU-XPLD	ATXMEGAA3BU-XPLD	The XMEGAA3BU Xplained Kit features the ATxmega256A3BU microcontroller with a 128x32 LCD display, Qtouch button, light sensor, temp sensor, and USB interface	30.01
556-ATAVRSBIN1	ATAVRSBIN1	Atmel's Inertial One sensor board delivers a full 9 degree of freedom sensor platform comprising a 3 Axis Magnetometer from AKM (AK8975);3 Axis Accelerometer from Bosch (BMA150) and a 3 Axis Gyroscope from InvenSense (ITG-3200).	25.05
556-ATAVRSBPR1	ATAVRSBPR1	Atmel's Pressure One sensor board delivers a platform comprising a high precision Barometric Pressure sensor from Bosch (BMP085).	44.18
Debug Tools			
556-ATAVRDRAGON	ATAVRDRAGON	AVR Dragon supports all programming modes for the AVR device family. Includes complete emulation support for devices w/32KB or less Flash memory.	52.16
556-ATJTAGICE2	ATJTAGICE2	Development tool for On-chip Debugging of all AVR 8-bit RISC MCUs and AVR32 32-bit DSP/MCUs with IEEE 1149.1 compliant JTAG interface.	426.66
556-ATAVRONEKIT	ATAVRONEKIT	The AVR ONE! Kit is a power development tool for on-chip debugging and programming of all AVR32 devices. Supported programming interfaces, are ISP, JTAG, and PDI. Interfaces with AVR32 Studio 2 and newer.	640.93
Development Kits			
556-ATA6613-EK	ATA6613-EK	The development board for the ATA6613 IC is designed to give designers a quick start with the ATA6613 IC and to enable prototyping and testing new LIN designs.	80.12
556-ATA6824-DK	ATA6824-DK	ATA6824 High Temperature H bridge DC Motor Control. The development board contains the H-bridge Gate Driver ATA6824, external FETs, and the microcontroller ATmega88 provides the speed signal. On the board there are only populated high temperature components.	223.36
556-ATAVRSB201	ATAVRSB201	The SB201 is an evaluation and development kit for the Atmel® Smart Battery device ATmega16HVA. This device is made for battery packs with either one or two cells in series, and features autonomous battery protection as well as very accurate voltage, current and temperature monitoring capabilities.	148.46
556-ATDVK90CAN1	ATDVK90CAN1	Development kit for use with AT90CAN AVR microcontrollers. Stand-alone board that may be plugged into the STK500 starter kit to complement evaluation and enable additional development.	120.38
Evaluation Kits			
556-ATAVRFBKIT	ATAVRFBKIT	Dimmable Fluorescent Ballast kit which demonstrate the ability of the AT90PWM2 to control all the main functions of a DALI Fluorescent Ballast	212.66
556-ATAVRBC100	ATAVRBC100	The BC100 is a reference design that demonstrates charging and discharging of two batteries/battery packs with a programmable charge voltage up to 40V.	212.66
556-ATAVRMC320	ATAVRMC320	The MC320 kit is a complete hardware system which demonstrates motor control using ATmega32M1 and features CAN and LIN connectivity. It does include the MC300 power stage board, the MC310 processor board (that can be purchased separately) and a BLDC motor.	308.96
556-ATAVRRZ600	ATAVRRZ600	The RZ600 evaluation kit enables development, debugging and demonstration of IEEE 802.15.4 compliant wireless and the AT86RF23x families of RF transceivers covering the regional 700/800/900MHz and worldwide 2.4GHz ISM bands for use with STK600.	189.93
556-ATAVRSB200	ATAVRSB200	The SB200 is a development platform for the SB20x reference designs, which offer an easy way to start evaluation and hence development of smart battery applications using the AVR® microcontrollers.	212.66
556-ATAVRBFLY	ATAVRBFLY	Evaluation tool shipped w/pre-loaded firmware supporting temperature sensing, light measurement, voltage readings and music playback.	21.39
556-ATEVK1100	ATEVK1100	The EVK1100 is an evaluation kit & development system for the AVR32 AT32UC3A microcontroller. It is equipped with a rich set of peripherals, and makes it easy to try the full potential of the AVR32 devices.	180.56
556-ATEVK1101	ATEVK1101	The EVK1101 is an evaluation kit & development system for the AVR32 AT32UC3B microcontroller. It is equipped with a rich set of peripherals, and makes it easy to try the full potential of the AVR32 devices.	159.16
556-ATEVK1105	ATEVK1105	The AVR32 EVK1105 is an evaluation kit for the AT32UC3A0512 which demonstrates Atmel's state-of-the-art AVR32 microcontroller in Hi-Fi audio decoding and streaming applications.	191.26
556-ATREB233SMAD-EK	ATREB233SMAD-EK	Evaluation Kit for AT86RF233 (IEEE 802.15.4, Zigbee, RF4CE, 6LoWPAN, ISM) Transceiver	506.91
556-EVK1060A	EVK1060A	The EVK1060A allows the user to evaluate all functions of the QT1060 touch sense controller. This kit provides a convenient reference design and allows the user to visualize discrete touch buttons, the guard channel & LED control.	81.59
556-EVK2160A	EVK2160A	The EVK2160A allows the user to evaluate all functions of the QT2160 touch sense controller. The kit provides a convenient reference design and allows the user to visualize discrete touch buttons or a touch slider LED control.	81.59
In-System Programming			
556-ATAVRISP2	ATAVRISP2	In-System Programmer used for field upgrades of AVR Flash microcontrollers. The AVRISP mkII combo w/AVR Studio® can program new AVR 8-bit RISC microcontrollers with ISP Interface.	36.11
Interface Module			
556-ATADAPCAN01	ATADAPCAN01	Extension to the STK500 and STK501 development boards adding support for the AVR AT90CAN128 device in a single development environment.	18.73
Arm-Based Microcontroller Development Kits and Tools			
556-ATSAM4L-EK	ATSAM4L-EK	Supports the SAM4L ARM MCU for Development and Evaluation	174.31
556-ATSAM4S-WPIR-RD	ATSAM4S-WPIR-RD	Supposrts the SAM4S ARM Cortex-M4 Series MCUs for development and Evaluation	297.63
556-AT91SAM9N12-EK	AT91SAM9N12-EK	Supports the AT91SAM9N12-CU Embedded ARM MCU for development and evaluation	310.30
556-AT91SAM9G15-EK	AT91SAM9G15-EK	Supports the AT91SAM9G15-CU Embedded ARM MCU for development and Evaluation	630.20
556-AT91SAM9G25-EK	AT91SAM9G25-EK	Supports the AT91SAM9G25 Embedded ARM MCU for development and Evaluation	415.66
556-AT91SAM9G35-EK	AT91SAM9G35-EK	Supports the AT91SAM9G35-CU Embedded ARM MCU for development and Evaluation	630.20
556-AT91SAM9X25-EK	AT91SAM9X25-EK	Supports the AT91SAM9X25-CU Embedded ARM MCU for development and Evaluation	415.66
556-AT91SAM9X35-EK	AT91SAM9X35-EK	Supports the AT91SAM9X35-CU Embedded ARM MCU for development and Evaluation	630.20
556-A91SAM7S-EK	AT91SAM7S-EK	Enables evaluation capabilities and code development of applications running on an AT91SAM7S device.	107.00
556-A91SAM7X-EK	AT91SAM7X-EK	Enables evaluation capabilities and code development of applications running on an AT91SAM7X microcontroller.	214.00
556-AT91SAM9G20-EK	AT91SAM9G20-EK	The AT91SAM9G20-EK Evaluation Kit supports the AT91SAM9G20 ARM926EJ-S-based 32-bit RISC microcontroller for real-time code development and evaluation.	535.00
556-AT91SAM9RL-EK	AT91SAM9RL-EK	The AT91SAM9RL-EK Evaluation Kit supports the AT91SAM9RL ARM926EJ-S-based 32-bit RISC microcontroller for real-time code development and evaluation.	802.50
556-A91SAM9261-EK	AT91SAM9261-EK	Supports the AT91SAM9261, ARM926EJ-S-based 32-bit RISC microcontroller and enables real-time code development and evaluation.	802.50
556-A91SAM9260-EK	AT91SAM9260-EK	Enables the evaluation of and code development for applications running on an AT91SAM9260 device.	535.00
556-A91SAM-ICE	AT91SAM-ICE	SAM-ICE is a JTAG emulator designed for all Atmel AT91 ARM7/ARM9 cores.	107.00
556-AT91SAM7SE-EK	AT91SAM7SE-EK	Evaluation Kit for evaluation of and code development for applications running on an AT91SAM7SE device.	214.00
556-AT91SAM9263-EK	AT91SAM9263-EK	Evaluation Kit enables the evaluation of and code development for applications running on an AT91SAM9263 device.	909.50
556-AT91SAM9XE-EK	AT91SAM9XE-EK	Evaluation Kit for SAM9XE Series	535.00
8051 Architecture Microcontroller Development Kits and Accessories			
556-AT88SC-DK1	AT88SC-DK1	Crypto Memory Adapter & Development Kit	40.13
556-A89ISP	AT89ISP	The AT89ISP Software performs in-system programming (ISP) of Atmel AT89S/LP devices. It provides an intuitive interface for in-system programming that can be run from a personal computer.	33.17
556-A89STK-05	AT89STK-05	USB Starter kit designed help developers using AT89C5131 USB Flash microcontroller. Includes: evaluation board In-System Programming tool (FLIP), and HID (Human Interface Device) keyboard demonstration program.	200.30
556-A89STK-11	AT89STK-11	Starter Kit dedicated to the In-System Programmable standard Flash C51 microcontrollers. Emulator to provide a reliable way to load and debug AtmelAT8xC51 microcontrollers.	132.41

BLACKHAWK Emulation Tools for TI DSPs

ADVANCED JTAG EMULATORS

Blackhawk™ is a leader in the design of DSP hardware and software Development tools. The first to develop a USB to JTAG emulator for Texas Instruments XDS510 class devices and next generation with the Blackhawk USB560 JTAG Emulator.

Features for USB2000:
- Super low-cost XDS510™-class controller
- Plug n' Play USB host interface
- Supports TI c2000 Digital Signal Processors: F283x, F281x, F280x, F280xx, LF240x
- 3.3/5.0 volt device I/O support
- Bi-color status LED (red/green)
- Code composer studio v3.3 support
- Blackhawk FlashBurn utility add-on
- Optional isolation adapter available

Features for USB510:
- Ultra compact designed pod with status LED
- High-speed USB 2.0 (480Mbits/sec) port
- Bus powered, no external power required
- Windows® Plug n' Play installation
- Auto-sensing low I/O voltage support
- High-speed micro coax cable assembly
- Free technical support and web downloads
- Standard 14-pin JTAG Header Connector
- Affordable price

Features for USB560:
- High-speed RTDX™ support with data rates of over 2MB/sec
- Compact pod with power and USB status indicator LED's
- High-speed USB 2.0 (480Mbits/sec) port
- Flexible 12 inch high-speed micro coax JTAG cable with 20-pin cTI (Compact TI) header
- Auto-sensing low I/O voltage support down to 0.5V
- Real-time, non-intrusive Advanced Event Triggering capability
- Windows® Plug n' Play installation
- Up to 100 times faster than XDS510 emulators
- Full Code Composer Studio IDE compatability for versions 2.2 and later
- Remote software available

MOUSER STOCK NO.	Blackhawk Part No.	Fig.	Description	Price Each
716-BH-USB-2000	BH-USB-2000	A	USB2000 Controller	319.93

716-BH-LAN-560	BH-LAN-560	E	LAN560 Emulator	2675.00

USB510 JTAG EMULATOR FOR TI DSP'S

Blackhawk has a broad range of emulator models that span the full spectrum of capabilities and price. From the entry level XDS100v2 and affordable USB2000 Controller to the most advanced XDS560v2 System Trace. All Blackhawk Emulators are backed by solid support and continual software updates to ensure compatibility with the latest Texas Instruments Devices and Platforms.

NEW! TECHNOLOGY

MOUSER STOCK NO.	Blackhawk Part No.	Fig.	Description	Price Each

EMULATION ADAPTERS

Isolation Adapter

The Blackhawk Isolation Adapter is a device that connects between your JTAG Emulator and the JTAG connector on your target board. The adapter is designed to minimize and protect connected devices (PC/Emulator/Target) from ground loop voltage, harsh environments and new, untested designs.

MOUSER STOCK NO.	Blackhawk Part No.	Fig.	Description	Price Each
716-BH-ADP-ISO-14	BH-ADP-ISO-14	-	BH Isolation Adapter 14-pin	267.50

Pin Converters

Blackhawk provides several different emulation adapters to fit Texas Instruments standard JTAG target headers. Below is a list of emulation adapters currently available from Blackhawk or an authorized Blackhawk Reseller.

USB MICROCONTROLLERS

Cypress offers the industry's broadest line of USB microcontrollers, as well as a full set of development tools, supporting cost-driven applications such as keyboards and mice, as well as high-performance applications like printers, scanners, xDSL modems, and digital cameras. Cypress has a wide range of solutions for Low-Speed USB applications, Full-Speed USB applications and USB Hub applications.

- Temperature range: commercial (0°F ~ 70°F)

CYPRESS Controllers, PHYs and CPLDs

RoHS Compliant **This product is RoHS compliant.**

USB MICROCONTROLLERS (CONT.)

Cypress offers the industry's broadest line of USB microcontrollers, as well as a full set of development tools, supporting cost-driven applications such as keyboards and mice, as well as high-performance applications like printers, scanners, xDSL modems, and digital cameras. Cypress has a wide range of solutions for Low-Speed USB applications, Full-Speed USB applications and USB Hub applications.

CAPSENSE CONTROLLERS

CapSense is available in three families. CapSense Express solutions (CY8C201xx) support simple button/slider designs with up to 10 capacitive buttons and 1 slider. CapSense solutions (CY8C20x34) are a fully-programmable platform supporting up to 25 capacitive buttons and 5 sliders. In addition, 2-dimensional trackpad solutions are also supported. The CapSensePLUS family is the most full-featured family in the CapSense portfolio. It can support up to 44 capacitive buttons and 8 sliders. CapSensePLUS also provides suppor for advanced functionalities such as proximity detection, 2-dimensional trackpads and analog/digital design integration. The newest 8C20xx6 family adds 1.8V and best in class current consumption with up to 33CS buttons.

TRUETOUCH™ TOUCHSCREEN SOLUTIONS

Cypress, the leader in capacitive touch sensing solutions, is revolutionizing the touchscreen market. Cypress' TrueTouch™ Touchscreen Solutions, powered by PSoC® Programmable-System-on-Chip technology, offer unmatched flexibility and the broadest portfolio available. The projected capacitive TrueTouch Solutions give designers a choice between different usage models, different touchscreen vendors and different LCD vendors. They also enable designers to accommodate last minute changes - something no other touchscreen product can deliver.

ENERGY MICRO Microcontrollers

RoHS Compliant **This product is RoHS compliant.**

EFM32 GECKO MICROCONTROLLERS

Features:

- 32-bit ARM Cortex-M3 running up to 32MHz
- Single 1.8 to 3.8 volt power supply
- 16 External Interrupts
- External Bus Interface (EBI)
- Direct memory accessController (DMA)
- Hardware AES with 128/256-bit encryption and decryption
- Integrated high and low frequency oscillators
- USARTs with UART and SPI modes up 16M-bit/s
- 16-bit Timer/Counters with Compare/Capture
- Low Energy TIMER with optional pulse outputs
- Flexible 24-bit Real Time Counter
- 12-bit ADC,and DAC
- Analog Comparators with 8 input mux and capacitive sensing capability

GIANT GECKO

Features:

- Timers/Counters
  - 4×16-bit Timer/Counter
  - 4×3 Compare/Capture/PWM channels
  - 16-bit Low Energy Timer
  - 1×24-bit and 1×32-bit Real-Time Counter
  - 3×16/8-bit Pulse Counter with asynchronous operation
  - Watchdog Timer with dedicated RC oscillator @ 50nA
- Communication Interfaces
  - 3× Universal Synchronous/Asynchronous Receiver/Transmitter
  - UART/SPI/SmartCard (ISO7816)/IrDA/I2S
  - Autonomous operation with DMA in Deep Sleep Mode
  - 2×I2C Interface with SMBus support
- 12 Channel DMA Controller
- Hardware AES with 128/256-bit keys in 54/75 cycles
- ARM Cortex-M3 CPU platform High Performance 32-bit processor @ up to 48MHz MPU
- Low Energy Sensor Interface (LESENSE)
- Debug Interface
- Pre-Programmed Serial Bootloader
- Temperature range -40 to 85ºC

For quantities greater than listed, call for quote.

ELPROTRONIC Flash Programmers

RoHS Compliant This product is RoHS compliant.

FLASH PROGRAMMERS FOR MSP430 MICROCONTROLLERS FROM TI

FlashPro430

Includes USB-FPA-4.x adapter (RoHS), USB cable, JTAG/Spy-Bi-Wire/BSL Ribbon cable, CD with software and documentation. Each adapter contains an access key - STD, LJB..etc. Access key can be upgraded via email at any time.

Standard software versions STD and UNIV

FlashPro430 software (GUI) with serialization and script-file commands. MSP430.dll for debugging, Multi FPA API-DLL for remote control from external software. Supports communication via JTAG/Spy-Bi-Wire and BSL. Multi-FPA API-DLL demo with source code written in Visual C++.net, Visual Basic.net, LabVIEW and DOS. Command line interpreter.

Lite software versions (LJB, LJ, LB)

FlashPro430 software (GUI) without serialization and without script-file commands. MSP430.dll for debugging. Supports communication via JTAG/Spy-Bi-Wire and BSL (LJB), via JTAG/Spy-Bi-Wire (LJ) or via BSL only (LB).

RoHS Compliant

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Elprotronic Part No.	Description	Price Each
715-USBMSP430FPASTD	USB-MSP430-FPA-STD	JTAG/SBW and BSL - Standard Software Version	319.93
715-USBMSP430FPALJB	USB-MSP430-FPA-LJB	JTAG/SBW and BSL - Lite Software Version	234.33

GangPro430

Includes USB-FPA-5.0 adapter (RoHS), USB cable, JTAG/Spy-Bi-Wire/BSL ribbon cable, CD with software and documentation. Software GangPro430 (access to up to six target devices) and FlashPro430 (one target device only) with serialization and script file commands, Multi-FPA API-DLL for remote control from external software and MSP430.dll for debugging. Multi-FPA API-DLL demo with source code written in Visual C++.net, Visual Basic.net, LabVIEW and DOS.

Each adapter contains an access key - JB (JTAG/Spy-Bi-Wire/BSL) or J (JTAG/Spy-Bi-Wire). Access key can be upgraded from J to JB via email at any time.
Note: The Gang Splitter is not included in the GangPro430 programmer's package. Order it separately if required.

RoHS Compliant

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Elprotronic Part No.	Description	Price Each
715-USBMSP430FPAGANG	USB-MSP430-FPA-GANG-JB	JTAG/SBW and BSL Software Version	362.73

Gang Splitter

Gang Splitter with ribbon cables for the GangPro430 Programmer. Simplify connection between Gang programming adapter and six target devices. Supports JTAG, Spy-Bi-Wire and BSL interface.

RoHS Compliant

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Elprotronic Part No.	Description	Price Each
715-PE014X02	PE014X02	Gang Splitter for GangPro430	40.66

FLASH PROGRAMMERS FOR CHIPCON CCXXMCU - CHIPCON PRODUCTS FROM TI

GangPro-CC

Includes USB-FPA-5.0 (RoHS) adapter, GangPro-CC Splitter, six SoC/Debug 10-wires ribbon cables, CD with software and documentation. Software GangPro-CC (access ti up to six target devices) and FlashPro-CC (one target device) with IEEE addressing, serialization and script-file commands, Multi-FPA API-DLL and command line interpreter for remote control from external software. Multi-FPA API-DLL demo with source code written in Visual C++.net.

RoHS Compliant

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Elprotronic Part No.	Description	Price Each
715-GANGPRO-CC-STD	GangPro-CC-STD	Gang Programmer for TI's Chipcon MCU	362.73

FlashPro-CC

Includes USB-FPA-4.x (RoHS) adapter, USB cable, SoC/Debug 10-wires ribbon cable, CD with software and documentation. Each adapter contains an access key-LITE or STD. Access key from the LITE to STD version can be upgraded via email at any time.

Standard software versions (STD)

FlashPro-CC software (GUI) with IEEE addressing, serialization and script-file commands. Multi-FPA API-DLL and command line interpreter for remote control from external software. Multi-FPA API-DLL demo with source code written in Visual C++.net.

RoHS Compliant

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Elprotronic Part No.	Description	Price Each
715-FLASHPRO-CC-STD	FlashPro-CC-STD	Standard Software Version	319.93

FLASH PROGRAMMERS FOR C2000 MCU FROM TI

FlashPro2000

Includes USB-FPA-4.x (RoHS) adapter, USB cable, FPA to JTAG adapter,14-wires ribbon cable, FPA to SCI-BOOT adapter,10-wires ribbon cable, CD with software and documentation. Each adapter contains an access key - LITE or STD. Access key from the LITE to STD version can be upgraded via email at any time.

Standard software package (STD)

FlashPro2000 (PN: FP2000-STD): Hardware as above, software (GUI) with serialization and script-file commands. Multi-FPA API-DLL and command line interpreter for remote control from external software. Multi-FPA API-DLL demo with source code written in Visual C++.net.

RoHS Compliant

For quantities greater than listed, call for quote.

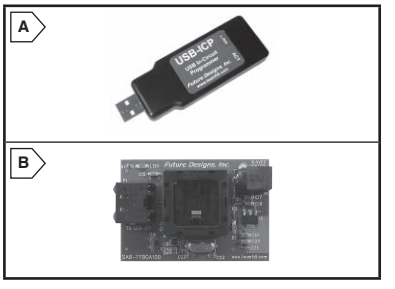
IN-CIRCUIT PROGRAMMERS AND ACCESSORIES

FDI has developed a family of PC based support products for the I2C bus and also for ISP (In System Programming) of Flash based microcontrollers from NXP and other vendors.

Features:
- Supports NXP's P89C51, ARM LPC2K, and P89LPC900 families of microcontrollers
- USB port Power so no external power supply required
- Supports USB 1.1 to 2.0
- Plugs directly into any standard USB port
- Works with NXP free Flash Magic software
- USB-ICP supports Target Device Voltage range of 3.0V - 5.0V only



✻ Requires USB-In-Circuit Programmer 786-USB-ICP-LPC2K which is sold separately

MOUSER STOCK NO.	FDI Part No.	Fig.	Description	Price Each
786-USB-ICP-80C51ISP	USB-ICP-80C51ISP	A	USB In-Circuit Programmer, Rev 1, 80C51ISP	73.83

FREESCALE Kinetis Cortex M-4 MCUs

freescale™

RoHS Compliant **This product is RoHS compliant.**

FREEDOM DEVELOPMENT PLATFORM

Features:

- KL25Z128VLK4—Cortex-M0+ MCU with: 128KB flash, 16KB SRAM
  Up to 48MHz operation
  USB full-speed controller
- OpenSDA—sophisticated USB debug interface
- I2S interface for direct audio interfacing with an external ADC/DAC
- Tri-color LED
- Capacitive touch "slider"
- Freescale MMA8451QR1 accelerometer
- Flexible power supply options
- Power from either on-board USB connector
- 5-12V Vin from IO header
- 5V provided to IO header
- 3.3V to or from IO header
- Reset button
- Expansion IO compatible with the Arduino Uno form factor

PRODUCT NEW

841-FREEDOM-KL25Z	FRDM-KL25Z	Kinetis L Series Arm Cortex M0+ Development Board	13.86

KINETIS K SERIES ARM CORTEX-M4 MICROCONTROLLERS

The Kinetis portfolio of microcontrollers pairs the efficient ARM® Cortex™ -M4 core with cutting–edge, low–power design techniques. The result is the industry's lowest power Cortex–M4 based MCU solutions.

- New Cortex–M4 core with single cycle DSP instructions paired with Freescale's efficient platform
- 90nm Thin Film Storage (TFS) process technology allows dynamic power to be reduced to as low as 200μA/MHz
- Special design techniques used to reduce leakage allowing lower power standby modes
- Flexible mode controller enables 10 different modes of operation which allows power reduction based on the application requirements
- MCU and many peripherals are able to operate down to 1.71V with full analog and flash capabilities
- MCU architecture supports adjustable clocking for peripherals and the core enabling quick changes to MCU clocks and different clock speeds
- Separate power supply for the Real Time Clock (RTC) allows low power time keeping with less than 1μA power consumption

Kinetis K10 - Baseline MCUs

- Serial Interface Type: UART, SPI, I2C, I2S, CAN
- Touch Sensing Interface
- Memory Protection Unit (MPU)
- Watchdog OSC/Timer
- Real-Time Clock
- Analog Comparator
- Supply Voltage: 1.71 to 3.6V

For quantities greater than listed, call for quote.

Freescale's Flexis Series Microcontrollers provide the industry's first roadmap for 8- and 32-bit compatible architectures. From the S08 controllers to the full-featured ColdFire® devices,the Flexis Series is a range of compatible MCUs sharing tools and peripherals to ease your design process and accelerate your time to market. This means that you can move from one device to the next compatible device, from the low end to the high end.

FLEXIS JM FAMILY

The S08JM family extends Freescale's 8-bit embedded USB controller family with up to 60K-bytes of Flash memory, a full speed USB 2.0 device controller and a 12-channel, 12-bit analog-to-digital converter. The S08 JM family also has several system protection features, such as low voltage detect and a Computer Operating Properly (COP) module. The S08JM family devices, are supported by the Freescale USB-LITE Stack by CMX, providing a direct migration path to high performing USB microcontrollers.

FLEXIS QE FAMILY

The Flexis QE series hosts Freescale's new ultra-low-power technology that reduces power consumption while meeting your target performance needs. The Flexis devices also share common sets of peripherals and development tools to deliver the ultimate in migration flexibility. The MC9S08QE128 (8-bit) and MCF51QE128 (32-bit) devices are available to maximize your performance while minimizing your power and allowing easy migration and development. The QE family, comprised of a pin-compatible 8-bit and 32-bit device duo, is the first family in the Flexis series.

RoHS Compliant

For quantities greater than listed, call for quote.

RS08 - REDUCED INSTRUCTION SET S08 CORE MICROCONTROLLERS

The RS08 core is a reduced version of the S08 central processing unit (CPU) that has been specifically designed for small pin-count devices with under 16KB memory. Thirty percent smaller than the S08 CPU, it is more efficient and cost-effective for simple electro-mechanical devices that are migrating to fully solid-state electronic operation or portable devices that have evolved into smaller or even disposable versions.

RoHS Compliant

♦Surface Mount Device

HCS08 - CORE MICROCONTROLLERS

High-performance and low power, the HCS08 does not sacrifice performance to provide low power 1.8V operation.
HCS08 Features - Multiple power management modes, including a 20 nanoamp (nA) power-down mode

- A zero-component auto-wakeup from "stop" to help reduce costs and reduce power to 0.7 microamp (μA) - Up to 40MHz CPU/20MHz bus at 2.1V and 16MHz CPU/8MHz bus at 1.8V
- A programmable internal clock generator with temperature and voltage compensation (typical drift < 2%) designed for reliable communications, fast start up and reduced system cost
- In-application reprogramming and data storage via third-generation 0.25μ flash technology
- High integration including four serial communication ports, up to 8 timer/PWMs, and an 8-channel 10-bit analog-to-digital converter specified down to 1.8V

RoHS Compliant

S08JS Family - Full-Speed 2.0 USB Device Controller and Integrated USB Transceiver

The JS16 extends Freescale's entry-level 8-bit embedded USB controller family with up to 16KB of flash memory and a full-speed USB 2.0 device controller. The JS16 also has several features for system protection, such as low voltage detection and a Computer Operating Properly (COP) module. The JS16 device is ideal for a variety of industrial control applications and consumer devices, including PC peripherals and remote controls.

S08LL Ultra Low-Power MCU with Integrated LCD Driver

Freescale introduces the first S08 ultra-low-power MCU with LCD driver. The MC9S08LL16/8 helps you reach your target performance levels while minimizing power consumption in your design, demonstrating extreme energy efficiency for ultra-long operation in battery-powered applications.

For quantities greater than listed, call for quote.

S08EL/S08SL with Enbedded Slave LIN Controller (SLIC)

Freescale's S08EL andS08SL 8-bit microcontrollers with embedded slave Local Interconnect Network (LIN) interface controller (SLIC) and EEPROM help to increase LIN slave performance and reduce development time. Freescale Semiconductor's 8-bit EL and SL families of microcontrollers (MCUs) are designed for LIN slave and general market applications. The EL family is positioned as higher end, offering higher memory and more peripherals, while the SL family is intended for more cost-sensitive applications.

For quantities greater than listed, call for quote.

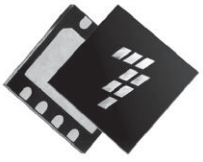
HC08 CORE MICROCONTROLLERS

Free's HC08 Family of 8-bit microcontrollers are small, general purpose, low-power and feature rich. The HC08 Core products are highly integrated, general purpose devices with ADC, analog comparator, multiple communications options, timers, and on-chip ICE.

From a basic bare-bones controllers in a tiny 8-pin quad flat non-leaded (QFN) package to feature-rich silicon in a 64-lead quad flat package (QFP), the HC08 MCU is an industry workhorse that can flaunt an impressive array of peripherals.

- 8 or 10-bit analog-to-digital converters (ADCs)
- Multichanel timers
- A wide variety of communications protocol support, inculding universal serial bus (USB), controller area network (CAN), local interconnect network (LIN), J1850 and radio frequency (RF)



HC08EY Family - Low Cost, High-Performance M68HC08 8-Bit MCU

COLDFIRE® MCF51CN128 FAMILY - 32-BIT ETHERNET MCUS

Freescale's new MCF51CN128 Ethernet MCUs are low-cost, low-power, high-performance devices designed for developers who want to add Ethernet connectivity to their commercial and industrial applications.

For quantities greater than listed, call for quote.

COLDFIRE® MCF51EM FAMILY - 32-BIT RISC MICROCONTROLLERS

The MCF51EM256/128 devices offer a flexible LCD controller, RTC with tamper detection, and dual 128K/64K blocks of FLASH for robust field firmware updates. Combine this with an accessible Poly-Phase Reference Design and a fully functional DEMOEM board and you have all the ingredients of a turnkey electrical metering solution with customized silicon designed specifically for the electrical metering market.

For quantities greater than listed, call for quote.

COLDFIRE® MCF5225X EXPANDED CONNECTIVITY MCUS

The MCF5225x family consists of highly integrated devices with on-chip USB, Ethernet, CAN and encryption functions, featuring the complete Freescale MQX RTOS software at no additional cost. This solution is ideal for factory automation, building control, and medical applications.

For quantities greater than listed, call for quote.

COLDFIRE® 32-BIT MICROCONTROLLERS

NEW PRODUCT

The ColdFire® product portfolio offers a wide mix of performance, price, integration and debugging capabilities for embedded designers. Its integration possibilities are limited only by imagination, and its 20-year history of 68K legacy is something no other competitor can offer. With these features to work with, the ColdFire® architecture is in a leadership position in the 32-bit embedded space.

For quantities greater than listed, call for quote.

MPC5125 - LOW POWER, HIGH PERFORMANCE MICROPROCESSOR

Features:

- Robust high-performance Power Architecture™ display solution at a low-cost/power-efficient point with full OS and middleware support.
- Dual 10/100BT Ethernet for bridging solutions
- Display interface supporting WXGA/720p, 24-bit color
- Rich set of connectivity:
  - 10x Flexible PSC (SPI, UART, AC'97, I2S, Multi-Ch TDM)
  - 4x CAN2.0 A/B , data rates in excess of 1Mbs
  - 2x High Speed USB 2.0 Host/Device/On-The-Go
  - 2x SDHC (MMC, SD, SDIO expansion)

MC56F800x DIGITAL SIGNAL CONTROLLERS

The entry-level MC56F8006/2 DSC provides the most cost-optimized solution for mathematically-intensive, power-sensitive real-time control applications. The MC56F8006/2 series uses the 56800E core, which is based on a dual Harvard-style architecture consisting of three execution units operating in parallel. This allows as many as six operations per instruction cycle. The MCU-style programming model and optimized instruction set allow straightforward generation of efficient, compact DSP and control code.

For quantities greater than listed, call for quote.

841—DEMO9S08SH32		S08SH Family Demonstration board	73.83
841—EML08QCBLTYE		Emulator for QB,QC,QL, QT and QY Families	529.76
841—USBMULTILINK08E		USB MON08 Multilink	105.93
841—USBMULTILINKBDME		USB HCS08/HCS12 BDM Multilink - In-Circuit Debugger/Programmer	105.93
841—EVBUSB2SER		USB to Serial Bridge Evaluation Board	21.39
841—M68CYCLONEPROE		Universal Standalone In-Circuit Debugger/Programmer	533.72
841—DC9S08QB8		Development Tools DC for DEMO9S08QB8	10.70
841—DEMO9RS08KB12		Development Tools KB12 DEMO Board	63.13
841—DEMO9RS08LE4		Development Tools LE4 Family Demo Board	63.13
841—DEMO9S08FL16		Development Tools Demo Board for MC9S08SV16 or MC9S08FL16	52.43
841—DEMO9S08SF4		Development Tools Demo Board for S08SF4	52.43
841—DEMO9S08SG32		Development Tools S08SG32 Demo Board	73.83
841—DEMO9S08SV16		Development Tools Demo Board for S08SV16 Family	52.43
841—DEMO9S12PFAME		Development Tools S12P Demo Board	105.93
16-Bit MCU Design Tools			
841—EVB9S12XDP512E		9S12XDP512 Evaluation Board	422.65
841—DEMO9S12XDT512E		9S12XDP512 Demonstration Board	80.25
841—KIT912F634EVME		MM912F634 Development Board for HCS12 Series	120.47
841—DEMO9S12XEP100		Basic (Small) Evaluation Board for 9S	80.57
841—EVB9S12XEP100		Full-featured Evaluation Board for 9S	535.00
841—DEMO9S12NE64E		DEMO9S12NE64 Demonstration Board	80.25
841—DEMO9S12HY64		Development Tools Demo Board For 9S12HY64	105.93
Flexis 8-Bit / 32-Bit MCU Design Tools			
841—DEMOQE128		Flexis QE128 Demonstration Board	105.93
841—EVBQE128		Evaluation Board for QE128 - S08 and V1 Coldfire	347.75
841—DC9S08AC128		Dev Tools Daughter Card for Flexis DEMOAC	10.70
841—DC9S08AC16		Dev Tools Daughter Card for Flexis DEMOAC	10.70
841—DC9S08AC60		Dev Tools Daughter Card for Flexis DEMOAC	10.70
841—DEMO51AC256KIT		Development Tools for DEMOAC DC9S08A	105.93
32-Bit MCU Coldfire V2 Core Design Tools			
841—DEMOEM		MCF51EM Demonstration Board	105.93
841—M5211DEMO		MCF521x Evaluation Board with MCF5211 MCU	114.40
841—M52223EVB		MCF5222X Microprocessors Evaluation Kit	320.04
841—M52235EVB		MCF5223 Evaluation Board	319.93
841—M52233DEMO		MCF52233 Evaluation Board	105.93
32-Bit Digital Signal Controller Design Tools			
841—M53015EVB		Development Tools for MCF5301x Series	640.93
841—M53017KIT		Development Kit for MCF5301x Series	854.93
841—M53017MOD		Production module for MCF53017	251.45
841—DEMO56F8013-EE		MC56F8013 Demonstration Board	80.20
841—DEMO56F8014-EE		MC56F8014 Demonstration Board	101.61
841—MC56F8006DEMO		Demonstration Board for MC56F8006 Digital Signal Controller	52.43
841—MC56F8367EVME		MC56F8367 Evaluation Board	320.04
32-Bit Power Architecture MCU Design Tools			
841—CYCLONEMAX		Programmer/Debuggers for MPC5x, Coldfire, ARM	961.82
841—MPC555CMEE		MPC555 Evaluation Kit	695.50
841—MPC5534EVBE		Development Tools for MPC5534MZP80	802.50
841—MPC5553EVBE		Development Tools for MPC5553MZP132	802.50
841—MPC5566EVB		Development Tools for MPC5566MZP132	802.50
32-Bit Powerquicc™ Communication Processor Design Tools			
841—MPC8306-KIT		Development Tools for MPC8306	812.13
841—MPC8309-KIT		Development Tools For MPC8309	833.53
841—MPC8377E800RDBA		Development Tools for MPC8377E	854.93
841—MPC8536DS		Development Tools for MPC8536	3632.65
841—MPC8544COMEDEV		Development Tools for MPC8544COM	1603.93
841—MPC8544DS		Reference Platform for MPC8544E	3923.26
841—MPC8569E-MDS-PB		Development Board for MPC8569E	3204.65

FREESCALE Tower System Development Tools

RoHS Compliant **This product is RoHS compliant.**

FREESCALE TOWER SYSTEM MCU MODULES

Freescale's Tower System is a modular development platform designed to save you months of development time now and in the future through rapid prototyping and tool re-use. The Tower System consists of interchangeable and reusable modules along with open source design files make it easy to customize your design and reduce low level design giving you more time to focus on differentiated solutions.

MOUSER STOCK NO.	Freescale Part No.	Fig.	Description	Price Each

FTDI USB Host Controllers & Interface Adapters

RoHS Compliant **This product is RoHS compliant.**

FTDI FT311D USB ANDROID HOST

The FT311D provides a bridge between peripheral hardware and an Android platform with a USB device port. The FT311D will enumerate the Android platform and provide an interface to either, GPIO, UART, PWM, I2C Master, SPI Slave or SPI Master.

Features:

- Entire USB protocol handled on the chip. No USB specific firmware programming required.
- Interface options selectable via 3 mode select pins
- 7 GPIO lines interface option
- Basic UART interface with RXD, TXD, RTS, CTS pins option
- 4 PWM channels option
- I2C master interface option
- PI Slave/Master interface option supporting modes 0, 1, 2 and 3 with MSB/LSB options
- Suitable for use on any Android platform supporting Android Open Accessory Mode

FTDI VINCULUM AND VINCULUM-II USB HOST CONTROLLER DEVICES

FTDI VNC2 USB Host Controller IC

Vinculum-II (VNC2) is the second generation of FTDI's Vinculum family of dual USB Host Controllers. VNC2 expands on the abilities of the VNC1L devices with more memory and a faster processor. The VNC2 features a powerful 16/32-bit width (instruction/data) MCU core, with embedded 256KB Flash and 16KB RAM memory. The device supports a range of flexible interfaces including UART, SPI, FIFO and PWM. The complete USB protocol data processing is handled entirely by hardware resources within the device freeing up processing resources for user developed applications.

For quantities greater than listed, call for quote.

FTDI VINCULUM AND VINCULUM-II DEVELOPMENT TOOLS

FTDI V2-EVAL Evaluation and Development Kit for VNC2

The V2-EVAL is a hardware platform designed to support easy evaluation of FTDI's Vinculum-II (VNC2) series of embedded USB host controller devices. TheVNC2 is accessed via an onboard daughterboard module enabling support for 32, 48 and 64-pin QFN package types. Daughterboard modules are sold separately.

ARM® MCU DEVELOPMENT TOOLS FOR ARM-POWERED DEVICES

- Supports Cortex-M0, Cortex-M1, Cortex-M3, Cortex-M4, ARM7, and ARM9 devices
- µVision IDE, debugger and simulation environment
- ARM industry-leading C/C++ compiler from ARM
- MicroLib highly optimized run-time library
- Real-Time Trace for Cortex-M3 processor based devices
- Keil RTX – deterministic Real-Time Operating System

MOUSER STOCK NO.	Keil Software Part No.	Description	Price Each
830-MDK-ARM	MDK-ARM	RealView Microcontroler Development Kit - Includes C/C++ Compiler, Assembler, µVision, RTT	4916.65
830-MDK-ARM-B	MDK-ARM-B	RealView Microcontroler Development Kit - Includes C/C++ Compiler, Assembler, µVision, RTT (256K Code Limit)	2883.65
830-MDK-FREESCALE	MDK-FREESCALE	Software development environment for Freescale Kinetis devices	743.65
830-MDK-PRO-T	MDK-PRO-T	ARM Software development environment - Professional	4060.65
830-MDK-PRO	MDK-PRO	ARM Software development environment - includes the ARM C++ compiler, µVision IDE/Debugger, middlewear libraries, & Keil RTX realtime OS	9945.65

ARM® MCU DEVELOPMENT TOOLS

- Wide range of evaluation boards for ARM, Cortex-M3, Cortex-M0, Cortex-R4, 8051, and C166
- Hardware support for Ethernet, CAN, USB, USB Host/OTG, SD Card, serial interfaces, and QVGA LCDs
- Example projects save you time and help you begin using the boards peripherals straight away
- Available as starter kits which include a ULINK-ME debug adapter
- All boards and starter kits include evaluation software, cables. documentation, and example programs
- Choose from the list of boards or use the architecture comparisons to select a suitable board

code_red RED PROBE+

Red Probe+ is a USB High Speed debug probe specially designed for use with ARM-based Microcontrollers. Red Probe+ is the new, improved and faster direct replacement for Red Probe, with complete integration with Red Suite. Red Probe+ allows high speed download to RAM and direct programming of on-chip Flash. When used with Cortex-M3 targets, built-in support for SWV allows full support for data trace, instruction and exception profiling and application sourced diagnostics. Together with Red Suite, Red Probe+ provides a complete development and debug environment for ARM-based microcontrollers.

Features:
- Fast all round debug including stepping
- JTAG/SWD clock up to 30MHz
- Wide target voltage range: 1.5V - 3.5V
- Switchable protocol support: ARM JTAG SWD, and SWV
- Programmable SWV runtime trace capture
- Hardware and Software Breakpoints
- Up to 5M Bytes/s download to RAM
- Up to 40K Bytes/s flash programming

For quantities greater than listed, call for quote.

code_red RED SUITE SOFTWARE

Red Suite is a highly integrated software development environment for ARM-based Microcontrollers, which includes all the tools necessary to develop high quality software solutions. The Red Suite IDE is based on the latest version of Eclipse with many ease-of-use and Micro-controller specific enhancements.

Features:
- Eclipse-based IDE
- Device-specific support for more than 200 microcontrollers from NXP and Luminary Micro
- Peripherals views of all supported microcontrollers
- Full support for both JTAG and low-pin count SWD debugging via Red Probe and LPC-Link
- Includes 1-year of email-based support with each purchased copy of the tools
- Fully functional 90-day evaluation
- Available for Windows XP and Windows Vista, Windows 7, 32-bit and 64-bit

16-BIT PIC24 FLASH MCUs

16-bit PIC24 microcontrollers offer a new level of performance and higher integration. Features supporting this compatibility between these families include common: instuction set and architecture (dsPIC DSCs add DSP capability), peripherals, pin-out, and tool suite including MPLAB® IDE, C30 C Compiler and MPLAB® PM3 Programmer, Real Ice, Explorer 16 Development Board.

HIGH-LINEARITY POWER AMPLIFIER

Features:
- Small package size
- High linear output power
- High speed power-up/-down
- Turn on/off time (10%~90%)<100ns

◆ **Surface Mount Device**

MICROCHIP Demo Boards and Development Products

REAL ICE AND PERFORMANCE PACK

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
MPLAB ICE 2000/4000 Accessories			
579-AC244002	AC244002	REAL ICE Performance Pak	171.18
579-DV244005	DV244005	REAL ICE Base probe kit	534.98
Plug-in Module			
579-MA160014	MA160014	For PIC18LF45K22	26.75
579-MA180027	MA180027	For PIC18F87K90	26.75
579-MA180028	MA180028	For PIC18F87K22	26.75
579-MA180031	MA180031	For PIC18F46K80	26.75
579-MA180032	MA180032	For PIC18F66K80	26.75
579-MA240022	MA240022	For PIC24F32KA304	26.75
579-MA240028	MA240028	For PIC24EP64MC204	26.75
579-MA240029	MA240029	For PIC24FJ128GA310	26.75
579-MA320001	MA320001	PIC32MX 100P QFP to 100P Plug-In Module	26.75
579-MA330028	MA330028	For dsPIC33EP64MC504	26.75
579-MA330031	MA330031	dsPIC33EP256MC506 Int. OpAmp Motor Control PIM	26.75
579-MA330031-2	MA330031-2	dsPIC33EP256MC506 Ext. OpAmp Motor Control PIM	26.75
Socket Modules			
579-AC164126	AC164126	PICtail Plus Prototype Daughter Board	21.40
579-AC164301	AC164301	18L/28L/40L DIP for MPLAB PM3	203.29
579-AC164345	AC164345	28L QFN 4x4mm for MPLAB PM3	203.29
Header Interfaces			
579-AC162050	AC162050	(8 PDIP) for PIC12F629/675 ICD 2	26.75
579-AC162051	AC162051	(28/40 PDIP) for ICD and ICD 2 debuggers	21.39
579-AC162053	AC162053	MPLAB ICD 2 for PIC16F627A, 628A, 648A (18PDIP)	37.45
579-AC162055	AC162055	MPLAB ICD 2 for PIC16F684 (14 PDIP)	26.75
579-AC162056	AC162056	MPLAB ICD 2 for PIC16F688 (14 PDIP)	26.75
Device Adapters, Adapter Plugs and Kits			
579-AC164114	AC164114	PIC18F1 x K50 Program Adapter	32.09

PIC32 DEVELOPMENT TOOLS

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-DM320001	DM320001	PIC32 Starter Kit	53.49
579-DM320005	DM320005	Expansion board for PIC32MX starter kit	267.49
579-DM320011	DM320011	Audio Development Board for PIC32 MCUs	160.49
579-AC323027	AC323027	PIC32 CTMU Eval Board	26.70
579-DM320013	DM320013	PIC32 MX1/MX2 Starter Kit	117.69
579-MA320011	MA320011	PIC32MX220F032D USB/Graphics PIM	26.75
579-TCHIP003	TCHIP003	chipKIT™ Starter Pak Uno32 for PIC32	66.88
579-TDGL008	TDGL008	Cerebot™ Development Board w/ chipKIT™ for PIC32	41.73
579-TDGL009	TDGL009	Cerebot™ Development Board w/ chipKIT™ for PIC32	84.53
579-TDGL010	TDGL010	Cerebot™ MX7 cK Development Board for PIC32	105.93

PICKIT™ STARTER KITS AND DEMO BOARDS

Important Note: The PICkit(tm) 1 FLASH Starter Kit software will not run on Windows 98 1st edition.
DO NOT INSTALL THIS SOFTWARE ON WINDOWS 98 1ST EDITION

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-DV164101	DV164101	PICkit 1 8/14P Flash Starter Kit	38.52
579-DV164122	DV164122	PICkit Serial Analyzer (with 28-Pin Demo Board)	53.49
579-DM164120-1	DM164120-1	PICkit Low Pin Count Demo Board	27.81
579-DM164120-2	DM164120-2	PICkit 2 44-Pin Count Demo Board	27.81
579-DV164120	DV164120	PICkit 2 Starter Kit	53.49
579-DV164121	DV164121	PICkit 2 Debug Express	53.49
579-PG164120	PG164120	PICkit 2 Microcontroller Programmer	37.44
579-DV164131	DV164131	PICkit 3 Debug Express	74.89

PICTAIL™ DEMO BOARDS

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-AC103003	AC103003	PIC10F mTouch Capacitive Eval Board	11.77
579-AC164121	AC164121	Ethernet PICtail Daughter Board	42.79
579-AC164122	AC164122	PICtail Daughter Board for SD & MMC cards	40.65
579-AC164123	AC164123	Ethernet PICtail Daughter Plus Board	42.79
579-AC164125	AC164125	Speech Playback PICtail	48.15
579-AC164126	AC164126	PICtail Plus Prototype Daughter Board	21.40
579-AC164127-5	AC164127-5	Graphics PICtail Plus SSD1926 Board	74.89
579-AC164130-2	AC164130-2	CAN/LIN PICtail Plus Daughter Board	48.15
579-DM1641303	DM164130-3	PICkit 28-Pin LIN Demo Board	42.80
579-AC164142	AC164142	BPSK 7.2kbps PLM PICtail Plus Daughter Brd	240.75
579-AC164144	AC164144	LCC Graphics PICtail Plus Board	96.29
579-AC164145	AC164145	PICtail + Daughter Board Dev Kit	240.75
579-AC320011	AC320011	M2M PICtail Daughter Board	212.93

PICMICRO DEMONSTRATION KITS

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-DM163014	DM163014	PICDEM 4 Demo Board for PIC12F629, 675, PIC16F630, 676, 684, 627A, 628A, 648A, 818, 819,87,88,1220,1320	139.09
579-DM163022-1	DM163022-1	PICDEM 2 Plus 18-, 28- and 40-pin PIC16FXXX, PIC16F1XXX and PIC18 devices	100.30
579-DM163029	DM163029	PICDEM Mechatronics	160.49
579-DM163035	DM163035	PICDEM Lab Development Kit	133.74
579-DM163045	DM163045	PICDEM Lab Development Kit	144.44
579-DV164039	DV164039	PIC24FJ256DA210 Development Kit	427.99

PICMICRO DEMONSTRATION KITS (CONT.)

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-DM240001	DM240001	PICDEM PIC24/dsPIC33 Explorer 16 Kit	139.09
579-DM240002	DM240002	PICDEM PIC24/dsPIC33 Explorer 16 (44-Pin)	139.09
579-DM240312	DM240312	PIC24FJ256DA210 Development Board	96.29
579-DM240313	DM240313	PIC18F87K22 Development Board	133.75
Connectivity			
579-DV250501	DV250501	MCP250XX CAN Developer's Kit	176.55

DSPIC 16 BIT DSC DEMONSTRATION BOARDS

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-DM300018	DM300018	dsPICDEM 2 Demo Board	106.99
579-DM300019	DM300019	dsPICDEM 80L Starter Demo Board	85.59
579-DM330021-2	DM330021-2	dsPICDEM MCLV-2 Demo Board	213.99
579-DM300023	DM300023	dsPICDEM SMPS Buck Demo Board	160.49
579-DM300027	DM300027	16-bit 28-PIN Starter Demo Board	85.59
579-DM330013	DM330013	dsPIC33F and PIC24H Microstick Development Tool	26.74

DEMO AND EVKITS FOR PICMICRO

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-MA180029	MA180029	PIC18F47J56 Full Speed USB Demo Board	48.15
579-DV164006	DV164006	MPLAB In-Circuit Debugger 2 Evaluation Kit	288.89
579-DV164033	DV164033	MPLAB ICD 2 with Explorer 16 Dev. Board	363.79
579-DV164005	DV164005	MPLAB In-Circuit Debugger 2 Module	213.99
579-DV164035	DV164035	MPLAB In-Circuit Debugger 3	203.29
579-DV164007	DV164007	MPLAB ICD 2 ws Module (includes ICD 2 Module, USB and RS232 cable, Pwr Supply)	246.09
579-DV007004	DV007004	Production Prog/Dev Kit with built-in ICSP Programs PICmicro and dsPIC30F devices	957.65

DEVELOPMENT TOOLS

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-AC164112	AC164112	MPLAB ICD 2 Vpp Voltage Limiter	10.69
579-ARD00354	ARD00354	MCP6N11 Amp IC Bridge Dev Tool	37.44
579-DM240013-1	DM240013-1	PIC24F K-Series Development Board	37.40
579-MCP9800DM-PCTL	MCP9800DM-PCTL	Thermal Sensor PICtail Demo Board	26.75
579-MCP9800DM-DL	MCP9800DM-DL	Tempurature Data Logger Demo Board	37.45
579-MCP3221DM-PCTL	MCP3221DM-PCTL	PICtail™ Demonstration Board	26.75
579-MCP3551DM-PCTL	MCP3551DM-PCTL	Delta Sigma ADC Demo Board	42.80
579-MCP402XEV	MCP402XEV	Non-Volatile Digital Pot Eval Board	16.05
579-MCP2515DM-PCTL	MCP2515DM-PCTL	CAN Controller PICtail Demo Board	42.80
579-MCP215XDM	MCP215XDM	Data Logger Demonstration Board	64.20
579-MCP23X17EV	MCP23X17EV	Evaluation Board	42.80
579-SOIC8EV	SOIC8EV	8-Pin SOIC/MSOP/TSSOP/DIP E Brd	10.70
579-TC1047ADM-PICTL	TC1047ADM-PICTL	Temperature to Voltage	10.70
579-TC2030-MCP-NL	TC2030-MCP-NL	Tag-Connect In-Circuit Cable No Legs	36.06
579-TSSOP20EV	TSSOP20EV	20-Pin TSSOP/SSOP Evaluation Board	10.69
579-VSUPEV	VSUPEV	Voltage Supervisor Evaluation Board	5.35

MOTOR CONTROL DESIGN

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-DV330021	DV330021	dsPICDEM MCSM Dev Kit	288.89
579-DM330022	DM330022	dsPICDEM MCSM Dev Board	139.09

EVALUATION BOARDS

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-MCP1640EV-SBC	MCP1640EV-SBC	MCP1640 Synchronous Boost Converter Eval Board	21.39
579-MCP1726EV	MCP1726EV	MCP1726 1A LDO Evaluation Board	32.10
579-MCP651EV-VOS	MCP651EV-VOS	MCP651 Input Offset Evaluation Brd	32.10
579-MCP73213EV-2SOVP	MCP73213EV-2SOVP	MCP73213 Dual Eval Board	21.39
579-MCP73831EV	MCP73831EV	MCP73821 Evaluation Board	48.15
579-MCP73833EV	MCP73833EV	MCP73833 Evaluation Board	21.40
579-MCP7386XEV	MCP7386XEV	MCP7386X Li-Ion Battery Charger Evaluation Board	32.10
579-TC1016/17EV	TC1016/17EV	TC1016/17 LDO Linear Regulator Evaluation Board	48.15

STARTER KITS

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-DV243003	DV243003	Memory Starter Kit	85.58
579-DM240011	DM240011	PIC24F Starter Kit	64.18
579-DM240415	DM240415	PIC24F Starter Kit for Android™	85.59

ENERGY METER IC

The EM773 is an ARM Cortex-M0 based, low-cost 32-bit energy metering IC, designed for 8/16-bit smart metering applications. The EM773 offers programmability and on-chip metrology functionality combined with a low power, simple instruction set and memory addressing with reduced code size compared to existing 8/16-bit architectures. The EM773 operates at CPU frequencies of up to 48MHz. The peripheral complement of the EM773 includes up to 32kB of flash memory, up to 8kB of data memory, one Fast-mode Plus I2C-bus interface, one RS-485/EIA-485 UART, one SPI interface with SSP features, three general purpose counter/timers, up to 25 general purpose I/O pins, and a metrology engine for energy measurement.

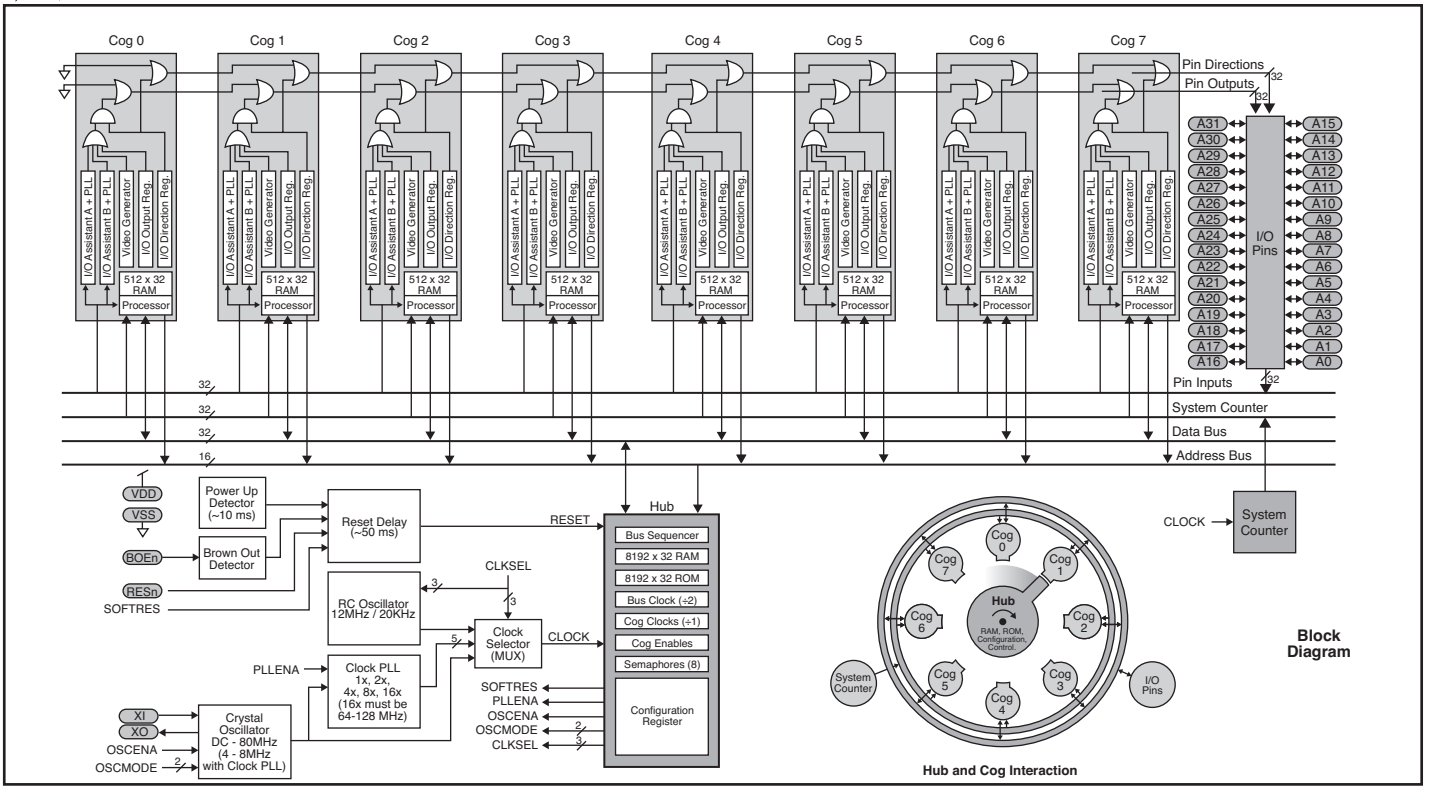
PARALLAX 32-Bit and 8-Bit Microcontrollers

Products may be RoHS compliant. Check mouser.com for RoHS status.

32-BIT PROPELLER MULTICORE MICROCONTROLLERS

What can you do with eight 32-bit processors (COGs) in one chip? Real simultaneous multi-processing!

The new Propeller chip is the result of our internal design team working for eight years. The Propeller chip was designed at the transistor level by schematic using our own Altera Stratix tools to prototype the product. The Propeller is programmed in both a high-level language, called Spin™, and low-level (assembly) language. With the set of pre-built Parallax "objects" for video, mice, keyboards, RF, LCDs, stepper motors and sensors your Propeller application is a matter of high-level integration. The Propeller is recommended for those with previous microcontroller experience.



Propeller Specifications	
Model Number	P8X32A
Package Types	40-pin DIP, 44-pin LQFP, 44-pin QFN
Parallax Stock Codes	P8X32A-D40 - DIP package P8X32A-Q44 - LQFP package
Power Requirements	3.3 volts DC
External Clock Speed	DC to 80MHz (4MHz to 8MHz with Clock PLL running)
Internal RC Oscillator	12MHz or 20KHz
System Clock Speed	DC to 80MHz
Global RAM/ROM	64K bytes; 32K RAM / 32K ROM
RAM/ROM Organization	32-bits (4 bytes or 1 long)
I/O Pins	32
Current Source/Sink per I/O	50mA

Propeller Starter Kit

The Propeller Starter Kit includes everything you need to get started with the Propeller microcontroller, including the Propeller Demo Board,the Propeller Manual, software on CD and a USB cable. The Propeller Demo Board includes a built-in Propeller (P8X32A-Q44), EEPROM and 5MHz crystal pre-wired to connectors for interfacing to devices such as a mouse, keyboard, TV or VGA monitor and speakers. This is all configured for immediate use by many objects from the Propeller Object Exchange (included with the Propeller Tool software). In just a few minutes you can see some of the impressive tasks the Propeller can perform.

Arduino Board of Education Products

Make your Arduino the onboard brain of a mobile robot and learn robotics, electronics, and programming with this versatile kit and its accompanying step-by-step lessons. The Board of Education Shield plugs into your own Arduino (not included) and mounts on the popular Boe-Bot robot chassis. With this kit and your own Arduino module, you can follow the Robotics with the Board of Education Shield for Arduino lessons with over 40 hands-on activities.

HYDRA Game Development Kit

Develop games, graphics and media applications with the Propeller Powered HYDRA Game Console. For beginner to intermediate coders, you need only basic programming experience in any BASIC or C-like language. All of the hardware and software you need is included (as shown in pictures), along with the comprehensive book on game programming for the Propeller in Spin and assembly language - "Game Programming for the Propeller Powered HYDRA". Within the book, the HYDRA hardware is covered in detail with schematics, descriptions, and tips allowing you to take full advantage of its resources, including its expansion port and game card. Note: Printed book is black and white. Kit comes complete with HYDRA unit, book, 128K Memory card, Blank Experimenter card, mouse, keyboard, gamepad, video and USB cables, power supply, CD and more!

Propeller Professional Development Board

The Propeller Professional Development Board (PPDB) is a high-quality, fully-integrated development platform for the Propeller microcontroller. A wide variety of typical I/O (LEDs, Buttons, etc.) devices and circuitry are built into the PPDB, providing the developer with an ideal platform for rapid Propeller project development.

C8051F70X CAPACITIVE TOUCH SENSE MCUs

The Silicon Labs C8051F70x MCU family meets designers' demands for Capacitive Touch Sense features and best-in-class performance. These high performance devices perform a wide range of mixed-signal functions and includes a high-speed 8051 Core, Capacitive Touch Sense with 16-bit capacitance-to-Digital Converter, superior noise immunity, fast 40µs acquisition time, and digital peripherals that include up to 39 port I/O with high sink current. The C8051F70x MCU family is robust and reliable with noise immune architecture with best-in-class SNR. Silicon Labs offers a simple GUI and API library that make implementation ast and easy.

RoHS Compliant

Features:

- On-chip voltage comparator
- Capacitive Sense interface with 32 input channels
- Precision calibrated 24.5MHz internal oscillator
- In-system, full-speed, non-intrusive debug interface (on-chip)

For quantities greater than listed, call for quote.

C8051F8XX CAPACITIVE TOUCH SENSE MCUS

The QuickSense™ C8051F8xx family of capacitive sensing MCUs provides an easy and reliable solution for capacitive buttons, sliders, wheels and capacitive proximity sensing. The C8051F800 family builds upon the C8051F700 MCU family by adding a lower-pin count, small form factor option to the industry's fastest capacitive touch sense solutions. The C8051F800 adds 16-, 20- and 24-pin package options to the existing 48- and 64-pin C8051F700, providing more options to fit products with the optimal pin count, size and cost. Additional resources such as a 10-bit ADC and digital PWM provide additional human interface support for accelerometers, vibratory haptic feedback, LED illumination control, temperature sensing and resistive touch screen sensing.

RoHS Compliant

C8051F9XX ULTRA LOW POWER TOUCH SENSE MCUS

The QuickSense™ C8051F99x family of capacitive sensing MCUs provides the lowest power and highest sensitivity touch sensing solution for capacitive buttons, sliders, wheels and capacitive proximity sensing. Architected from the popular C8051F9xx platform the device features a 150µA/MHz active mode and multiple sleep modes as low as 10nA. With up to 14 capacitive sensing inputs and a patent-pending charge timing hardware capacitance to digital converter, the C8051F99x achieves unparalleled touch sensitivity, speed and ultra-low power in packages as small as a 3mmx3mm QFN20.

RoHS Compliant

C8051F9XX ULTRA LOW POWER TOUCH SENSE DEVELOPMENT TOOLS

MOUSER STOCK NO.	Silicon Labs Part No.	Description	Price Each
634-F990SLIDEREK	F990SliderEK	Demonstrates the system level possibilities that can be achieved when combining Silicon Labs QuickSense™ technology with the C8051F99x ultra low power capacitive sensing MCU.	32.09
634-C8051F996DK	C8051F996DK	Development Kit for the C8051F990, F991, F996 and F997 family of ultra low power capacitive sensing MCUs and the C8051F980, F981, F982, F983, F985, F986, F987, F988 and F989 family of ultra low power MCUs.	105.93

C8051FXXX PRECISION MIXED-SIGNAL MICROCONTROLLERS

Silicon Laboratories' mixed-signal microcontrollers integrate world-class analog, a high-speed pipelined 8051 CPU, ISP Flash memory and on-chip JTAG based debug in each device. Configurable high-performance analog, up to 100MIPS core and in-system programmability provide the user with complete design flexibility, improved time-to-market, superior system performance and greater end product differentiation

RoHS Compliant

Typical Silicon Labs MCU Chip

USB MICROCONTROLLERS

USB MCUs feature an on-board USB 2.0 function controller with an integrated transceiver and on-chip clock recovery. No external resistors, crystal, voltage regulator, EEPROM or other components are required. On-chip resources include a high-speed 8051 CPU with up to 64 kB Flash, UARTs, SMBus, SPI, timers, counters and PWM generators. On-chip analog features include a multi-channel 10-bit ADC, voltage reference, internal oscillator, comparators and a temperature sensor. Available in 28-pin QFN, 32-pin LQFP or 48-pin TQFP packages, these devices provide a single-chip solution for embedded USB applications.

RoHS Compliant

SMALL FORM FACTOR MICROCONTROLLERS

The Small Form Factor family of microcontrollers combines a high-speed 8051 CPU, Flash memory and high-performance analog circuits in remarkably small packages allowing system designers to reduce component count while improving system performance. These highly-integrated devices are optimized for space-constrained, low-power, low-cost applications in consumer, industrial, communications and automotive markets. Development is quick and easy due to low-cost, professional development tools and in-system debug. High integration, small size, high CPU throughput and best-in-class analog peripherals make the Small Form Factor family ideal for a wide range of applications.

SILICON LABS Microcontrollers

RoHS Compliant **This product is RoHS compliant.**

AUTOMOTIVE MICROCONTROLLERS

Silicon Labs offers automotive customers a complete family of of small footprint, high-performance, highly reliable mixed-signal mixed-signal MCUs, featuring:

- 50MIPS 8051CPU
- 24MHz on-board oscillator (±0.5%) with clock multiplier
- 32-channel, 12-bit, 200kbps ADC
- Up to 3 comparators
- -40ºC to +125ºC Operating temperature range
- On-board Temperature Sensor

For quantities greater than listed, call for quote.

OTP-EPROM MICROCONTROLLERS

Silicon Laboratories OTP-EPROM family of MCUs is a high-performance solution for cost and space-sensitive applications. Pin compatible with Silicon Labs' Flash-based MCUs, these devices provide designers the flexibility to develop code in Flash and switch to low cost OTP versions for mass production.

SILICON LABS

MICROCONTROLLER DEVELOPMENT KITS

MOUSER STOCK NO.	Description	Price Each
634-C8051F005DK	For C8051F000, F001, F002, F005, F006, F010, F011, F012, F015, F016, F017, F018 & F019 MCUs	85.60
634-C8051F020DK	For C8051F020, F021, F022, and F023 MCUs	98.00
634-C8051F040DK	For C8051F040, F041, F042, and F043 MCUs	210.76
634-C8051F060DK	For C8051F060, F061, F062, and F063 MCUs	210.76
634-C8051F120DK	For C8051F120, F121, F122, F123, F124, F125, F126, F127, F130, F131, F132 & F133 MCUs	105.93
634-C8051F206DK	For C8051F206 MCUs	73.83
634-C8051F226DK	For C8051F220, F221, F226, F230, F231, & F236 MCUs	73.83
634-C8051F300DK	For C8051F300, F301, F302, F303, F304, & F305 MCUs	73.83
634-C8051F310DK	For C8051F310 and F311 MCUs	73.83
634-C8051F320DK	For C8051F320 and F321 MCUs	105.93
634-C8051F326DK	For C8051F326 and F327 MCUs	105.93
634-C8051F330DK	For C8051F330 and F331 MCUs	73.83
634-C8051F336DK	For C8051F336 Family	105.93
634-C8051F340DK	For C8051F340, F341, F342, F343, F344, F345, F346 & F347 MCUs	105.93
634-C8051F350DK	For C8051F350, F351, F352, and F353 MCUs	105.93
634-C8051F360DK	For C8051F360, F361 and F362 MCUs	105.93
634-C8051F370-A-DK	For C8051F37x MCUs	85.29
634-C8051F380DK	For C8051F380, F381, F382, F384, F385, F386 and F387 MCUs	105.93
634-C8051F390-A-DK	For C8051F39x MCUs	85.29
634-C8051F410DK	For C8051F410, F411, F412 and F413 MCUs	105.93
634-C8051F500DK	For C8051F50x MCUs	105.93
634-C8051F530ADK	For C8051F52xA and C8051F53xA MCUs	105.93
634-C8051T600DK	For C8051T600, T601, T602, T603, T604 & T605 MCUs	105.93
634-C8051T606DK	Dev Kit for C8051T606 MCUs	105.93
634-C8051T606TDB	MSOP Socket Daughter Card	20.33
634-C8051T620DB32	QFN32 Socket Daughter Card for C8051T620	26.75
634-C8051T620DK	For C8051T620/21/320/321/322 & 323 MCUs	138.03
634-C8051T630DK	For C8051T630 Family	159.43
634-C8051F912DK	For C8051F912DK, C8051F902, F902, F911 and F912 MCUs	105.93
634-C8051F930DK	For C8051F920, F921, F930, F931 MCUs	105.93
634-C8051F960-A-DK	Development Kit CD, Third Party Tools CD, kit for 8051	140.44
634-SLBLDC-MTR-RD	Sensorless BLDC Motor Reference Design	127.33
634-STEPPER-MTR-RD	Stepper Motor Reference Design	127.33

UNIFIED DEVELOPMENT PLATFORM

Motherboard

MOUSER STOCK NO.	Description	Price Each
634-UP-BACKPLANE01EK	CP2105 UDP Motherboard to use with MCU, I/O Expander, Radio and EZLink card	220.69

Accessory Boards

MOUSER STOCK NO.	Description	Price Each
634-UPMP-F960-EMIFEK	For C8051F960, UDP MCU Card (with no LCD) to use with UDP Motherboard	93.63
634-UPMP-F960-MLCDEK	For C8051F960, MCU Card (with Multi LCD) to use with UDP Motherboard	93.63
634-UPMP-F960-SLCDEK	For C8051F960, MCU Card (with Static LCD) to use with UDP Motherboard	108.54
634-UPMU-F390-A-EK	For C8051F390, UDP MCU Card to use with UDP Motherboard	67.11
634-UPMU-F370-A-EK	For C8051F370, UDP MCU Card to use with UDP Motherboard	67.11
634-UPMU-M3U1XX-B-EK	SiM3U1xx (USB) Development Kit	90.95
634-UPMU-M3C1XX-B-EK	SiM3C1xx (non-USB) Development Kit	90.95
634-UPPIF960-A-EK	For C8051F960, Pico Card to use with UDP Motherboard	20.33
634-UPPI1020GMA915EK	For Si1020-GM, 915MHz Pico Card to use with UDP Motherboard	53.50
634-UPPI1024GMA868EK	For Si1024-GM, 868MHz Pico Card to use with UDP Motherboard	46.81
634-UPPI1020GMA470EK	For Si1020-GM, 470MHz Pico Card to use with UDP Motherboard	53.50
634-UPIO-GLCD-SPI-EK	For EZRadioPRO, SPI graphic LCD I/O board	76.24

EVALUATION KITS

MOUSER STOCK NO.	Description	Price Each
634-C8051F064EK	Evaluation Board, USB Cable and Software	105.93
634-CP2103EK	For CP2103 USB-to-UART Bridge Chip	31.03
634-CP2102EK	For CP2102 USB-to-UART Bridge Chip	31.03
634-CP2120EK	Evaluation Board for CP2120	41.73

TARGET/PROTOTYPING BOARDS

MOUSER STOCK NO.	Description	Price Each
634-C8051F005TB	Target/Prototyping Board with C8051F005 MCU	52.46
634-C8051F020TB	Target/Prototyping Board with C8051F020 MCU	68.48
634-C8051F040TB	Target/Prototyping Board with C8051F040 MCU	82.18
634-C8051F060-TB	Target/Prototyping Board with C8051F060 MCU	128.40
634-C8051F120-TB	Target/Prototyping Board with C8051F120 MCU	53.50
634-C8051F300TB	Target/Prototyping Board with C8051F300 MCU	37.45

TARGET/PROTOTYPING BOARDS (CONT.)

MOUSER STOCK NO.	Description	Price Each
634-C8051F310TB	Target/Prototyping Board with C8051F310 MCU	37.45
634-C8051F320TB	Target/Prototyping Board with C8051F320/21 MCU	53.50
634-C8051F340-TB	Target/Prototyping Board with C8051F34x Family MCU	53.50
634-C8051F350-TB	Target/Prototyping Board with C8051F350 MCU	53.50
634-C8051F360-TB	Target/Prototyping Board with C8051F360 MCU	53.50
634-C8051F380-TB	Target/Prototyping Board with C8051F380 MCU	53.50
634-C8051F410-TB	Target/Prototyping Board with C8051F410 MCU	53.50
634-C8051F500-TB	Prototyping Board for C8051F50x	53.50
634-C8051F912-TB	C8051F912-TB Target Board	54.84
634-C8051F930-TB	Prototyping Board with C8051F930	54.84
634-C8051F996-TB	Target/Prototyping Board with C8051F996 MCU	54.84
634-AB1	Prototyping Board with 128KB SRAM	37.45

ACCESSORIES

MOUSER STOCK NO.	Description	Price Each
634-C8051T600SDB	SOIC Socket Daughter Board	20.33
634-C8051T600QDB	QFN Socket Daughter Board	31.03
634-CAT5EXOVER-001	CAT5e Cross-over Cable - 3' length	5.34
634-DEBUGADPTR1-USB	USB Debug Adapter for C8051Fxxx MCU	37.45
634-EC-SJ	Standard JTAG Cable	5.35

USB TOOLSTICK DEVELOPMENT TOOLS

MOUSER STOCK NO.	Description	Price Each
634-TOOLSTICKSK	Starter Kit	26.74
634-TOOLSTICKBA	Base Adapter	18.73
634-TOOLSTICK300DC	C8051F300 Daughter Card	10.59
634-TOOLSTICK300PP	Programming Platform for C8051F30X MCUs	73.83
634-TOOLSTICK310PP	Programming Platform for C8051F310/12/14, F361, F364, F366, F368 MCUs	73.83
634-TOOLSTICK311DC	C8051F311 Daughter Card	10.59
634-TOOLSTICK316PP	Programming Platform for C8051F316/17, F338, F339 MCUs	73.83
634-TOOLSTICK320PP	Programming Platform for C8051F320, F342, F343, F346, F347 MCUs	73.83
634-TOOLSTICK321DC	C8051F320/321 Daughter Card	10.59
634-TOOLSTICK321PP	Programming Platform for C8051F321, F327 MCUs	73.83
634-TOOLSTICK327DC	C8051F327 Daughter Card	10.59
634-TOOLSTICK330DC	C8051F330 Daughter Card	10.59
634-TOOLSTICK330PP	Programming Platform for C8051F330/1/2/3/4/5/6/7 MCUs	73.83
634-TOOLSTICK336DC	C8051F336 Toolstick Daughter Card	10.59
634-TOOLSTICK340PP	Programming Platform for C8051F340/1/4/5 MCUs	73.83
634-TOOLSTICK342DC	C8051F34x Daughter Card	10.59
634-TOOLSTICK360DC	C8051F360 Daughter Card	10.59
634-TOOLSTICK370-ADC	Toolstick Daughter Card for C8051F370x/9x	16.27
634-TOOLSTICK381DC	Daughter Card for C8051F381/2/3/4/5/6/7 MCUs	10.59
634-TOOLSTICK410PP	Programming Platform for C8051F410/2 MCUs	73.83
634-TOOLSTICK411DC	C8051F411 Daughter Card	10.59
634-TOOLSTICK411PP	Programming Platform for C8051F411/3 MCUs	73.83
634-TOOLSTICK500MPP	Programming Platform for C8051F50x (48QFN)	73.83
634-TOOLSTICK500QPP	Programming Platform for C8051F50x (48QFP)	73.83
634-TOOLSTICK502DC	C8051F50x Daughter Card	10.59
634-TOOLSTICK502MPP	Programming Platform for C8051F50x (32QFN)	73.83
634-TOOLSTICK502QPP	Programming Platform for C8051F50x (32QFP)	73.83
634-TOOLSTICK520PP	Programming Platform for C8051F520A (DFN10) MCUs	73.83
634-TOOLSTICK530ADC	Daughter Card C8051F53xA and C8051F52xA MCUs	10.59
634-TOOLSTICK530MPP	Programming Platform for C8051F530A (QFN20) MCUs	73.83
634-TOOLSTICK530TPP	Programming Platform for C8051F530A (TSSOP20) MCUs	73.83
634-TOOLSTICK716MPP	Programming Platform for C8051F716 (QFN-32)	84.53
634-TOOLSTICK717MPP	Programming Platform for C8051F717 (QFN-24)	84.53
634-TOOLSTICK800QPP	Programming Platform for C8051F8xx (QSOP-24) MCUs	73.83
634-TOOLSTICK800SPP	Programming Platform for C8051F8xx (SOIC-16) MCUs	73.83
634-TOOLSTICK800DC	C8051F800 Daughter Card	10.59
634-TOOLSTICK912DC	ToolStick Daughter Card for C8051F901/02/11/12-GM	10.59
634-TOOLSTICK912UPP	Programming Platform for C8051F901/02/11/12-GU	73.83

NEW! TECHNOLOGY

STMICROELECTRONICS STM32 ARM CORTEX™

STM32 (Cortex™-M0)

The STM32F051xx family incorporates the high-performance ARM Cortex™-M0 32-bit RISC core operating at a 48MHz frequency, high-speed embedded memories (Flash memory up to 64Kbytes and SRAM up to 8Kbytes), and an extensive range of enhanced peripherals and I/Os. All devices offer standard communication interfaces (up to two I2Cs, two SPIs, one I2S, one HDMI CEC, and up to two USARTs), one 12-bit ADC, one 12-bit DAC, up to five general-purpose 16-bit timers, a 32-bit timer and an advanced-control PWM timer.

For quantities greater than listed, call for quote.

STM32 (Cortex™-M3)

The STM32 family of 32-bit Flash Microcontrollers is based on the breakthrough ARM Cortex™-M3 core - a core specifically developed for embedded applications. The STM32 family benefits from the Cortex-M3 architectural enhancements including the Thumb-2 instruction set to deliver improved performance with better code density, significantly faster response to interrupts, all combined with industry leading power consumption. ST is now the first leading MCU supplier to introduce a product family based on this core. The STM32 family is built to offer new degrees of freedom to MCU users. It offers a complete 32-bit product range that combines high performance, low power and low voltage, while maintaining full integration and ease of development.

STM32 (Cortex™-M4)

The ARM® Cortex™-M4-based STM32 F4 series is an extension of the industry-leading STM32 portfolio towards even higher performance. Like the STM32 F2 series, these MCUs leverage ST's 90 nm NVM technology and ST's ART Accelerator™ to reach the industry's highest benchmark scores for Cortex-M-based microcontrollers with 210DMIPS at 168MHz operating frequency. The DSP instructions and the floating point unit enlarge the range of addressable applications. The STM32 F4 series is the result of a perfect symbiosis of the real-time control capabilities of an MCU and the signal processing performance of a DSP, and thus complements the STM32 portfolio with a new class of devices, digital signal controllers (DSC).

CORTEX DEVELOPMENT TOOLS

NEW! TECHNOLOGY

For quantities greater than listed, call for quote.

MOUSER STOCK NO. / Mfr. Part No.	Description	Price Each
M0		
511—STM32F0DISCOVERY	STM32 F0 Entry-level Cortex M0 DIP module evaluation board with USB debug interface.	8.55
511—STM320518-EVAL	Evaluation board for STM32 F0 series fitted with an STM32F051 48MHz Entry-level Cortex M0 CPU and QVGA LCD display.	212.93
M3		
511—STM32L152-EVAL	Complete hardware emulation platforms with the STM32L152, implementing the full range of device peripherals and features	266.16
511—STM32L-DISCOVERY	Includes a 6-digit LCD display, one touch-sensing slider, 2 LEDs, 1 user button, current measurement and the embedded debugger (ST-LINK/V2).	12.84
511—STM32VLDISCOVERY	Includes an STM32F100 and an in-circuit ST-Link debugger/programmer to debug Discovery applications and other target board applications.	10.57
511—STM32100B-EVAL	STM32F100V EVB with HDMI CEC, 2xI2C, 2 SPI channels, 3 USART channels, 8KB SRAM, 128KB internal Flash, JTAG and SWD debugging.	251.45
511—STM32100B-MCKIT	Starter kit (w/STM32F100B) provides a complete development platform for motor control applications	1469.91
511—STM3210E-EVAL	512K version of complete hardware evaluation platform with the STM32F103, implementing the full range of device peripherals and features.	266.16
511—STM3210C-EVAL	Complete Connectivity Platform with USB-OTG, MAC, 2 CAN2.0, 2I2C, 5 USART, Smartcard, SPI, JTAG, SWD and Debugging Support	319.66
511—STM32-COMSTICK	Complete low-cost Hitex evaluation supporting 10/100 ethernet, USB 2.0, Full-speed device/host/OTG with on-chip PHY and CAN	84.26
511—STEVAL-IPC003V1	Demonstration board is a thermal printer adapter board for the STM3210C_EVAL and offers a solution for parking ticket vending machines.	80.64
511—STM32L152-SK/IAR	IAR KickStart Kit for STM32L EnergyLite ARM, IAR visualSTATE 20-state eval with embedded IAR J-link Lite debugging probe	199.29
511—STM3221G-EVAL	The STM3221G-EVAL evaluation board is a complete demonstration and development platform for the STM32F2 series and includes an embedded STM32F217IGH6 high-performance ARM Cortex -M3 32-bit microcontroller	373.16
511—STM32MICOS-EVAL	The STM32-MICRIUM package consists of a evaluation board and a book. Step-by-step look at the inner workings of Micrium's latest real-time kernel, µC/OS-III.	212.66
M4		
511—STM32F3DISCOVERY	Includes devices with 64 to 256K-bytes of on-chip flash memory and up to 48K-bytes of SRAM	17.70
511—STM32F4DISCOVERY	Based on the STM32F407VGT6, it includes an ST-LINK/V2 embedded debug tool, two ST MEMS, digital accelerometer and digital microphone, one audio DAC with integrated class D speaker driver, LEDs and push buttons and an USB OTG micro-AB connector	15.57
511—STM32373C-EVAL	Eval Board for STM32373C, 72MHz analog integration to complement STM32 F1 and F4 Series	292.89
511—STM3240G-EVAL	Evaluation board for the STM32 F4 series and includes an STM32F407IGH6 high-performance ARM® Cortex™-M4F 32-bit microcontroller.	373.16
511—STM3241G-EVAL	Evaluation board for the STM32 F4 series and includes an STM32F417IGH6 high-performance ARM® Cortex™-M4F 32-bit microcontroller with a cryptographic acceleration cell.	373.16
511—STM3240GSKKEI	Keil starter kit is a complete solution for starting application development and evaluating STM32F4 Series ARM Cortex-M4	382.79
511—STM32F4DISCOVERY	Based on the STM32F407VGT6, it includes an ST-LINK/V2 embedded debug tool, two ST MEMS, digital accelerometer and digital microphone, one audio DAC with integrated class D speaker driver, LEDs and push buttons and an USB OTG micro-AB connector	15.57
511—STM3240G-EVAL	Evaluation board for the STM32 F4 series and includes an STM32F407IGH6 high-performance ARM® Cortex™-M4F 32-bit microcontroller.	373.16
511—STM3241G-EVAL	Evaluation board for the STM32 F4 series and includes an STM32F417IGH6 high-performance ARM® Cortex™-M4F 32-bit microcontroller with a cryptographic acceleration cell.	373.16

THIRD-PARTY SOFTWARE AND TOOLS

Users can choose from a full range of development solutions that deliver start to finish control of application development from a single environment. Solutions come with in-circuit emulators, and offer project management, source editing, application building and debugging from a single, easy-to-use graphical interface. They are available for all popular C/C++ compilers compatible with ARM cores.

PRODUCT NEW

For quantities greater than listed, call for quote.

MOUSER STOCK NO. / Mfr. Part No.	Description	Price Each
511—STM3210CPRIMER	EVOPrimer Raisonance Toolset for the STM32 Performance Line preloaded with 256Kb RAM, Flash, Ride 7, a C/C++ compiler, Circle OS task scheduler and C source code for all sample applications and libraries.	105.66
511—STMPRIMER-BASE	EVOPrimer Raisonance base accesory for use with Target and extention Boards for the STM32 Line with removable transparent cover, USB cable with debugging/programming interface and most hardware features for MCU evaluation. This board can also be extended by add-on connectors.	80.25
511—STMPRIMER-PROTO	STMPrimer accessory for prototype target STM32 extention boards.	64.20
511—STM3210CPRIM-D	STMPRIMER accessory including 264KB flash for the STM32 MCU target boards for use with the EvoPrimer base.	25.41
511—STM32L15PRIM-D	STMPRIMER accessory including 256KB flash for the STM32 and STM8 MCU target boards for use with the EvoPrimer base.	41.27
511—STM3240GPRIM-D	STMPRIMER accessory including 256KB flash for the STM32 and STM8 MCU target boards for use with the EvoPrimer base.	105.66
511—STMPRIMER-EXT	STMPRIMER accessory including 256KB flash for the STM32 and STM8 MCU target boards for use with the EvoPrimer base.	123.05
511—STM3210C-SK/KEIL	Starter kit with uVision3, ARM RealView C/C++ compiler for code up to 16K-bytes, ULINK-ME (USB/JTAG) in-circuit debugger/programmer and evaluation board with STM32F107C (256Kbyte Flash, Ethernet, USB Host and OTG).	334.38
511—STM3210E-SK/KEIL	Kit includes RealView Microcontroller Development, Kit for ARM (16K code-size limited version) with ARM C/C++ compiler, ULINK (USB/JTAG) in-circuit emulator and evaluation board for STM32 with external 1M RAM, 8M flash, and joystick for primer 2 applications.	306.29
511—STM3210E-SK/IAR	Kit includes IAR Embedded Workbench for ARM (EWARM - 32K code-size limited version), J-Link (USB/JTAG) in-circuit emulator and evaluation board for STM32, E-version 512Kb flash memory for Primer 2 applications.	287.56
511—STM3220G-SK/IAR	Complete, cost-effective solution for starting application development and evaluating the STMicroelectronics STM32 F2-series ARM core-based microcontrollers.	306.29
511—STM3220G-JAVA	Kit is composed of the STM3220G-EVAL evaluation board and a DVD ROM which contains an evaluation version of the MicroEJ® Software Development Kit	373.43

ST FLASH STICK (ST IN-CIRCUIT COMMUNICATION KIT); 8-BIT

MOUSER STOCK NO. / Mfr. Part No.	Description	Price Each
511—STX-RLINK	In-Circuit debugger/programmer supporting JTAG and ICC protocols for STM8, ST7, uPSD, STM32, STR7 and STR9	86.84

STM32 GRAPHIC PANEL BOARD

The STM32-based STEVAL-CCM001V2 graphic panel demonstration board display images one by one in a slideshow fashion. The heart of this board is the STM32 microcontroller, which is capable of reading a memory card containing photographs, and display them on a TFT screen. The memory used to store the images is a microSD card. A 3-axis MEMS accelerometer is used for the picture orienation. The application can be used either as a standalone solution, or combined with other applications such as POS, card readers, security panels, USB speakers or high-end remote controls.

MOUSER STOCK NO. / Mfr. Part No.	Description	Price Each
511—STEVAL-CCM001V2	STM32-based graphic panel demonstration board display based on STM32 MCU containing photographs for a TFT screen with microSD and 3-axis MEMS	153.15

STM32 Development Board

PRODUCT NEW

MOUSER STOCK NO. / Mfr. Part No.	Description	Price Each
511-STM3220G-EVAL	Full range of hardware features on the board USB OTG HS, USB OTG FS, ethernet, motor control, CAN, MicroSD card, smartcard, USART, Audio DAC, RS-232, IrDA, SRAM, MEMS, EEPROM to develop applications.	373.16

STM8L ULTRA-LOW-POWER 8-BIT

STMicroelectronics has introduced its first ultra-low-power family based on the 8-bit STM8 core. Paving the way for a future complete ultra-low-power platform, the STM8L family combines high performance and ultra-low power consumption thanks to a new proprietary ultra-low-leakage process and optimized architecture. This family is declined in three different lines making the STM8L an optimal family to support many applications with special care on power savings.

For quantities greater than listed, call for quote.

STM8L DEVELOPMENT BOARDS

MOUSER STOCK NO.	Description	Price Each
511—	STM8L-DISCOVERY	For the STM8L152C6T6 which includes ST-Link embedded debug tool interface, LCD (24 segments, 4 commons), LEDs and push buttons.	12.08
511—	STM8L1526-EVAL	For STM8L152C6 which supports I2C, SPI, USART, 12-bit ADC, 12-bit DAC, LCD driver, 2KB internal SRAM, 32 KB EEPROM and SWIM debugging.	212.66
511—	STM8L15LPBOARD	Low-power demo board demonstrates all the STM8L15x low-power modes, and permits the user to take consumption measurements in all modes.	52.16
511—	STM8L1526PRIMER	EvoPrimer STM8L Ultralow power line complete evaluation tool including base and target board with 32KB Flash, program/debug USB port, 3 character display, 8 segments, temperature sensor, MEMS accelerometer, rechargable battery, solar cells, and push buttons.	105.66
511—	STM8L1526PRIM-D	STMPRIMER accessory including 32KB flash for the STM8L MCU target boards for use with the EvoPrimer base.	25.41

STM8S GENERAL PURPOSE 8-BIT

The STM8S family of general-purpose 8-bit Flash microcontrollers offers ideal solutions for industrial and appliance market requirements. An advanced core version combined with a 3-stage pipeline ranks the STM8S in the top position for performance to cost ratio . The embedded EEPROM and the calibrated RC oscillator allow a significant cost effectiveness. An easy-to-use and intuitive development environment contributes improving time to market.

For quantities greater than listed, call for quote.

POWER ARCHITECTURE® AUTOMOTIVE, 32-BIT

PRODUCT NEW

This 32-bit system-on-chip (SoC) automotive microcontroller family is the latest achievement in integrated automotive application controllers. It belongs to an expanding range of automotive-focused products designed to address chassis applications—specifically, electrical hydraulic power steering (EHPS) and electric power steering (EPS)—as well as airbag applications.

For quantities greater than listed, call for quote.

OLIMEX Development Boards

RoHS Compliant **This product is RoHS compliant.**

Olimex Ltd. designs, prototypes, and manufactures printed circuit boards, sub-assemblies, and complete electronic products. Olimex provides product/PCB design assembly, harnessing, and panel work ranging from small analog devices to large, complex microprocessor products. Olimex is recognized as a third party hardware developer for Texas Instruments, Atmel, STMicroelectronics, IAR Systems, Cirrus Logic, and more.

MOUSER STOCK NO.	Description	Price Each
909-AVR-CAN	Development Board for AT90CAN128	33.61
909-AVR-USB-STK	Development Board for AT90USB162	46.61
909-AVR-MT128	Development Board for ATMEGA128	45.73
909-AVR-IO-M16	Development Board for ATMEGA16	34.96
909-AVR-T32U4	Development Board for ATMega32U4	19.26
909-SAM3-H256	Development Board for ATSAM3S4BA-AU	26.88
909-SAM3-P256	Development Board for ATSAM3S4BA-AU	34.96
909-IMXOLINUXINOMAXI	OLinuXino-MAXI Single-Board Linux Computer	60.18
909-IMXOLINUXINOMCRO	Single-Board Linux Computer, i.MX233 MCU, SD Card, USB, Comp. Video	32.05
909-IMXOLINUXINOSD	SD Card for OLinuxino-MAXI Board	13.41
909-OLIMEXINO-32U4	Olimexino Development Board for ATMega32U4	17.44
909-OLIMEXINO-5510	Olimexino Development Board for MSP430	17.44
909-OLIMEXINO-328	Development Board for AVR ATMEGA328	29.57
909-OLIMEXINO-STM32	Development Board for ARM STM32	26.88
909-LPC-H1114	Dev. Brd for LPC-H1114 Cortex-M0 , 32KB FLASH, 8KB SRAM	12.28
909-LPC-H1343	Dev. Brd for LPC-1343 Cortex M3, 32KB FLASH 8KB RAM	12.28
909-LPC-H11C14	Dev. Brd for LPC-H11C14 Cortex M0, 32KB FLASH, 8KB SRAM	12.28
909-LPC-P1227	ARM Prototype Board for LPC1227	28.23
909-LPC1766-STK	Development Board for LPC1766 256KB Flash 64KB RAM	104.28
909-LPC-E2294-8MB	Development Board for LPC2294 256KB Flash 16KB RAM	246.10
909-LPC-P2378	Development Board for LPC2378 512KB Flash 16KB RAM	109.78
909-MSP430-CCRF	Dev. Brd for MSP430-CCRF w/ RF Transceiver (868/915MHz)	24.18
909-MSP430-CCRFLCD	Development Board for TI CC430F5137IRGZ with LCD	33.61
909-MSP430-P149	Development Board for MSP430F149	27.39
909-MSP430-P1611	Development Board for MSP430F1611	40.35
909-MSP430-P169	Development Board for MSP430F169	34.25
909-MSP430-P249	Development Board for MSP430F249	27.39
909-MSP430-5438STK	Development Board for MSP430F5438	55.17
909-MSP430-EASYWEB-2	Development Board for MSP430F149 10A/240V TCP/IP	68.59
909-MSP430-EASYWEB-3	Development Board for MSP430F149 Low Power TCP/IP	34.25
909-MSP430-169STK	Starter Kit for MSP430F169	109.78
909-MSP430-413STK2	Starter Kit for MSP430F413	54.57
909-MSP430-169LCD	Starter Kit for MSP430F169	45.24
909-TMS320-P28016	Development Board for TMS320F28016	68.59
909-PIC-P26J50	Prototype/Development Board for PIC18F26J50	13.41
909-PIC32PINGUINOOTG	Development Board for PIC/DSPIC PIC32 OTG	29.57
909-PINGUINO-MICRO	Pinguino Micro, Development Board for PIC32MX440F256H	17.44
909-PIC-LCD3310	Development Board for PIC18F67J50	54.85
909-PIC32-MX460	Development Board for PIC32MX460F	54.85
909-PIC-MICRO-WEB	Development Board for PIC18F67J60 TCP/IP Micro	54.85
909-PIC-WEB	Development Board for PIC18F67J60 TCP/IP	40.35
909-PIC-MAXI-WEB	Development Board for PIC18F97J60 TCP/IP	67.29
909-PIC32-WEB	Development Board for PIC32MX460F512 TCP/IP	37.00
909-PIC32-MAXI-WEB	Development Board for PIC32MX460F512L TCP/IP	134.65
909-PIC-USB-STK	Starter Kit for PIC18F4550 with USB	33.61
909-STM32-H152	Dev. Brd for STM32L15VBT6 Cortex M3, 128KB Flash, 16KB RAM	20.14
909-STM32-P152	Dev. Brd for STM32L15VBT6 Cortex M3, 128KB Flash, 16KB RAM	33.61
909-STM32-LCD	Development Board for STM32F103ZE	115.27
909-STM32-103STK	Starter Kit for STM32F103RBT6	82.32
909-PIC32-T795	PIC/DSPIC Development Board for PIC32-T795 Pinguino	25.16
909-PIC32PINGUINOMX	Pinguino Development Board for PIC32MX220F032D	17.44
909-MSP430-5510STK	Starter Kit Board for MSP430F5510	22.83
909-EM-32G210F128-H	Hardware Board for EM-32G210F128-H	23.27
909-DUINOMITE-MEGA	PIC32MX795F521H Duinomite Dev. Board - Mega	41.12
909-DUINOMITE-MINI	PIC32MX795F521H Duinomite Development Board - Mini	27.39
909-DUINOMITE	PIC32MX795F521H Duinomite Development Board	27.39
909-DUINOMITE-IO	Duinomite I/O Board - connects VGA, Composite Video, Audio, & PS/2 Keyboard	6.79
909-DUINOMITE-SHIELD	Arduino 26-Pin Connector Shield	5.41
909-DUINOMITE-EMEGA	PIC/DSPIC Maximite Open Source SBC- Mega Ethernet	54.85
909-SHIELD-EKG-EMG	EKG/EMG Shield for Duniomite	26.88

HEADER BOARDS

909-MSP430-HE427	Header Board for MSP430FE427	27.39
909-MSP430-HG439	Header Board for MSP430FG439	35.63
909-MSP430-HW427	Header Board for MSP4730FW427	27.39
909-STM32-H103	Header Board for STM32F103RBT6	26.88
909-STM32-H107	Header Board for STM32F107	33.61

PROTOTYPE BOARDS

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Description	Price Each
909-PROTO-SHIELD	Prototype Shield for Olimex Ardino Compatible Boards	8.01
909-AVR-P40N85358MHZ	Prototype Board for STK200 10-Pin	17.44
909-AVR-P20B-10MHZ	Prototype Board for STK200 20-Pin	17.77
909-AVR-P28N-8MHZ	Prototype Board for STK200 28-Pin	17.44
909-AVR-USB-162	Prototype Board for AT90USB162	21.49
909-LPC-P1343	Prototype Board for LPC1343	17.44
909-MSP430-P123M	Prototype Board for MSP430F123	16.40
909-TMS320-P28027	Prototype Board for TMS320F28027	54.85
909-PIC-USB-4550	Prototype Board for PIC18F4550 w/USB	22.83
909-PIC-P67J60	Prototype Board for PIC18F67J60	41.12

PROTOTYPE BOARDS (CONT.)

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Description	Price Each
909-PIC-P32MX	Prototype Board for PIC32MX340F512	26.88
909-PIC-P18-20MHZ	Prototype Board for 18-PIN PIC	17.77
909-PIC-P28-20MHZ	Prototype Board for 28-PIN PIC	17.44
909-PIC-P40-20MHZ	Prototype Board for 40-PIN PIC	17.44
909-PIC-P14-20MHZ	Prototype Board ICSP/ICD Enabled 14-Pin	17.77
909-PIC-P28-USB	Prototype Board ICSP/ICD Enabled 28-Pin	31.51
909-PIC-P40-USB	Prototype Board ICSP/ICD Enabled 40-Pin	31.51
909-STM32-P107	Prototype Board for STM32F107VCT6	61.90
909-STM32-P103	Prototype Board for STM32F103RBT6	33.61
909-STM32-P207	Arm Protype Board for STM32F207	134.65
909-STM32-P407	Arm Protype Board for STM32F207	148.12

WIRELESS, ACCESSORIES, AND MODULES

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Description	Price Each
909-MOD-WIFI	WIFI Wireless Prototype Module	40.35
909-MOD-GPS	GPS SIRF STAR III Module 20-CH 38mA 4G	54.85
909-MOD-BT	Bluetooth Wireless Prototype Module	26.88
909-MOD-ZIGBEE	Zigbee Wireless Prototype Module	22.83
909-MOD-MRF24J40	MRF24J40 ZigbeeTransciever Module	21.89
909-MOD-NRF24LR	RF 2.4GHZ Transciever Module NRF24L01 34x18mm	16.40
909-MOD-NRF24LS	RF 2.4GHZ Transciever Module NRF24L01 51x18mm	27.82
909-MOD-RFID125-BOX	RFID Reader for 125KHZ TAGS 100x50x10mm	54.85
909-MOD-RFID125	RFID Reader for 125KHZ TAGS 50x20x5mm	35.63
909-RFID125-ISO	RFID Transponder Tag, 125KHz ISO	.70
909-RFID125-WAT	RFID Watch Tag, 125KHz	1.85
909-RFID125-STI	RFID Sticker Tag, 125KHz	.86
909-RFID1356-ISO	RFID Transponder Tag, 13.56MHz ISO	1.37
909-RFID1356-STI	RFID Sticker Tag, 13.56MHz	1.37
909-MOD-ENC624J600	Ethernet Controller Header Board w/UEXT Conn 100Mbit	23.27
909-MOD-ENC28J60	Ethernet Controller Header Board w/UEXT Conn 10Mbit	18.79
909-MOD-IO	Expandable Board Input/Output w/UEXT	34.96
909-MOD-USB-RS232	USB to RS232 Interface Module	15.03
909-MOD-POE	PoE Injector for PIC-MICRO-WEB	13.65
909-MOD-MMA7260	3-AXIS Accelerometer Board with AT91SAM7S64	53.50
909-MOD-SMB380	3-AXIS Accelerometer Board with UEXT Conn	28.89
909-MOD-SM380	UEXT Accelerometer Module	20.52
909-MOD-VGA-32MB	Gameduino 32MB VGA Shield	41.12
909-MOD-LCD4.3	Olimex 4.3" LCD Panel extension, UEXT	109.78
909-MOD-NOKIA6610	TFT LCD 128x128 Pixel 12bit Color	34.96
909-MOD-LCD3310	LCD 84x48 B/W Nokia 3310 UEXT Connector	9.36
909-MOD-LCD1X9	LCD 1x9 Alphanumeric UEXT/I2C	9.53
909-MOD-SDMMC	SD/MMC Card Module UEXT/BAT Connector	5.32
909-MOD-RS485	RS232 to RS485 Converter Module w/ UEXT Conn	9.36
909-MOD-EKG	MSP430 Heart-Rate and EKG Kit w/ LCD & RS232 EKG Output	34.96
909-MOD-PULSE	MSP430 Heart-Rate and Blood Oxygenation Dev. Board	34.96
909-MOD-RTC	Real Time Clock Interface Board w/ PCF8536 & UEXT	6.67
909-SHIELD-LOL-SMT	Red SMT3528 LED Shield for Olimexino-328	22.89
909-MOD-POE-V2	PoE Adapter Module	28.76
909-MOD-ZIGBEE-UEXT	Zigbee Uext Module	24.64
909-MOD-ZIGBEE-PIR	Zigbee PIR Module	26.01
909-MOD-USB-RS232	USB to RS232 Interface Module	15.03
909-MOD-IRDA	IRD Uext Module	6.79
909-MOD-TC	Thermocoupler Uext Module	10.71
909-MOD-MAG	Magnetometer Uext Module	10.91
909-MSP430-RFLINK	Wireless Module with MSP430F1232	27.39
909-AVR-GSM	Development Board for ATMEGA32 32KB Flash 2KB RAM	131.75
909-PIC-GSM	Development Board w/GSM Module PIC18F97J60-I/PT	123.51
909-RFID125-ISO-5	RFID Tag 125KHZ ISO 86x54x0.8mm	3.51
909-RFID125-KEY-5	RFID Tag 125KHZ Keyfob 36.5x30x7.5mm	3.51
909-RFID125-STI-5	RFID Tag 125KHZ Sticker 20x1mm	4.33
909-ENC28J60-H	Ethernet Controller Header Board 30x24mm	18.79
909-CS8900A-H	Ethernet Controller Header Board 53x29mm	23.27
909-USB-ISO	FL SPD USB Isolator 1000V 41x36.5mm	40.35
909-MSP430-LEDBOOST	8x8 LED Matrix for TI MSP430 Launchpad	13.65
909-MOD-LED8x8	MSP430 Launchpad 8x8 LED Add-on	9.36
909-MSP430-PIR	PIR Sensor for MSP430F2013 Low Power	17.77
909-MSP430-GBD	Glass Break Detector	27.39
909-MSP430-SOLAR	Solar Panel Battery Charger w/MSP430 JTAG	13.65
909-BATTERY-LITHPO	Lithium Polymer Battery w/JST Conn. for Olimex Arduino Compatible Boards	8.16
909-USB-ULIPO	Lithium Polymer Battery	5.78

PROGRAMMERS / DEBUGGERS

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Description	Price Each
909-ARM-JTAG-SWD	ARM JTAG SWD Adapter	6.67
909-ARM-JTAG-20-10	JTAG 20-pin 0.1" to 10-pin 0.05" Adapter	6.67
909-ARM-USB-OCD	3-in-1 USB ARM JTAG 2-5V 50x40mm	74.02
909-ARM-USB-TINY-H	Hi Speed ARM USB JTAG 2-5V 50x40mm	53.82
909-AVR-ISP-MK2	AVR Programmer for Atmel STK500 V2	26.88
909-AVR-ISP500-ISO	AVR Programmer 2MB Flash 1000V	68.59
909-AVR-ISP500-TINY	AVR Programmer 2MB Flash	41.12
909-AVR-ISP500	USB AVR Programmer	27.39
909-AVR-JTAG-USB	USB JTAG Dongle OPTOISOLATED 3-5V	26.89
909-MSP430JTAGISOMK2	Optoisolated USB JTAG for MSP430Fxxx flash microcontrollers	202.01
909-MSP430-JTAG-TINY	USB JTAG for MSP430FXXX	74.02
909-MSP430-JTAG-RF	Wireless USB JTAG For MSP430FXXX	137.24
909-TMS320-XDS100-V2	USB JTAG Dongle XDS100V2 TMS320	74.02
909-PIC-KIT3	PIC Programmer/Debugger, USB to PC Connection	40.35
909-PIC-MCP-USB	MPLAB 8/18/28/40P for PICSTART+	47.08

META WATCH™ DEVELOPMENT SYSTEM

Meta Watch™ is a wearable development system that enables rapid development of 'connected-watch' applications. With Meta Watch™, developers can quickly and easily extend the interfaces of devices and applications to the wrist. The Meta Watch™ platforms utilize embedded Bluetooth® technology to connect to smartphones, mobile devices and other Bluetooth enabled devices.

Watch Features:
- A great looking watch
- An easy-to-use Bluetooth enabled wearable development system
- Fully-tooled; production-ready modules with FCC, CE certification
- Stainless steel case
- Leather strap
- Water-resistant (3 ATM)
- Mineral crystal lens
- Vibrating motor
- Three-axis accelerometer
- Ambient light sensor

Embedded SDK Features:
- Add your own thread to the watch for special functions
- Use the Meta Watch™ low-power application framework
- No need to open the watch for in-circuit debugging
- Uses TI SPI-BY-Wire
- Leverage the Bluetooth radio and remote protocol for communication
- Sample code which is an Open Source Android SDK project demonstrating watch connectivity to an Android phone. The project demonstrates watch idle screen use as well as notifications for: CallerID, SMS messages, alarms, calendar events, music control, email and IM

Kit Includes:
- Programming/charging clip & USB cable
- Ability to easily program through external clip & cable; no need to open watch
- Supports open source projects that support both CCS (Code Composer Studio) and IAR tool chains
- One digital display watch
- Preprogrammed to connect to an Android device out of the box

Benefits:
- MetaWatch™ is a fully-tooled production unit which lowers the barrier to market entry
- As a development platform it allows users to create custom wearable applications
- Bluetooth technology allows connection to over 3 billion + Bluetooth devices in the market
- Freely available source example code allows for easy development
- Meta Watch™ community with forums, documentation nd links to sample code

MSP430X4XX FLASH/ROM LCD MICROCONTROLLERS

MSP430x4xx – This family of LCD flash/ROM based devices offers 1.8V-3.6V operation, up to 120kB/Flash/ROM 8MIPS with FLL + SVS along with an integrated LCD controller. Ideal for low power metering and medical applications.

For quantities greater than listed, call for quote.

MSP430X5XX/6XX FLASH NO LCD MICROCONTROLLERS

MSP430x5xx/6xx – Introducing the new Flash-based family featuring the lowest power consumption up to 25MIPS with 1.8V to 3.6V operation starting at 12MIPS. New features include an innovative Power Management Module for optimizing power consumption, an internally controlled voltage regulator, and 2x more memory than previous devices.

For quantities greater than listed, call for quote.

SITARA™ ARM CORTEX-A8 AND ARM9 MICROCONTROLLERS

The Sitara™ ARM® MPU Product Platform – High performance, ARM-based microprocessors include more than 70ARM Cortex™-A8 and ARM9® options. With speeds ranging from 375MHz to 1.5GHz which enables you to find the processor you need for your end application and a roadmap to meet additional performance and power requirements. In addition, Sitara ARM microprocessors offer a software-compatible roadmap if you are using existing Sitara solutions.

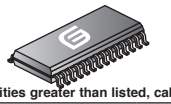
STELLARIS™ FAMILY OF ARM® CORTEX-M3™ MICROCONTROLLERS

The Stellaris family of microcontrollers incorporates the ARM Cortex-M3 MCU core running up to 50MHz, embedded Flash and SRAM, a low-dropout voltage regulator, integrated brown-out reset and power-on reset functions, analog comparators, 10-bit ADC, SSI, GPIOs, watchdog and general purpose timers, UARTs, IC, motion control PWMs, and quadrature encoder inputs.



For quantities greater than listed, call for quote.

STELLARIS™ EVALUATION KITS, REFERENCE DESIGN KITS, AND MODULES

Features:

- Fully functional evaluation versions of microcontroller toolsets from ARM/Keil, CodeSourcery (GNU), Code Red Technologies and IAR
- Everything needed to develop and prototype embedded applications right out of the box, including all cables, jumpers, and power over USB
- All boards can be used as booster packs for the MSP430 and Stellaris Launch pads

For quantities greater than listed, call for quote.

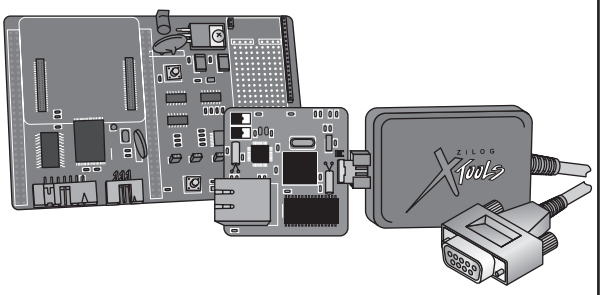
zilog
Embedded in Life
An IXYS Company



ZILOG EZ80F91 FLASH MICROCONTROLLER

Features:

- eZ80 core operating at 50MHz
- On-chip 10/100BaseT Ethernet MAC
- 256KB on-chip Flash memory
- 16KB on-chip SRAM
- Power management features supporting Sleep, Halt, and peripheral power-down controls
- Glueless external bus supporting eZ80, Z80, Intel, and Motorola modes
- 32GPIO
- IrDA compatible Infrared Encoder/Decoder
- Two independent UARTs with multidrop mode
- SPI and I2C ports
- Four, 16-bit counter/timers with I/O capability
- Watch Dog Timer with selectable clock inputs
- Real-time clock with on-chip 32KHz oscillator
- Full-feature PLL
- JTAG and ZiLOG Debug Interfaces
- Interrupt controller supporting internal and external maskable interrupts as well as non-maskable interrupts input
- New DMA-like eZ80 instructions

Description:

The eZ80F91 is the flagship device of the eZ80Acclaim! family of Flash Microcontrollers (MCUs). With 50MHz speed and an on-chip Ethernet MAC, designers now have the necessary performance to execute complex applications quickly and efficiently. Combining 256KB of Flash with 16KB SRAM, the eZ80F91 provides the memory needed to implement communication protocol stacks and achieve the flexibility when performing in-system updates of application firmware. Complementing the high performance, the eZ80F91 offers a rich set of serial communication peripherals to address application designs ranging from consumer electronics and point-of-sale terminals to security systems and industrial control.

ZILOG EZ80F92 FLASH MICROCONTROLLER

Features:

- eZ80 core operating at 20MHz
- Up to 128KB on-chip Flash memory
- Up to 8KB on-chip SRAM
- Power management features supporting Sleep, Halt, and peripheral power-down controls
- Glueless external bus supporting eZ80, Z80, Intel, and Motorola modes
- Up to 24GPIO
- IrDA compatible Infrared Encoder/Decoder
- Two independent UARTs with multidrop mode
- SPI and I2C ports
- Six, 16-bit counter/timers with I/O capability
- Watch Dog Timer with selectable clock inputs
- Real-time clock with on-chip 32KHz oscillator
- JTAG and ZiLOG Debug Interfaces
- Interrupt controller supporting internal and external maskable interrupts as well as non-maskable interrupts input
- New DMA-like eZ80 instructions

Description:

The eZ80F92 is another of the devices which make up the eZ80Acclaim!™ family of Flash Microcontrollers (MCUs). Combining 20MHZ speed, 128KB of Flash, and 8KB SRAM, the eZ80F92 provides the performance and memory needed to implement communication protocol stacks and achieve the flexibility when performing in-system updates of application firmware. Complementing the high performance, the eZ80F92 offers a rich set of serial communication peripherals to address application designs ranging from consumer electronics and point-of-sale terminals to security systems and industrial control. The zZ80L92 is the ROMless equivalent to the eZ80F92/93.

ZILOG EZ80F93 FLASH MICROCONTROLLER

Attention:

- Above features and development kit for eZ80F92Acclaim!™ are applicable to eZ80F93Acclaim!™

Description:

The eZ80F93 is a new part comprising part of the eZ80Acclaim!™ family of Flash Microcontrollers (MCUs). Combining 20MHz speed, 64KB of Flash, and 4KB SRAM, the eZ80F93 provides the performance and memory needed to implement communication protocol stacks amd achieve the flexibility when performing in-system updates of application firmware. Complementing the high performance, the eZ80F93 offers a rich set of serial communication peripherals to address application designs ranging from consumer electronics and point-of-sale terminals to security systems and industrial control.

Z16FMC SERIES FLASH MICROCONTROLLER

Zilog's Z16FMC Series MCU, a part of the Flash Motor Control family of devices, is a powerful 16-bit CISC microcontroller that outperforms most RISC microcontrollers in its class. The Z16FMC boasts a unique architecture that provides the power, punch and performance of a 32-bit micro with the code, current efficiency and cost of a 16-bit. The Z16FMC features Zilog's ZNEO® CPU, which boasts a highly-optimized instruction set that achieves higher performance per clock cycle with less code space and lower overhead than competing architectures. Optimized for motor control applications, these devices are designed for the control of multiphase AC and DC variable-speed motors.

Features:

- 16-bit optimized Single-Cycle CISC core
- Up to 128KB of in-circuit programmable Flash memory
- Flexible communication interface including a 9-bit UART with LIN & IrDA, I2C, ESPI
- 12-Channel, 10-bit ADC with a 2.1µs conversion time
- Highly integrated Digital/Analog peripherals
  - Operational Amplifier
  - Analog Comparator
  - Internal Precision Oscillator
  - 4-Channel DMA Controller
  - 12-bit PWM module with three complementary pairs or six independent PWM outputs

RoHS Compliant

For quantities greater than listed, call for quote.

MOUSER STOCK NO. Mfr.	Mfr. Part No.	Package	Flash (KB)	SRAM (KB)	GPIO	Interface Type	10-bit A/D Channels	Interrupts	Temperature Range (°C)	Price Each 1	25	100

Z16FMC SERIES MOTOR CONTROL DEVELOPMENT KIT

The Z16FMC Series Motor Control Development Kit features a Motor Control Modular Development System (MC MDS) daughter board mounted on a 3-Phase Motor Control Application Board. The MC MDS board consists of a 64LQFP Z16FMC chip and a DBG connector to connect the kit to a host development PC via the USB Smart Cable. The 3-Phase Motor Control Application Board provides spade lug connectors for the 3-phase motor and fused spade lug connectors for an adjustable 24V DC, 3A workbench power source.

RoHS Compliant

ZILOG Z8 ENCORE!™ XP MICROCONTROLLERS

Specifications:

- Each Z8 Encore! Microcontroller contains the following: Watchdog Timers, Analog Comparator, Temp. Sensor, Current Sense Amplifier, and Internal Precision Oscillator
- Core Speed: 20MHz
- Voltage: 2.7V to 3.6V
- UARTs: 1
- 2 16-bit Timers with PWMs
- Surface Mount

RoHS Compliant

For quantities greater than listed, call for quote.

ZILOG Z8 ENCORE!™ FLASH MCU DEVELOPMENT KIT

The Z8 Encore! Microcontroller (MCU) Development Kit is a general-purpose platform that allows design engineers to evaluate the capabilities and operation of the Z8 Encore! family of microcontrollers and provides tools to shorten the development cycle. Included with the Development Kit is a free full-version ANSI C-Compiler and a Target Interface Module board that interfaces with the on-chip debugger converting a one-wire interface to a two-wire RS-232-like interface. All necessary hardware, software tools, and technical documentation are included, to provide a complete solution at minimal cost.

Features:

Hardware:
- Evaluation Board, Z8 Encore!
- Smart Cable – DB9 to six-pin male (Z8F08200100KIT)
- RS-232 DB9 Serial Cable
- 9VDC Universal Power Supply

Software:
- ZDS II - Z8 Encore! IDE with ANSI C-Compiler
- Sample code
- Device Driver software

CD-ROM contains:
- ZDS II Quick Start Guide
- Development Kit User Manual
- ZDS II - IDE User Manual

ENCORE! KIT

4K 28-PIN Dev Kit

MOUSER STOCK NO. Mfr.	Mfr. Part No.	Description	Price Each
692	Z8F08200100KIT	ENCORE! KIT (4K-8K Flash)	42.75
692	Z8F04A28100KITG	4K 28-PIN Dev Kit Lead Free	42.75

ZILOG Z8 ENCORE!™ MICROCONTROLLERS

- Each Z8 Encore! Microcontroller contains the following: Watchdog Timers, SPI Port, 12C Port
- Core Speed: 20MHz

ZILOG Z8 OTP MICROCONTROLLERS

The 8-Bit One-Time Programmable (OTP) Microcontrollers are members of ZiLOG's single-chip Z8 MCU family featuring enhanced wake-up circuitry, programmable Watch-Dog Timers, Low-Noise EMI options, and easy hardware/software system expansion capability.

Compilers, Debuggers, and Programmers

USB2Wiggler Features:

- Universal Serial Bus interface for JTAG and BDM debugging
- Faster than the classic parallel port Wiggler
- Fully compatible with all Macraigor Systems software
- Operates up to Hi-Speed USB rates (480Mb/s)
- One side interfaces to USB port of host IBM compatible PC, other side connects to OCD (On-Chip Debug) port of target system
- Port may be JTAG, E-JTAG, OnCE, COP, BDM, or any of several other types of connections

USB2Demon Features:

- Interfaces to USB 1.1 or USB 2.0 port of host PC on one side, other side connects to OCD (On-Chip Debug) port on target system
- Simultaneously debugs up to 255 devices on a single scan chain
- Supports configurable JTAG/BDM clock rates up to 20MHz
- Compatible with Windows and Linux hosts
- Supported versions of Linux: Red Hat 7.2-9 and Fedora Core 2
- Fully compatible with all of Macraigor's software tools

USB2Sprite Features:

- Low cost on-chip debugging interface
- Provides a simple, self powered, host USB to target mini USB debug interface
- Very small footprint
- Small size and USB's 5 meter (16ft.) maximum cable length
- High speed downloads
- Flash memory programming
- Multi-core/multi-processor debugging
- Interoperability with major 3rd party software debuggers

Macraigor Systems — PROGRAMMERS AND DEBUGGERS

BYTE CRAFT LIMITED — DEVELOPMENT SOFTWARE

Features:

- An optimizing C Cross-compiler
- The BCLink linker
- An Integrated Development Environment and editor
- A built-in macro cross-assembler

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Bytecraft Part No.	Description	Price Each
Compilers			
929-C6805	C6805	C Compiler for Freescale MC68HC05 microcontrollers	1706.65
929-C6808	C6808	C Compiler for Freescale HC08/ HCS08/RS08 microcontrollers	1706.65
929-MPC	MPC	C Compiler for Microchip PIC 12/14/16/17	1706.65
Tools			
929-ETPUC	ETPUC	Code Development System for Freescale eTPU	4012.50
929-FUZZC	FUZZC	Fuzzy Logic Preprocessor - Converts fuzzy logic statements and C statements into pure C code	203.30

MCS ELECTRONICS — COMPILERS

Features:

- Structured BASIC with labels
- Structured programming with IF-THEN-ELSE-END IF, DO-LOOP, WHILE-WEND, SELECT- CASE
- Fast machine code instead of interpreted code
- Variables and labels can be as long as 32 characters
- Bit, Byte, Integer, Word, Long, Single and String variables
- Compiled programs work with any 8051 MCU such as AT89C1051, AT89C2051, 8031, 8032, 8051, 8052, 0552, 80535 and 80537 MCUs
- Statements are highly compatible with Microsoft's VB/QB
- Special commands for LCD-displays , I2C chips and 1WIRE chips
- Integrated terminal emulator with download option
- Integrated simulator for testing
- Integrated flash programmer and support for SPI, PG2051, PG302, SE512, SE514, TAFE. (hardware can be purchased separately)
- Editor with statement highlighting
- Context sensitive help

For quantities greater than listed, call for quote.

921-BASCOM-8051	BASCOM-8051	8051 BASIC Compiler and integrated simulator	127.33

EE Tools — DEVELOPMENT PROGRAMMERS

TopMaxII Programmers

TopMaxII Features:

- High speed device programmer and TTL/LOGIC/DRAM tester
- PC driven: USB 2.0 interface
- Device libraries > 18000
- Standard 48-pin DIL ZIF socket
- Supported devices: EPROM, EEPROM, FLASH (NOR/NAND) memory, PLD, FPGA, Serial PROM, Parallel PROM, CMOS PROM, PIC and microcontrollers
- B/P/V takes 65 sec. for 64Mbit flash memory
- All socket adapters are available in stock (USA): PLCC, SOP, SOIC, QFP, TSOP, SON, BGA, TSSOP, and TSOPII
- Supported low-voltages: 1.8/2.0/2.7/3.0/3.3/5.0 volt
- Built-in AC (110-240) power supply
- External start key for auto programming mode
- Win 95/98/NT/2000/XP/Vista/Windows 7
- Approved by CE
- Made in USA
- Free software update for lifetime

MOUSER STOCK NO.	Description	Price Each
Mfr. / Mfr. Part No.		
519—TOPMAXII	Universal Device Programmer and IC Tester for USB	850.65

ChipMax and ChipMax2 Programmers

ChipMax2 Features:

- Cost effective high speed universal programmer
- PC driven: USB 2.0 interface
- Device libraries > 1500
- Standard 48-pin DIL ZIF socket
- Supported Devices: EPROM, EEPROM, FLASH (NOR/NAND) memory, PLD, FPGA, Serial PROM, Parallel PROM, CMOS PROM, PIC and microcontrollers
- B/P/V takes 85 sec. for 64Mbit Flash Memory
- All socket adapters are available in stock (USA): PLCC, SOP, SOIC, QFP, TSOP, SON, BGA, TSSOP, and TSOPII
- Supported low voltages: 1.8/2.0/2.7/3.0/3.3/5.0 volt
- External AC (110 or 240) power supply
- External start key for auto programming mode
- Win 95/98/NT/2000/XP/Vista/Windows 7
- Approved by CE
- Made in USA
- Free software update for lifetime

ChipMax2

ChipMax Features:

- Low cost universal programmer
- PC driven: parallel (print) port interface
- Device libraries > 8500
- Standard 40-pin DIL ZIF socket
- Supported Devices: EPROM, EEPROM, FLASH (NOR/NAND) memory, PLD, FPGA, Serial PROM, Parallel PROM, CMOS PROM, PIC and microcontrollers
- B/P/V takes 85 sec. for 64 Mbit Flash Memory
- All socket adapters are available in stock (USA): PLCC, SOP, SOIC, QFP, TSOP, SON, BGA, TSSOP, and TSOPII
- External AC (110 or 240) power supply
- Win 95/98/NT/2000/XP/Vista/Windows 7
- Approved by CE
- Made in USA
- Free software update for lifetime

ChipMax

MOUSER STOCK NO.	Description	Price Each
Mfr. / Mfr. Part No.		
519—CHIPMAX2	Universal Device Programmer and IC Tester for USB	529.65
519—CHIPMAX	Universal Device Programmer for PC Parallel Port	262.15

EE Tools — PROGRAMMER ADAPTERS

The following adapters can be added as popular programming accessories for all EE Tools programmers.

MOUSER STOCK NO.	Description	Price Each
Mfr. / Mfr. Part No.		
519—PA16SO16DEO150	Universal 16-pin SOIC Adapter	85.60

943-5.10.01	5.10.01	D	ST SPC560 Series	Flash Programmer For PowerPC Based Microcontrollers With On-Chip Flash	853.86
943-5.15.01	5.15.01	E	Renesas RX600 (RX610, RX621, RX62N, RX62T)	Programming Tool For Renesas RX600 Series Microcontrollers With On-chip Or External Flash Memory And Renesas RX Core	853.86

EMULATORS/SIMULATORS FOR ARM DEVICES

Features include high download speed into RAM and flash memory, the ability to set an unlimited number of breakpoints into flash memory of MCUs. Supports ARM 7/9/11, Cortex, and Coldfire and various IDEs. SDK available.

Features:

- High visibility of tool chain parameters
- Hardware independent breakpoints
- Debugger independent flash download

NEW! TECHNOLOGY
