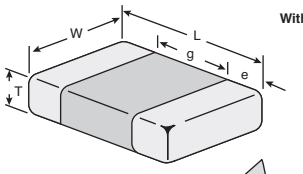
Modern vehicle design is driven by the need for increased comfort, safety and security. As a result, automobiles are becoming intelligent and increasingly reliant upon electronics. In the automotive sector, Murata's products are used in communication, safety, information, and power train systems, just to name a few. The acceptance of Murata's capacitor products in these applications is based upon the core competencies of Murata – ceramic material and processing technology. Murata's GCM series is designed for the more rigorous demands of safety, under-hood, and power train systems. The GCM series is designed specifically to meet the test conditions of the AEC-Q200.

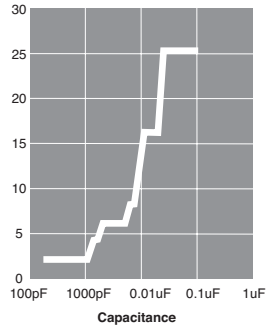
Features:

- Meets AEC-Q200 requirements
- GCM15 and 32 types are suited for only reflow soldering
- GCM18, 21, and 31 types are suited for flow and reflow soldering
- GCM Series is offered with a nickel (Ni) barrier termination finished with matte tin (Sn) plating
- Available in paper or embossed tape and reel packaging for automatic placement
- The GCM Series is RoHS compliant.

RoHS Compliant



ESD level based on AEC-Q200 test method [GCM18(0603)/X7R]



Part No.	Dimensions: mm

MURATA Safety Rated Ceramic Chip Capacitors

RoHS Compliant This product is RoHS compliant.

muRata Innovator in Electronics

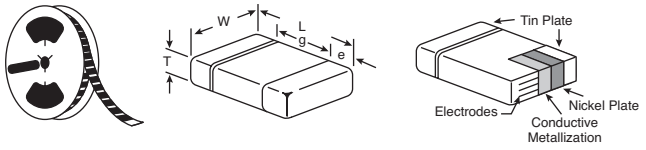
GA3 SERIES SAFETY RATED MULTILAYER SMD CERAMIC CHIP CAPACITORS

Features:

- Lead Free
- 250 VAC (r.m.s.)
- Base metal and lead-free technology
- GA3 is safety Rated (Y2/Y3)
- Operating Temperature: -55°C to +125°C
- Temperature Coefficient: X7R

RoHS Compliant

DIMENSIONS: mm



✻Line-By-Pass only

MURATA Low ESL Ceramic Chip Capacitors

RoHS Compliant **This product is RoHS compliant.**

LLL SERIES - STANDARD TWO TERMINAL REVERSED GEOMETRY LOW ESL TYPE

Murata offers a standard profile and low profile low inductance series of capacitors. Murata's Low ESL product line up includes the standard 2 terminal, reversed geometry type, (LLL Series), eight (8) terminal type (LLA Series) and Ten (10) terminal type (LLM Series). These three series are plated with Ni and matte Sn, and are RoHS compliant. Murata's low ESL series provide high capacitance in small case sizes. The low ESL series is especially ideal for high-speed microprocessors and high frequency digital equipment.

Features:

- Low ESL: 150 to 250pH - suitable for noise reduction at high frequencies (> 200MHz)
- Operating temperature: **X7R:** -55°C to 125°C w/ a ±15% cap change over temperature range
  X7S: -55°C to 125°C w/ a ±22% cap change over temperature range
  X6S: -55°C to 105°C w/ a ±22% cap change over temperature range

RoHS Compliant

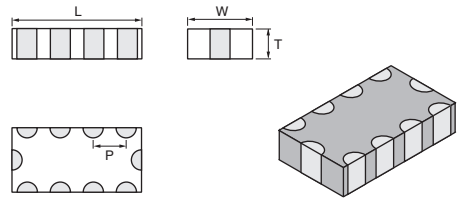
LLM SERIES - TEN TERMINAL LOW ESL TYPE

Features:
- Low ESL: 35 to 45pH. Suitable for high speed (1GHz to 4GHz) IC decoupling.
- Operating Temperature: **X7R:** -55°C to 125°C w/ a ±15% cap change over temperature range.
  X7S: -55°C to 125°C w/ a ±22% cap change over temperature range.



RoHS Compliant

NOVACAP Ceramic SMD Capacitors

RoHS Compliant **This product is RoHS compliant.**

NOVACAP TIP & RING CAPACITORS

NOVACAPs line of low ESR surface mount capacitors are ideally suited for "Tip & Ring" applications. They are designed with 250 VDC rating to withstand the 52 VDC bias and 150 VRMS signal during ring cadence. Dielectrics of X7R, Z5U and Y5V are available in a variety of sizes and values and can be found on mouser.com or by calling your Mouser representative.

NOVACAP SAFETY CERTIFIED CAPACITORS

The LS (X2,Y3) and ES (Y2) series of MLC chip capacitors are specifically designed for use in modems, facsimile machines, telephones and other electronic equipment where lightning or overvoltage surges can occur. These parts are rated to 3000 Vdc(LS series) and 5000Vdc(ES series) and are rated at 250 Vac safety approved.

NOVACAP HIGH TEMPERATURE 200°C CAPACITORS

NOVACAP manufactures COG chip capacitors designed and tested to operate from -55°C to 200°C. Product applications include harsh environments such as oil exploration and automotive/avionics engine compartment circuitry. Product is available as surface mount chips in sizes 0805 to 7565.

Specifications:

- Operating Temperature Range: -55°C to 200°C
- Temperature Coefficient: 0 ± 30 ppm/°C (up to 200°C)
- Dissipation Factor: .001 (0.1%) Max @ 25°C
- Insulation Resistance: 25°C- >100GΩ or >1000ΩF
  200°C >1GΩ or >10ΩF
- Dielectric Withstanding Voltage: < 200V, 250%
  201-500V, 150% or 500V✻ (✻whichever is greater)
- Termination: Palladium Silver

For quantities greater than listed, call for quote.

NOVACAP Ceramic SMD Capacitors

RoHS Compliant **This product is RoHS compliant.**

NOVACAP SMD CERAMIC CAPACITORS

(EIA C0G) or NP0 Dielectric is an ultra stable Class I dielectric. It has a linear temperature coefficient, low loss, stable electrical properties with time, voltage and frequency. C0G chips are used in precision circuitry requiring Class I stability. X7R Dielectric is a stable EIA Class II dielectric, with +/-15% temperature coefficient and predictable variation of electrical properties with time, temperature and voltage. Class II X7R chips are used as decoupling, by-pass, filtering and transient voltage suppression elements. Y5V/Z5U Dielectric is a general purpose EIA Class III dielectrics with +22% to -56% (Z5U) and +22% -82% (Y5V) temperature coefficients and very high capacitance density. The NOVACAP Z5U and Y5V formulations are very stable with time, typically aging less than 2% per decade. General purpose chips are used in by-pass and decoupling functions and other applications where capacitance change over the operating temperature range is not critical.

All Dielectrics are available in two nickel barrier termination systems suitable for solder wave, vapor phase or reflow solder board attachment. The "N" termination is a standard nickel barrier over fired on silver. The "C" termination is a nickel barrier over polymer terminated capacitors, which are able to accommodate a significantly increased degree of board flexure compared with standard terminated capacitors.

SYFER High Q RF Capacitors

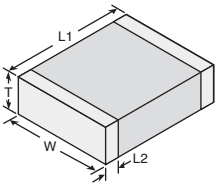
RoHS Compliant **This product is RoHS compliant.**

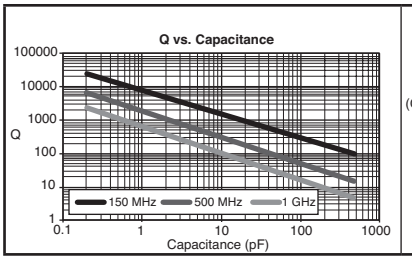
HIGH Q RF CAPACITORS

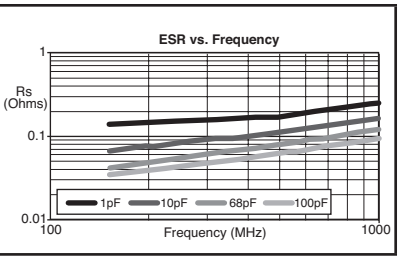
Syfer produces a wide range of specialist ceramic capacitors suitable for high frequency applications. Our High Q types are available in a range of sizes from 0402 to 3640. The design and materials used in their manufacture result in higher resonant frequencies, making them suitable for a wide range of applications including tuners, mixers, filters, oscillators, RF power amplifiers and tuning networks. Syfer also offers square chips in 0505 and 1111 sizes. Other case sizes available.

Features:
- High "Q" Factor at high frequencies
- High RF power cababilities
- Low ESR
- Small size
- High self resonant frequencies
- Excellent stability across temperature range

Specifications:
- Operating Temperature: -55°C to +125°C
- Temperature Coefficient (Typical): 0±30ppm/°C
- Insulation resistance at +25°C: >100GΩ
- Insulation resistance at +125°C: >10GΩ







For quantities greater than listed, call for quote.

SURGE AND SAFETY CAPACITORS

The Syfer range of surge and safety ceramic capacitors offer designers the option of using a surface mount ceramic multilayer capacitor to replace leaded film types. Offering the benefits of reduced board space requirements and lower profile, they are also available in a FlexiCap™ version to reduce the risk of mechanical cracking.

RoHS Compliant

Applications:

- Modems
- AC-DC Power Supplies
- Where lightning strikes or other voltage transients represent a threat to electronic equipment.

For quantities greater than listed, call for quote.

250VAC NON SAFETY RATED AC CAPACITORS

Syfer Technology has developed a range of MLCCs for use in 250Vac 60Hz applications. As they are designed for non-safety critical applications, the available capacitance values are much higher than for safety types which need to meet strict impulse and voltage proof requirements.

RoHS Compliant

For quantities greater than listed, call for quote.

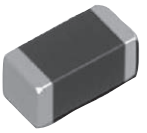
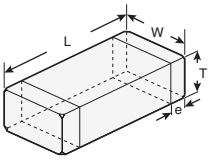
TAIYO YUDEN Multilayer Ceramic Capacitors TAIYO YUDEN

RoHS Compliant **This product is RoHS compliant.**

HIGH VALUE MLCCs

High Dielectric Type





Features:
- Monolithic structure provides higher reliability

Applications:
- Communication equipment
- General digital circuit
- Power Supply bypass capacitors
- Smoothing capacitors

Features:
- Monolithic structure provides higher reliability

Applications:
- Communication equipment
- General digital circuit
- Power Supply bypass capacitors
- Smoothing capacitors

TAIYO YUDEN Multilayer Ceramic Capacitors

RoHS Compliant **This product is RoHS compliant.**

M SERIES MEDIUM-HIGH VOLTAGE MLCCs

Features:
- The use of nickel as electrode material prevents migration and provides high reliability
- Small case sizes with high rated voltage

Applications:
- General telephone exchange
- Wireless and Telecommunication base
- For DC/DC Converter

MLCCS FOR HIGH FREQUENCY APPLICATIONS

Features:
- Q value in the high frequency range (1GHz+) is superior compared to other types of multilayer capacitors
- The 1005 (0402) case size is designed for high density mounting and weight reduction in various applications

Applications:
- Suitable for those high frequency applications in which a capacitor with both a high Q-value and small size is required such as portable communications and other wireless applications
- Adjustment of characteristics in high frequency circuit

TDK Ceramic Capacitor Arrays

TDK 2 ELEMENT CAPACITOR ARRAYS

Features:
- Multiple capacitors (2) in one package
- Reduced space needed for equal capacity
- Unique electrode construction reduces crosstalk in RF applications
- Decreases mounting time by 50% compared to individual components
- No polarity

RoHS Compliant

DIMENSIONS: in. (mm)

TDK 4 ELEMENT CAPACITOR ARRAYS

Features:
- Multiple capacitors (4) in one package
- Highly effective in EMC countermeasure applications
- Unique electrode construction reduces crosstalk in RF applications
- Decreases mounting time by 75% compared to individual components
- No polarity

RoHS Compliant

TDK Ceramic Chip Capacitors

RoHS Compliant **This product is RoHS compliant.**

C SERIES CONDUCTIVE EPOXY CAPACITORS

Features:

- AgPdCu termination for conductive glue mounting
- Reduce risk of silver migration
- Improved mechanical/thermal strength when used with conductive glue
- AEC Q-200 compliant
- RoHS, WEE, and REACH compliant

Applications:

- Transmission control
- Engine sensor module
- Automotive power train
- Anti-Lock Breaking System
- Application requiring conductive glue mounting method

TDK MLCC Capacitors

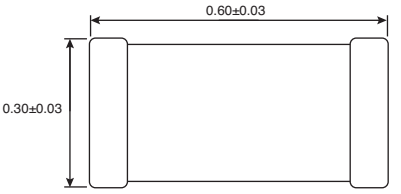
RoHS Compliant This product is RoHS compliant.

C SERIES - HIGH Q, HIGH FREQUENCY CAPACITORS

Features:
- Excellent attenuation
- High self-resonant frequency
- Higher Q factor than standard capacitors
- Lower power dissipation/less energy absorption
- High stability with respect to time, temperature, frequency, and voltage

Specifications:
- 0201 Case Size
- Temperature Range: -55°C to +125°C
- Rated Voltage (DC): 25V
- Temperature Coefficient: C0G
- Capacitance range of 0.2pF to 15pF
- Available in standard and tight tolerance

DIMENSIONS: mm



FK Series

TDK High Capacitance Ceramic Chip Capacitors

TDK

C SERIES CAPACITORS

RoHS Compliant **This product is RoHS compliant.**

Features:

- High capacitance has been achieved through precision technologies
- Monolithic structure ensures superior mechanical strength and reliability
- High-accuracy automatic mounting is facilitated through the maintenance of very precise dimensional tolerances.
- Composed of only ceramics and metals, these capacitors provide extremelydependable performance, exhibiting virtually no degradation even when subjected to temperature extremes.

TDK High Capacitance Ceramic Chip Capacitors

RoHS Compliant **This product is RoHS compliant.**

C SERIES CAPACITORS (CONT.)

Features:

- High capacitance has been achieved through precision technologies
- Monolithic structure ensures superior mechanical strength and reliability
- High-accuracy automatic mounting is facilitated through the maintenance of very precise dimensional tolerances.
- Composed of only ceramics and metals, these capacitors provide extremelydependable performance, exhibiting virtually no degradation even when subjected to temperature extremes.

TDK High Capacitance Ceramic Chip Capacitors

C SERIES CAPACITORS (CONT.)

RoHS Compliant **This product is RoHS compliant.**

Features:

- High capacitance has been achieved through precision technologies
- Monolithic structure ensures superior mechanical strength and reliability
- High-accuracy automatic mounting is facilitated through the maintenance of very precise dimensional tolerances.
- Composed of only ceramics and metals, these capacitors provide extremelydependable performance, exhibiting virtually no degradation even when subjected to temperature extremes.

TDK High Capacitance Ceramic Chip Capacitors

RoHS Compliant **This product is RoHS compliant.**

C SERIES CAPACITORS (CONT.)

Features:

- High capacitance has been achieved through precision technologies
- Monolithic structure ensures superior mechanical strength and reliability
- High-accuracy automatic mounting is facilitated through the maintenance of very precise dimensional tolerances.
- Composed of only ceramics and metals, these capacitors provide extremelydependable performance, exhibiting virtually no degradation even when subjected to temperature extremes.

TDK Ceramic Chip Capacitors

RoHS Compliant **This product is RoHS compliant.**

C SERIES CAPACITORS

Features:

- High capacitance has been achieved through precision technologies
- Monolithic structure ensures superior mechanical strength and reliability
- High-accuracy automatic mounting is facilitated through the maintenance of very precise dimensional tolerances.
- Composed of only ceramics and metals, these capacitors provide extremelydependable performance, exhibiting virtually no degradation even when subjected to temperature extremes.

TDK Ceramic Chip Capacitors

RoHS Compliant **This product is RoHS compliant.**

C SERIES CAPACITORS (CONT.)

Features:

- High capacitance has been achieved through precision technologies
- Monolithic structure ensures superior mechanical strength and reliability
- High-accuracy automatic mounting is facilitated through the maintenance of very precise dimensional tolerances.
- Composed of only ceramics and metals, these capacitors provide extremelydependable performance, exhibiting virtually no degradation even when subjected to temperature extremes.

TDK Ceramic Chip Capacitors

RoHS Compliant **This product is RoHS compliant.**

C SERIES CAPACITORS (CONT.)

Features:

- High capacitance has been achieved through precision technologies
- Monolithic structure ensures superior mechanical strength and reliability
- High-accuracy automatic mounting is facilitated through the maintenance of very precise dimensional tolerances.
- Composed of only ceramics and metals, these capacitors provide extremelydependable performance, exhibiting virtually no degradation even when subjected to temperature extremes.

TDK Ceramic Chip Capacitors

RoHS Compliant **This product is RoHS compliant.**

C SERIES OPEN MODE CAPACITORS

Features:

- Increase resistance to mechanical bending, temperature cycle, vibration, and electrical stresses
- Wider distance between the end of the opposite electrode and the termination
- Reduces the risk of short circuit failures
- X7R and X8R temperature ranges

Applications:

- Automotive and other high stress applications
- Battery line circuit with high board flex stress

TDK Ceramic Chip Capacitors

RoHS Compliant **This product is RoHS compliant.**

CGA SERIES AUTOMOTIVE GRADE CAPACITORS

Features:

- The CGA series consists of products that can be used for the power train, safety equipment, etc. of a vehicle
- Parts are manufactured using tested and stable manufacturing processes and are subjected to increased inspections to guarantee a higher level of reliability
- A monolithic structure ensures superior mechanical strength and reliability
- High Capacitance has been achieved through precision technologies that enable the use of multiple thinner ceramic dielectric layers
- High-accuracy automatic mounting is facilitated through the maintenance of very precise dimensional tolerances
- Low stray capacitance ensures high conformity with nominal values, thereby simplifying the circuit design process

Applications:

- Automotive applications
- High reliability requirement applications
- Harsh environment requirement applications
- Smart meter
- Base Stations
- Noise Bypass in automotive

Dimensions: mm

TDK Ceramic Chip Capacitors

RoHS Compliant This product is RoHS compliant.

CGA SERIES AUTOMOTIVE GRADE CAPACITORS (CONT.)

Features:
- The CGA series consists of products that can be used for the power train, safety equipment, etc. of a vehicle
- Parts are manufactured using tested and stable manufacturing processes and are subjected to increased inspections to guarantee a higher level of reliability
- A monolithic structure ensures superior mechanical strength and reliability
- High Capacitance has been achieved through precision technologies that enable the use of multiple thinner ceramic dielectric layers
- High-accuracy automatic mounting is facilitated through the maintenance of very precise dimensional tolerances
- Low stray capacitance ensures high conformity with nominal values, thereby simplifying the circuit design process

Applications:
- Automotive applications
- High reliability requirement applications
- Harsh environment requirement applications
- Smart meter
- Base Stations
- Noise Bypass in automotive

Dimensions: mm

RoHS Compliant This product is RoHS compliant.

CGA SERIES AUTOMOTIVE GRADE CAPACITORS (CONT.)

Features:

- The CGA series consists of products that can be used for the power train, safety equipment, etc. of a vehicle
- Parts are manufactured using tested and stable manufacturing processes and are subjected to increased inspections to guarantee a higher level of reliability
- A monolithic structure ensures superior mechanical strength and reliability
- High Capacitance has been achieved through precision technologies that enable the use of multiple thinner ceramic dielectric layers
- High—accuracy automatic mounting is facilitated through the maintenance of very precise dimensional tolerances
- Low stray capacitance ensures high conformity with nominal values, thereby simplifying the circuit design process

Applications:

- Automotive applications
- High reliability requirement applications
- Harsh environment requirement applications
- Smart meter
- Base Stations
- Noise Bypass in automotive

TDK Ceramic Chip Capacitors

RoHS Compliant This product is RoHS compliant.

CGA SERIES AUTOMOTIVE GRADE CAPACITORS (CONT.)

Features:
- The CGA series consists of products that can be used for the power train, safety equipment, etc. of a vehicle
- Parts are manufactured using tested and stable manufacturing processes and are subjected to increased inspections to guarantee a higher level of reliability
- A monolithic structure ensures superior mechanical strength and reliability
- High Capacitance has been achieved through precision technologies that enable the use of multiple thinner ceramic dielectric layers
- High—accuracy automatic mounting is facilitated through the maintenance of very precise dimensional tolerances
- Low stray capacitance ensures high conformity with nominal values, thereby simplifying the circuit design process

Applications:
- Automotive applications
- High reliability requirement applications
- Harsh environment requirement applications
- Smart meter
- Base Stations
- Noise Bypass in automotive

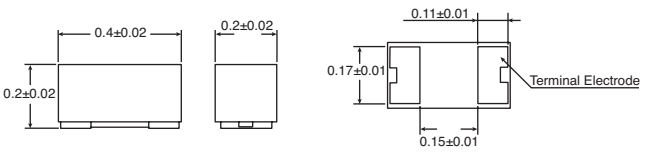
TFSQ THIN-FILM CAPACITORS (Z-MATCH)

For Impedance Matching at High Frequency

NEW! TECHNOLOGY

Features:
- Thin-film technologies developed for the manufacture of HDD heads are applied to achieve low ESL and ESR with narrow tolerances of ± 0.05 pF
- Z-match capacitors feature tight tolerances and a high self-resonant frequency

Applications:
- PA circuits, RF matching circuits and RF modules used in mobile phones, smartphones and other devices for wireless LAN, WiMAX, LTE, and other RF communication technologies



DIMENSIONS: mm

TDK Ceramic Chip Capacitors

RoHS Compliant **This product is RoHS compliant.**

CGJ SEREIES EXTENDED LIFE CAPACITORS

- Extended Life series capacitor featuring increased evaluation during manufacturing to promote longer life
- Life test performs at 2x rated voltage for 2000 hrs
- Reliability tests based on MIL-STD requirements
- Guaranteed TC Bias and Hot IR performance
- Anti-counterfeit/tamper-proof seal to assist in the identification of authentic TDK CGJ products
  The condition of the seal also indicates if the product has been tampered with in the supply chain

TDK Ceramic Chip Capacitors

RoHS Compliant **This product is RoHS compliant.**

CGJ SERIES EXTENDED LIFE CAPACITORS (CONT.)

- Extended Life series capacitor featuring increased evaluation during manufacturing to promote longer life
- Life test performs at 2x rated voltage for 2000 hrs
- Reliability tests based on MIL-STD requirements
- Guaranteed TC Bias and Hot IR performance
- Anti-counterfeit/tamper-proof seal to assist in the identification of authentic TDK CGJ products The condition of the seal also indicates if the product has been tampered with in the supply chain

TDK MLCC Ceramic Capacitors

RoHS Compliant This product is RoHS compliant.

CKD SERIES - 3-TERMINAL FEED THROUGH CAPACITORS

Features:

- These small low-cost filters are used for meeting EMC requirements
- Can be used us to even higher frequencies due to low parasitic inductance
- Optimized for use as a noise bypass capacitors for signal and power source circuits

Applications:

- For digital and analog signal line noise bypassing signal line

CKG SERIES - 2-CHIP PILED CAPACITORS

Features:

- No polarity
- Twice the capacitance is obtainable on a single capacitor space.
- Unique construction provides high reliability
- The metal caps absorbs stress from thermal and mechanical shocks, ensuring excellent performance on aluminum circuit substrates
- Low ESR and ESL promises excellent characteristics for high frequency switching power supply

Applications:

- Smoothing circuits.
- Temperature variable applications.
- Maintenance free power supplies.
- DC to DC converters.
- Automotive applications.

VISHAY Silicon and VJ HVArc Guard® Capacitors

RoHS Compliant **This product is RoHS compliant.**

VISHAY ELECTRO-FILMS THIN FILM SMD SILICON CAPACITOR

Features:
- Industries highest SRF
- Low DCR, high Q
- Small size: 0.040"x0.020"x0.015"

Applications:
- Lumped element filters
- Impedance matching circuits
- decoupling and DC blocking

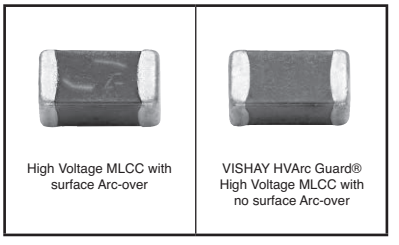
VJ HVARC GUARD® SERIES

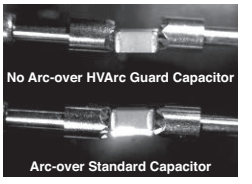
Features:
- Surface-mountable, multilayer ceramic capacitors, that protect against surface arc-over
- Higher capacitors and smaller case sizes that save board space, as compared to standard high voltage MLCCs
- Voltage breakdowns are twice that of some competitor products
- **Excellent reliability and high voltage performance**

Specifications:
- Operating Temperature: -55°C to +125°C
- Temperature Coefficient of Capacitance (TCC):
  X7R Style: ≤ 15% from -55°C to + 125°C, with 0VDC applied
  C0G (NP0) Style: 0 ±30ppm/°C from -55°C to +125°C



High Voltage MLCC with surface Arc-over

VISHAY HVArc Guard® High Voltage MLCC with no surface Arc-over



Applications:
- DC-to-DC converters (Buck and Boost)
- Voltage multipliers for flyback converters
- Lighting ballast circuits
- Power supplies

For quantities greater than listed, call for quote.

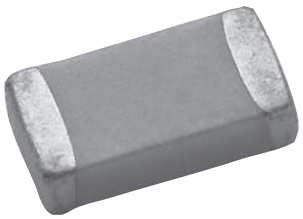
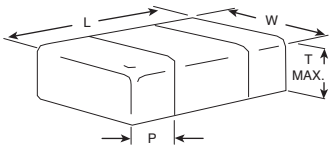
VISHAY/VITRAMON SMD Automotive MLCC

VJ SERIES AUTOMOTIVE GRADE CAPACITORS

Features:
- High operating temperature
- Wet build process
- Reliable Noble Metal Electrode (NME) system
- Halogen-free according to IEC 61249-2-21 definition





DIMENSIONS: in. (mm)

Specifications:
- Operating temperature range: -55°C to +150°C
- Temperature Coefficient of Capacitance (TCC):
  C0G Style: 0 ppm/°C ± 30 ppm/°C from -55°C to +125°C
  X7R Style: ± 15% from -55°C to + 125°C, with 0 VDC applied

Note: Polymer (B-termination) have increased dimensions: Length 0.006" (0.15 mm)

Applications:
- Automotive "under the hood"
- Safety and comfort electronics

IPDiA SMD Silicon Capacitors

RoHS Compliant **This product is RoHS compliant.**

EXSC SERIES EXTREME TEMPERATURE

Features:
- Ultra high operating temperature
- Low profile
- High stability of capacitance
- Low leakage current
- High reliability

Specification:
- Operating temperature range: -55°C to +250°C
- Tolerance: 15%

RoHS Compliant

For quantities greater than listed, call for quote.

HSSC SERIES HIGH STABILITY

Features:
- High reliability
- Low leakage current
- Low ESL
- Low ESR

Applications:
- Medical, Aerospace, Automotive industries
- High stability applications
- Decoupling, Filtering, Charge pump
- Devices with battery operations
- Replacement of X7R and NPO
- Downsizing

Specification:
- Operating temperature range: -55°C to +150°C
- Tolerance: 15%

RoHS Compliant

For quantities greater than listed, call for quote.

HTSC SERIES HIGH TEMPERATURE

Features:
- High stability
- High reliability
- Low leakage current
- Low ESL
- Low ESR

Applications:
- Military, Aerospace, Automotive industries
- High reliability applications
- Replacement of X7R and COG dielectrics
- Decoupling, Filtering, Charge pump
- Downsizing

Specification:
- Operating temperature range: -55°C to +200°C
- Tolerance: 15%

RoHS Compliant

For quantities greater than listed, call for quote.

LPSC SERIES LOW PROFILE

Features:
- High stability
- High reliability
- Low leakage current
- Low ESL
- Low ESR

Applications:
- Medical, Telecom, Computer Industries
- Decoupling, Filtering, Charge pump
- High reliability applications
- Devices with battery operations
- Extreme miniaturization
- Suitable for Embedded technologies

Specification:
- Operating temperature range: -55°C to +150°C

RoHS Compliant

For quantities greater than listed, call for quote.

WBSC SERIES WIRE BONDING

Features:
- Full compatible to monolithic ceramic capacitors
- Low leakage current
- Ultra high stability of capacitance value:
  Temperature ±1% (-55°C to +150°C)
  Voltage <0.1%/Volts
  Negligible capacitance loss through ageing
- Custom sizes, values, shapes, tolerances and higher voltage
- Low leakage current down to 100pA
- Low profile

RoHS Compliant

For quantities greater than listed, call for quote.

XTSC SERIES ULTRA HIGH TEMPERATURE

Features:
- High reliability
- Low leakage current
- Low ESL
- Low ESR

Applications:
- Military, Aerospace, Automotive, Downhole industries
- High reliability applications
- Replacement of X8R and COG dielectrics
- Decoupling, Filtering, Charge pump
- Downsizing

Specification:
- Operating temperature range: -55°C to +250°C

RoHS Compliant

For quantities greater than listed, call for quote.

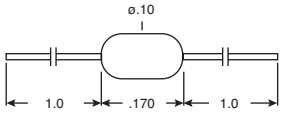
SPINGUARD® SA SERIES AXIAL MULTILAYER CERAMIC CAPACITORS

Specifications:
- Conformally Coated Axial Leaded MLC
- Temperature Coefficients: C0G (NP0), X7R, Z5U
- Case Material: Epoxy (Flame Retardant to UL Bulletin 492, Par. 280)
- Lead Material: Solderable

RoHS Compliant



DIMENSIONS: in.

C0G

For quantities greater than listed, call for quote.

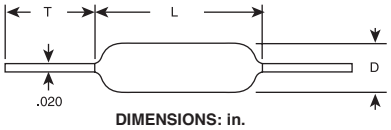
KEMET C4XX SERIES, "AXIMAX" CONFORMAL COATED AXIAL

Temperature Characteristics:

- C0G: 0 ±30ppm/°C from -55°C to +125°C
- X7R: ±15% from -55°C to +125°C
- Z5U: +22% from; -56% from +10°C to +85°C

Specifications:

- Solder coated copper clad steel leads
- Epoxy encapsulated - meets flame test requirements of UL Standard 94V-0
- High-temperature solder - meets EIA RS-198D, Method 302, Condition B (260°C for 10 sec.)



DIMENSIONS: in.

RoHS Compliant

Temp Coef: C0G, 5% Tolerance

For quantities greater than listed, call for quote.

GOLDEN MAX CERAMIC CONFORMAL COATED/RADIAL HIGH VOLTAGE C3XX SERIES

- Temperature characteristics: C0G: 0.15% max. from -55°C to +125°C, X7R: ±15% max. from -55°C to +125°C
- Epoxy encapsulated
- Meets flame test requirements of UL Standard 94V-0

Also available in various lead formations, tolerances, and packaging. Please contact a Mouser Sales Representative for information.

CERAMIC "GOLDEN MAX" CONFORMAL COATED, RADIAL, C0G (NP0)

- Temperature characteristics: 0 ±30ppm/°C from -55°C to +125°C
- Epoxy encapsulated
- Meets flame test requirements of UL Standard 94V-0

Also available in various lead formations, tolerances and packaging. Please contact a Mouser Sales Representative for information.

RoHS Compliant

CERAMIC "GOLDEN MAX" CONFORMAL COATED, RADIAL, X7R AND Z5U

- Temperature Characteristics: X7R: ±15% from -55°C to +125°C, Z5U: +22%, -56% from +10°C to +85°C
- Meets flame test requirements of UL Standard 94V-0.
- Epoxy Encapsulated

Also available in various lead formations, tolerances and packing.
Please contact a Mouser Sales Representative for information.

RoHS Compliant

KEMET 125°C UP TO 260°C C3 CERAMIC CASED CAPACITORS

Specifications:
- Elimination of cracking through uniform coefficient of linear expansion
- No "pull away" of epoxy potting from epoxy case at elevated temperatures
- Resistant to moisture penetration
- Superior volumetric efficiency
- Patented design

Applications:
- Down Hole
- Industrial
- Harsh Environment

MURATA Radial Ceramic Capacitors

RoHS Compliant **This product is RoHS compliant.**

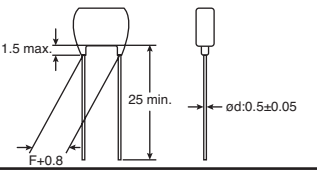
muRata Innovator in Electronics

MURATA RADIAL HIGH VOLTAGE CAPACITORS

Features:

- Small size and large capacitance.
- Low ESR/ESL - suitable for high frequency.
- Meets AEC-Q200 requirements.
- Coated with epoxy or silicone resin which is suitable for heat cycle.

DIMENSIONS: mm



For quantities greater than listed, call for quote.

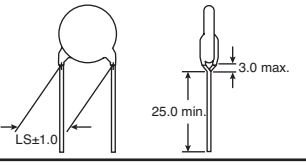
MURATA RADIAL HIGH VOLTAGE CAPACITORS

Applications:

- Ideal for use as the ballast in back lighting inverters for liquid crystal display.
- Ideal for use on high frequency pulse circuits such as a horizontal resonance circuit for CTV and snubber circuits for switching power supplies.
- Ideal use on decoupling circuit for power supply

Code	Temperature Characteristics	Cap. Change or Temp. Coeff	Temperature Range
B3	B	±10%	
E3	E	+20%-55%	-25 to +85°C
F3	F	+30%-80%	
R3	R	±15% +15%-30%	-25 to +85°C +85 to 125°C
1X	SL	+350 to -1000ppm/°C	+20 to 85°C

DIMENSIONS: mm



For quantities greater than listed, call for quote.

MURATA Multilayer Ceramic Radial Capacitors

muRata Innovator in Electronics

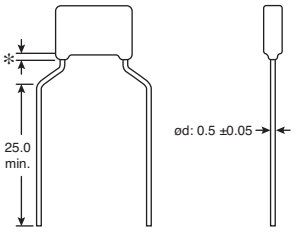
MURATA RPE SERIES CAPACITORS

RoHS Compliant **This product is RoHS compliant.**

Specifications:

- Temperature Characteristics:
  C0G ±30ppm/°C from -55°C to +125°C
  X7R ±15% from -55°C to +125°C
  Z5U -56%, +22% from +10°C to +85°C
- Case Size: 5.0 x 3.5mm
- Lead Space: 2.5mm
- D.F.: <ø.8% @ 1kHz

DIMENSIONS: mm



RoHS Compliant

✻ Coating extension does not exceed the end of lead bend

For quantities greater than listed, call for quote.

TDK MLCC Ceramic Capacitors

RoHS Compliant **This product is RoHS compliant.**

TDK DIPPED RADIAL CERAMIC CAPACITORS

Features:

- Due to the technological progress in creating thinner layers of ceramic dielectric and achieving multilayer lamination, this product provides large electrostatic capacity
- It maintains a high level of reliability under specified environmental conditions
- Its residual inductance is small and it provides good frequency characteristics
- The leads are formed with a "kink" to achieve consistent insertion heights and facilitate the release of gases during soldering for dramatically improved solderability
- Also available are products that meet taping specifications for automatic insertions, which contribute to reducing on-board costs

RoHS Compliant **This product is RoHS compliant.**

TDK DIPPED RADIAL CERAMIC CAPACITORS (CONT.)

Features:

- Due to the technological progress in creating thinner layers of ceramic dielectric and achieving multilayer lamination, this product provides large electrostatic capacity.
- It maintains a high level of reliability under specified environmental conditions.
- Its residual inductance is small and it provides good frequency characteristics.
- The leads are formed with a "kink" to achieve consistent insertion heights and facilitate the release of gases during soldering for dramatically improved solderability.
- Also available are products that meet taping specifications for automatic insertions, which contribute to reducing on-board costs.

TDK MLCC Ceramic Capacitors

RoHS Compliant This product is RoHS compliant.

TDK DIPPED RADIAL CERAMIC CAPACITORS (CONT.)

Features:

- Due to the technological progress in creating thinner layers of ceramic dielectric and achieving multilayer lamination, this product provides large electrostatic capacity.
- It maintains a high level of reliability under specified environmental conditions.
- Its residual inductance is small and it provides good frequency characteristics.
- The leads are formed with a "kink" to achieve consistent insertion heights and facilitate the release of gases during soldering for dramatically improved solderability.
- Also available are products that meet taping specifications for automatic insertions, which contribute to reducing on-board costs.

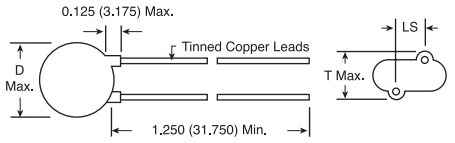
VISHAY Ceramic Capacitors

SPRAGUE 125L AND 440L SERIES: AC LINE RATED DISC CAPACITORS

Line By-Pass and Antenna Coupling Types, X and Y EMI/RFI Filter

LEAD-FREE RoHS Compliant

DIMENSIONS: in. (mm)



Case Code	Diameter (Max.)	Lead Spacing
D	.365 (9.3)	.378 (9.5)
E	.330 (8.3)	.250 (6.3)
F	.400 (10.0)	.250 (6.3)
G3	.460 (11.5)	.375 (9.4)
H	.530 (13.3)	.250 (6.3)
H3	.530 (13.3)	.375 (9.4)

X	.830 (20.8)	.375 (9.4)
Y	.940 (23.5)	.375 (9.4)

PERFORMANCE DATA

Test	125L	440L
Continuous Voltage Rating	250VAC,2kVDC	250VAC,4kVDC
Dielectric Strength	2000VAC,4kVDC	3500VAC,7kVDC
Dissipation Factor (@ + 25°C)	1.50%	1.00%
Case Breakdown/Flammability	2500 VAC; UL94v0; + 105 C	
Temperature Characteristic (See Notes 1 and 2 below)	Z5U/Y5V	X5F Y5U/Z5U
Insulation Resistance (Min.)	1000Ω F	1000Ω F

Notes:
1. Permissible change with temperature: Y Type: +20%, -55% (reference 20°C); X Type: +20%, -80%.
2. TC Class refers to ceramic classification. 125L are Class III, Y5V. 440L K tolerance are ClassII, other 440L cases are Class III.

250 VAC, 2k VDC

For quantities greater than listed, call for quote.

6K Volt, 20% Tolerance

Features:

- Application Range: Up to 60,000VDC, 1500VRMS
- Insulation Resistance: 75,000MΩ minimum
- Disipation Factor: 2.0% maximum
- Dielectric Strength: 10,500VDC, 3000VRMS

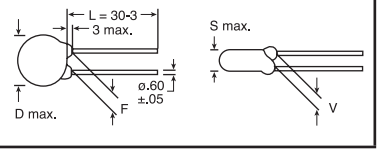
ROEDERSTEIN WYO SERIES: CERAMIC AC CAPACITORS CLASS X1, 440VAC/CLASS Y2, 250VAC

DIMENSIONS: mm



Specifications:

- Design: ceramic disc with epoxy coating
- Rated voltage: 250VAC: 50/60Hz (Y2); 440VAC: 50Hz (X1)
- Coating: epoxy, dipped, insulating, flame retarding (UL94V-0)
- Approvals: IEC 60384-14/2, UL 1414, CSA C 22.2

LEAD-FREE RoHS Compliant

For quantities greater than listed, call for quote.

CORNELL DUBILIER Film Capacitors

RoHS Compliant This product is RoHS compliant.

DME SERIES - MINIATURE METALLIZED POLYESTER RADIAL DIPPED CAPACITORS

Cross Reference	
Cornell Dubilier	Panasonic
DME Series	ECQE-----F

Type DME radial-leaded, mini-dipped capacitors deliver the performance of other capacitors which have cases that are twice as big. Improvements in film technology permit the use of thinner dielectric and make DME the choice for all but higher current AC applications where the larger size may be an advantage. DME self heals shorts caused by overvoltage transients. For small size and low cost, DME is tops.

DIMENSIONS: in.

Specifications:

- Voltage range: 100-1000VDC (65-250VAC)
- Capacitance range: .01-10µF
- Capacitance tolerance: ±10%
- Operating temperature range: -55°C to 125°C full-rated voltage @ 85°C - Derate linearly to 50% - rated voltage @ 125°C
- Dielectric strength: 150%
- Dissipation Factor: 1% max.
- Insulation resistance: 3,000MΩ x µF; 9,000MΩ min.
- Life test: 1,000 hours at 85˚C @ 125% rated voltage

Features:

- Significant size reduction and performance characteristics comparable to other film capacitors that are in larger case sizes
- DME self heals shorts caused by overvoltage transients
- Small size/low cost

RoHS Compliant

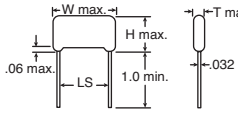
DPPM SERIES SNUBBER CAPACITORS

Type DPPM radial-leaded, metallized polypropylene capacitors utilize series wound extended foil with floating metallized common foil construction. Type DPPM offers excellent high frequency and high current capabilities and self-healing characteristics. With low inductance and high dV/dt characteristics, DPPM is ideal for snubber applications.

Specifications:

- Capacitance tolerance: ±10%
- Operating temperature range: -40°C to 105°C full-rated voltage @ 85°C - derate linearly to 50% - rated voltage @ 105°C
- Life test: 500 hours at 85°C @ 150% rated voltage



DIMENSIONS: in.

RoHS Compliant

For quantities greater than listed, call for quote.

CORNELL DUBILIER Metallized Film Capacitors, Axial Leaded

CDE CORNELL DUBILIER

RoHS Compliant **This product is RoHS compliant.**

CDE CORNELL DUBILIER 940C POLYPROPYLENE FILM SERIES

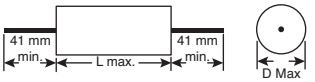
The 940C round, axial film capacitors use polypropylene film and dual metallized electrodes for both self healing properties and high peak current carrying capability (dV/dt). This series features low ESR characteristics, excellent high frequency and high voltage capabilities.

RoHS Compliant

DIMENSIONS: in.

Specifications:

- Voltage range: 1000 Vdc to 3000 Vdc
- Capacitance range: .01μF to 2μF
- Operating temperature: -55°C to +105°C
- Capacitance tolerance: ± 10%



For quantities greater than listed, call for quote.

CDE CORNELL DUBILIER 941C METALLIZED POLYPROPYLENE SERIES

Type 941C flat, oval film capacitors are constructed with polypropylene film and dual metallized electrodes for both self healing properties and high peak current carrying capability (dV/dt). This series features low ESR characteristics, excellent high frequency and high voltage capabilities.

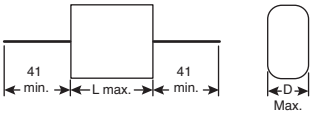
NEW PRODUCT

RoHS Compliant

DIMENSIONS: in.

Specifications:

- Tolerance: ±10%
- Temperature Range: -55°C to 105°C
- Voltage Range: 600 to 3000VDC
- Capacitance Range: 0.01 to 4.7μF
- Insulation Resistance: 100,000 MΩ x μF
- Life Test: 2,000 hrs. at 85°C @ 125% rated voltage



For quantities greater than listed, call for quote.

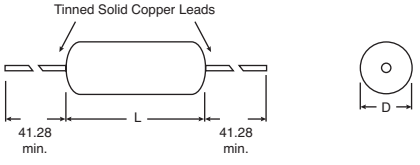
CDE CORNELL DUBILIER 935 METALLIZED POLYPROPYLENE SERIES

Designed for 20 - 100K Hz switching power supply input filtering, DC blocking and output filter applications where high current, high capacitance, and low ESR values are important. Dry sections are sealed with flame-retardant outer wrap and epoxy end seals for moisture resistance. This non-protected film capacitor has Underwriters Laboratories, Inc., recognition for construction only. U.L. File Number assigned is E128034(N)

Specifications

- Tolerance: ±10%
- Temperature range: -55°C to 105°C
- Voltage range: 100, 200, and 400VDC
- Maximum DF (1K Hz, +25°C): 0.1%
- Capacitance range: 1-30μF
- Dielectric strength: 200%
- Insulation resistance: 200,000MΩ x μF
- Life test: 1,000 hrs. at 85°C @ 125% rated voltage



DIMENSIONS: mm

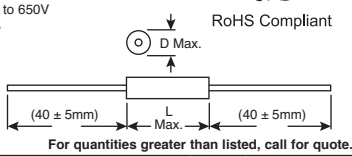
MALLORY 150 SERIES AXIAL METALLIZED POLYESTER FILM CAPACITOR

MALLORY Cornell Dubilier Electronics, Inc.

Excellent choice for general purpose applications such as blocking, bypass, decoupling, smoothing and some timing, energy storage/discharge and arc suppression.

- Low leakage
- Non-Polar
- Non inductively wound
- Epoxy end fill meets UL94V-0
- Flame retardant Polyester wrap meets UL510
- Operating temperature: -55°C to +125°C
- Capacitance range: .01μF to 2.2μF
- Voltage range: 63V to 650V
- Tolerance: 5%,10%

RoHS Compliant



For quantities greater than listed, call for quote.

EPCOS Film Capacitors

RoHS Compliant This product is RoHS compliant.

PHASECAP© COMPACT SERIES

Features:

- Concentric winding
- MKK-technology
- Wavy cut and heavy edge
- Compact design
- Cylindrical aluminum can with stud
- Very high life expectancy
- High inrush current withstand ability and high overcurrent capability
- Self healing
- Overpressure disconnector
- Touch proof terminals
- Discharge device

FEIDA MOTOR RUN CAPACITORS CBB66 - SINGLE CAPACITOR P2 ALUMINUM CAN OVAL

The EPCOS Feida Motor Run Capacitors are constructed of polypropylene film (dielectric), metallized film (electrode), with an aluminum can and metal top. Filled with PCB-free vegetable oil, the insulator material meets IEC 60335-1. The EPCOS Feida Motor Run Capacitors feature self-healing properties, a low dissipation factor, an overpressure disconnection device, and high insulation resistance. The Motor Run Capacitors meet the highest safety level P2 to IEC 60252-1 2001-02 and is IEC/EN 60335 compatible. For general sine wave applications, mainly as motor run capacitors.

Features:

- Safety Devices: Self-healing properties; Overpressure disconnector
- Low dissipation factor
- Highest safety level P2 to IEC 60252-1 2001-02
- Tolerance: ±5%
- Lead Spacing (mm): 20
- High insulation resistance
- IEC/EN 60335 compatible
- Metal can, metal top, oval shape
- Voltage range: 250 - 450VAC
- Capacitance range: 3 - 50µF
- Temperature: -40°C to +85°C
- Low losses
- RoHS Compatible to directive 202/95/EC

Construction:

- Dielectric: polypropylene film
- Electrode: Metallized film
- Aluminum can, metal top
- Filling material: Vegetable oil, PCB free
- Insulator material as per IEC 60335-1

Technical Data and Specifications:

- Reference standards: UL 810/IEC 60252-1/ EIA 456 A Jan. 89
- Safety class to IEC 60252-1 2001-02: P2
- Life expectancy to IEC 60252 2001: 250 - 450V: 10,000h (Class B)
- Life expectancy to EIA 456 A Jan. 89: 60,000 hours at 95% survival rate
- Rated capacitance CR: 3 - 50µF
- Rated voltage V_R: 250/370/400/450VAC
- Rated frequency f_R: 50/60 Hz

Typical Applications:

- For general sine wave applications, mainly as motor run capacitor

Main Applications:

- General purpose
- Air conditioning
- Household appliances

Terminals:

- 4+4 fast-on terminal #250 style

Maximum Ratings:

- Maximum permissible voltage V_{max}: 1.1 - V_R (V_R = Rated voltage)
- Maximum permissible current I_{max}: 1.3 - I_R (I_R = Rated current)

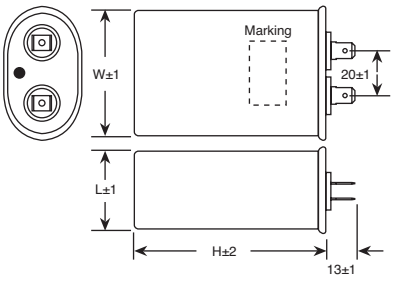
Climatic Data:

- Climatic category: 40/070/21

Test Data:

- AC test voltage terminal to terminal V_{TT}: 2.0 V_R, 10s
- Insulation voltage terminals to case: 3000 V AC, 2s
- Insulation resistance R_{ins} or time constant at 20°C, rel. Humidity ≤65% (minimum as-delivered values): 10,000 MΩ µF
- Life expectancy to EIA 456 A Jan. 89: 60,000 hours at 95% survival rate
- Dissipation factor at 20°C: ≤2.0 10^{-3} (100Hz)
- Maximum rate of voltage rise dV/dt_{max}: 10 V/µs

DIMENSIONS: mm



For quantities greater than listed, call for quote.

EPCOS DC Link Film Capacitors

This product is RoHS compliant.

EPCOS MKP 2/4 PINS - SWITCHING DC LINK FILM RADIAL CAPACITORS

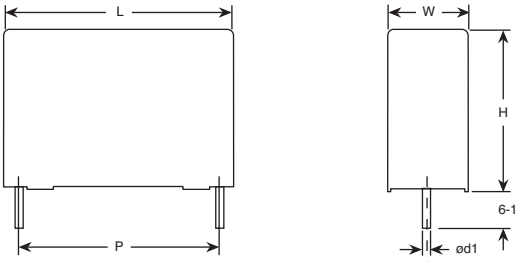
DIMENSIONS: mm

Marking:
- Manufacturer's logo
- Rated Capacitance
- Tolerance
- Rated DC voltage
- Type Number

Construction:
- Dielectric: Polypropylene (MKP) film
- Wound technology
- Plastic case (UL 94V-0)
- Epoxy resin sealing

Specifications:
- Maximum operating temperature: 100°C
- DC test voltage between terminations (to IEC61017): 1.5 x V_R, 10 s / 1.65 x V_R, 2 s
- Max. peak Current: C (μF) x dv/dt (V/μs)
- Peak non-repetitive current: 1.5 x I_F

Terminals:
- Parallel wire leads, lead-free tinned



RoHS Compliant

2 Pin Film Capacitors

EPCOS DC Link Film Capacitors

RoHS Compliant This product is RoHS compliant.

EPCOS MKP 2/4 PINS - SWITCHING DC LINK FILM CAPACITORS

Marking:
- Manufacturer's logo
- Rated Capacitance
- Tolerance
- Rated DC voltage
- Type Number

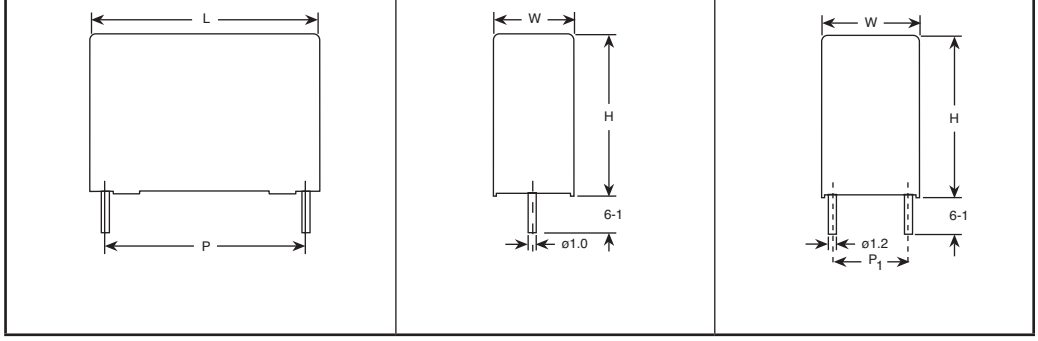
RoHS Compliant

Construction:
- Dielectric: Polypropylene (MKP) film
- Wound technology
- Plastic case (UL94V-0)
- Epoxy resin sealing

Specifications:
- Maximum operating temperature: 100°C
- DC test voltage between terminations (to IEC61017): 1.5 x V_R, 10 s / 1.65 x V_R, 2 s
- Max. peak Current: C (μF) x dv/dt (V/μs)
- Peak non-repetitive current: 1.5 x I_P

Terminals:
- Parallel wire leads, lead-free tinned

DIMENSIONS: mm



2 Pin Film Capacitors

For quantities greater than listed, call for quote.

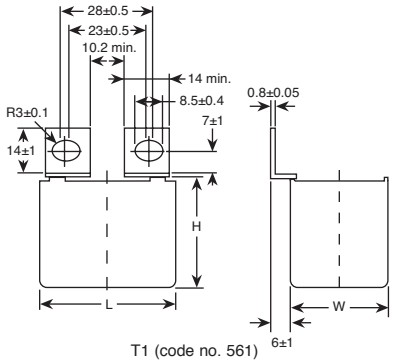
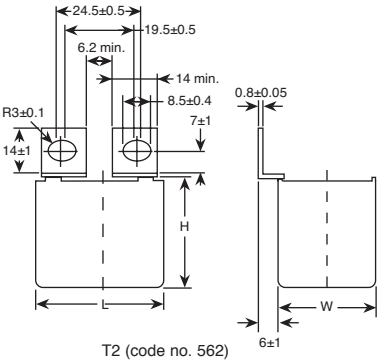
EPCOS Film Snubber Capacitors

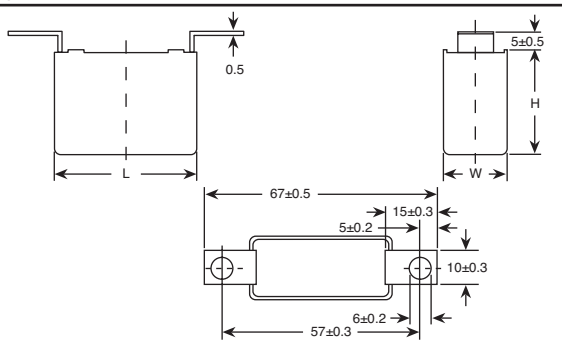
RoHS Compliant **This product is RoHS compliant.**



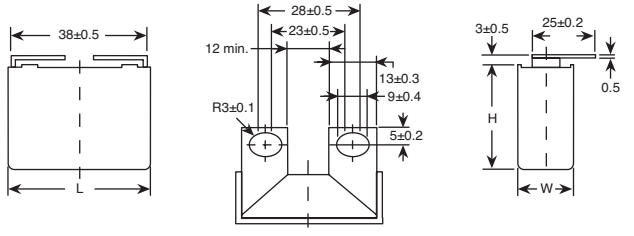
T1 (code no. 561)



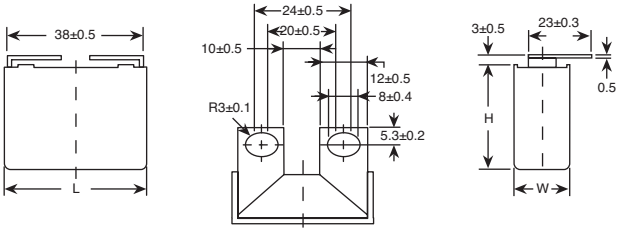
T2 (code no. 562)



T3 (code no. 563)



T4 (code no. 564)



T5 (code no. 565)

DIMENSIONS: mm

EPCOS MKP SNUBBER CAPACITORS

Marking:
- Manufacturer's logo
- Ordering code
- Style (MKP)
- Rated Capacitance (coded)
- Cap
- Tolerance (code letter)
- Rated DC voltage
- Date of manufacture (coded)

Construction:
- Dielectric: Polypropylene (MKP) film
- Wound technology with internal series connection
- Plastic case (UL 94 V-0)
- Epoxy resin sealing (UL 94 V-0)

Specifications:
- Maximum operating temperature: 100°C
- Strap terminals, tinned copper (maximum torque 10 Nm)
- Max. Operating Temperature: +100°C
- Rated Temperature: +85°C -55°C

Pulse Handling Capability:
"dv/dt" values represents the maximum permissible voltage change per unit of time for non-sinusoidal voltages, expressed in V/µs.

For quantities greater than listed, call for quote.

EPCOS Film Capacitors

RoHS Compliant **This product is RoHS compliant.**

EPCOS METALLIZED POLYESTER FILM RADIAL CAPACITORS

Applications:
- Blocking, Coupling, Decoupling
- Bypass
- RFI Suppression for Automotive Applications

Construction:
- 5-15mm lead space -- Stacked Film Technology Code "D" or "C"
- 10-27mm lead space -- Wound Capacitor Technology - Code "N", "Q", "T"

RoHS Compliant

For quantities greater than listed, call for quote.

EPCOS METALLIZED POLYPROPYLENE RADIAL CAPACITORS

Applications:
- Smoothing
- High-Frequency AC Loads
- TV (Flyback)

Features:
- Wound Capacitor Technology with epoxy coating
- Very High Pulse Strength
- Self-healing properties

RoHS Compliant

For quantities greater than listed, call for quote.

EMI SUPPRESSION METALLIZED BOX CAPACITORS

Class X2

Applications:
- "Across the Line" Applications
- Polypropylene Boxed Construction
- Epoxy Resin Sealing
- UL 1414/ UL 1286 File # E97863 / E157153

RoHS Compliant

For quantities greater than listed, call for quote.

Class Y1

Applications:
- "Line to Ground" Applications
- Polypropylene Boxed Construction
- Epoxy Resin Sealing
- UL 1414 File # E97863

RoHS Compliant

RoHS Compliant This product is RoHS compliant.

C4AE SERIES BOX CAPACITOR DC-LINK RADIAL 4 LEADS

Features:

- Operating temperature range: -40˚C to +85˚C
- Self-healing
- High capacitance density
- Low losses
- High ripple current
- High contact reliability
- Suitable for high frequency applications
- Tolerance: 5%

For quantities greater than listed, call for quote.

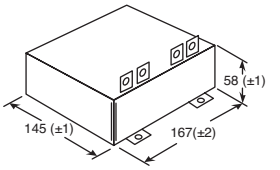
DC LINK FILM CAPACITOR

Features and Specifications:

- Tolerance: ±10%
- Temperature range: -40°C to +105°C
- Long life, 20000 hours at 90°C
- ESR at 1KHz mΩ : <0.9
- Max. RMS Current (10KHz): 100

RoHS Compliant

DIMENSIONS: mm



For quantities greater than listed, call for quote.

KEMET Film Capacitors

RoHS Compliant **This product is RoHS compliant.**

The Capacitance Company
KEMET
CHARGED.™

RADIAL METALLIZED POLYPROPYLENE FILM CAPACITORS

General Technical Data:
- Non-inductive type
- Operating temperature range: -40˚C to +110˚C

Typical Applications:
Interference suppression and across the line applications. Suitable for use in situations where failure of the capacitor could lead to danger of electrical shock.

For quantities greater than listed, call for quote.

RADIAL METALLIZED POLYESTER FILM CAPACITORS

General Technical Data:
- Non-inductive type
- Operating temperature range: -55˚C to +105˚C

Typical Applications:
By-passing, blocking, coupling, decoupling, timing, oscillator circuits.

For quantities greater than listed, call for quote.

MALLORY Metallized Polyester Film Capacitors

CDE CORNELL DUBILIER

RoHS Compliant This product is RoHS compliant.

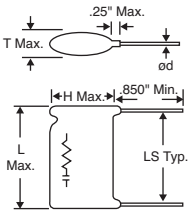
QUENCHARC® ARC SUPPRESSOR / SNUBBER NETWORKS

RoHS Compliant

Features:
- Metallized Polyester Capacitor in series with a carbon composition resistor.
- Flame Retardant epoxy coated case

Specifications:
- Operating Temperature: -55°C to +85°C
- Capacitance Tolerance: ±20%
- Resistance Tolerance: ±10%

Applications:
- Noise and Arc Supression
- RC Snubber Network
- Relay Contact Protection
- EMI/RFI Reduction
- Noise reduction on Controllers/Drivers



DIMENSIONS: in.

For quantities greater than listed, call for quote.

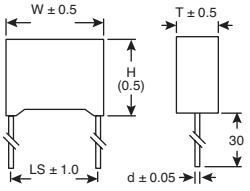
SUPPRESSOR METALLIZED POLYESTER FILM 158X SERIES - TYPE X2

RoHS Compliant

Features:
- UL and CSA Approved
- Flame retardant case meets UL94V-0
- Polyurethane end fill meets UL94V-0
- Used in applications where damage to the capacitor will not lead to the danger of electrical shock

Specifications:
- Operating temperature: -40°C to +100°C
- Voltage range: 250VRMS
- Tolerance: ±20%
- Lead material: tinned copper clad steel



For quantities greater than listed, call for quote.

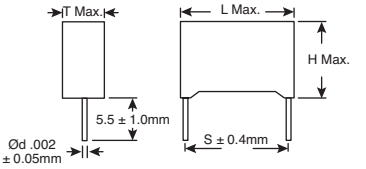
METALLIZED POLYESTER FILM, RADIAL

Excellent choice for general purpose applications such as blocking, bypass, decoupling, smoothing and some timing, energy storage/discharge and arc suppression.

Features:
- Non-Polar
- Low leakage
- Non inductively wound
- Epoxy Encapsulent meets UL94V-0
- Flame retardant case meets UL94V-0

Specifications:
- Voltage range: 160 series - 63V to 650V
  168 series - 50 to 400V
- Capacitance range: 160 series - .0033uF to 3.3uF
  168 series - .001uF to 1uF
- Operating temperature: -55°C to +125°C
- Tolerance: 5%,10%

RoHS Compliant



For quantities greater than listed, call for quote.

EMI SUPPRESSOR METALLIZED POLYPROPYLENE CAPACITORS

Features:

- New improved design: Small dimensions including low profile capacitors
- Temperature range: PHE840: -55°C to +105°C; PHE850: -55°C to +110°C
- Construction metallized polypropylene winding, encapsulated in self-extinguishing material meeting the requirements of UL94V-0

Applications:

- For worldwide use as electromagnetic interference suppressor in all X2 and across-the-line applications

Approvals: ENEC, UL, cUL

✻Included in the kit

METALLIZED POLYESTER RADIAL CAPACITORS

Features:

- Bypassing signal coupling
- General purpose for highest reliability
- Construction: Radial leads of tinned wire are electrically welded to the contact metal layer on the ends of the capacitor winding
- Temperature range: -55°C to +100°C

GENERAL PURPOSE AC/DC METALLIZED PAPER CAPACITORS

Features:

- Self-extinguishing UL94V-0 encapsulation material
- Excellent self-healing properties
- Ensures long life even when subjected to frequent overvoltages
- Good resistance to ionization due to impregnated dielectric
- High dU/dt capability
- The capacitors meet the most stringent IEC humidity class, 56 days
- The impregnated paper ensures excellent stability giving outstanding reliability properties, especially in applications having continuous operation

PANASONIC Metallized Polyester Film Capacitors

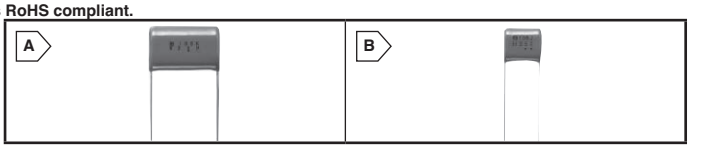
Panasonic

RoHS Compliant This product is RoHS compliant.

ECQEB AND ECQEF SERIES

Features:
- Small size
- Excellent electrical characteristics
- Flame retardant epoxy resin coating
- Tolerance: 10%
- Small size (ECQEB series)
- Self-healing property (ECQEF series)

Applications:
- 250VDC: High frequency and current circuits
- 450VDC: Active filter circuits



For quantities greater than listed, call for quote.

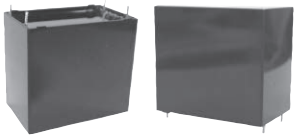
RoHS Compliant This product is RoHS compliant.

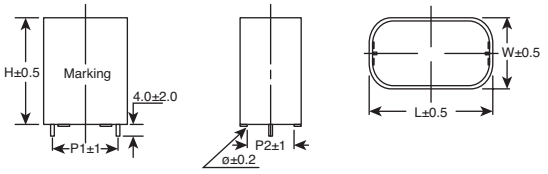
EZP-E SERIES METALLIZED POLYPROPYLENE DC LINK FILM CAPACITORS

DIMENSIONS: mm

Features:

- High saferty, Self-healing and Self-protecting function built-in
- Long product life, High reliability
- Low loss, Low ESR
- Flame retardant (case and sealing resin)
- Tolerance: ±10%
- Operating Temperature Range: -40°C to +85°C





Recommended Applications:

- For DC filtering, DC link circuit
- Solar inverters
- Wind power generation
- Industrial power supplies
- Inverter circuit in applicances

For quantities greater than listed, call for quote.

STACKED METALLIZED PPS FILM CHIP CAPACITORS

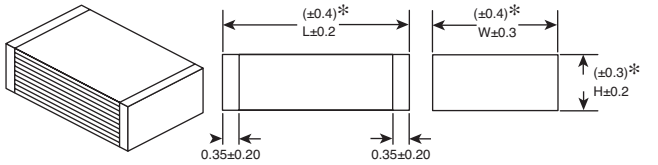
ECH-U(C) Series

Features:

- Small in size
- Low loss and excellent frequency characteristics
- For reflow soldering

Recommended Applications:

- Time-constant
- Filtering
- Oscillation and resonance
- Resonance circuit for LCD backlight inverter unit



* To be applied only for size Z&Y

DIMENSIONS: mm

For quantities greater than listed, call for quote.

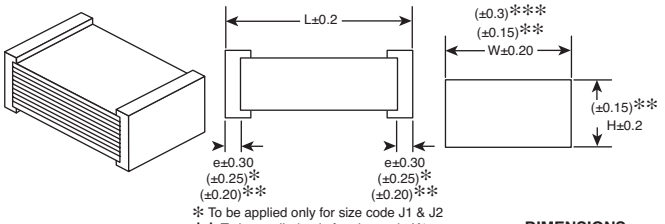
ECH-U(X) Series

Features:

- Small in size (minimum size 1.6mm x 0.8mm)
- 85°C, 85% RH, W.V. X 1.0 for 500 hours
- For reflow soldering

Recommended Applications:

- Time-constant
- Filtering
- Oscillation and resonance



* To be applied only for size code J1 & J2
** To be applied only for size code K1
*** To be applied only for size code E1, E2, D1, D3, D4

DIMENSIONS: mm

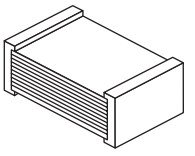
PANASONIC Film Capacitors

Panasonic

RoHS Compliant This product is RoHS compliant.

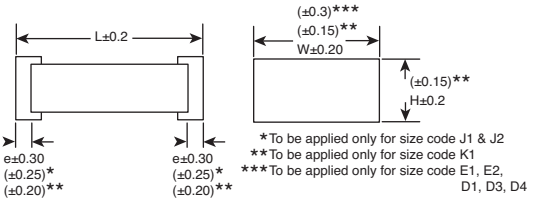
STACKED METALLIZED PPS FILM CHIP CAPACITORS (CONT.)

ECH-U(X) Series



Features:
- Small in size (minimum size 1.6mm x 0.8mm)
- 85°C, 85% RH, W.V. X 1.0 for 500 hours
- For reflow soldering
- RoHS directive compliant

Recommended Applications:
- Time-constant
- Filtering
- Oscillation and resonance



*To be applied only for size code J1 & J2
**To be applied only for size code K1
***To be applied only for size code E1, E2, D1, D3, D4

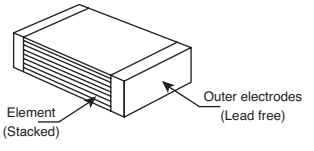
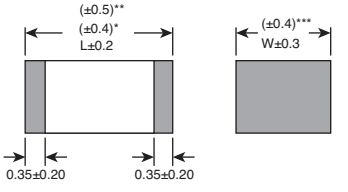
STACKED METALLIZED PEN FILM CHIP CAPACITORS

ECW-U(C) Series

Features:
- Small in size
- For reflow soldering
- RoHS directive compliant

Recommended Applications:
- General purpose (coupling, by-pass)





PRODUCT NEW

For quantities greater than listed, call for quote.

RoHS Compliant This product is RoHS compliant.

METALLIZED POLYPROPYLENE FILM CAPACITORS

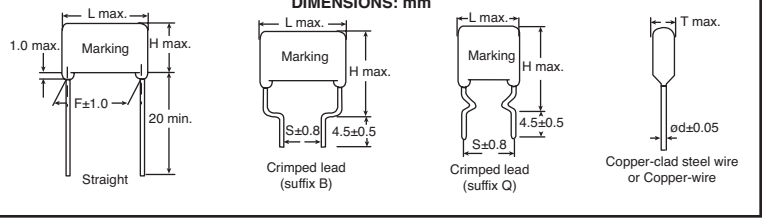
Features:
- Small size
- Excellent frequency characteristics

Recommended Applications:
- 250VDC and 630VDC: High frequency and current circuits
- 450VDC: Active filter circuits
- 800VDC: Resonance circuit for power supply

PRODUCT NEW

RoHS Compliant

DIMENSIONS: mm



For quantities greater than listed, call for quote.

ECQ-UA SERIES - METALLIZED POLYESTER FILM CAPACITORS

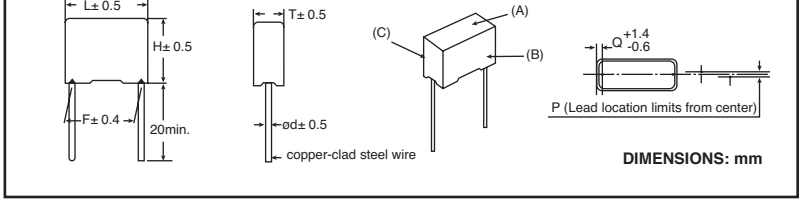
In accordance with UL/CSA and European safety regulation class X2

PRODUCT NEW

RoHS Compliant

Features:
- Compact
- Flame-retardant plastic case and non-combustible resin

Recommended Applications:
- Interference suppressors



DIMENSIONS: mm

For quantities greater than listed, call for quote.

RoHS Compliant **This product is RoHS compliant.**

ECQ-U(G) AND ECQ-U(L) SERIES - METALLIZED POLYESTER FILM CAPACITORS

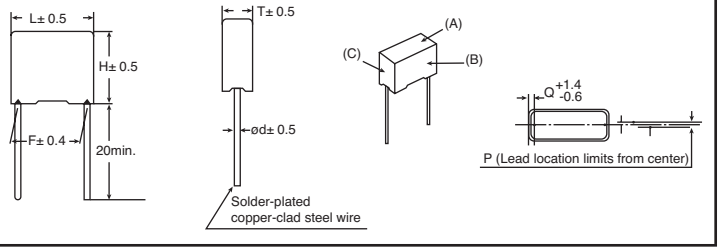
Features:

- Compact
- Flame-retardant plastic case and non-combustible resin
- ECQ-U(G) Voltage Rating: 250VAC (UL, CSA)
- ECQ-U(L) Voltage Rating: 300VAC (IEC60384-14)

Recommended Applications:

- Interference suppressors

DIMENSIONS: mm



ECQ-U(G) Series

In accordance with UL/CSA and European safety regulation class X1

For quantities greater than listed, call for quote.

MKP1847 AC CAPACITORS

Specifications:
- Terminals: tinned wire
- Construction: metalized polypropylene film
- Tolerance ±: 5%
- Operating temperature: 55°C to + 85°C

Applications:
- High performance AC filtering applications

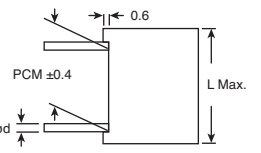
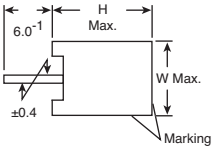
VISHAY/ROEDERSTEIN Film Capacitors

RoHS Compliant This product is RoHS compliant.

MKP1841 AND MKP1840 METALIZED POLYPROPYLENE FILM CAPACITORS

DIMENSIONS: mm





Specifications:

- Coating: flame retardant plastic case, blue, epoxy resin sealed
- Construction: extended double-sided metallized polypropylene film
- Reliability: operational life > 300,000 hours
- Electrodes: vacuum deposited aluminum
- Dielectric: polypropylene film
- Operating Temperature: -55°C to +100°C
- Capacitance Drift: up to +40°C, ±0.5% for a period of two years

For quantities greater than listed, call for quote.

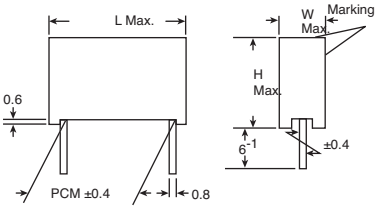
MKT1813 METALIZED POLYESTER FILM CAPACITORS

Specifications: **DIMENSIONS: mm**

- Dielectric: polyester film
- Electrodes: vacuum deposited aluminum
- Coating: plastic-wrapped, epoxy resin sealed
- Construction: extended metalized film
- Operating Temperature: -55°C to +100°C
- Capacitance Drift: up to +40°C, ±1.5% for a period of two years
- Reliability: operational life > 300,000 hours



For quantities greater than listed, call for quote.

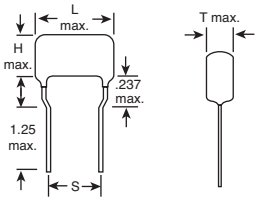
TYPE 225P POLYESTER FILM CAPACITORS

Type 225P capacitors are wound from PETP polyester film and thin gauge foil under carefully controlled atmospheric conditions. Protected against moisture by a conformal coating of epoxy. Specifically designed for printed wiring board applications. Widely used in computers, instrumentation and telecommunications equipment.

Specifications:

- Operating temperature: -55°C to +85°C
- Tolerance: ±10%
- Dissipation factor: maximum dissipation factor .75%
- Life test: shall withstand 500 hour life test at +85°C @ 150% of rated voltage

DIMENSIONS: in.



100 VDC / 70 VAC

For quantities greater than listed, call for quote.

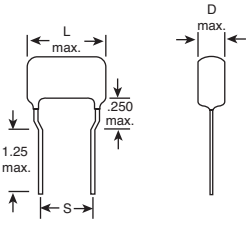
TYPE 715P POLYPROPYLENE FILM CAPACITORS

Type 715P capacitors are ideal for applications where high AC current flow is found, as in certain solid-state TV vertical circuits, RF generators, and pulse-forming networks where dielectric heating is often a problem.

Specifications:

- Operating temperature: -55°C to 85°C; up to +105°C when working voltage is reduced to 50% of the 85°C rating
- Tolerance: ±5%
- Life test: shall withstand 500 hour life test at +85°C @ 150% of rated voltage
- Conformally coated with a flame retardant epoxy

DIMENSIONS: in.



200 VDC / 155 VAC

For quantities greater than listed, call for quote.

WIMA Polypropylene Capacitors

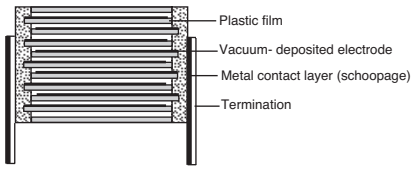
RoHS Compliant **This product is RoHS compliant.**

WIMA DC-LINK MKP4

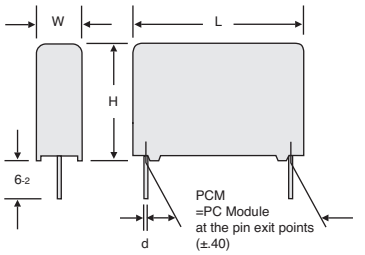
Metallized Polypropylene (PP) Capacitors for DC-Link Applications

Features:
- High volume/capacitance ratio
- Excellent self-healing properties
- Very low dissipation factor
- High reliability
- 2-pin and 4-pin contact configuration
- According to RoHS 2002/95/EC

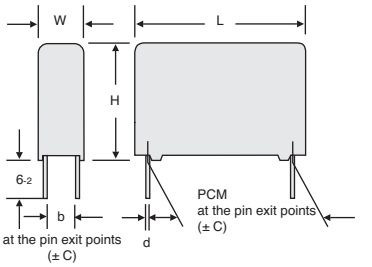
Applications:
- As intermediate circuit capacitor e.g. in high power converter technology, power supplies, solar inverters etc.



DIMENSIONS: mm



2-pin version



4-pin version

For quantities greater than listed, call for quote.

WIMA Film Capacitors

RoHS Compliant **This product is RoHS compliant.**

METALLIZED POLYPROPYLENE (PP) CAPACITORS FOR DC-LINK APPLICATIONS

DC-LINK MKP5

Features:
- Very high volume/capacitance ratio
- Self-healing properties
- Cylindrical plastic case for PCB mounting
- Dry construction without electrolyte or oil
- No internal fuse required
- Negative capacitance change versus temperature
- Very low dielectric absorption

Applications:
- Wind Power Systems
- Inverters

NEW PRODUCT

For quantities greater than listed, call for quote.

DC-LINK MKP6

Features:
- Very high volume/capacitance ratio
- Self-healing properties
- Cylindrical aluminium case for bus bar mounting
- Dry construction without electrolyte or oil
- No internal fuse required
- Negative capacitance change versus temperature
- Very low dielectric absorption

Applications:
- Wind Power Systems
- Inverters

FKS2 SERIES FILM/FOIL POLYESTER

Specifications:
- Temperature Range: - 55° C to + 100° C
- Dielectric: Polyethylene-terephthalate film
- Capacitor Electrodes: Metal foil film
- Encapsulation: Flame retardant case, UL 94 V-0
- Termination: Tinned wire

Features:
- Pulse duty construction

Applications:
- Coupling
- Decoupling

For quantities greater than listed, call for quote.

FKP SERIES FILM/FOIL POLYPROPYLENE IGBT SNUBBER CAPACITORS

Specifications:
- Temperature Range: - 55° C to + 100° C
- Dielectric: Polypropylene film
- Capacitor Electrodes: Aluminum foil and metallized plastic film
- Encapsulation: Flame retardant plastic case, UL 94 V-0

Features:
- Low inductive construction achieved with end-surface contacts
- Internally series connected
- Self-healing construction

For quantities greater than listed, call for quote.

MKP SERIES METALLIZED POLYPROPYLENE IGBT SNUBBER CAPACITORS

Specifications:
- Temperature Range: - 55° C to + 100° C
- Dielectric: Polypropylene film
- Capacitor Electrodes: Double-sided metallized plastic film
- Encapsulation: Flame retardant plastic case, UL 94 V-0

Features:
- Low inductive construction achieved with end-surface contacts
- Double-sided metallization for high pulse ratings
- Internally series connected
- Self-healing construction

For quantities greater than listed, call for quote.

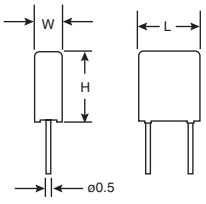
WIMA Radial Lead Film Capacitors

RoHS Compliant This product is RoHS compliant.

MKS4 SERIES METALIZED POLYESTER



Specifications:
- Temperature Range: - 55ºC to + 100ºC
- Dielectric: Polyethylene-terephthalate film
- Capacitor Electrodes: vacuum-deposited
- Encapsulation: Flame retardant plastic case,UL94V-0
- Termination: Tinned wire

Features:
- Self Healing capability
- High volume/capacitance ratio

Applications:
- By-pass
- Blocking
- Coupling and decoupling
- Timing

For quantities greater than listed, call for quote.

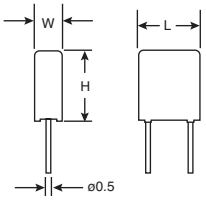
MKP4 SERIES METALIZED POLYPROPYLENE



Specifications:
- Temperature Range: - 55ºC to + 100ºC
- Dielectric: Polypropylene film
- Capacitor Electrodes: vacuum-deposited
- Encapsulation: Flame retardant plastic case, UL94V-0

Features:
- Self Healing capability
- Very low dissipation factor
- Negative capacitance change versus temperature

Applications:
- Sample and hold
- Timing
- High frequency Coupling and decoupling
- Oscillating circuits

For quantities greater than listed, call for quote.

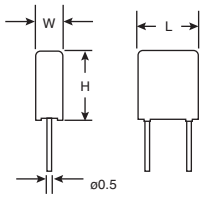
WIMA Radial Lead Film Capacitors

RoHS Compliant This product is RoHS compliant.

MKP2 SERIES METALIZED POLYPROPYLENE



RoHS Compliant

Specifications:
- Temperature Range: -55ºC to +100ºC
- Dielectric: Polypropylene film
- Capacitor Electrodes: Metalized plastic film
- Encapsulation: Flame retardant plastic case, UL 94V-0

Features:
- For high frequency applications
- Suited for "sample & hold" circuits
- Stable negative TC
- Low ESR

For quantities greater than listed, call for quote.

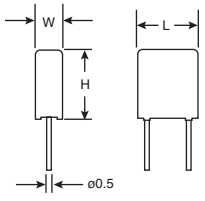
MKS2 SERIES METALIZED POLYESTER



RoHS Compliant

Specifications:
- Temperature Range: -55ºC to +100ºC
- Dielectric: Polyethylene-terephthalate film
- Capacitor Electrodes: Metalized plastic film
- Encapsulation: Flame retardant vacuum-deposited aluminum

Features:
- Reservoir capacitor with unlimited life at high temperatures
- Ideally suited for wide temperature range applications

For quantities greater than listed, call for quote.

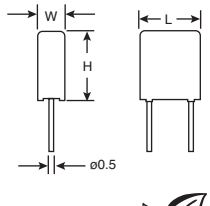
FKP2 SERIES FILM/FOIL POLYPROPYLENE



RoHS Compliant

Specifications:
- Temperature Range: -55ºC to + 100ºC
- Dielectric: Polypropylene film
- Capacitor Electrodes: Metal foil film
- Encapsulation: Flame retardant plastic case, UL 94V-0

Features:
- Pulse applications with high repetition frequency
- Suited for replacement of polystyrene capacitors in audio and HF applications

For quantities greater than listed, call for quote.

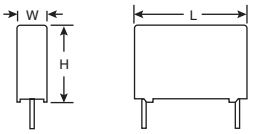
WIMA Pulse Duty Film Capacitors

RoHS Compliant This product is RoHS compliant.

MKP10 SERIES RADIAL LEAD METALLIZED POLYPROPYLENE FILM CAPACITORS

Specifications:
- Temperature Range: - 55ºC to + 100ºC
- Dielectric: Polypropylene film
- Capacitor Electrodes: Double sided metallized plastic film
- Encapsulation: Flame retardant plastic case, UL94V-0

Features:
- For SMPS, loudspeakers, lighting, monitors, and televisions
- Self-healing pulse duty construction



RoHS Compliant

For quantities greater than listed, call for quote.

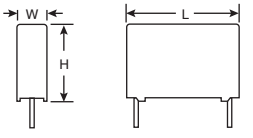
FKP1 SERIES RADIAL LEAD FILM/FOIL POLYPROPYLENE CAPACITORS

Specifications:
- Dielectric: Polypropylene film
- Temperature Range: - 55ºC to + 100ºC
- Capacitor Electrodes: Aluminum foil and double sided metallized plastic film
- Encapsulation: Flame retardant plastic case, UL94V-0

Features:
- With metal foil electrode, internally series-connected for very high current ratings.

Applications:
- Damping and commutation capacitors in switch mode power supplies, static frequency changes in drive and power electronics, deflection systems in monitors and televisions.



RoHS Compliant

For quantities greater than listed, call for quote.

WIMA Pulse Duty Film Capacitors

RoHS Compliant **This product is RoHS compliant.**

FKP4 SERIES SELF HEALING PULSE FILM CAPACITORS

The WIMA FKP 4 is a range of self-healing film/foil Polypropylene capacitors made with a single metallized plastic film and metal foil electrodes in series connection. Due to its film/foil structure with metallized electrode carrier, this capacitor type is suitable for high current loads. The capacitor is constructed as a series connection, the current carrying electrodes consist of two metal foils and a metallized carrier film as a "floating electrode".

WIMA pulse capacitors are produced with the proven box technology using solvent-resistant, flame-retardant plastic cases according to UL94V-0.

Features:
- High pulse duty
- Self-healing
- Internal series connection
- Very low dissipation factor
- Negative capacitance change versus temperature

Specifications:
- Dielectric: Polypropylene film
- Temperature Range: -55°C to +100°C
- Capacitor electrodes: aluminum foil and siglesided metallized plastic film
- Encapsulation: flame retardant plastic case
- Tolerance: ±10%

Applications:
- Switch mode power supplies
- Converter in drives and power electronics
- Deflection systems in monitors and TV-sets
- Electronic ballasts
- Audio/video equipment

RoHS Compliant

CORNELL DUBILIER RF MICA Chip Capacitors

CDE CORNELL DUBILIER

MCH SERIES: HIGH VOLTAGE MAGNETIC

Features:
- No thermal cracking
- FR4 compatible and wave solderable
- Extremely high Q above 50MHz
- Excellent for tuning and impedance matching

Applications:
- RF Power Amplifiers
- MRI Generators
- Transmitters

RoHS Compliant

For quantities greater than listed, call for quote.

CDE CORNELL DUBILIER

MC SERIES: HIGH POWER HV RF CHIP CAPACITORS

Specifications:
- Temperature range: -55°C to +125°C
- Insulation resistance: 100GΩ min.
- Pulse handling: dV/dt of 20,000v/µs
- Tight tolerances available
- Typical I_{RMS} > 8 Amps @ 100mHz
- Voltage: 100VDC, 500VDC, 1000VDC
- Capacitance Range: .5pF to 2200pF

RoHS Compliant

Features:
- Low impedance to beyond 1GHz
- Near-zero capacitance change in all environments
- Withstands 200% rated voltage for up to 5 seconds
- Very High Q
- FREE from cracking / delaminating
- FR4 Compatible and wire solderable

Applications:
- CATV
- Flight Radio
- RF and Microwave
- Resonators
- Lasers

CORNELL DUBILIER Multilayer Clad SMT RF Capacitors

CDE CORNELL DUBILIER

MIN, MCM HIGH CURRENT SERIES

Types MCM and MIN SMT clad multilayer RF capacitors are top performers for high power applications requiring low inductance at high frequencies and can operate at temperatures up to 200°C and voltages to 1000VDC.

Thermal Spreading, robust natural materials and a CTE compatible with FR4 make these capacitors an excellent choice to replace more expensive porcelain capacitors.

Common Features:

- 200°C rated with no voltage derating
- Low ESR for RF power applications
- Wave solderable
- CTE ≈ 18
- No cracking / delaminating
- Nonmagnetic for minimal RF loss
- Very low ESL for excellent by-pass action
- Available on T&R
- Ultra stable - no change with (t), (V) and (f)
- Exact capacitance values ±0.5pF up to 1000VDC

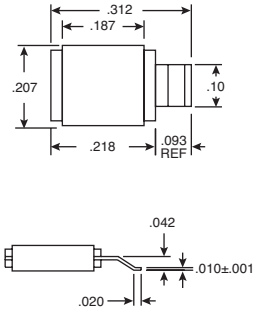
CDE CORNELL DUBILIER MIN SERIES

RoHS Compliant

Specifications:

- Voltage Rating: 300VDC
- Temperature Range: -55°C to +200°C with no voltage derating
- Dielectric Strength: 200% of rated voltage for 5 seconds
- Insulation Resistance: 1000MΩ - μF Need not exceed 100,000MΩ at 25°C
- Typical Thickness: .065 - .125 (±.015)
- Wave solderable
- Typical ESR <10mΩ @ 100 MHz (100pF)

DIMENSIONS: in.



For quantities greater than listed, call for quote.

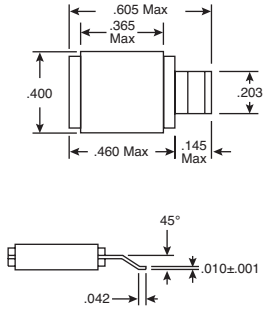
CDE CORNELL DUBILIER MCM SERIES

RoHS Compliant

Specifications:

- Voltage Rating: 300 - 1000VDC
- Temperature Range: -55°C to +200°C with no voltage derating
- Dielectric Strength: 200% of rated voltage for 5 seconds
- Insulation Resistance: 1000MΩ - μF Need not exceed 100,000MΩ at 25°C
- Typical Thickness: .095 - .125 (±.015)
- Wave solderable
- Typical I_{RMS} >20 Amps @ 100 MHz

DIMENSIONS: in.



For quantities greater than listed, call for quote.

CORNELL DUBILIER Radial RF MICA Capacitors

CDE CORNELL DUBILIER

RADIAL LEAD DIPPED MICA HIGH VOLTAGE RF CAPACITORS

Exclusive CDE dipping process to impart high moisture and humidity resistance.
Conforms to EIA specifications.

- Tolerance: D=.5pF, J=5%
- Temperature range: -55°C to +125°C
- Voltage range: 100, 300, 500, and 1000WVDC
- Vibration test: 10-2000Hz
- Pulse handling: dV/dt of 20,000 v/μs

Lead Spacing (LS): in.

RADIAL LEAD DIPPED MICA HIGH VOLTAGE RF "SNUBBERS" & RF APPLICATION CAPACITORS

Exclusive CDE dipping process to impart high moisture and humidity resistance.
Conforms to EIA specifications.

- Tolerance: D=.5pF, J=5%
- Temperature range: -55°C to +125°C
- Voltage range: 100, 300, 500, and 1000WVDC
- Vibration test: 10-2000Hz
- Pulse handling: dV/dt of 20,000 v/μs

Lead Spacing (LS): in.	
CDV16	CDV19

AVX Niobium Oxide Capacitors

RoHS Compliant **This product is RoHS compliant.**

A KYOCERA GROUP COMPANY

AVX NIOBIUM OXIDE CAPACITORS

Specifications:

- Operating temperature range:
  - NOJ series -55°C to +105°C
  - NOM series -55°C to +105°C
  - NLJ series -55°C to +105°C
  - NOS series -55°C to +125°C
- Reliability:
  - NOJ series 0.5% per 1000 hours at 85°C
  - NOM series 0.2% per 1000 hours at 85°C
  - NOS series 0.2% per 1000 hours at 85°C
  - NLJ series 0.2% per 1000 hours at 85°C
- Capacitance range: 10 ~ 680µF
- Capacitance tolerance: 20%
- Leakage current
  DCL: 0.02CV

AVX TPS Low ESR Tantalum Chip Capacitors

This product is RoHS compliant.

TPS SERIES III 125°C TANTALUM CHIP CAPACITORS

Features & Specifications:

- Low ESR levels previously only seen by other technologies
- Traditional Mno2 technologies guarantees excellent line and field performance, humidity stability and high electrical and thermal stress resistance
- Capacitance Range: 1.0µF to 1000µF
- Capacitance Tolerance: ±10%, ±20%
- Temperature Range: -55 °C to +125°C
- Voltage listed is at 85°C, Derate 33% @ 125°C

RoHS Compliant

AVX TPS Low ESR Tantalum Chip Capacitors

RoHS Compliant This product is RoHS compliant.

TPS SERIES III 125°C TANTALUM CHIP CAPACITORS (CONT.)

Features & Specifications:

- Low ESR levels previously only seen by other technologies
- Traditional Mno2 technologies guarantees excellent line and field performance, humidity stability and high electrical and thermal stress resistance
- Capacitance Range: 1.0µF to 1000µF
- Capacitance Tolerance: ±10%, ±20%
- Temperature Range: -55°C to +125°C
- Voltage listed is at 85°C, Derate 33% @ 125°C

RoHS Compliant

AVX Tantalum Solid Electrolytic Chip Capacitors

AVX TANTALUM CHIP CAPACITORS

The consumer TLJ series of tantalum capacitors offers high capacitance vs. voltage ratio based on stable MnO2 electrode capacitors. The TLJ series complieswith RoHS requirements and it is an environmentally friendly component ready for lead-free assembly systems up to 3x reflow with 260°C peak temperature. The TLJ series is suitable for wide range of consumer electronic applications such as the latest portable handheld electronics, cellular phones, PDAs or other digital equipment and cameras.

Specifications:

- Technical Data: All technical data relate to an ambient temperature of +25°C
- Capacitance Tolerance: ±20%
- Temperature Range: -55°C to +125°C with category voltage
- Reliability: 0.2% per 1000 hours at 85°C, 0.5xVR with 0.1Ω/V series impedance with 60% confidence level

Rated Voltage (VR) -55°C≤ +40°C:	4	6.3	10	16	20
Category Voltage (VC) at 85°C:	2	3.15	5	8	10
Category Voltage (VC) at 125°C:	0.8	1.26	2	3.2	4

Features:

- High Volumetric Efficiency
- Environmentally Friendly
- Small & Low Profile Cases
- 3x Reflow 260°C Compatible
- Consumer Applications

RoHS Compliant

LEAD-FREE
Lead-Free Compatible Component

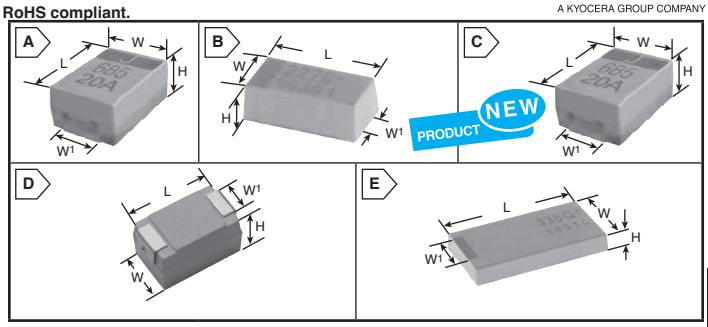
* W1 dimension applies to the termination width for A dimensional area only.



TCN UNDERTAB SERIES-TANTALUM SOLID CHIP CAPACITOR

Features:

- Conductive polymer electrode reduces ignition failure mode
- Low ESR
- 3x reflow 260°C compatible
- Consumer applications
- Undertab terminations layout:
  - High Volumetric Efficiency
  - High PCB assembly density
  - High capacitance in smaller dimensions

For quantities greater than listed, call for quote.

W_1 dimension applies to the termination width for A dimensional area only.

TAJ SERIES 125°C STANDARD TANTALUM CHIP CAPACITORS

NEW PRODUCT

Features & Specifications:

- General purpose SMT chip tantalum series
- 6 case sizes available
- Capacitance range: 0.1 µF to 2200µF
- Temperature range: -55°C to 125°C
- Reliability: 1% per 1000 hours at 85°C, V_R with 0.1Ω/V series impedance, 60% confidence level

For quantities greater than listed, call for quote.

TAJ SERIES 125°C STANDARD TANTALUM CHIP CAPACITORS (CONT.)

Features & Specifications:
- General purpose SMT chip tantalum series
- 6 case sizes available
- Capacitance range: 0.1μF to 2200μF
- Temperature range: -55°C to 125°C
- Reliability: 1% per 1000 hours at 85°C, V_R with 0.1Ω/V series impedance, 60% confidence level

W_1 dimension applies to the termination width for A dimensional area only.

RoHS Compliant

THJ Series: High Temperature

Features:

- Twice improved reliability
- 175°C @ 0.5V_R continuous operation
- CV range: 0.1-220µF/6.3-50V
- Low ESR options on approval
- High temperature automotive and industry applications

Specifications:

- Technical data: All technical data relate to an ambiant temperature of +25°C
- Capacitance range: 0.1µF to 150µF
- Temperature range: -55°C to 175°C voltage derating
- Reliability: 0.5% per 1000 hours at 85°C, V_R with 0.1Ω/V series impedance, 60% confidence level, 3.5 fits at 40°C, 0.5V_R

TRJ Series: Professional

NEW PRODUCT

Features:

- Twice improved reliability
- DLC reduced by 25% to 0.0075CV
- Robust against higher thermo-mechanical stresses during assembly process
- CV range: 0.1-470µF/6.3-50V
- 114 low ESR parts released
- Automotive, medical, aerospace, military and other high-end applications

Specifications:

- Technical data: All technical data relate to an ambiant temperature of +25°C
- Capacitance range: 0.1 µF to 470µF
- Leakage current DCL: 0.0075CV
- Temperature range: -55°C to +125°C
- Reliability: 0.5% per 1000 hours at 85°C, V_R with 0.1Ω/V series impedance 60% confidence level

KEMET Tantalum Polymer Surface Mount Capacitors

The Capacitance Company KEMET CHARGED.

RoHS Compliant **This product is RoHS compliant.**

T520 SERIES - 105°C LOW ESR, KO-CAP

Features:

- Polymer Cathode Technology
- Low ESR
- High Frequency Cap Retention
- No-Ignition Failure Mode
- EIA Standard Case Sizes
- 100% Surge Current Tested
- 20% tolerance

Electrical Specifications:

NEW PRODUCT

- Operating Temperature Range: -55°C to +105°C
- Voltage listed is at 85°C, Derate 25% at 105°C
- Reverse Voltage Rating & Polarity:
  Polymer tantalum capacitors are polar devices and may be permanently damaged or destroyed if connected in the wrong polarity. The positive terminal is identified by a laser-marked stripe and may also include a beveled edge. These capacitors will withstand a small degree of transient voltage reversal for short periods. Please note that these parts may not be operated continuously in reverse.

RoHS Compliant

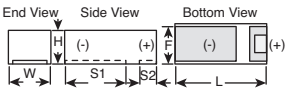
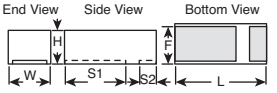
KEMET Tantalum Polymer Surface Mount Capacitors

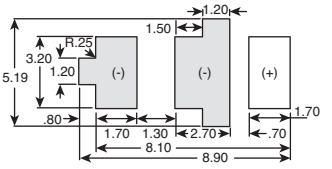
The Capacitance Company KEMET CHARGED.

I Case Size



Z Case Size

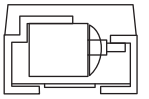




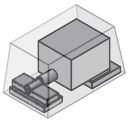
Case Size		Dimensions: mm (in.)					
KEMET	EIA	L	W	H	F±0.2	S1±0.2	S2±0.2
I	3216-10	3.2±0.2	1.6±0.2	1.0 max.	1.2	1.0	0.7
Z	7343-17	7.3±0.4	4.3±0.3	1.7 max.	2.8	5.1	1.3

Facedown 7343-17 will NOT fit on standard 7343 solder pads, and movement along Z axis could result in a short. Three-pad design must be used with center pad connection to circuit for low ESL properties. Dual pads on cathode connection required to prevent solder lifting with one cathode pad, and for mechanical hold. Will fit on Sanyo TPL pad specification - all dimensions equal except for .80mm tab extension at left cathode (-) plate as shown above.

Standard Construction



Face Down Termination



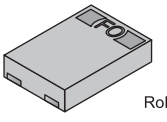
Reduction in current "loop area" creates proportional reduction in ESL.

T528 SERIES FACE DOWN TERMINATION TANTALUM SURFACE MOUNT CAPACITORS

Features:

- Low ESR
- 100% Surge Current Testing
- Polymer Cathode Technology
- Low ESL: <0.7nH@20MHz
- Lead (Pb) free 260˚C Reflow Capable
- RoHS compliant/Halogen Free
- High Frequency Cap Retention
- Non-Ignition Failure Mode
- 105˚C Max. Temperature Capability
- 100% Accelerated Steady State Aging
- Self-Healing Mechanism
- Improved Volumetric Efficiency
- Use up to 90% VR
- Tolerance: ±20%

PRODUCT NEW



RoHS Compliant

T530 SERIES - 125ºC LOW ESR, KO-CAP

Features for T530:

- Highest CV in Standard EIA Size
- Extremely low ESR
- 125°C Max, temperature capability
- Polymer Cathode technology
- High frequency capacitance retention
- Non-Ignition failure mode
- Molded case (pick-and-place precision)
- 100% Accelerated steady state aging
- 100% Surge current testing
- Utilizes multiple tantalum anode technology
- Volumetric efficiency
- Use up to 90% of rated voltage (10% Derating)
- Self-healing mechanism

KEMET Tantalum Polymer Surface Mount Capacitors

The Capacitance Company KEMET CHARGED.

RoHS Compliant **This product is RoHS compliant.**

T545 SERIES HIGH ENERGY, LOW ESR POLYMER SURFACE MOUNT CAPACITORS

Features:

- Extremely low ESR
- High energy delivery capability
- -55°C to +85°C operating temperature range
- Polymer cathode technology
- High frequency capacitance retention
- Non-ignition failure mode
- Capacitance up to 1,500µF
- Voltage: 6.3–16V
- 100% accelerated steady state aging
- 100% surge current tested
- 100% thermal shock
- Volumetric efficiency, very high capacitance
- Self-healing mechanism

Applications:

- Power hold-up
- Data hardening
- Vaulting for enterprise and military SSDs

RoHS Compliant

T543 SERIES LOW ESR ORGANIC POLYMER, KO-CAP

Features:

- -55°C to +105°C operating temperature range
- High frequency capacitance retention
- Capacitance up to 1,500µF
- 100% accelerated steady state aging
- 100% surge current tested
- Surge options at 25°C and -55°C/85°C

Applications:

- DC/DC converters
- Point of load power supply
- Radar pulse capacitor
- Telecommunications (mobile phone and base station)

RoHS Compliant

T521 SERIES HIGH VOLTAGE ORGANIC POLYMER, KO-CAP

Features:

- Voltage ratings to 63V
- Volumetric efficiency
- Stable temperature characteristics
- Up to 330µF capacitance value
- High ripple current capability
- Low ESR
- Pb Free when ordered with 100% Sn termination

Applications:

- DC/DC converters
- Power supply input
- Military/aerospace and industrial markets

RoHS Compliant

TSP SERIES STACK POLYMER SMD CAPACITORS

Features:

- Operating temperature range: -55°C to +125°C
- High volumetric efficiency
- High capacitance
- Custom capacitance up to Milli Farad range
- Ultra low ESR (Single digit milliohms)
- Surge capability
- Surface mountable
- Discrete components EIA Standard Case sizes
- High temperature lead attach material (>260°C)
- Tolerance: 20%

PRODUCT NEW

T522 SERIES REDUCED LEAKAGE ORGANIC POLYMER, KO-CAP

Features:

- Operating temperature range: -55°C to +105°C
- High frequency capacitance retention
- Non-ignition failure mode
- Volumetric efficiency
- Self-healing mechanism
- 100% accelerated steady state aging
- 100% surge current tested
- Low profile designs
- Tolerance: 20%

RoHS Compliant

For quantities greater than listed, call for quote.

T525 SERIES 125°C LOW ESR ORGANIC POLYMER, KO-CAP

Features:

- Operating temperature range: -55°C to +125°C
- High frequency capacitance retention
- Non-Ignition failure mode
- Volumetrically efficient
- Self-healing mechanism
- Halogen free epoxy
- Tolerance: 20%

RoHS Compliant

KEMET T491 SMD Tantalum Capacitors

The Capacitance Company KEMET CHARGED.

RoHS Compliant This product is RoHS compliant.

T491 SERIES (CONT.)

Case Size		Component - Dimensions: mm (in.)

KEMET Tantalum Chip Capacitors, Low ESR

The Capacitance Company KEMET CHARGED.

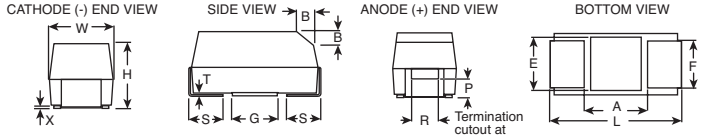
RoHS Compliant **This product is RoHS compliant.**

T489 SERIES LOW DC LEAKAGE MnO2

Features:

- Operating temp. range of -55˚C to +125˚C
- Improved reliability: 0.50%/1000hrs, 85°C, Rated Voltage
- Meets or exceeds EIA standard 535BAAC
- Halogen-free epoxy
- Laser-marked case
- DC Leakage at 0.0075CV
- Low ESR options available

RoHS Compliant



DIMENSIONS: in. (mm)

T495 SERIES SOLID TANTALUM CHIP CAPACITORS, LOW ESR, SURGE ROBUST

- Designed for very low ESR
- High ripple current capability
- High surge current capability
- 100% accelerated steady-state aging
- Low equivalent Series Inductance (<2.5nH ESL)
- Meets or exceeds EIA Standard 535BAAC
- 100% Surge current test
- Available tested per DSCC Dwg. 95158
- New extended values for low ESR
- Precision-molded, laser-marked case
- Symmetrical, compliant terminations
- Taped and reeled per EIA 481-1

RoHS Compliant

KEMET Tantalum Chip Capacitors and Low ESR

The Capacitance Company KEMET CHARGED.

T428 SERIES HIGH VOLUMETRIC EFFICIENCY FACEDOWN MNO2

Features:
- High CV/cc
- Laser marked case
- Halogen free epoxy
- Operating temperature range: -55°C to +125°C

PRODUCT NEW

For quantities greater than listed, call for quote.

496 SERIES, LOW ESR, FAIL-SAFE FUSED

Features:
- Built-in fuse protects against damaging short circuit failure mode
- Symmetrical, compliant terminations
- Patented fuse assembly
- 100% Surge Current test on C, D, X sizes

For quantities greater than listed, call for quote.

DIMENSIONS: mm

F93 SERIES RESIN-MOLDED CHIP CAPACITORS

Specifications:
- Operating Temperature: -55 to +125°C
- Capacitance Tolerance: ±20%, ±10%
- Capacitance Tolerance measured at 120Hz

NEW PRODUCT

RoHS Compliant

DIMENSIONS: mm

VISHAY/SPRAGUE Solid Tantalum Chip Capacitors

RoHS Compliant This product is RoHS compliant.

594D SERIES: TANTAMOUNT®, CONFORMAL COATED LOW ESR, MAXIMUM CV

RoHS Compliant

- Operating Temperature Range: -55°C to 85°C (125°C with voltage derating)

For quantities greater than listed, call for quote.

VISHAY/SPRAGUE Solid Tantalum Chip Capacitors

RoHS Compliant **This product is RoHS compliant.**

592D SERIES: TANTAMOUNT®, LOW PROFILE, CONFORMAL COATED, MAXIMUM CV

• Operating temperature: -55°C to 85°C (125°C with voltage derating)

For quantities greater than listed, call for quote.

VISHAY/SPRAGUE Molded Tantalum Chip Capacitors

RoHS Compliant **This product is RoHS compliant.**

✻ Go to mouser.com for complete product listing.

293D SERIES: COMMERCIAL CHIP CAPACITORS

- Operating temperature: -55°C to +85°C (To +125°C with voltage derating)
- Meets IEC Specification QC300801/US0001 and EIA 535BAAC

For quantities greater than listed, call for quote.

VISHAY/SPRAGUE Solid Tantalum Chip Capacitors

RoHS Compliant This product is RoHS compliant.

TR3 SERIES: TANTAMOUNT® MOLDED CASE, LOW ESR

Features:
- Operating temperature: -55°C to +85°C (to +125°C with voltage derating)
- Compatible with "High Volume" automatic pick and place equipment
- High ripple current carrying capability
- Meets IEC Specification QC300801/US0001 and EIA 535BAAE
- Low ESR

4 Volt

VISHAY/SPRAGUE Solid Tantalum Chip Capacitors

RoHS Compliant This product is RoHS compliant.

TR3 SERIES: TANTAMOUNT® MOLDED CASE, LOW ESR (CONT.)

Features:
- Operating temperature: -55°C to +85°C (to +125°C with voltage derating)
- Compatible with "High Volume" automatic pick and place equipment
- High ripple current carrying capability
- Meets IEC Specification QC300801/US0001 and EIA 535BAAE
- Low ESR

20 Volt (Cont.)

TAP SERIES EPOXY DIPPED RADIAL TANTALUM CAPACITORS

TAP is a professional grade device manufactured with a flame retardant coating and featuring low "leakage current and impedance, very small physical sizes and exceptional temperature stability." It is designed and conditioned to operate to +125°C. Available in various lead configuration, tolerances, and packaging. Contact a Mouser Sales Representative for more information. Voltages listed are at 85°C. Derate voltage 33% at 125°C.

TAP types are all offered on radial tape, in reel format for use on high speed radial automatic insertion equipment, or performing machines. The tape format is compatible with EIA 468A standard for component taping set out by major manufacturers of radial automatic insertion equipment.

KEMET Tantalum Capacitors

The Capacitance Company KEMET CHARGED.

"ULTRA DIP II" TANTALUM CAPACITORS, 10% TOLERANCE

The KEMET "Ultra Dip II" Series, miniature dipped solid tantalum capacitors, provide the designer with the advantage of compactness plus low leakage and low DF performance characteristics for filtering, bypassing, coupling, blocking and RC timing circuits. The plastic case provides a tough barrier coating and maintains precision of lead wire spacing within ±0.015 inch. The gold color epoxy utilized permits laser marking with outstanding permanency and legibility. All case sizes are printed with capacitance, voltage, polarity, and vendor identification. Solid tantalum devices exhibit no degradation failure mode during shelf storage and show a constantly decreasing failure rate (i.e., absence of wearout mechanism) during life tests. The "UltraDip II" Series provides self-insulation cases which are resistant to shock and vibration. These capacitors exhibit low DCL, ESR and Impedance and have excellent temperature stability. Voltages listed are at 85°C. Derate voltage 33% at 125°C.

RoHS Compliant

Available in various lead configuration, tolerances, and packaging. Contact a Mouser Sales Representative for more information.

KEMET Tantalum Capacitors

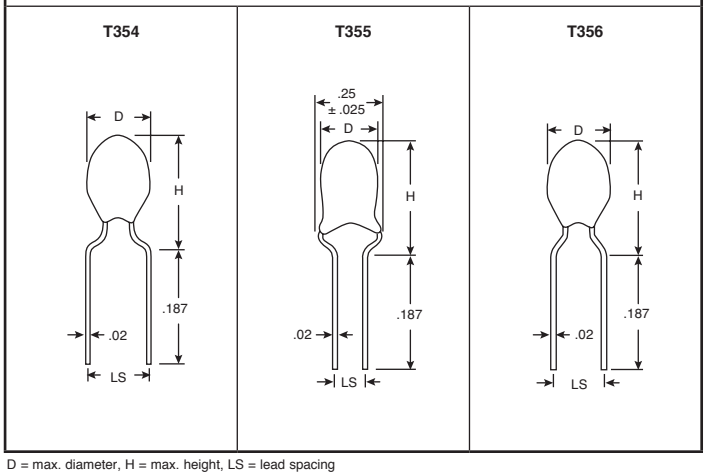
RoHS Compliant This product is RoHS compliant.

"ULTRA DIP II" TANTALUM CAPACITORS, 10% TOLERANCE

The KEMET "Ultra Dip II" Series, miniature dipped solid tantalum capacitors, provide the designer with the advantage of compactness plus low leakage and low DF performance characteristics for filtering, bypassing, coupling, blocking and RC timing circuits. The plastic case provides a tough barrier coating and maintains precision of lead wire spacing within ±0.015 inch. The gold color epoxy utilized permits laser marking with outstanding permanency and legibility. All case sizes are printed with capacitance, voltage, polarity, and vendor identification. Solid tantalum devices exhibit no degradation failure mode during shelf storage and show a constantly decreasing failure rate (i.e., absence of wearout mechanism) during life tests. The "Ultra Dip II" Series provides self-insulation cases which are resistant to shock and vibration. These capacitors exhibit low DCL, ESR and Impedance and have excellent temperature stability. Voltage rated at 85°C. Derate voltage 33% at 125°C.

Available in various lead configuration, tolerances, and packaging. Contact a Mouser Sales Representative for more information.

DIMENSIONS: in.



D = max. diameter, H = max. height, LS = lead spacing

KEMET Tantalum Capacitors

T322 SERIES, TANTALUM, MOLDED AXIALS, 10% TOLERANCE

RoHS Compliant

These capacitors offer an extremely high capacitance-to-volume ratio while still maintaining excellent performance. Ideally suited for use in printed wiring boards and all applications requiring a high degree of packaging density.

Typical applications include decoupling, blocking, bypassing and filtering in commercial computers, data processing, communications, and other electronic equipment. The low ESR/impedance at high frequencies offered by this capacitor is especially suitable for decoupling required by high speed computers. Voltage rated at 85°C. Derate voltage 33% at 125°C.

For quantities greater than listed, call for quote.

T110 SERIES, TANTALUM HERMETICALLY SEALED, AXIAL, 10% TOLERANCE

RoHS Compliant

KEMET standard hermetic sealed T110 Series are desirable for use in high humidity environments. They are ruggedly built, designed for miniaturized circuitry, and are especially suited for coupling, bypass filtering and R-C timing circuits. They exhibit excellent stability, extremely low DC leakage current, dissipation factor, and ESR/impedance over a wide temperature and frequency range. Voltage rated at 85°C. Derate voltage 33% at 125°C.

For quantities greater than listed, call for quote.

T550 SERIES, TANTALUM HERMETICALLY SEALED, AXIAL, 10% TOLERANCE

RoHS Compliant

The organic polymer characteristic of the T550 Polymer Hermetic Seal Series (PHS) from KEMET results in very low ESR and improved capacitance retention at high frequency and low temperature. The T550 PHS capacitor can be operated at voltages up to 80% of rated voltage with equivalent or better reliability than the traditional MnO2 or wet tantalum capacitors that operated at 50% of rated voltage. The capacitance range of the T550 capacitor is 100µF to 120µF @ 120 Hz/25°C and its operating temperature range is -55°C to 105°C.

For quantities greater than listed, call for quote.

TYPE 199D SOLID TANTALUM CAPACITORS

Solid-Electrolyte TANTALEX® Capacitors Resin-Coated, Radial-Lead

Features:
- Economy and high performance are combined in these radial-lead solid-electrolyte TANTALEX® capacitors
- Rugged, reliable capacitors featuring low leakage current and low dissipation factor

Performance Characteristics:
- Operating temperature: -55°C to +85°C
- Derate voltage: 33% @ 125°C
- Capacitance Tolerance: ±10%
- Lead size: 24AWG, 0.010 nom. dia.

150D SOLID TANTALUM CAPACITORS - HERMETICALLY-SEALED

Features:

- Terminations: Tin/lead (SnPb), 100% Tin (RoHS compliant)
- These high performance, hermetically-sealed Tantalex® capacitors have set the standard for solid-electrolyte tantalum capacitors for more than three decades
- High capacitance, low DCL, low dissipation factor and exceptional operating stability
- Performance and reliability have been proven in commercial, industrial and military applications
- Available in four case codes and capacitors are supplied with plastic-film insulation
- Terminals are solid, tinned nickel wire leads
- The Military equivalent to the 150D is the CSR13 which is qualified to MIL-C-39003/01

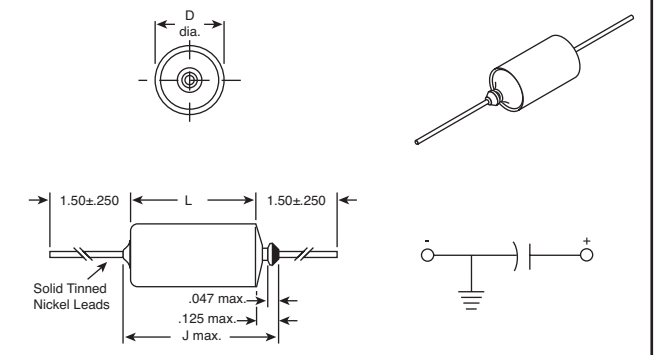
Specifications:

- Operating Temperature: -55°C to +85°C
- Capacitance Tolerance: ±10% standard
- ±5% available as special
- Dissipation Factor: @120Hz, +25°C
- Life Test: 2000 hours @ 85°C

LEAD-FREE

RoHS Compliant

DIMENSIONS: in.



Case Size	With Insulating Sleeve*		J (Max.)	Lead Size	
	D	L		AWG No.	Nominal Dia.
A	.135±.016	.286±.031	.422	24AWG	.020
B	.185±.016	.474±.031	.610	24AWG	.020

VISHAY TYPE 173D SOLID TANTALUM CAPACITORS

Type 173D molded case axial-lead TANTALEX® capacitors are designed for high performance automotive, industrial and commercial electronic equipment. Precision molded in gold colored, flame retardant, thermosetting epoxy resin, units are laser marked for improved legibility, while the tapered end of the case provides easy identification of the positive terminal.

Specifications:

- Operating Temperature: -55°C to +85°C
- Capacitance Tolerance: ±10%
- Dissipation Factor: @ 120Hz, +25°C
- Life Test: 2000 hours @ 85°C

AVX Electrolytic Tantalum Capacitors

RoHS Compliant **This product is RoHS compliant.**

A KYOCERA GROUP COMPANY

TANTALUM FUSED CAPACITORS

Fused Tantalum Capacitors offer protection from possible damaging short circuit failure modes. This is accomplished with an internal fuse using thin film technology that is in series with the capacitor. The AVX fused tantalum offers lower ESR limits than competitive fused tantalum capacitors.

Features:

- Molded Case
- Internal thin-film fuse
- Fail safe operation while maintaining low ESR
- Fuse characteristics can be specified
- Lower ESR and faster actuation than competition
- Compatible with lead-free solder processes
- Stable lead-times

Applications:

- Industrial: Failure intolerant systems
- Computers
- Server backplanes
- Highend computing and decoupling
- Parallel capacitor banks that will benefit from redundancy
- All Markets
- Uninterruptible power supplies
- Lower ESR than competing product
- Higher ripple current capability

RoHS Compliant

TWA WET ELECTROLYTIC TANTALUM CAPACITOR

The TWA series is an axial leaded wet electrolytic tantalum capacitor and represents a new level of high CV (capacitance/voltage) previously unavailable in this technology. TWA incorporates a novel, very high capacitance cathode system that allows for higher CV designs, well beyond values specified in the Mil-PRF-39006 drawing. TWA products are listed on DSCC 93026 Rev. P, which includes new high capacitance/voltage ratings.

This design includes a welded tantalum can and header assembly that provides a hermetic seal to withstand the harsh shock and vibration requirements of 39006.

Customized capacitance and voltage packages are possible and welcomed. Contact Mouser Electronics about design possibilities beyond those contained in this datasheet.

RoHS Compliant

VISHAY M34/M35 SURFACE MOUNT WET TANTALUM CAPACITORS

M34 and M35 wet tantalum electrolytic chip capacitors incorporate the advantages of all the varieties of electrolytic capacitors and elimate most of the disadvantages. They have a higher ripple current capability than any other electrolytic type with similar combinations of capacitance and case size.

Features:

- Very low ESR
- High ripple current capability
- Transient reverse voltage capability
- Low DCL

NEW! TECHNOLOGY

Specifications:

- Operating Temperature: -55°C to +85°C
- Life Test: Capacitors shall be capable of withholding a 2000 h life test at 85°C at rated voltage
- Termination: A = 100% Tin (RoHS Compliant)
  B = Tin/Lead

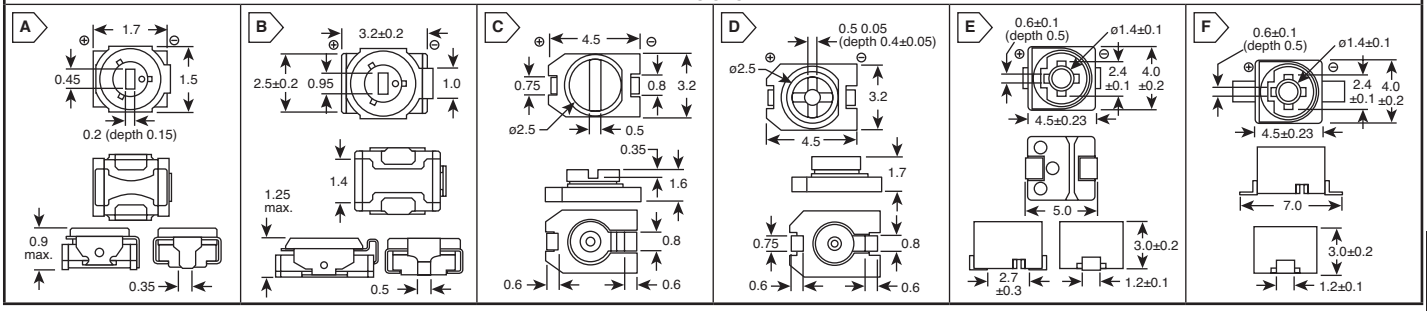
MURATA Lead Free SMD Ceramic Trimmer Capacitors

DIMENSIONS: mm



TZR1 SERIES

Features:
Unique construction with no plastic material provides superior soldering heat resistance to maintain excellent characteristic performance after reflow soldering. Suitable for high frequency circuit due to high self resonant frequency.

Specifications:
- Operating Temperature: -25°C to +85°C
- Insulation Resistance: 10,000MΩ min.
- Torque: 0.1 to 1.0mNm

TZY2 SERIES

Features:
New shape of cover can improve the flux invasion compared with current products. Improvement of the adhesion between rotor and stator leads to superior stability. Unique construction with no plastic material provides superior soldering heat resistance to maintain excellent characteristic performance after reflow soldering. Suitable for high frequency circuit due to high self resonant frequency.

Specifications:
- Operating Temperature: -25°C to +85°C
- Insulation Resistance: 10,000MΩ min.
- Torque: 0.5 to 5.0mNm

TZC3 SERIES

Features:
Color coded stator permits easy identification of capacitance and reduces mounting errors. Can be adjusted with conventional adjustment tools having a thickness of 0.5mm. Designed for automatic placement in surface mount applications. Heat resistant resin withstands reflow soldering temperature.

Specifications:
- Operating Temperature: -25°C to +85°C
- Insulation Resistance: 10,000MΩ min.
- Torque: 1.5 to 10.0mNm

SPRAGUE GOODMAN Trimmer Capacitors

FILMTRIM® PLASTIC DIELECTRIC TRIMMER CAPACITORS, 8MM GYA SERIES, 10MM GYC AND GZC SERIES

Features:
- Low cost for commercial/industrial applications
- Top and bottom adjustable
- Linear capacitance change vs. rotation
- Typical applications: mobile radios, transmitters, pagers, electronic games, wireless security and fire alarms, and CATV

Specifications:
- Voltage rating: 100 VDC
- Dielectric withstanding voltage: 200 VDC
- Contact resistance: 0.010Ω max
- Insulation resistance: 10^4 MΩ min
- Operating temperature: GYA, GYC: -40°C to +70°C GZC: -40°C to + 85°C
- Torque: GYA series: 15-250 g-cm (0.21-3.5 oz-in) GYC, GZC series: 15-360 g-cm (0.20-5.0 oz-in)
- Dielectric construction: GYA, GYC: Polypropylene GZC: Polycarbonate

For quantities greater than listed, call for quote.

AIRTRIM® GAA SERIES MULTI-TURN TRIMMER CAPACITORS

Features:
- Multiple mounting styles, including surface mount
- Excellent stability
- Multi-turn resolution
- High Q

Applications:
Designed for VHF, UHF and microwave applications: amplifiers, oscillators, filters, radar, cable TV, mobile radios, and RF applications. Suitable for military and aerospace environments.

Specifications:
- Operating temperature range: -65°C to +125°C
- Voltage rating: 250 VDC
- Test voltage: 500 VDC
- Insulation resistance: >10^6MΩ min.
- Contact resistance: < 0.01Ω
- Torque: .35 to 3.5pF: 0.3 to 3.0 oz-in (22 to 216 g-cm)
  .6 to 6.0pF: 0.4 to 4.0 oz-in (29 to 288 g-cm)
  1.0 to 16pF: 0.5 to 5.0 oz-in (36 to 360 g-cm)
- Q factor: > 5000 @ 100MHz

0.35-3.5 pF Capacitance Range

VOLTRONICS SMD Multi-Turn & Half-Turn Trimmer Capacitors

Voltronics Corporation is the world's leader in the design and manufacture of precision trimmer capacitors. Voltronics combines engineering know-how with leading edge technology and offers a variety of dielectrics that are suitable for applications from 1MHz to over 2GHz and voltages up to 20,000 VDC.

MULTI-TURN TRIMMER CAPACITORS

A1 SERIES

The Voltronics A1 Series high reliability solid dielectric trimmer capacitor is an ideal, economical replacement for conventional miniature air and sapphire dielectric trimmers. High reliability solid PTFE dielectric, positive tuning stops and up to 13 full turns of linear turning make the A1 Series an outstanding performer. 40 psi sealed, high voltage and non-magnetic versions are readily available.

RoHS Compliant

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Voltronics Part No.	Fig.	Cap. Range (pF)		Working Voltage	Withstanding Voltage	Q	Price Each		
			Min.	Max.				1	10	50

768-A1J8	A1J8	A	0.5	8.0	125	250	3000 @ 100MHz	31.91	29.17	20.51
768-A1J12	A1J12	B	0.6	12.0	125	250	2000 @ 100MHz	36.33	33.21	23.36

A4 SERIES

The A4 Series unique design using minimal parts simplifies the manufacturing process to effect one of the most economical high performance trimmer capacitors available in the industry. Also offers a high reliability solid PTFE dielectric, positive tuning stops and up to 5 full turns of linear tuning in the shortest length of any similar trimmer capacitor. It is an ideal choice for tuning and impedance matching high frequency and high power amplifier circuits.

RoHS Compliant

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Voltronics Part No.	Fig.	Cap. Range (pF)		Working Voltage	Withstanding Voltage	Q	Price Each		
			Min.	Max.				1	10	50
768-A4M3	A4M3	C	0.5	3.0	125	250	3000 @ 100MHz	22.99	21.03	14.79
768-A4M5	A4M5	D	0.6	5.0	125	250	2000 @ 100MHz	23.41	21.40	15.04

P SERIES

Voltronics "P" line of sapphire subminiature trimmer capacitors is a unique design. The trimmers have high Q, zero temperature coefficient, and are internally O-ring sealed to keep out flux and cleaning fluid. Yet, sizes are the same as the MIL unsealed styles. The tuning screw does not move in and out, and RF current does not run along it. Sapphire is ideal for precision trimmer capacitors. It's dielectric constant does not change with frequency, and its loss constant is extremely stable, measuring below 0.0003 up to 10 GHz. Sapphire is chemically inert, totally moisture resistant, and mechanically strong.

RoHS Compliant

For quantities greater than listed, call for quote.

ASG-D SERIES PROGRAMMABLE - HIGH PERFORMANCE SMD XO AND VCXO

Features:

- ASG series is a High Performance crystal based oscillator; available either as an XO or a VCXO
- LVCMOS output, 10MHz to 250MHz
- LVDS output, 10MHz to 1.50GHz
- LVPECL output, 10MHz to 1.50GHz
- Offered with either 2.50V or 3.30V bias voltage

ASG-P SERIES PROGRAMMABLE - HIGH PERFORMANCE SMD XO AND VCXO

Features:

- ASG series is a High Performance crystal based oscillator; available either as an XO or a VCXO
- LVCMOS output, 10MHz to 250MHz
- LVDS output, 10MHz to 1.50GHz
- LVPECL output, 10MHz to 1.50GHz
- Offered with either 2.50V or 3.30V bias voltage

ABRACON OCXO Oscillators

RoHS Compliant This product is RoHS compliant.

OVEN CONTROLLED OSCILLATORS SMD AND THRU-HOLE

Features:
- Frequency Range SMD: 1.000 to 160.00MHz
- Frequency Range Thru-Hole: 1.000 to 100.00MHz
- Operating Temperature: -40°C to +85°C
- SC-Cut or AT-Cut, High "Q" resonator based design
- Either Sinewave or CMOS RF output
- Tight stability option

Applications:
- Cellular Infrastructure
- Radar Systems
- Test and Measurement Equipment
- GPS Tracking with precision hold-over accuracy
- WiMax/WLAN

DIMENSIONS: mm

Frequency Control

Abracon

AOCJY Series OCXO Oscillator 25.4 x 22 - SMD

For quantities greater than listed, call for quote.

ABRACON SMD Pure Silicon™ Clock Oscillators

RoHS Compliant This product is RoHS compliant.

PLASTIC PACKAGE INDUSTRIAL GRADE ULTRA MINIATURE PURE SILICON™ CLOCK OSCILLATORS

Features:

- 2nd Generation MEMS Technology by Discera
- Low Power Consumption <10mA
- Low Cost-Compact QFN Plastic Packaging
- Low jitter
- Supply Voltage (Vdd): +1.7 ~ +3.6V
- Output Load: 15pF

No	Pin Terminal

ABRACON SMD Crystals and Oscillators

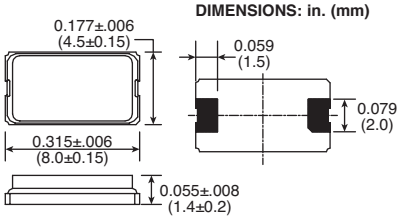
RoHS Compliant This product is RoHS compliant.

ABM2 SERIES SMD MICROPROCESSOR CRYSTALS

Features:

- Low in height; suitable for thin equipment
- Glass sealed package assures high reliability and high temperature operation
- Tight tolerance and stability available
- Suitable for RoHS compliant reflow
- Low cost glass sealed crystal solution

DIMENSIONS: in. (mm)



For quantities greater than listed, call for quote.

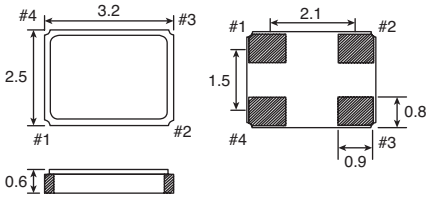
ABM8X SERIES SMD ULTRA MINIATURE, HIGH STABILITY CRYSTALS

Features:

- -40ºC to +125ºC wide operating temperature range
- ±40ppm Max. All Inclusive frequency stability over 10-year product life
- Fundamental Mode, low ESR Quartz design
- Ultra miniature, Seam-Sealed, RoHS compliant reflow-able package

DIMENSIONS: in. (mm)



Pin function:
#1 crystal connection
#2 GND
#3 crystal connection
#4 GND

For quantities greater than listed, call for quote.

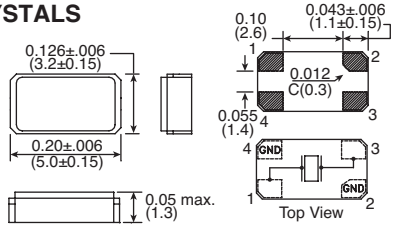
ABM3C SERIES SMD ULTRA MINIATURE CRYSTALS

Features:

- Low in height; suitable for thin equipment.
- Glass sealed package assures high reliability and high temperature operation
- Tight tolerance and stability available
- Suitable for RoHS reflow profile



DIMENSIONS: in. (mm)

For quantities greater than listed, call for quote.

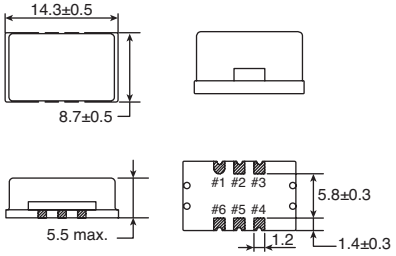
ABLJO SERIES LOW JITTER CRYSTAL OSCILLATORS

Features:

- High "Q", 3rd Overtone Crystal Technology
- Ultra Low Jitter performance 0.10ps Max. (12kHz to 20MHz)
- Standard LVCMOS RF Output
- Wide Operating Temperature (-40ºC to +85ºC) standard
- ±40ppm Max. All inclusive Stability (including Aging) over 10-years
- (17) Standard Frequencies between 80MHz & 200MHz
- 9x14mm RoHS Compliant SMT package



DIMENSIONS: in. (mm)

Connection:
#1 V.C
#2 NC
#3 GND
#4 Output
#5 N.C.
#6 Vcc

For quantities greater than listed, call for quote.

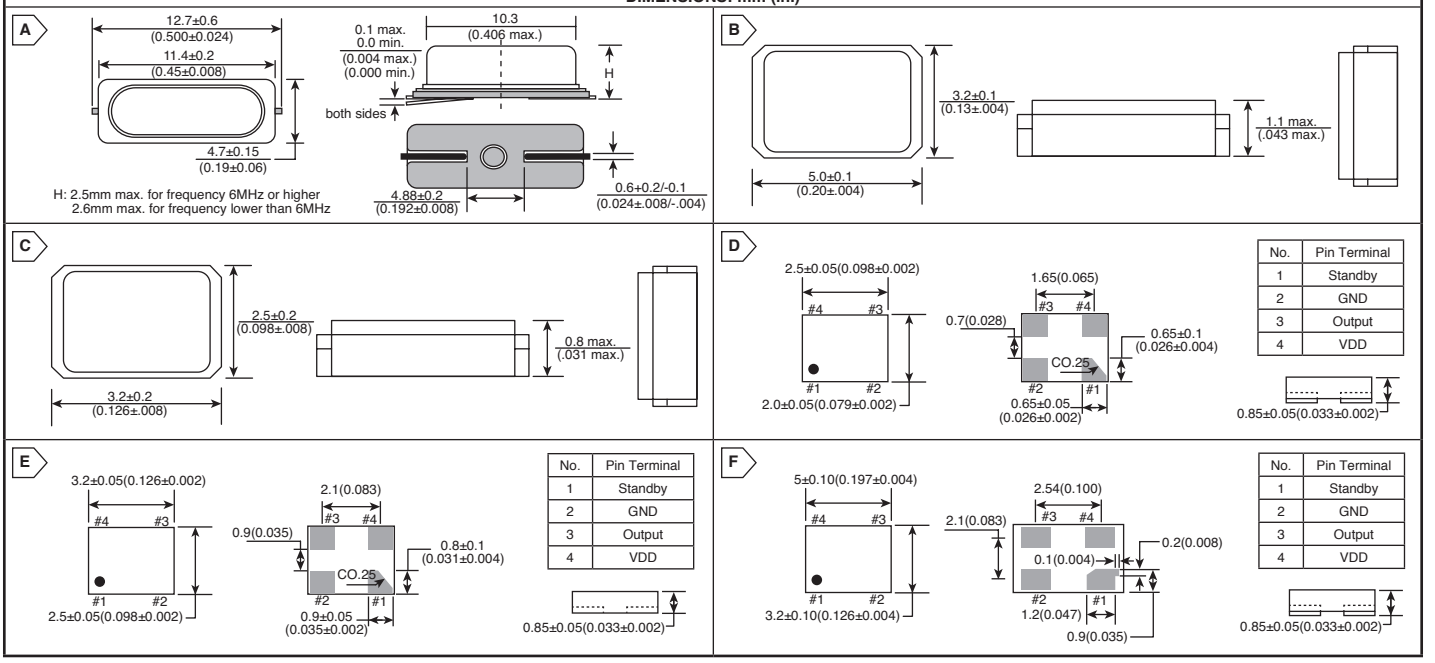
ABRACON Crystals and Oscillators

RoHS Compliant **This product is RoHS compliant.**

ABRACON CORPORATION

DIMENSIONS: mm (in.)



No.	Pin Terminal
1	Standby
2	GND
3	Output
4	VDD

ABLS3 SERIES LOW PROFILE MICROPROCESSOR CRYSTALS

Features:

- High reliability, Low cost
- Tight stability and extended temperature
- Low profile (2.6mm max.)
- Reflow capable

For quantities greater than listed, call for quote.

ABM3B SERIES CERAMIC SMD CRYSTALS

Features:

- Fundamental mode
- Suitable for reflow
- Tight Stability available
- Ceramic package and metal lid assures high precision and reliability
- Seam sealing

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Abracon Part No.	Fig.	Frequency (MHz)	Price Each 1	10	50	100	500

ABM8 ULTRA MINIATURE CERAMIC SMD CRYSTALS

Features:

- Low in height; suitable for thin equipment, 0.8mm max
- Seam sealed package assures high reliability
- Tight tolerance and stability available
- Available for fundamental and 3rd over tone mode

For quantities greater than listed, call for quote.

ASDMB SERIES INDUSTRIAL GRADE OSCILLATORS 2.5MM X 2.0MM

Features:

- Ultra Miniature Pure Silicon™ Clock Oscillator
- 2nd Generation MEMS Technology with reduced jiter by Discera
- Low Power Consumption <10mA
- Compact QFN Plastic Packaging

For quantities greater than listed, call for quote.

ASEMB SERIES INDUSTRIAL GRADE OSCILLATORS 3.2MM X 2.5MM

Features:

- Ultra Miniature Pure Silicon™ Clock Oscillator
- 2nd Generation MEMS Technology with reduced jiter by Discera
- Low Power Consumption <10mA
- Compact QFN Plastic Packaging

For quantities greater than listed, call for quote.

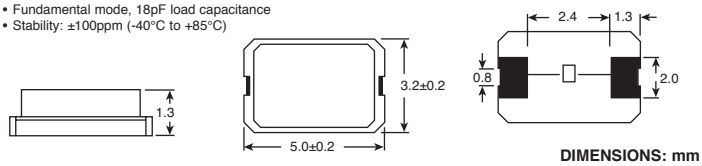
ABM3 SERIES MINI CERAMIC, 3.2 X 5

RoHS Compliant

Features:

- Operating temperature: -20°C to 70°C
- Frequency tolerance: ± 20ppm
- Fundamental mode, 18pF load capacitance
- Stability: ±100ppm (-40°C to +85°C)



DIMENSIONS: mm

For quantities greater than listed, call for quote.

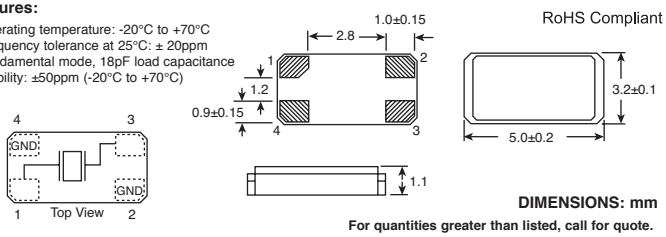
ABM3B SERIES MINI CERAMIC, 3.2 X 5

RoHS Compliant

Features:

- Operating temperature: -20°C to +70°C
- Frequency tolerance at 25°C: ± 20ppm
- Fundamental mode, 18pF load capacitance
- Stability: ±50ppm (-20°C to +70°C)



DIMENSIONS: mm

For quantities greater than listed, call for quote.

ABM8G GLASS SEALED CRYSTALS

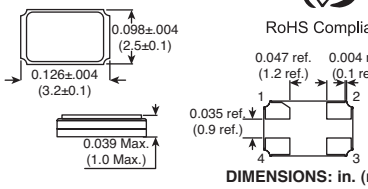
RoHS Compliant

Features:

- Low in height; suitable for thin equipment
- Glass sealed package assures high reliability and high temperature operation

Applications:

- Automotive applications
- High Density Applications
- Modems, communication and test equipment
- PMCIA, Wireless applications



DIMENSIONS: in. (mm)

For quantities greater than listed, call for quote.

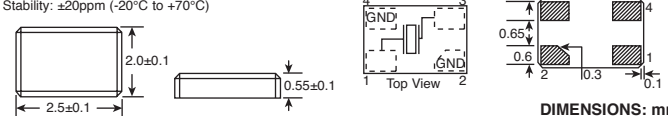
ABM10 SERIES ULTRA MINI CERAMIC, 2 X 2.5

RoHS Compliant

Features:

- Operating temperature: -20°C to +80°C
- Frequency tolerance at 25°C: ± 20ppm max.
- Fundamental mode, 10pF load capacitance
- Stability: ±20ppm (-20°C to +70°C)



DIMENSIONS: mm

For quantities greater than listed, call for quote.

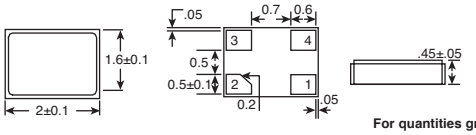
ABM11 SERIES ULTRA MINI CERAMIC, 1.6 X 2

Features:

- Fundamental mode
- Suitable for reflow
- Tight Stability available
- Ceramic package and metal lid assures high precision and reliability
- Seam sealing

Applications:

- Communication and Test equipment
- High Density applications
- PCMCIA and wireless applications



RoHS Compliant

DIMENSIONS: mm

For quantities greater than listed, call for quote.

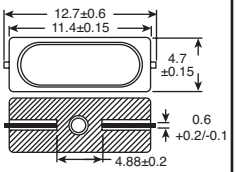
ABRACON Microprocessor Crystals

RoHS Compliant. This product is RoHS compliant.

ABLS/ABLS2 SERIES SMD MICROPROCESSOR CRYSTALS, HC49SM, 12.7 X 4.7MM

ABLS Series Features:
- Operating temperature: -55°C to +125°C
- Frequency tolerance: ±30ppm
- 18pF load capacitance
- Stability: ±100ppm
- Dimensions: 11.4x4.7x4.2mm

ABLS2 Series Features:
- Operating temperature: -40°C to +85°C
- Frequency tolerance: ±30ppm
- 18pF load capacitance
- Stability: ±30ppm
- Dimensions: 11.4x4.7x3.3mm



DIMENSIONS: mm

For quantities greater than listed, call for quote.

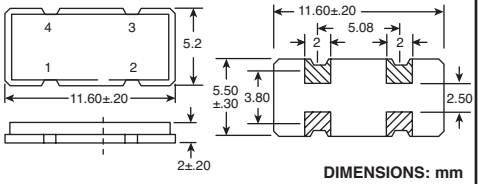
ABC2 SERIES MICROPROCESSOR CRYSTALS, LOW FREQUENCY

Features:
- Low frequency in small size SMD
- 2.0mm height ideal for high density circuit boards
- Ceramic package offers excellent environmental and heat resistance
- Extended temperature -40°C to +85°C for industrial applications



DIMENSIONS: mm

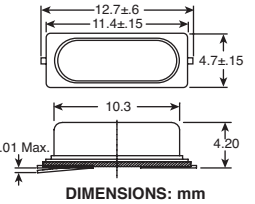
ABLS ULTRA LOW ESR SMD CRYSTAL

Features:
- Ultra low ESR as low as 20 ohms for 4MHz, 85% lower than typical ABLS 4MHz
- Low negative resistance(-R) IC design can ensure high oscillation margin
- Tight stability and automotive grade temperature available
- Hermetically resistance weld sealed
- Designed to mate with next-generation micro controller and transceiver circuits enabling designers to arrive at low power solutions, without compromising performance
- Crystals are optimized to properly function under low drive level conditions of a few uW up to 500uW without impacting the gain margin of the oscillator loop



DIMENSIONS: mm

For quantities greater than listed, call for quote.

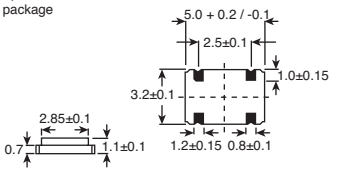
ABRACON SMD Crystal Clock Oscillators

ASFL1 SERIES MINIATURE CRYSTAL CLOCK OSCILLATORS, 3.2 X 5

Features:
- Frequency Range: 1.5Mhz to 125.0Mhz
- Operating Temperature: -40°C to +85°C
- Stability: ±30ppm (-20°C to +70°C)
- Supply Voltage (VDD): 3.3VDC ±10%
- Low current consumption
- Tight stability option
- Glass sealed package

Pin Assignment	
1	Tristate
2	GND/Case
3	Output
4	VDD

RoHS Compliant



DIMENSIONS: mm

For quantities greater than listed, call for quote.

ASVTX SERIES VOLTAGE CONTROLLED TEMPERATURE COMPENSATED CRYSTAL OSCILLATOR VCTCXO, 3.2 X 5

Features:
- Frequency range: 12.800MHz - 19.2MHz
- Operating temperature: -40°C to +85°C
- Supply voltage (Vcc): 3.0VDC ±5%
- Low current consumption
- Tolerance: ±0.5ppm @ 25°C
- Stability: ±2.5ppm (-30°C to +75°C)

RoHS Compliant

Pin Assignment

ABRACON Crystal Oscillators

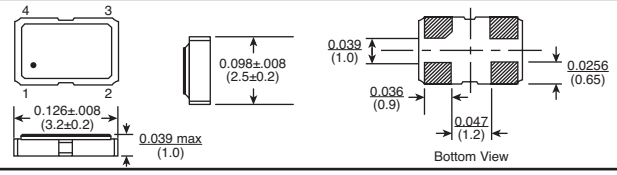
RoHS Compliant This product is RoHS compliant.

ASE SERIES CMOS SMD, 3.2 X 2.5

Features:
- Frequency Range: 0.625 to 200MHz
- Operating Temp: -10°C to +70°C

Applications:
- CCD clock for VTR camera
- PDA, wireless communication

DIMENSIONS: mm



For quantities greater than listed, call for quote.

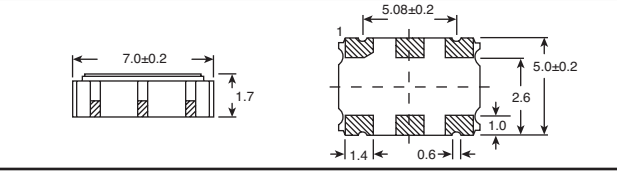
ASVV SERIES VCXO VOLTAGE CONTROLLED SMD, 7 X 5

Features:
- Frequency Range: 1.000MHz to 125.00MHz
- Operating Temp: -40°C to +85°C
- Stability: ±50ppm (0°C to +70°C)

DIMENSIONS: mm



For quantities greater than listed, call for quote.

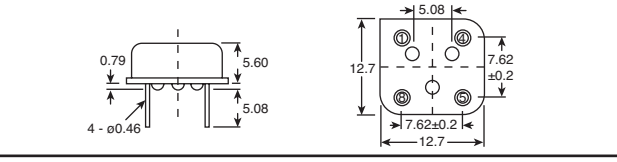
ACH/ACHL SERIES, HALF SIZE LEADED

Features:
- Frequency Range: 32.768kHz to 200MHz
- Operating Temp: -20°C to +70°C
- Stability: ±30ppm
- HCMOS and TTL compatible
- Tight symmetry option
- Fast rise and fall times

DIMENSIONS: mm



For quantities greater than listed, call for quote.

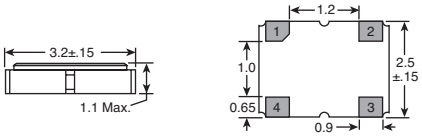
ASE2 SERIES CMOS COMPATIBLE SMD, 3.2 X 2.5

Features:
- Frequency Range: 0.75 to 75MHz
- Operating Temp: -40°C to +85°C
- Stability: ±50ppm max.

Applications:
- CCD clock for VTR camera
- Equipment connected to PC or PC cards
- Wireless communication

DIMENSIONS: mm



For quantities greater than listed, call for quote.

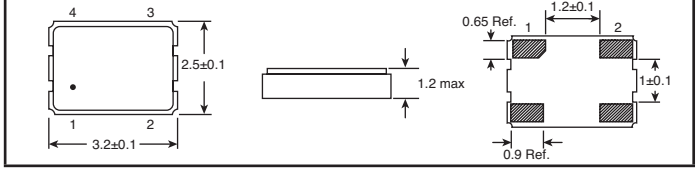
ASEK SERIES CERAMIC SMD, 3.2 X 2.5

Features:
- IR-Reflow consumption
- Lower current consumption
- Seam sealed assure high-reliability performance

Applications:
- LCD
- Laptop
- Bluetooth and mobile communication

DIMENSIONS: mm



For quantities greater than listed, call for quote.

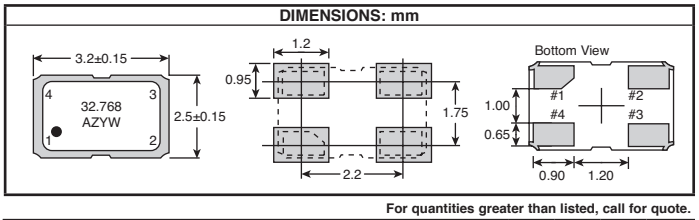
ASHEK SERIES CMOS SMD, 3.2 X 2.5MM

Features:
- Ultra Low uA current comsumption with COS output
- Tri-state function
- Operating Temp: -40°C to +85°C

Applications:
- Mobile phone
- Clock and Data recovery
- Computers and peripherals

DIMENSIONS: mm



For quantities greater than listed, call for quote.

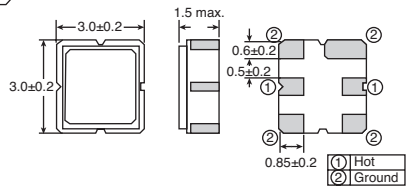
AVX SMD Ceramic Resonators

RoHS Compliant This product is RoHS compliant.

DIMENSIONS: mm

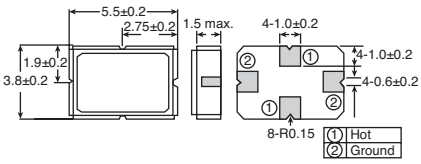
A



Features:
- Small size
- High reliablity
- Excellent temperature characteristics

Applications:
- Remote keyless entry system
- Garage openers
- Security systems

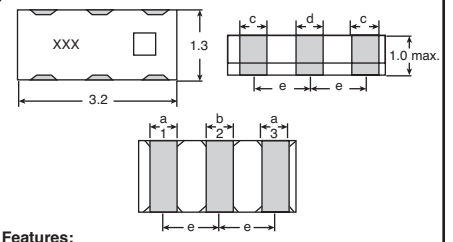
B



Features:
- Small size (5.5x3.8mm)
- Hermetic seal
- Excellent temperature characteristics

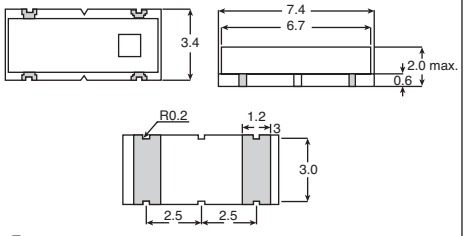
Applications:
- Keyless entry systems
- Garage Openers
- Security Systems

C



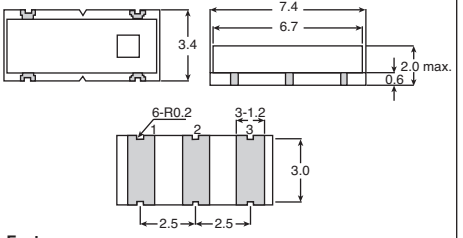
Features:
- Small and low profile
- Reflow solderable
- Excellent solderability
- Rectangular shape allows easy pick and placement
- High reliability, high temperature withholding package

D



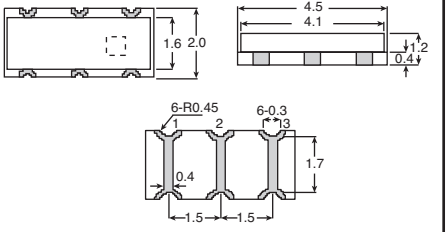
Features:
- Small and low profile
- Reflow solderable
- Excellent solderability
- Rectangular shape allows easy pick and placement
- High reliability, high temperature withholding ceramic case

E



Features:
- Small and low profile
- Reflow solderable
- Excellent solderability
- Rectangular shape allows easy pick and placement
- High reliability, high temperature withholding package

F



Features:
- Small and low profile
- Reflow solderable
- Excellent solderability
- Rectangular shape allows easy pick and placement
- High reliability, high temperature withholding package

RESONATORS

AVX produces a broad range of high quality ceramic resonators. The high quality and extensive coverage of this product line allows optimum design of almost any oscillating circuit.
Ceramic resonators stand between quartz crystal oscillators and LC/RC oscillators in regard to accuracy but are considerably smaller, require no adjustments, have improved start-up times, and are low in cost.

RoHS Compliant

Specifications:

- Temperature Characteristics: -20°C to +80°C
- Frequency Tolerance: ±0.5%
- Resonant Impedance: 2.00-2.90MHz = 200 ohm max
  3.00-3.57MHz = 100 ohm max
  3.58-8.00MHz = 30 ohm max
  8.01-20.00MHz = ohm max

KNH21 SERIES EMI FILTERS

Features:
- 0805 Size. Rated current up to 6A MAX
- Effective for filtering noise on power (Vcc) lines

AVX SMD Clock Oscillators

RoHS Compliant This product is RoHS compliant.

TEMPERATURE COMPENSATED CRYSTAL OSCILLATORS (TCXO)

NEW! TECHNOLOGY

1.8 Volt (2.5 and 3.3 Volt Compatible)

Common Features:

- Miniature SMD type
- Reflow compatible
- Frequency Stability: ±0.5x10-6/-30 to +85°C

Applications:

- GPS Units

For quantities greater than listed, call for quote.

CITIZEN SMD Programmable, XO and VCXO Oscillators

RoHS Compliant This product is RoHS compliant.

CITIZEN CM309S SERIES PLASTIC SMD CRYSTALS 4.6 X 12.5

Specifications:
- Operating Temperature: -40°C to +85°C
- Frequency Tolerance: ±30ppm
- Load Capacitance: 18.0pF typ.
- Insulation Resistance: 500MΩ min.

Features:
- Heat resistant
- Plastic encased cylinder type AT-cut crystal
- Reflow solderable
- Suitable for automatic insertion

RoHS Compliant

DIMENSIONS: mm

PART NUMBERING GUIDE:

695-CSX750 _ _ - _ -FREQ

Product Family

Programmable Frequency:

	Voltage	Load Condition
PT	5V	TTL
PC	5V	CMOS
PB	3.3V	CMOS

Frequency Tolerance (at Operating Temp.):
B = ±50ppm (-20°C to +70°C)
C = ±100ppm (-20°C to +70°C) (Std)
F = ±100ppm (-40°C to +85°C)
G = ±200ppm (-40°C to +85°C)

Packaging Method:
UT = Tape & Reel (2000 pcs min.)
UB = Bulk

Frequency:
Numerical Value - Max. characters as follows:

XXX.XXXXXX
Followed by "M" for MHz

CITIZEN CSX750 SERIES PROGRAMMABLE CRYSTAL OSCILLATORS 7.0 X 5.0MM

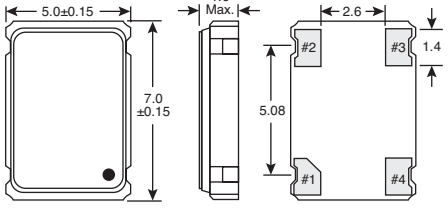
Features:
- Wide range of output frequency by PLL technology

Applications:
- Communication Devices
- AV Devices
- Automotive Devices
- Measuring Instruments

Specifications:
- Frequency Range: CSX750PT - 1.000MHz to 125.000MHz
  CSX750PC - 1.000MHz to 125.000MHz
  CSX750PB - 1.000MHz to 100.000MHz

RoHS Compliant

DIMENSIONS: mm



Pin Assignment	
Pin No.	Connection
#1	OE or Stand By
#2	GND
#3	OUT
#4	Vdd

HCM49 SERIES MHZ METAL CAN SMD CRYSTALS HC49SM 4.7 X 11.5

Specifications:

- Operating Temperature: -40°C to +85°C
- Frequency Tolerance: ±30ppm
- Load Capacitance: 18.0pF typ.
- Aging (First year): ±5ppm max.
- Shock Resistance: ±10ppm max.
- Insulation Resistance: 500MΩ min.

For quantities greater than listed, call for quote.

CRYSTEK High Performance Oscillators

CRYSTEK CORPORATION

RoHS Compliant **This product is RoHS compliant.**

TEMPERATURE COMPENSATED CRYSTAL OSCILLATORS (TCXO) 20 X 20MM

Features:
- Tight Stability at ±1.0PPM (parts per million)
- Low Phase Noise

Output:
- HCMOS
- Symmetry: 40/60% max. @ (Vdd)/2
- Load: 15pF

Specifications:
- Frequency: 10.000MHz
- Frequency Stability: ±1.0PPM @-10°C to +60°C
- Supply Voltage: 5V±0.5V
- Supply Current: 20mA max.
- Phase Noise: -135dBc/Hz @ 10KHz Offset

DIMENSIONS: in. (mm)

Pad	Connection
1	Supply Voltage
2	RF Output
3	Case Ground
4	Case Ground
5	Case Ground

CVT32 SERIES, 3.2 X 5MM SMD - TXCO WITH VOLTAGE CONTROL

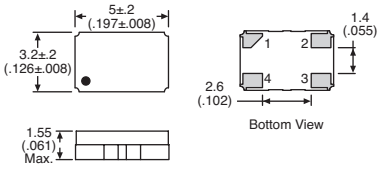
Specifications:
- Frequency Range: 12.8-30MHz
- Input Voltage: 3.0V±10%
- Input Current: 1.2mA typ., 2mA max.
- Low Phase Noise Floor @ -140dBc/Hz
- Calibration Tolerance: ±1.5ppm
- Stability: ±2.5ppm @ -20°C to +80°C
- Aging: 1ppm max./year

Output:
- Clipped Sinewave
- Load: 6-15KΩ/2-10pF
- Harmonics: -12dBc max.

Voltage Control:
- 1.5V±1.0V
- Vcont Trim: ±4ppm min., ±12ppm max.

DIMENSIONS: mm (in.)

Pad	Connection	Pad	Connection
1	Volt. Cont.	3	OUT
2	GND	4	Vdd



Note: Other TCXO (Temperature Compensated Crystal Oscillators) and TCVCXO (Temperature Compensated Voltage Controlled Crystal Oscillators) available. Please contact your Mouser representative for more information.)

For quantities greater than listed, call for quote.

CVT25 SERIES, 2.5 X 3.2MM SMD - TXCO ULTRA MINIATURE WITH VOLTAGE TRIM

Specifications:
- Frequency Range: 13.0 to 38.4MHz
- Input Voltage: 3V±5%
- Input Current: 1.2mA typ., 2mA max.
- Phase Noise: -110dBc/Hz max. 100Hz offset
  -130dBc/Hz max. 1KHz offset
- Calibration Tolerance: ±1.5ppm
- Frequency Stability: ±2.5ppm
- Aging: 1 ppm max./year

Output:
- Clipped Sinewave
- Load: 6-15KΩ/2-10pF
- Harmonics: -12dBc max.

Voltage Control:
- 1.5V±1.0V
- Vcont Trim: ±8ppm min.

DIMENSIONS: in. (mm)

CVCSO SERIES, VOLTAGE CONTROLLED SAW OSCILLATORS 14.2 X 9.14MM

True Sinewave

Other synergistic and related products available including Semiconductors, and Receivers/Transceivers.
Custom designs available also, ask your Mouser representative.

Wireless Technologies supported:

Bluetooth	ISM Band	WiMAX
CDMA2000	RFID	Wi-Fi
GSM	UMTS/3G	ZigBee
InfrRed (IR)	UWB	

Features:
- SAW Resonator Technology
- Low Phase Noise
- Low Jitter

Output:
- True SINEWAVE
- Symmetry: 45/55% max @ (Vdd)/2
- Pullability APR: ±50ppm min.
- Linearity: 20% max.
- No Sub-Harmonics

Specifications:
- Frequency: 1GHz
- Frequency Stability: ± 200ppm @0°C to +70°C
- Supply Voltage: 5V±0.25V
- Control Voltage: 2.5V±2.5V
- Supply Current: 25mA typ., 35mA max.
- Phase Noise: -135dBc/Hz @ 10KHz Offset
- Jitter: 1psec RMS max.

Phase Noise Typical	
1KHz	-108 dBc/Hz
10KHz	-135 dBc/Hz
100KHz	-145 dBc/Hz
1MHz	-155 dBc/Hz

Pad	Connection

CVS575 SERIES, VOLTAGE CONTROLLED SAW OSCILLATOR 7.5 X 5MM SMD

Specifications:
- 315MHz to 1GHz Available Freq. Range
- 5x7.5mm SMD Package
- Complementary LVPECL Output
- +3.3V Supply
- Ultra-Low Jitter <0.20 pSec RMS (50KHz to 80MHz)
- Ultra-Low Phase Noise -130dBc/Hz @ 10KHz offset
- CMOS Logic Enable/Disable

Wireless Technologies supported:

Bluetooth	ISM Band	WiMAX
CDMA2000	RFID	Wi-Fi
GSM	UMTS/3G	ZigBee
InfrRed (IR)	UWB	

Output Phase Noiset	
@1KHz offset	-108 dBc/Hz

CCPD-033/034, LVPECL CLOCK OSCILLATORS, 5 X 7MM SMD

Specifications:

- Frequency Range: 77.760~311.040MHz
- Input Voltage: 3.3V ± 0.3V
- Input Current: 55mA Typ, 88mA max.
- Jitter: 1ps RMS max.
- Low phase noise, non PLL design

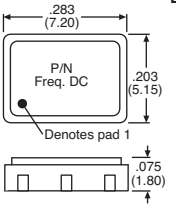
Pad	Connection	Pad	Connection
1	E/D	4	OUT
2	N/C	5	COUT
3	GND	6	Vdd

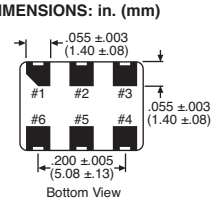
Output:

- Differential LVPECL
- Symmetry: 45/55% max. @ 50% Vdd
- Logic: Terminated to Vdd-2V into 50 ohms
- Rise/Fall Time: 1ns max.@20% to 80% Vdd

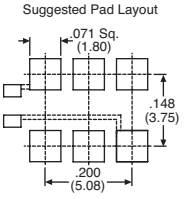
✻ Also available in 9x14

DIMENSIONS: in. (mm)





Suggested Pad Layout



Bypass Capacitor Recommended

(Other frequencies, stabilities, voltages, outputs and temperature ranges available. Please contact your Mouser representative for more information.)

7.0 x 5.0 x 1.20mm

Features:
- Stable frequency over temperature and drive level
- Frequency tolerance, ±30ppm
- Frequency stability, ±50ppm
- Operating temperature to -40°C to +85°C

For quantities greater than listed, call for quote.

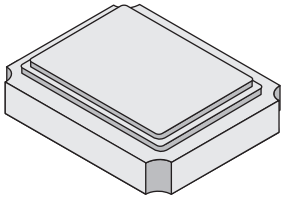
CLOCK OSCILLATORS



2.5 x 2.0 x 1.0mm

Features:
- CMOS compatible
- Fundamental and 3RD overtone crystals
- Frequency stability, ±50ppm
- +1.8Vdc,+2.5Vdc,+3.3Vdc operation
- Operating temperature to –10°C to +70°C
- Output enable standard

For quantities greater than listed, call for quote.

CTS Crystals, Clock Oscillators and Tuning Forks

RoHS Compliant This product is RoHS compliant.

CTS 445 SMD QUARTZ CRYSTALS

NEW PRODUCT

Features:
- Standard 5.0x3.2mm Glass Seal Package
- Fundamental Crystal Design
- Low Cost
- Wide range of applications

For quantities greater than listed, call for quote.

CTS ATS-SM SMD QUARTZ CRYSTALS HC49SM (12.3X4.83X4.3)

Features:
- Stable frequency over temperature and drive level
- Operating temperature: -20°C to +70°C
- Frequency range: 3.5-60MHz
- Frequency tolerance: ±30ppm standard
- Frequency stability: ±50ppm standard
- Fundamental and 3rd overtone crystals

RoHS Compliant

For quantities greater than listed, call for quote.

CTS MP SERIES THRU HOLE QUARTZ CRYSTALS HC49U (13.46X10.85X3.8)

NEW PRODUCT

Features:
- Stable frequency over temperature and drive level
- Operating temperature: -20°C to +70°C
- Frequency range: 1.8-48MHz
- Frequency tolerance: ±45ppm standard
- Frequency stability: ±50ppm standard
- Fundamental and 3rd overtone crystals

RoHS Compliant

For quantities greater than listed, call for quote.

CTS CB3 AND CB3LV SERIES SMD HCMOS/TTL CLOCK OSCILLATORS (7.0X5.0X1.8)

Features:
- Standard 7.0x5.0mm surface mount footprint
- HCMOS/TTL compatible
- +3.3VDC (CB3LV) or +5.0VDC (CB3) operation
- Operating temperature: -20°C to +70°C
- Frequency Range: 1.5 - 160MHz
- Frequency Stability: ±50ppm standard

RoHS Compliant

For quantities greater than listed, call for quote.

CTS TF SERIES TUNING FORK CRYSTALS

NEW PRODUCT

Features:
- Hermetic Ceramic Package
- Frequency Tolerance, ±20pp, Standard
- Frequency Temperature Coefficient, -0.03ppm/°C2
- Operating Temperatue, -40°C to +85°C Standard

For quantities greater than listed, call for quote.

CTS TC SERIES REAL TIME CLOCK OSCILLATORS

Features:
- Fundamental Crystal Design
- Hermetic Ceramic Package
- Frequency Stability, ±50ppm Standard
- +1.5Vdc, +1.8Vdc, +2.5Vdc, +3.3Vdc operation
- Operating Temperature, -40°C to +85°C Standard
- Tape & Reel Packaging, EAI-418

For quantities greater than listed, call for quote.

CTS MODEL 636 SMD HCMOS/TTL CLOCK OSCILLATORS (5.0X3.2X1.3)

Ceramic packaged clock oscillator offering reduced size and enhanced stability.

Features:
- Standard 5.0x3.2mm surface mount footprint
- HCMOS/TTL compatible
- +3.3VDC operation
- Operating temperature: -20°C to +70°C
- Frequency stability: ±50ppm standard
- Frequency range: 1.0 - 125MHz
- Output enable standard
- Fundamental and 3rd overtone crystals

For quantities greater than listed, call for quote.

CTS MODEL 357 SMD VOLTAGE CONTROLLED CRYSTAL OSCILLATORS (VCXO) (7X5X2)

Ceramic packaged voltage controlled oscillator offering reduced size and enhanced stability.

Features:
- Standard 7x5mm surface mount footprint
- HCMOS/TTL compatible output
- Frequency range: 1.5-77.76MHz
- Frequency stability: ±50ppm standard
- APR: ±50ppm standard
- +3.3VDC operation
- Operating temperature: -40°C to +85°C
- Output enable standard
- Low phase jitter, NON-multiplied

For quantities greater than listed, call for quote.

CTS MXO45 AND MXO45HS SERIES THRU HOLE CLOCK OSCILLATORS

The MXO45/MXO45HS are DIP packaged clock oscillators offering reliable performance at an economical cost.

Features:
- Standard 14 pin or 8 pin DIP footprint
- HCMOS/TTL compatible
- Fundamental and 3rd overtone crystals
- Frequency range: 1.0-105.561MHz
- Frequency stability: ±50ppm standard
- +5.0VDC operation
- Operating temperature: 20°C to +70°C
- Output enable option

For quantities greater than listed, call for quote.

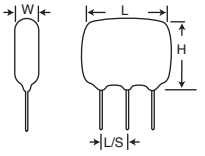
ECS Ceramic Resonators, Filters and Cylinder Crystals

ZTT SERIES CERAMIC RESONATORS

The ZTT Series ceramic resonator offers wide frequency range and extended temperature range capabilities with built-in load capacitance.

Specifications:
- Operating temp.: -20°C to +80°C
- Frequency accuracy (@25°C): ±0.5%
- Aging for 10 years: ±0.3%

Features:
- Low profile
- Wide frequency range
- Extended temperature range
- High stability
- Built-in load capacitance



DIMENSIONS: mm

RoHS Compliant

For quantities greater than listed, call for quote.

ECS-SR1-A SERIES SMD CERAMIC RESONATORS

The ECS-SR-A SMD ceramic resonator is an excellent low cost frequency control solution when absolute frequency accuracy is not important.

Specifications:
- Operating temp.: -20°C to +80°C
- Frequency accuracy (@25°C): ±0.5%
- Aging for 10 years: ±0.3%

Features:
- Low profile
- Wide frequency range
- Extended temperature range
- Height: 1.8max.

DIMENSIONS: mm

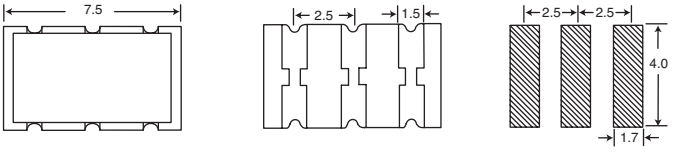
ECS-SR-B SERIES SMD CERAMIC RESONATORS

The ECS-SR-B Series SMD ceramic resonator includes a built in capacitor for simplification of oscillator circuits and reduces component count. The SMD ceramic resonator is an excellent low cost frequency control solution when absolute frequency accuracy is not important.

Specifications:
- Operating temp.: -20°C to +80°C
- Frequency accuracy (@25°C): ±0.5%
- Aging for 10 years: ±0.3%

Features:
- Low profile
- Wide frequency range
- Extended temperature range
- Built-in load capacitance
- Height: 2.2max.

DIMENSIONS: mm



For quantities greater than listed, call for quote.

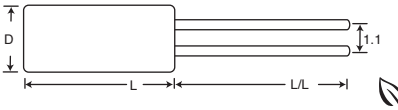
MHZ RANGE CYLINDER TYPE CRYSTALS

This product represents our selection of miniature tubular high frequency crystals.
They feature outstanding shock/vibration resistance and environmental characteristics.

Features:
- Cost effective
- Excellent aging
- Load cap.: 18pf
- Lead length: .394in.
- Wide frequency range
- Excellent reliability

DIMENSIONS: mm



RoHS Compliant

For quantities greater than listed, call for quote.

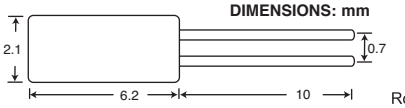
ECS-31 SERIES KHZ RANGE CYLINDER TYPE CRYSTALS, 2X6

The ECS-31 Series features the same characteristics as the only tuning fork crystals offer.
Because of their miniature size they are ideal for portable and communication equipment applications.

Features:
- Miniature size
- Cost effective
- Lead length: .394in.
- Long term stability
- Load cap.: 12.5pf

DIMENSIONS: mm



RoHS Compliant

For quantities greater than listed, call for quote.

ECS-3951M/3953M SERIES SMD CLOCK OSCILLATORS 7.5 X 5.0MM

New Industrial Grade

The ECS-3953M (3.3V) and ECS-3951M (5V). Series are miniature, crystal controlled, low current clock oscillators in a ceramic SMD package. Package is seam welded with a metal lid. The low profile package is ideal for today's advanced portable PC and instrumentation designs.

Features:
- 3.3V or 5.0V version
- Low power consumption
- Standby function
- Stability Tolerance: ±50ppm

Specifications:
- Frequency range: 1.8 to 125MHz
- Temperature range: Extended -40° to +85°
- Height: 1.6max.

ECS-327SMO SMD CLOCK OSCILLATOR 6.5 X 4.0MM

DIMENSIONS: mm

The ECS-327SMO oscillator utilizes the 32.768KHz tuning fork crystal in a SMD ceramic package. It is designed specifically for wireless PCMCIA and portable communication equipment applications.

Features:
- 2.0mm low profile
- SMD version
- 3.3V input voltage
- Tape and reel

Specifications:
- Operating temperature: -10°C to +60°C
- Frequency stability: -60ppm/-30ppm
- Height: 2.0max.

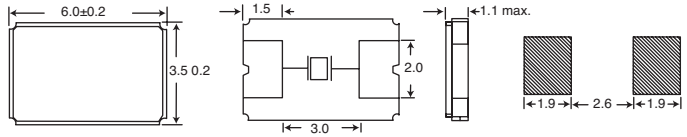
ECS-64A SMD QUARTZ CRYSTALS 6 X 3.5MM

The ECX-64A are subminiature SMD crystals with 3.5x6mm footprint. The package height measures 1.1mm max., which is ideal for densely populated PCB applications.

Features:
- Compact and low profile
- Glass sealed ceramic package
- Tape and reel

Specifications:
- Stability: ±50ppm
- Extended Temp.: -40°C to +85°C

DIMENSIONS: mm



For quantities greater than listed, call for quote.

ECS Clock Oscillators

RoHS Compliant This product is RoHS compliant.

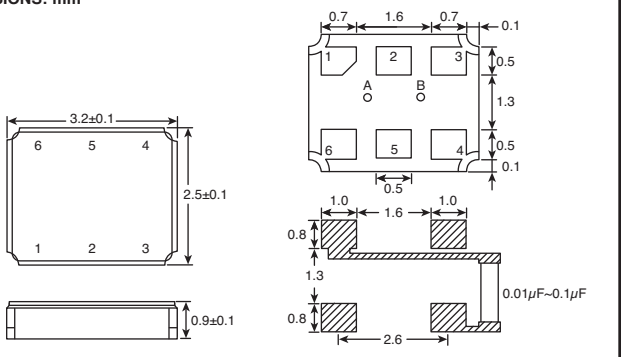
ECS-2535HS SMD CLOCK OSCILLATOR 3.2 X 2.5MM

Specifications:

- Frequency range: 1.000min. - 45.000max. MHz
- Operating temperature: -30°C to +85°C
- Output load: 15pF

RoHS Compliant

DIMENSIONS: mm



For quantities greater than listed, call for quote.

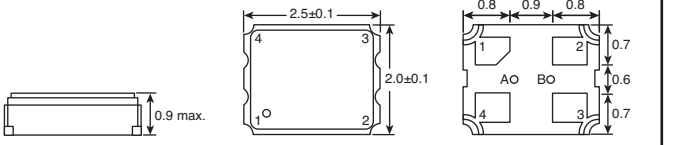
ECS-2033 SMD CLOCK OSCILLATOR 2.5 X 2.0MM

Specifications:

- Frequency range: 0.750min. - 75.000max. MHz
- Operating temperature: -40°C to +85°C
- Frequency stability: ±50ppm
- Output load: 15pF

RoHS Compliant

DIMENSIONS: mm



For quantities greater than listed, call for quote.

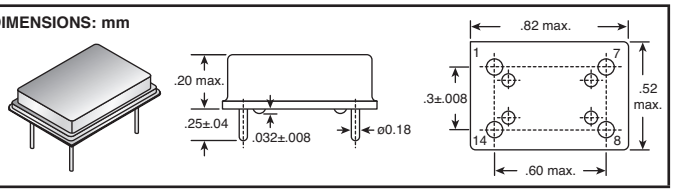
FULL SIZE (TTL/HCMOS) CLOCK OSCILLATORS

Specifications:

- Frequency stability: ±100ppm max.
- Supply voltage: +5.0 ±0.25
- Operating temp.: 0°C to +70°C
- Storage temp: -55°C to +125°C
- Output Load: TTL: 10TTL max.

RoHS Compliant

DIMENSIONS: mm



For quantities greater than listed, call for quote.

ECS HC49 Microprocessor Crystals

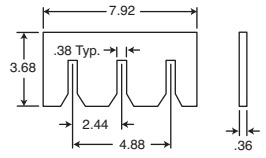
RoHS Compliant **This product is RoHS compliant.**

ECS HC-49U/US BASE INSULATOR, HC-49/U AND HC-49/US

- Frequency tolerance: ±30ppm
- Shunt capacitance: 7.0pF
- Load capacitance: specified or series
- Operating temperature Range: -10°C to +70°C
- Storage temperature: -30°C to +85°C
- Cost effective
- Excellent aging
- Wide frequency range
- Excellent reliability

RoHS Compliant

DIMENSIONS: mm

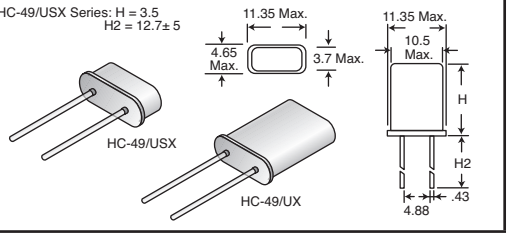


HC-49U/US Base Insulator

DIMENSIONS: mm

HC-49/UX Series: H = 13.46
H2 = 12.7 (Opt. 20)

HC-49/USX Series: H = 3.5
H2 = 12.7± 5



HC-49/UX

- "AT" cut crystal

ECS Microprocessor Crystals

RoHS Compliant **This product is RoHS compliant.**

CSM-7 HC49SM

The CSM-7 is an excellent choice for the SMD version of the HC-49US leaded crystal. The CSM-7 has a case height of 4.3mm maximum in a resistance weld metal package.

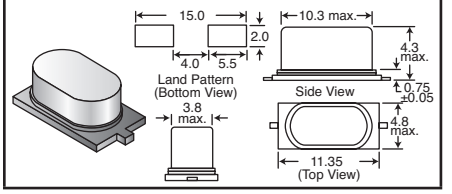
Specifications:

- Frequency tolerance: ±30ppm
- Extended temp.: +25°C to ±30ppm
- Shunt capacitance: 7.0pF
- Load capacitance: specified or series
- Operating temp. range: -10°C to +70°C
- Industrial range: -40°C + 85°C (50ppm)
- Storage temp.: -30°C to +85°C

Features:

- Cost effective
- Space saving design
- Low profile

DIMENSIONS: mm



For quantities greater than listed, call for quote.

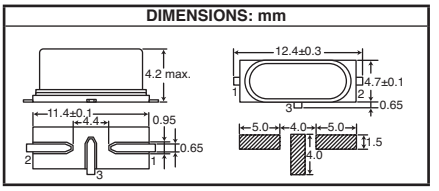
ZIGBEE/BLUETOOTH CRYSTALS

The miniature ECX-42 is a compact SMD crystal. The 4.0x2.5x0.8mm ceramic package is ideal for today's SMD manufacturing environment.

Specifications:

- Low profile
- 4.0x2.5mm footprint
- Extended temp. range option
- Operating temp.: -10°C to +70°C

DIMENSIONS: mm



For quantities greater than listed, call for quote.

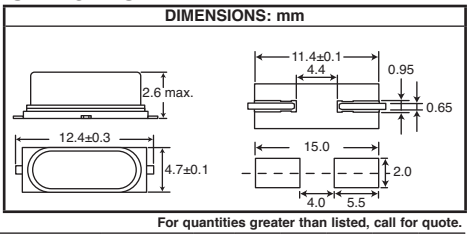
CSM-7X-3L SMD CRYSTAL

The CSM-7X-3L is a low profile SMD crystal with case ground. Ideal for applications that require a case ground.

Specifications:

- Case ground
- Industry std. HC-49US package
- Extended temp. range option
- Operating temp.: -10°C to +70°C

DIMENSIONS: mm



For quantities greater than listed, call for quote.

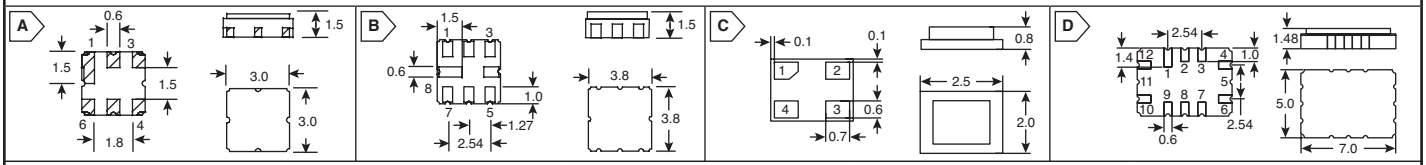
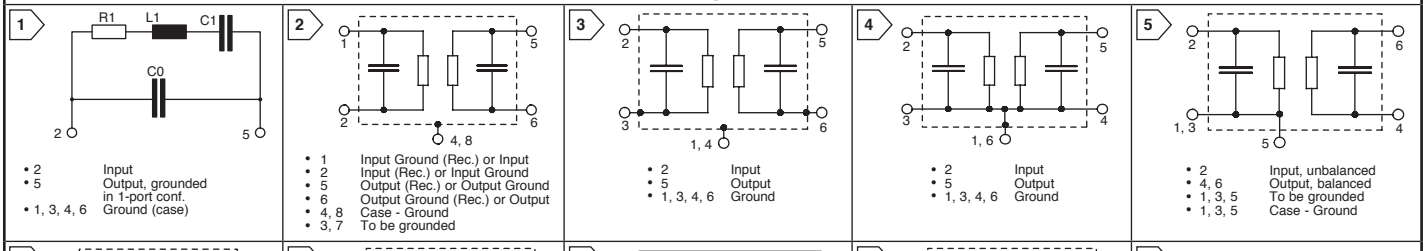
EPCOS SAW Components and Filters

RoHS Compliant **This product is RoHS compliant.**

DIMENSIONS: mm



Pin Configurations



Surface Acoustic Wave (SAW) resonators and front end filters are key components in modern Remote Control Applications, which transmit in Europe typically at 433.92MHz or 868-870MHz and in the USA at 315 or 915MHz. These remote controls are used in systems for Remote Keyless Entry (RKE, wireless operation of a car's central locking system), wireless Tire Pressure Monitoring (TPMS), electronic toll, RFID, short range data transmission, security alarms and garage door openers. They consist of several transmitters and receivers as well as the combination of both, transceivers.

Transmitter The code which is supposed to be transmitted to the receiver consists of an encoded identifier (including a rolling code for security reasons) and the message itself to e.g. unlock the central locking system of a car. An oscillator which is synchronized by a SAW resonator oscillates at an exact frequency. Thereby, it generates an RF carrier signal, which (using the simple on off-keying procedure, OOK) is modulated according to the transmission code by simply turning the oscillator on and off. This coded, modulated RF signal will be sent out through the antenna of the transmitter.

Receiver The modulated RF signal (encoded message) sent from the transmitter is received by the antenna of the receiver a few feet away (typically 30-300ft.). Additionally, the receiver will involuntarily pick up environmental noise and spurious emissions which may jam/block the receiver, making it deaf for any message from the transmitter. To avoid this, a narrow band SAW front end filter with high selectivity can filter out this unwanted noise. A local oscillator (stabilized e.g. by a SAW resonator like the transmitter oscillator) generates an LO frequency, typically 500KHz or 10.7MHz below transmission frequency. The filtered RF signal from the antenna will now be mixed down in a mixer with this LO frequency to an intermediate frequency (IF), which can be decoded by decoder ICs and microcontrollers.

Features:
- Provides reliable, fundamental mode, quartz frequency stabilization in transmitters or local oscillators
- RoHS compatible
- Ni, gold-plated terminals
- Passivation layer elpas
- AEC-Q200 qualified

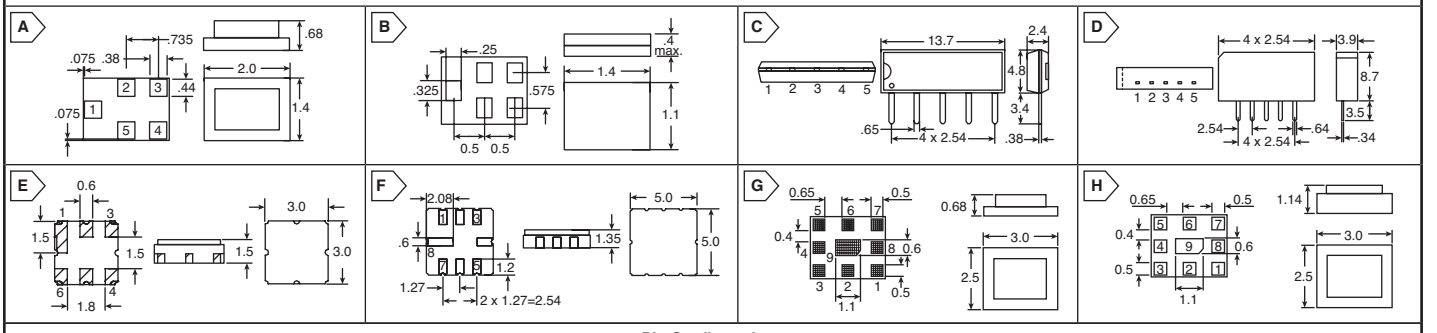
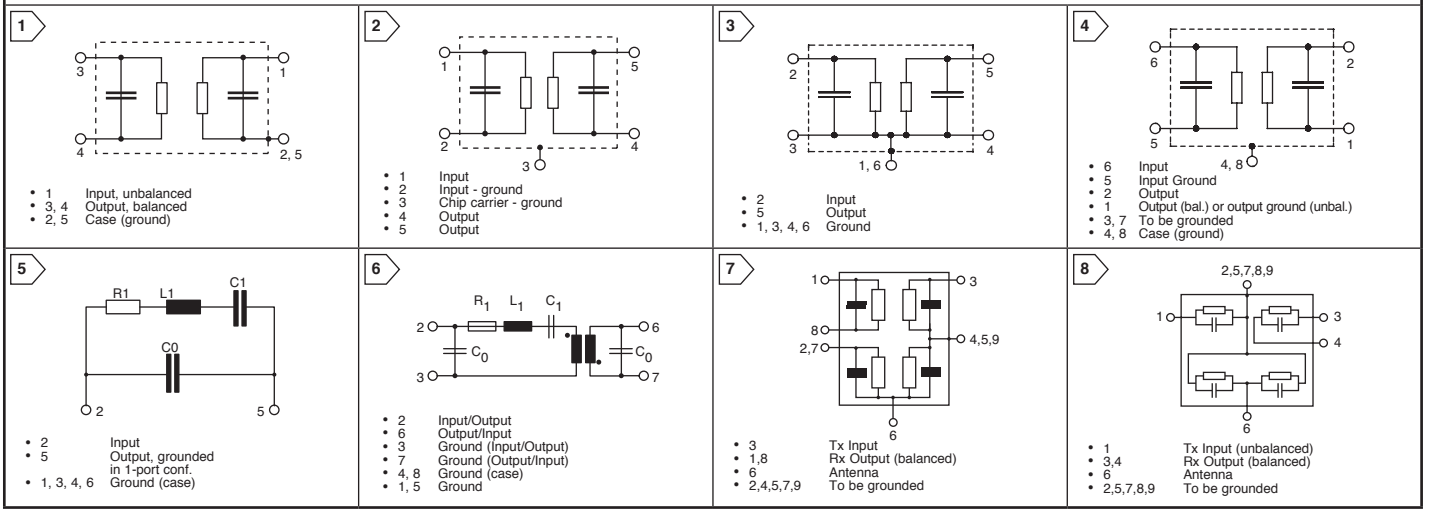
EPCOS SAW Filters, Duplexers and Resonators

RoHS Compliant **This product is RoHS compliant.**

DIMENSIONS: mm



Pin Configurations



Surface Acoustic Wave (SAW) resonators and front end filters are key components in modern Remote Control Applications, which transmit in Europe typically at 433.92MHz or 868-870MHz and in the USA at 315 or 915MHz. These remote controls are used in systems for Remote Keyless Entry (RKE, wireless operation of a car's central locking system), wireless Tire Pressure Monitoring (TPMS), electronic toll, RFID, short range data transmission, security alarms and garage door openers. They consist of several transmitters and receivers as well as the combination of both, transceivers.

Transmitter The code which is supposed to be transmitted to the receiver consists of an encoded identifier (including a rolling code for security reasons) and the message itself to e.g. unlock the central locking system of a car. An oscillator which is synchronized by a SAW resonator oscillates at an exact frequency. Thereby, it generates an RF carrier signal, which (using the simple on off-keying procedure, OOK) is modulated according to the transmission code by simply turning the oscillator on and off. This coded, modulated RF signal will be sent out through the antenna of the transmitter.

Receiver The modulated RF signal (encoded message) sent from the transmitter is received by the antenna of the receiver a few feet away (typically 30-300 ft.). Additionally, the receiver will involuntarily pick up environmental noise and spurious emissions which may jam/block the receiver, making it deaf for any message from the transmitter. To avoid this, a narrow band SAW front end filter with high selectivity can filter out this unwanted noise. A local oscillator (stabilized e.g. by a SAW resonator like the transmitter oscillator) generates an LO frequency, typically 500KHz or 10.7MHz below transmission frequency. The filtered RF signal from the antenna will now be mixed down in a mixer with this LO frequency to an intermediate frequency (IF), which can be decoded by decoder ICs and microcontrollers.

Features:
- Provides reliable, fundamental mode, quartz frequency stabilization in transmitters or local oscillators
- RoHS Compatible
- Ni, Gold-Plated Terminals
- Passivation Layer Elpas
- AEC-Q200 Qualified

For quantities greater than listed, call for quote.

ULTRA MINIATURE SIZE, LOW PROFILE, SMD, MHZ RANGE CRYSTAL UNITS

Specifications:
- Case size: 5mm x 2.0mm x .55mm
- Frequency range: 12MHz to 48MHz

Applications:
- Mobile phone, Bluetooth, W-LAN, ISM band radio, clock for MPU

RoHS Compliant

For quantities greater than listed, call for quote.

SMD KHZ RANGE CRYSTAL UNITS

Specifications:
- Case size: 8.0x3.8x2.54mm
- Frequency range: 14.31818MHz, 17.734MHz to 41.0MHz

Applications:
- Clock and microcomputer

RoHS Compliant

For quantities greater than listed, call for quote.

FOX Oscillators

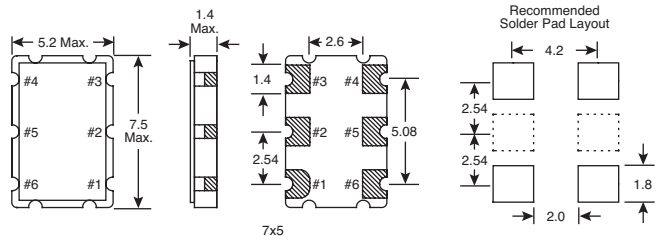
RoHS Compliant This product is RoHS compliant.

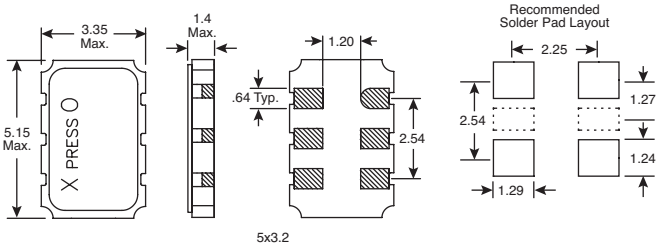
XPRESSO FAMILY - LOW JITTER CONFIGURABLE OSCILLATORS

Features:

- Low jitter comparable to fixed-frequency oscillators, 10x less than programmables
- Frequency options: 0.75MHz to 1.3GHz
- Low jitter, low noise

DIMENSIONS: mm





PART NUMBERING GUIDE:

XPO-HC 3 -FREQUENCY

Type:
H = HCMOS
P = LVPECL
L = LVDS

Material:
C = Ceramic

Package Size:
7 = 7.5x5.0mm
5 = 5.0x3.2mm

Voltage:
3 = 3.3V

Stability:
0 = ±100ppm
5 = ±50ppm
6 = ±25ppm
8 = ±20ppm (-20°C to +70°C Only)

Operating Temperature:
Blank = -20°C to +70°C
R = -40°C to +85°C

Frequency

4MHz to 50MHz Stocked Frequencies

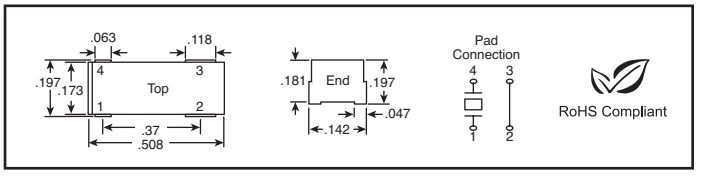
ENCAPSULATED SMD CRYSTALS

- Operating temp.: -10°C to +70°C
- Frequency tolerance: ±50ppm
- Aging: ±5ppm per year max
- Drive level (typ./max.): 0.1mW/1.0mW
- Maximum height: .197"

DIMENSIONS: in.



For quantities greater than listed, call for quote.

CERAMIC RESONATORS (CERALOCK®)
CHIP TYPE THREE-TERMINALS CSTCC/E/R/W/G SERIES

Features:

- Oscillation circuits do not require external load capacitors
- The resonators are extremely small and have a low profile
- No adjustment is necessary for oscillation circuits
- Temperature range: -20°C to +80°C

Application:

- Clock oscillators for microprocessors
- Electronic control circuits for small electronic equipment
- Audio-visual applications (Camcorder, Remote Controller, etc.)
- Office automation equipment (DVD, CD-ROM, HDD, FDD, etc.)

For quantities greater than listed, call for quote.

LEAD TYPE THREE-TERMINALS CSTLS SERIES

Features:

- Oscillation circuits do not require external load capacitors
- The resonators are compact, light weight and exhibit superior shock resistance performance
- They enable the design of oscillator circuits requiring no adjustment
- Temperature range: -20°C to +80°C

Application:

- DTMF generators
- Clock oscillators for microcomputers
- Remote control units
- Automated office equipment

For quantities greater than listed, call for quote.

LEAD TYPE TWO-TERMINAL CSBLA SERIES

Features:

- The series comprises fixed, tuned, solid-state devices
- The resonators are miniature, light weight and exhibit excellent shock resistance
- Oscillating circuits requiring no adjustment can be designed by utilizing these resonators in conjunction with transistors or appropriate ICs
- Temperature range: -20°C to +80°C

Application:

- Square-wave and sine-wave oscillator
- Clock generator for microprocessors
- Remote control systems

For quantities greater than listed, call for quote.

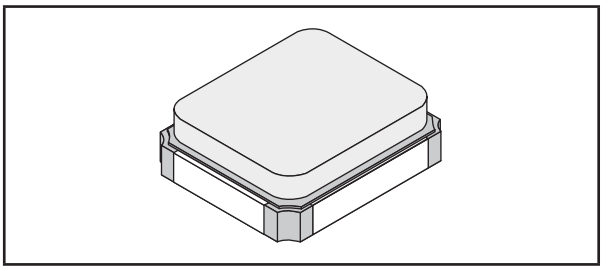
MURATA Hybrid Crystal Resonators

RoHS Compliant **This product is RoHS compliant.**

muRata Innovator in Electronics

XRCGB SERIES - CRYSTAL RESONATORS



Murata's XRCGB crystal family features a quartz crystal element manufactured by Tokyo Denpa encased in Murata's proven packaging derived from its ceramic resonator technology. This combination creates a timing device that is smaller and lower cost than standard quartz crystals whilst maintaining the precision of quartz.

The XRCGB series benefits from a tiny package size of just 2.0x1.6x0.7mm, comparing favorably to its quartz crystal equivalents. Murata's hybrid crystal resonators now all feature four connection pads on the base allowing for use on existing 3225 and 2520 board layouts.

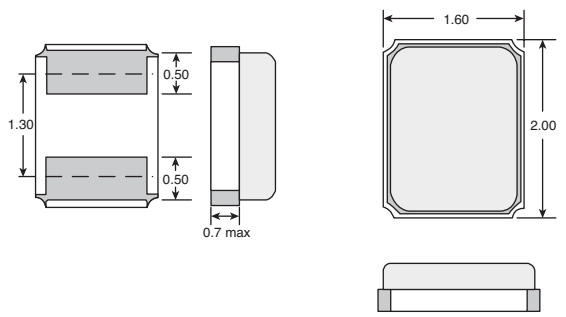
Features:
- More inexpensive compared with quartz crystal units
- Based on Murata's excellent production technology, achieving small size and high performance
- Higher-precision compared with ceramic resonators
- Accommodates lead-free solder mounting
- Extremely small size: 2.0x1.6x0.7mm

Specifications:
- Temperature Range: -30°C to +85°C
- Nominal frequency: 24 to 48MHz
- Initial Frequency deviation: ±100ppm
- Temperature characteristics: ±50ppm
- Load capacitance: 6pF

✻Product note: Conformal coating or washing of the component is not acceptable because it is not hermetically sealed.

Applications:
- Used for storage devices such as HDDs and ODDs
- USB2.0 High Speed specification compliant
- Audio equipment and musical instruments
- Other applications for replacement from other crystal resonators or oscillators

Dimensions: (mm)



Recommended Pad Layout: (mm)

PLETRONICS Oscillators

RoHS Compliant **This product is RoHS compliant.**

LC55P SERIES CMOS CLOCK OSCILLATORS

Pletronics' LC55P Series is a precision square wave oscillator with a CMOS output. This rugged, all silicon design does not rely on vibrating or resonating mechanical structures. The LC55P Series is exceptionally resistant to mechanical shock and vibration. This low cost oscillator is a drop in replacement for traditional crystal oscillators in most applications.

Features:
- Frequencies from 8MHz to 125MHz
- Supply voltages from 1.8V to 3.3V
- Very low power consumption
- 3.2mm x 5mm Plastic Package
- Enable/Disable Function
- Low Jitter

For quantities greater than listed, call for quote.

OeD4 SERIES TCVCXO OSCILLATORS

Pletronics' OeD4 is from the OeXO™ Series of temperature compensated voltage controlled crystal oscillator with a CMOS output.

Features:
- 3.2mm x 5mm LCC Ceramic Pacakge
- Supply Voltage: 3.3V

For quantities greater than listed, call for quote.

THA3 SERIES STRATUM-III

The package is desgined for high density surface mount designs.

Features:
- Optional Voltage Control Function
- HCMOS output
- 5mm x 7mm LCC Ceramic Package

For quantities greater than listed, call for quote.

RFM SAW Filters

RoHS Compliant This product is RoHS compliant.

SAW FILTERS - RF AND SF SERIES

Features:
- Ideal front-end filter for European wireless receivers
- Operating temperature range: -40°C to +85°C
- Low-loss, coupled-resonator - quartz design
- Simple external impedance matching

TXC Automotive Grade Crystals

AA SERIES 5.0 X 3.2MM GLASS SEALING CRYSTALS

Features:
- Compact glass sealed SMD crystal units.
- Wide operating temperature range.
- Superior and reliable performance in harsh environment.

For quantities greater than listed, call for quote.

AB SERIES 5.0 X 3.2MM SEAM SEALING CRYSTALS

Features:
- Reliable seam sealed ceramic package.
- Wide operating termperature range.
- Superior and reliable performance in harsh environment.
- Application: TPMS, ECM, ABS and sensor modules.

For quantities greater than listed, call for quote.

AC SERIES 5.0 X 3.2MM CMOS OUTPUT

Features:
- Ultra small SMD seam sealed clock crystal oscillator units.
- High precision characteristic covering up to high frequency range.
- Designed for automatic mounting and reflow soldering.
- Optionable stand-by function for output: Tri-state output.
- Supply voltage range : 1.8 V- 3.3 V.
- High stability, low jitter, low power consumption.

For quantities greater than listed, call for quote.

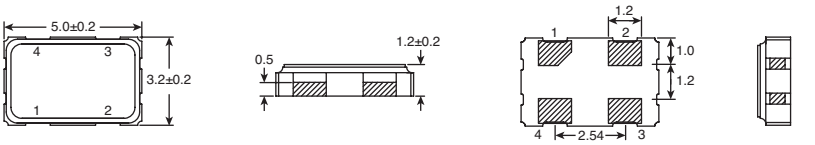
TXC SMD CMOS CXO Oscillators

RoHS Compliant **This product is RoHS compliant.**

7C SERIES 5 X 3.2MM

Features:
- Operating Temperature Range: -10˚C to 70˚C
- Ultra small SMD seam sealed clock crystal oscillator units
- Designed for automatic mounting and reflow soldering
- Optionable stand-by function for output: Tri-state output
- High stability, low jitter, low power consumption
- High precision characteristic covering up to wide frequency range

Applications:
- Wireless communication set, PDA and DSC



For quantities greater than listed, call for quote.

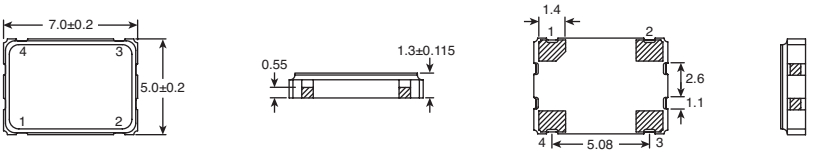
7W SERIES 7 X 5MM

Features:
- Operating Temperature Range: -10˚C to 70˚C
- Small SMD seam sealed clock crystal oscillator units
- High stability, low jitter, low power consumption
- Designed for automatic mounting and reflow soldering
- Optionable stand-by function for output: Tri-state output
- High precision characteristic covering up to wide frequency range

Applications:
- Wireless communication, PC and LCDM.



For quantities greater than listed, call for quote.

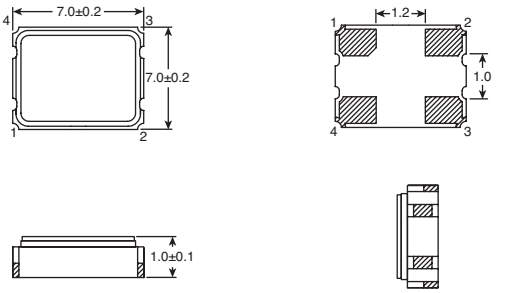
7W SERIES 7 X 5MM

Features:
- Operating Temperature Range: -10˚C to 70˚C
- Tri-state function available
- Ultra small SMD seam sealed clock crystal oscillator units

Applications:
- WLAN, Bluetooth, DSC, DSL and other IT product



For quantities greater than listed, call for quote.

TXC SMD, DIP and Tuning Fork Crystals

RoHS Compliant **This product is RoHS compliant.**

9HT10 & 9H12 SERIES SMD CRYSTALS

Features:
- 2 pads surface mount package
- High reliable environmental performance
- Application for NB, Smart Phone, variety of compact portable consumer products reference clocks

For quantities greater than listed, call for quote.

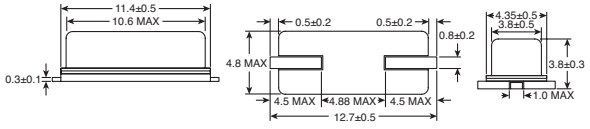
9C SERIES SMD CYRSTALS, HC-49S

Features:
- Operating Temperature Range: -20˚C to 70˚C
- High frequency pullability and low equivalent series resistance.
- Highly mass production capability

Applications:
- PC
- STB
- LCDM
- Cable Modem



For quantities greater than listed, call for quote.

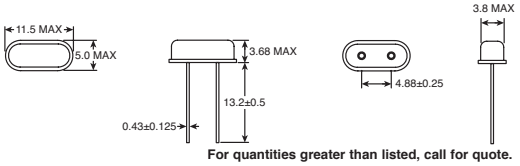
9B SERIES DIP CRYSTALS, LEADED, HC-49S

Features:
- Operating Temperature Range: -20˚ to 70˚C
- Resistance welded type crystal units.
- High frequency pullability and low equivalent series resistance.
- Lower cost and highly mass production capability.

Applications:
- TV
- STB
- LCDM
- Cable Modem



For quantities greater than listed, call for quote.

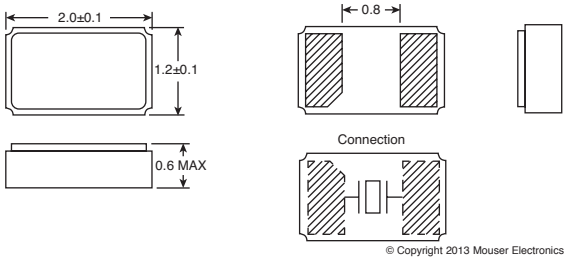
9HT11 SERIES SMD TUNING FORK CRYSTALS

Features:
- Operating Temperature Range: -40˚C to 85˚C
- Frequency Tolerance: ±20ppm
- Load Capacitance: 12.5pF
- Ceramic surface mount package.

Applications:
- Mobile phone
- Notebook
- DSC



For quantities greater than listed, call for quote.

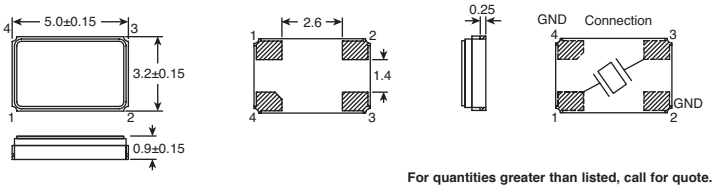
TXC SMD Seam and Glass Crystals

RoHS Compliant **This product is RoHS compliant.**

7B SERIES SMD SEAM CRYSTAL 5 X 3.2MM

Features:
- Operating Temperature Range: -20˚C to 70˚C
- Ultra small SMD type crystal units
- High precision characteristics covering up to wide frequency range.
- Higher frequency stability and reliability
- Excellent for reducing EMI effect

Applications:
- Bluetooth
- Wireless communication set
- DSC
- PDA
- Mobile phone
- USB interface card



For quantities greater than listed, call for quote.

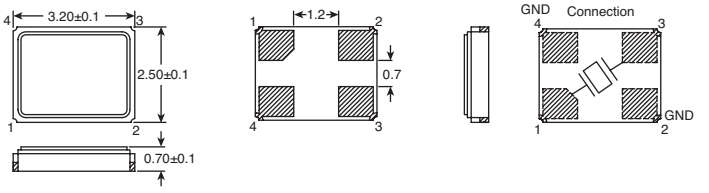
7M SERIES SMD SEAM CRYSTAL 3.2 X 2.5MM

Features:
- Operating Temperature Range: -20˚C to 70˚C
- Extremely small SMD type crystal units
- High precision and high frequency stability
- Extremely good for reducing EMI effect

Applications:
- Bluetooth
- Wireless communication set
- DSC
- PDA
- Mobile phone



For quantities greater than listed, call for quote.

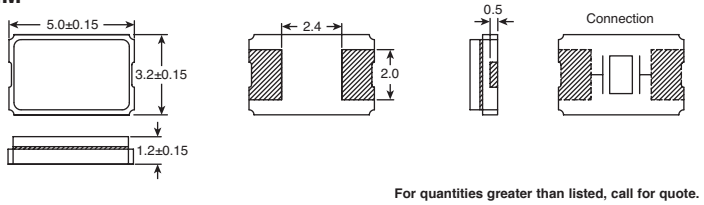
7A SERIES 2 PADS SMD GLASS SEALED CRYSTALS 5 X 3.2MM

Features:
- Operating Temperature Range: -20˚C to 70˚C
- High reliable environmental performance
- Tight tolerance and stability parts are available
- Designed for automatic mounting and reflow soldering
- Reasonable cost and good delivery performance
- Contains Pb in sealing glass exempted by RoHS directive



For quantities greater than listed, call for quote.

VECTRON RF Oscillators

RoHS Compliant **This product is RoHS compliant.**

VECTRON INTERNATIONAL A BOVERN COMPANY

VCC1 SERIES CMOS CRYSTAL OSCILLATORS 5 X 7 X 1.6MM

Features:
- CMOS output
- Output frequencies to 190MHz
- Low jitter, fundamental or 3rd OT crystal
- Tri-state output for board test and debug
- -10/70°C or -40/85°C operating temperature
- Gold over nickel contact pads
- Hermetically sealed ceramic SMD package
- Product is compliant to RoHS directive and fully compatible with lead free assembly

Applications:
- SONET/SDH/DWDM
- Ethernet, Gigabit Ethernet
- Storage Area Network
- Digital Video
- Broadband Access
- Microprocessors/DSP/FPGA

RoHS Compliant

VCC6-Q/R SERIES LVPECL CRYSTAL OSCILLATORS 5 X 7.5 X 2.2MM

Features:
- 2.5 or 3.3V LVPECL
- 3rd Overtone Crystal for best jitter performance
- Output frequencies to 270MHz
- 0.2pS rms jitter, 12kHz-20MHz,155.52MHz
- Enable/Disable for test and board debug
- -10/70°C or -40/85°C operating temperature
- Hermetically sealed ceramic SMD package
- Product is compliant to RoHS directive

Applications:
- SONET/SDH/DWDM
- Fiber Channel
- Ethernet, Gigabit Ethernet
- Storage Area Network
- Digital Video
- Broadband Access

RoHS Compliant

VS-705 SERIES SINGLE FREQUENCY VCSO OSCILLATORS 5 X 7.5 X 2.5MM

Features:
- Industry standard package, 5.0x7.5x2.5mm
- 5th generation ASIC technology for ultra low jitter
- 120fs-rms (fN = 622.08MHz, 12kHz to 20MHz)
- 105fs-rms (fN = 622.08MHz, 50kHz to 80MHz)
- Output frequencies from 122.88MHz to 985.00MHz
- Spurious suppression, 90dBc typical
- 2.5V or 3.3V supply voltage
- LVPECL or LVDS output configurations
- Tri-State output select (OD, OS, OE)
- Compliant to EC RoHS directive

C4400 Applications:
- 1-2-4 Gigabit Fibre Channel
- 10 Gigabit Fibre Channel
- 10GbE LAN/WAN
- Synchronous Ethernet
- OC-192
- SONET/SDH
- WiMax

RoHS Compliant

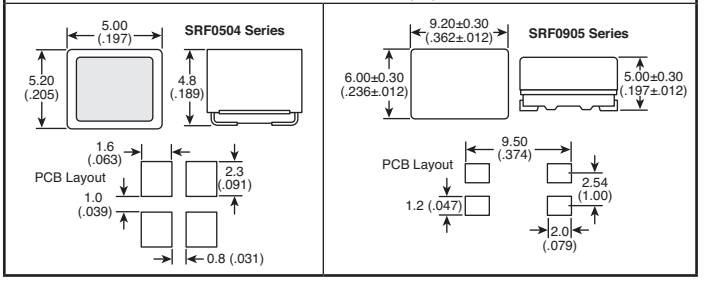
Line Filters, EMI Filters and Soft Ferrites

RoHS Compliant **This product is RoHS compliant.**

BOURNS® LINE FILTERS

DIMENSIONS: mm (in.)



Features:

- Current rating up to 5A
- Inductance range: SRF0504: 0.55 to 5.0μH; SRF0905: 10 to 6500μH
- Frequency range: SRF0504: 1200MHz; SRF0905: 300MHz

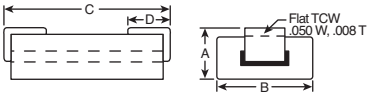
Fair-Rite Products Corp. SURFACE MOUNT EMI SHIELD BEADS

The rugged construction decreases DC resistance and increases current carrying capacity compared with plated beads.

DIMENSIONS: in.



Features:

- Offered in low frequency (73), broadband (43) and high frequency (61) materials

Lead Free

For quantities greater than listed, call for quote.

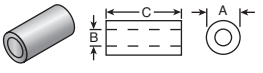
Fair-Rite Products Corp. EMI SHIELD BEADS

DIMENSIONS: in.

Beads with a "1" as the last digit of the part number are not burnished, those with the last digit "2" are supplied burnished to break the sharp edges.



Applications:

- Recommended suppression material of unwanted signals between 20MHz and 200MHz

For quantities greater than listed, call for quote.

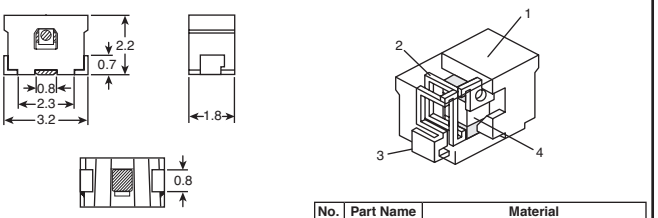
Panasonic Electronic Components ELKE SERIES SMD COIL TYPE DIGITAL NOISE EMI FILTERS

DIMENSIONS: mm (in.)



No.	Part Name	Material
1	Enclosure	PPS resin mixed with ferrite powder
2	Coil	Copper alloy plate
3	Terminal	Copper alloy plate SnCu
4	Capacitor	Chip capacitor

Features:

- 3218 case size
- Operating temperature: –20°C to +85°C
- No variation in attenuation characteristics as current changes
- Part numbers are laser applied to make viewing eaiser
- ELK-EV: High ESD suppression with varistor and included coils

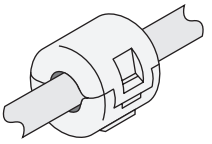
FERRISHIELD Ferrite RFI Suppressors

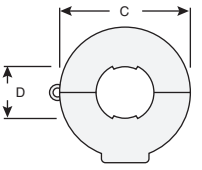
LEADER TECH a HEICO company
The Leading Edge In EMI Shielding Technology

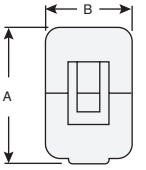
RoHS Compliant **This product is RoHS compliant.**

Anywhere there is an antenna-like structure such as a power cord or I/O cable, in the presence of a microprocessor, there is a need for RFI suppressors to control unwanted high frequency interference.
The selection below is an assortment of the most popular sizes in the most universally applicable broadband formula – effective up to 1GHz by allowing data signals to pass unimpeded and absorbing the high frequency energy.

SPLIT CABLE SNAP FERRITES







RoHS Compliant

For Round Cables up to 0.96" Diameter

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	FerriShield Part No.	Dimensions: in. (mm) A	B	C	D	Impedance (Ω)	Price Each 1	10	20

FERRISHIELD RFI/EMI Gaskets and Fabrics

RoHS Compliant **This product is RoHS compliant.**

LEADER TECH a HEICO company — *The Leading Edge In EMI Shielding Technology*

RFI/EMI CONDUCTIVE SHIELDING FABRIC

Shielding effectiveness is determined by a combination of two events: reflection and absorption of RF signals. Absorption depends on the bulk, or thickness, of the shield material. However, reflection occurs at the shield surface and its effectiveness is independent of thickness. Reflection is the determining factor for all high frequency signal attenuation. (Note: When these materials are used in another regime; i.e., conductive shielding gaskets, conductivity is the determinant.) Maximum reflection occurs with the highest conductivity materials. The best overall metals are copper, nickel and combinations of both - based on high conductivity, compatibility with mating metals, manufacturing versatility and cost. The large 1040mm material width (41") minimizes seams; thin 0.08-0.10mm cross sections (0.003-0.004") maximize conformability to irregular surfaces.

Applications:

- Bonding or laminating to complex geometric shapes
- ESD, RFI-EMI; shielding attenuation >70.0dB up to 10.0GHz for CuNi type
- Enclosure panels and frames, seams, joints, shield curtains for back panel openings
- RFI-EMI conductive shielding gasket cover membranes
- Architectural shielding; shielded room finishing - ceilings, walls, floors; special purpose rooms

RoHS Compliant

Conductive Adhesive

- Sheet size 1040x914mm (41" wide x 36" long)
- Available in full rolls of 50 meters (~164')

For quantities greater than listed, call for quote.

EMC Conductive Shielding Aluminum

A high performance, cost-effective sheet shielding material. Very good electrical and thermal conductivity, high reflectivity and resistance to oxidation and corrosive environments. Composition is a four-layer matrix of static dissipative-EMC coating/polyester/Aluminum/polyethylene.

- Sheet size 1040x914mm (41" wide x 36" long)
- Available in full rolls of 182 meters (~600')

For quantities greater than listed, call for quote.

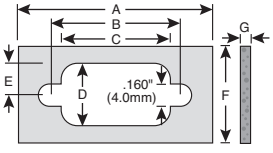
D-Sub RFI/EMI Shielding Gaskets

- Conformable to irregular surfaces
- Eliminates gap problems between connector and I/O surface plates
- Compresses from 0.10" to 0.025"

RoHS Compliant



For quantities greater than listed, call for quote.

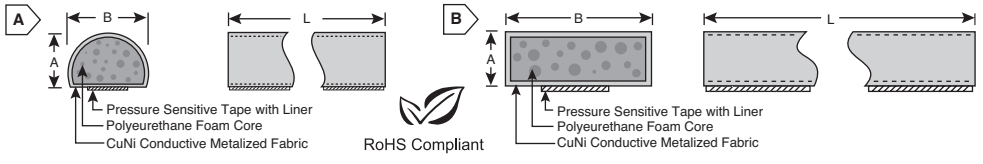
RFI/EMI Metallized Fabric over Foam Shielding Gaskets

- Omnidirectional compression loading from any angle
- Quick, easy adhesive mounting on any surface
- Groove mount or surface mount
- Eliminates the need for mechanical clip-ons
- Universally functional for most applications
- Copper-nickel metallized fabric over open cell polyurethane foam



RoHS Compliant

For quantities greater than listed, call for quote.

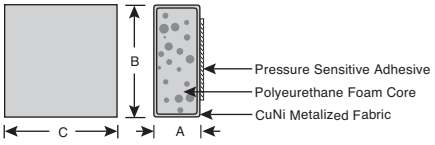
RFI/EMI Shielding Contacts

- Very low profile
- Low compression force
- Simple adhesive mounting
- Excellent alternative to liquid Form-in-place gaskets



RoHS Compliant

For quantities greater than listed, call for quote.

Thermal Transfer Material

- Fills microscopic gaps promoting efficient heat transfer between component and heatsink
- For each increase in operating temperature of 10°C, component life decreases 50%
- 4 grades accommodate most applications
- Sheet size 300x200x1.0mm

RoHS Compliant

For quantities greater than listed, call for quote.

GORE-SHIELD® SMT EMI GROUNDING PADS KIT

Features:

- Standardization of product allows late-stage implementation
- Consists of 2 basic parts: Electrically conductive gasket material and solderable support layer
- Nickel or silver base
- High shielding effectiveness
- Installed to ground trace with standard pick & place equipment
- Will survive multiple reflow operations
- Multiple parts can be used as building blocks to make EMI Gaskets
- As grounding pads, individual parts create discrete electrical contact points with low DC resistance
- Form factor insures repeatability, eliminates hand labor and cure time, and is lead free process compatible
- Ideal for metal enclosures or narrow trace widths
- A proven solution for in a variety of applications: power amps, mobile phones, GPS, RF Scanning, automotive telematics, audio applications
- Provided on EIA-481 standard tape and reel

Dimensions: mm

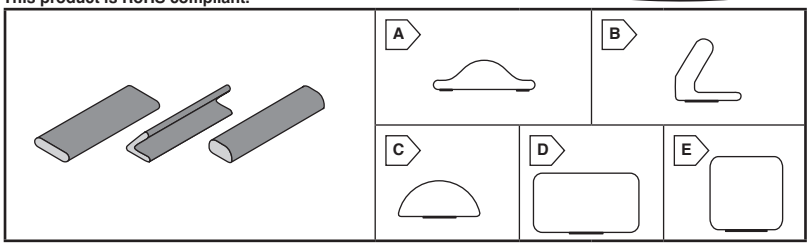
LAIRD TECHNOLOGIES EMI Components

RoHS Compliant This product is RoHS compliant.

LAIRD TECHNOLOGIES FABRIC-OVER-FOAM EMI SHIELDING GASKETS

Features:

- Shielding effectiveness of >100dB across a wide spectrum of frequencies (MIL-STD 285 mod.)
- Extremely low compression forces allow for use of lighter materials
- Low surface resistivity of <0.07 ohms/square provides improved conductivity (ASTM F390)
- Abrasion resistant metallized fabrics show virtually no degradation in shielding performance after 1,000,000 cycles
- Urethane & thermoplastic elastomer (TPE) core provide low compression set ensuring long-term reliable gasket performance
- Service temperatures from -40°F to 158°F (-40°C to 70°C)



For quantities greater than listed, call for quote.

LAIRD TECHNOLOGIES STANDARD PRECISION ELECTRONIC CONTACTS

Laird Technologies standard precision electronic contacts ground, carry current and signals, and interconnect boards and devices. Laird Technologies offers a wide choice of plating options and designs in standard formats that are ready for product.

- Materials: 0.10mm BeCU
- Typical Applications: Grounding, energy carrying

BeCU=Beryllium Copper

LAIRD TECHNOLOGIES EMI Components

RoHS Compliant **This product is RoHS compliant.**

LAIRD TECHNOLOGIES BOARD LEVEL SHIELDS

Standard Surface Mount Shields - One Piece

One-piece shields offer six sides of protection, with the sixth side being the board itself. One-piece designs offer economical shielding protection where access to covered components is not necessary.
The One-piece design offers economical shield protection.
No tooling costs associated with one or two piece standard designs

Standard Surface Mount Shields - Two Piece

Two-piece board level shields offer users the flexibility to inspect or repair shielded components without having to risk board damage by removing the entire shield or incur any tooling costs. Covers snap on and off with ease, which makes repair of the component under the shield quicker and easier.

One Piece Unit 
Two Piece Unit Requires Purchase of 1 Frame and 1 piece Cover 
For quantities greater than listed, call for quote.

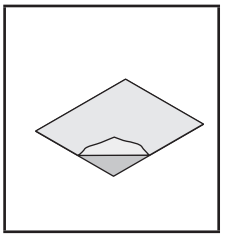
LAIRD TECHNOLOGIES MICROWAVE ABSORBERS



Q-Zorb™ RFSW Surface Wave

Q-Zorb RFSW surface wave absorbers are thin, magnetically loaded elastomeric sheets designed to provide attenuation at high angles of incidence for surface wave attenuation. The are nominally manufactured in the thickness range of 0.010 in. to 0.125 in. (0.3mm to 3.2mm).

Features:

- The materials available are in UL fire retardant versions for use in commercial devices.
- Excellent performance at frequencies between 500MHz and 40GHz.
- Several magnetic fillers are available carbonyl iron powder is standard, but other materials such as iron silicide (FeSi) are used for corrosion resistant applications.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Laird Tech Part No.	Description	Optimum Frequency Range (GHz)	Dimensions: in. (mm) Height	Width	Thickness	Price Each

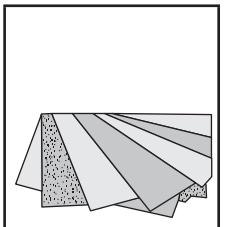
Microwave Absorbing Foam

Microwave absorbing foam is commonly used around antennas and wireless devices to provide isolation or side lobe reduction. It can be die-cut into components for EMI reduction inside microwave cavities and is used to manufacture antenna hats and test boxes. It can be encapsulated into a textile cover for use outdoors and fabricated into blankets, covers and over components.



RFRET - Reticulated Foam Absorbers

RFRET is a urethane-based reticulated foam absorber. RFRET is offered with a graded carbon coating providing excellent broadband reflectivity reduction.
RFRET with constant carbon loading provides excellent insertion loss. RFRET is useful for antenna sidelobe reduction and pattern enhancement.

RFLS - Lossy Foam Absorbers

RFLS is a single layer "lossy" sheet produced by dipping lightweight open-celled urethane foam into a resistive solution. The end product is a uniform lightweight, loaded sheet material with a specified insertion loss at a given frequency. RFLS offers the lowest cost in microwave absorber products.

Features:

- Typical applications: antennas, amplifiers, oscillators, computer housings and wireless equipment
- Lowers the noise or cavity Q in microwave components
- Can be supplied with PSA backing
- Excellent performance at low frequencies (> 100 MHz)

For quantities greater than listed, call for quote.

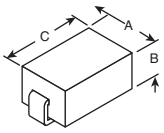
LAIRD TECHNOLOGIES EMI Chip Beads

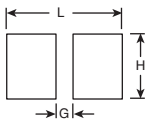
RoHS Compliant **This product is RoHS compliant.**

SMD FERRITE BEAD ASSEMBLIES

Specifications:
- 10Amp continuous operating current apability
- Low DCR
- Rugged construction

Applications:
- EMI filtering
- Board flexture applications





Land Pattern
(For Reflow Soldering)

For quantities greater than listed, call for quote.

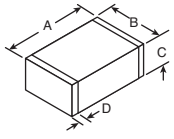
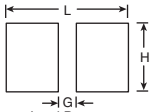
SMD FERRITE EMI CHIP BEADS

Specifications:
- Excellent retention under bias
- Rugged monolithic construction
- Superior impedance vs frequency characteristics
- Economical



Applications:
- Filtering of power input pins and devices using high speed clocks
- High frequency filtering of medium speed clocks and video signals
- Data bus filtration; high frequency amplifier oscillation killers



Land Pattern
(For Reflow Soldering)

Series Codes:
LI - Low Current Chips (1amp & <400ohms)
MI - Mid Current Chips (1-2.5amps)
HZ - High Impedance Chip (<1amp & >400ohms)
HI - High Current Chip (>3amps)
LF - Low Frequency Chips

LAIRD TECHNOLOGIES Ferrite Cable EMI Filters

RoHS Compliant **This product is RoHS compliant.**

SNAP-ON EMI FERRITE CLAMP FILTERS IN PLASTIC CASES

Features:
- For retrofit and post assembly usages
- Excellent common and differential mode EMI suppression
- Black or white plastic snap-on cases provide secure closure
- For round cables and wire bundles

For quantities greater than listed, call for quote.

ROUND AND CYLINDRICAL FERRITE EMI SUPPRESSION CORES

Features:
- Excellent common and differential mode EMI suppression
- For round cables and wire bundles
- Broadband performance
- Impedance value is NET impedance of the ferrite core only

For quantities greater than listed, call for quote.

MURATA EMI Suppression Filters (EMIFIL®) Chip Ferrite Beads

muRata Innovator in Electronics

RoHS Compliant **This product is RoHS compliant.**

BLM__A SERIES

BLM__A series generates an impedance from the relatively low frequencies. Therefore, BLM__A series is effective in noise suppression in a wide frequency range.

Features:

- Suitable for flow and reflow soldering
- Wide temperature range; -55°C to +125°C
- High Z characteristics

Applications:

- I/O ports, DC power lines, and signal lines

For quantities greater than listed, call for quote.

BLM__B SERIES DESIGNED FOR HIGH SPEED SIGNALS

BLM__B series can minimize attenuation of the signal waveform due to its sharp impedance characteristics.

Features:

- Suitable for flow and reflow soldering
- Operating temperature: -55°C to +125°C
- High impedance characteristics
- Designed to reduce noise above operating frequencies from 10 to 100MHz

Applications:

- Computers and peripheral equipment
- Consumer products
- High speed circuits

For quantities greater than listed, call for quote.

MURATA EMI Suppression Filters (EMIFIL®) Chip Ferrite Beads

RoHS Compliant **This product is RoHS compliant.**

The chip ferrite beads BLM series comprises ferrite bead in the shape of a chip. This ferrite bead generates a high impedance which at high frequency mainly consists of a resistance element. The BLM series is effective in circuits without stable ground lines because the BLM series does not need a connection to ground. The nickel barrier structure of the external electrodes provides excellent solder heat resistance.

BLM__B SERIES DESIGNED FOR HIGH SPEED SIGNALS

The BLM__B series can minimize attenuation of the signal waveform due to its sharp impedance characteristics.

Features:
- Designed to reduce noise above operating frequencies from 10 to 100MHz
- High impedance characteristics
- Suitable for flow and reflow soldering
- Operating temperature: -55°C to +125°C

Applications:
- Computers and peripheral equipment
- Consumer products
- High speed circuits

RoHS Compliant

For quantities greater than listed, call for quote.

MURATA EMI Suppression Filters (EMIFIL®) Chip Ferrite Beads

muRata Innovator in Electronics

RoHS Compliant **This product is RoHS compliant.**

The chip ferrite beads BLM series comprises ferrite bead in the shape of a chip. This ferrite bead generates a high impedance which at high frequency mainly consists of a resistance element. The BLM series is effective in circuits without stable ground lines because the BLM series does not need a connection to ground. The nickel barrier structure of the external electrodes provides excellent solder heat resistance.

BLM__A SERIES DESIGNED FOR STANDARD TYPE SIGNALS

BLM__A series generates an impedance from the relatively low frequencies. Therefore, BLM__A series is effective in noise suppression in a wide frequency range.

Features:

- Suitable for flow and reflow soldering
- Wide temperature range: -55°C to +125°C
- High Z characteristics
- Operating temperature: -55°C to +125°C

Applications:

- I/O ports, DC power lines, and signal lines

For quantities greater than listed, call for quote.

BLM__H SERIES DESIGNED FOR UHF APPLICATIONS

BLM18H series has a modified internal electrode structure, that minimizes stray capacitance and increases the effective frequency range.

- BLM18H series realizes high impedance at 1GHz and is suitable for noise suppression from 500MHz to GHz range
- HG-type is effective in noise suppression in wide frequency range
- HD-type for high-speed signal line provides a sharper roll-off after the cut off frequency
- The magnetic shielded structure minimizes cross talk
- Operating temperature: -55°C to +125°C

For quantities greater than listed, call for quote.

BLM__R SERIES DESIGNED FOR DIGITAL INTERFACE

Resistance of BLM__R series especially grows in the lower frequency range. Therefore BLM__R series is less effective for digital signal waveform at low frequency range and can suppress the ringing.

- Operating temperature: -55°C to +125°C

For quantities greater than listed, call for quote.

MURATA EMI Filters and Ferrite Beads

muRata
Innovator in Electronics

RoHS Compliant This product is RoHS compliant.

DS_6 SERIES DISC TYPE EMIFIL® LEADED EMI SUPPRESSION FILTER

DS_6 is a compact, high performance lead type EMI suppression filter which can be mounted 2.54mm pitch. Its three terminal structure enables nice high frequency performance.

Applications:

- Computer and peripherals interfaces
- Compact digital equipment
- Compact PPC, electronic typewriters, other electronic equipment and appliances
- Helps all electronic equipment and appliances meet FCC, VDE and CISPR regulations
- STD footprint for high density mounting

RoHS Compliant

For quantities greater than listed, call for quote.

DS_9 SERIES DISC TYPE EMIFIL® LEADED EMI SUPPRESSION FILTER

Disc type EMIFIL®, DSS9 and DST9 are T-type EMI suppression filters. The disc-type EMIFIL increases the self-resonant frequency of the capacitor by attaching two lead wires to one of the electrodes of the capacitor and increases the insertion loss by adding inductance to the lead. Frequencies to be suppressed can be selected by choosing the capacitance. They are also recommended for use as by-pass capacitors.

RoHS Compliant

For quantities greater than listed, call for quote.

BNX SERIES LEADED EMI FILTER LC COMBINED TYPE

The block type "EMIFIL" BNX Series incorporates through-type capacitor, multilayer chip capacitors and bead. The BNX is high performance for use in DC power circuits.

Applications:

- Noise suppression for DC power line of large screen display
- PDP
- LCD-TV

Features:

- The filter enables obtaining high insertion loss in wide frequency ranges from 0.5MHz to 1GHz
- The only one filter block enable noise suppression of both the positive and negative lines
- There are no connection routes in the current circuits, thus ensuring highly reliable performance

RoHS Compliant

For quantities greater than listed, call for quote.

BL01/02/03 SERIES FERRITE BEAD INDUCTORS

BL01/02/03 series are ferrite beads with lead wires to produce a high frequency loss for suppression of noise. Simple construction and easy-to-use, effective for low impedance circuits such as power supplies and grounds. Effective also for preventing overshoot and undershoot of digital signal in clocks or the like, and suppressing the higher harmonic wave. Suitable for prevention of abnormal oscillation at high frequency amplifying circuit.

RoHS Compliant

For quantities greater than listed, call for quote.

CHIP CAPACITOR TYPE EMI FILTERS

NFM21CC Series - 0805 Case Size

The "EMIFIL" NFM21C series is a chip type three terminal EMI suppression filter. It can reduce residual inductance to an extremely low level making it excellent for noise suppression at high frequencies.

Applications:

- PCs and peripherals which emit high amounts of noise
- Compact size equipment such as PDA, PC card and mobile telecommunications equipment
- Severe EMI suppression and high impedance circuits such as digital circuits

Features:

- Three terminal structure enables high performance in high frequency range
- Uses original electrode structure which realizes excellent solderability

For quantities greater than listed, call for quote.

NFM21PC Series - 0805 Case Size

NFM21P is a three terminal structure component. This product can be applied to large current DC power lines. NFM21P is suitable for noise suppression of DC power lines where relatively large current operates.

Features:

- The rated current of 4A is suitable for IC's individual power lines
- Murata's original internal electrode structure design realizes excellent EMI suppression effects from low frequency to high frequency

For quantities greater than listed, call for quote.

NFE31PT Series - 1206 Case Size

The "EMIFIL" NFE31P is a small size T-type circuit EMI suppression filter.

Features:

- Its large rated current of 6A and low voltage drop due to small DC resistance are suitable for DC power line use
- The feedthrough capacitor realizes excellent high frequency characteristics
- The structure incorporates built-in ferrite beads which minimize resonance with surrounding circuits

For quantities greater than listed, call for quote.

NFM41PC Series - 1806 Case Size

The "EMIFIL" NFM41P series consists of three terminal structure. These components are able to be applied to large current DC power lines. NFM41P series are suitable in noise suppression in DC lines where relatively large currents operate.

Applications:

- Personal computers, word processors and peripherals
- Telephones, PCs, communication equipment, etc.
- Digital TVs, VCRs
- Telecommunications equipment

For quantities greater than listed, call for quote.

NFE61PT Series - 2606 Case Size

Features:

- The NFE61PT series has large rated current of 2A and low voltage drop due to small DC resistance suitable for power line use
- The feedthrough capacitor realizes excellent high frequency characteristics
- The structure incorporates built-in ferrite beads which minimize resonance with surrounding circuits

For quantities greater than listed, call for quote.

LC COMBINED CHIP EMIFIL

NFL18ST Series

The NFL18ST series is an EMI suppression filter for high speed signal lines, achieving T-type structure in 1.6x0.8mm size with Murata's multilayer technology.

Applications:

- Noise suppression for video signal lines (RGB lines) and high speed clock lines

Features:

- Steep insertion loss characteristics realize excellent noise suppression and prevent distortion of signal waveform
- By minimizing stray capacitance of inductor, achieves high performance in noise suppression in high frequency range

For quantities greater than listed, call for quote.

NFW31SP Series

The EMI filter NFW31S series consists of high performance EMI suppression filters. They are designed for noise suppression in high speed signal digital circuits in which the signal harmonics are prone to becoming noise sources. These filters achieve a 100dB/dec. (typ.) damping characteristic with Murata's innovative circuit design. This makes these chips effective in applications where the signal and noise frequencies are close to each other.

For quantities greater than listed, call for quote.

SCHAFFNER Chokes and Low Pass Filters

RoHS Compliant This product is RoHS compliant.

SCHAFFNER CURRENT-COMPENSATED CHOKES

- Maximum operating voltage: 250V at 40ºC
- 0.3 to 10A Ratings
- 0.7 to 100mH inductances (dual choke configurations)
- 100KHz-3MHz common-mode resonance frequencies
- Operating temperature: -40ºC to +125ºC
- More Inductors available, Contact a Mouser Representative for assistance

RoHS Compliant

For quantities greater than listed, call for quote.

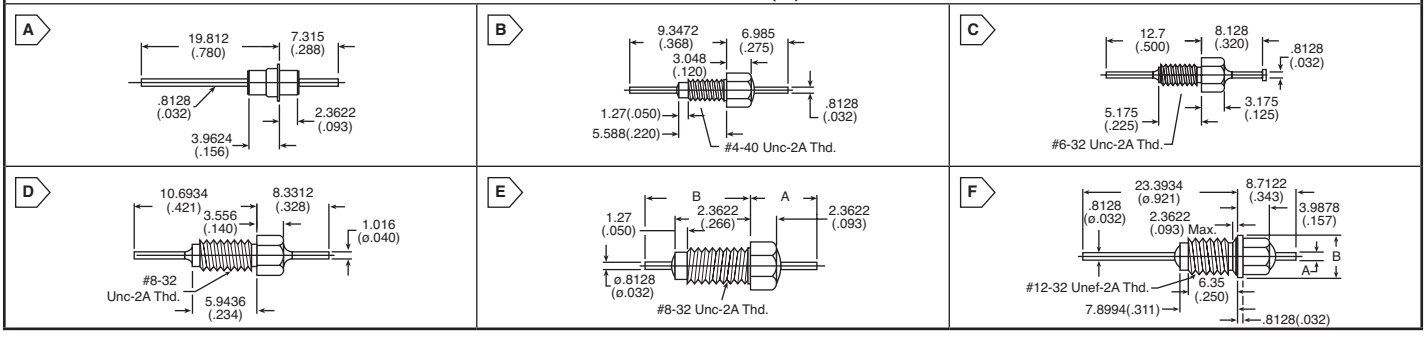
SPECTRUM ASP EMI Low Pass Filters

RoHS Compliant **This product is RoHS compliant.**

DIMENSIONS: mm (in.)



SOLDER-IN PI CIRCUIT FILTERS

Solder-in filters are ideal for use in critical areas where space does not allow use of mounting tools or hardware. The solder-in feature also allows installation in unison with other board mounted components. Primarily used in filtering signal/data lines and DC power lines.

For quantities greater than listed, call for quote.

⁎ With Turret on one end

RESIN SEALED BOLT-IN FILTERS

These filters are easily mounted in a tapped hole or thru-hole with supplied nut and lock-washer. The rugged case with resin seals at both ends provides excellent environmental protection. Primarily used in filtering signal/data lines and DC power lines.

For quantities greater than listed, call for quote.

HIGH CURRENT / HIGH VOLTAGE RESIN SEALED FILTERS

High current filters are ideal for use in high current 5 volt logic buss, but also can be used for 48VDC telephone rack buss, high current switch mode power supplies and DC charging systems. High voltage filters find use in high voltage power supplies and applications requiring U.L. Hi-Pot.

Pi Circuit 3/8-32 Thread

For quantities greater than listed, call for quote.

HERMETICALLY SEALED THREADED CASE FILTERS

This series of filters features hermetic glass seals and high EMI filtering performance. They are excellent for critical applications that demand high reliability in the toughest enviromental conditions and provide broad-band high performance EMI filtering from 10KHz to over 10GHz.

For quantities greater than listed, call for quote.

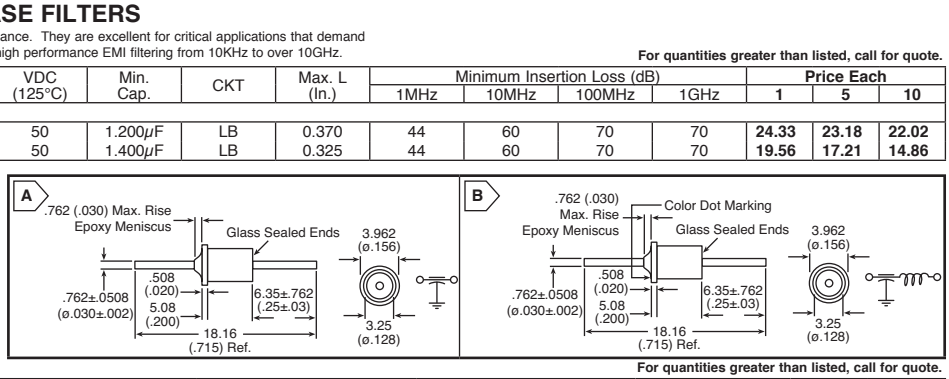
SPECTRUM ASP MINIATURE HERMETIC L CIRCUIT SOLDER-IN EMI FILTERS

Features:

- Voltage ratings from 50VDC to 200VDC
- EMI filtering from 10KHz to over 10GHz
- Glass seal one end provides protection from hostile environments
- Designed to be soldered into a package, bracket or bulkhead



For quantities greater than listed, call for quote.

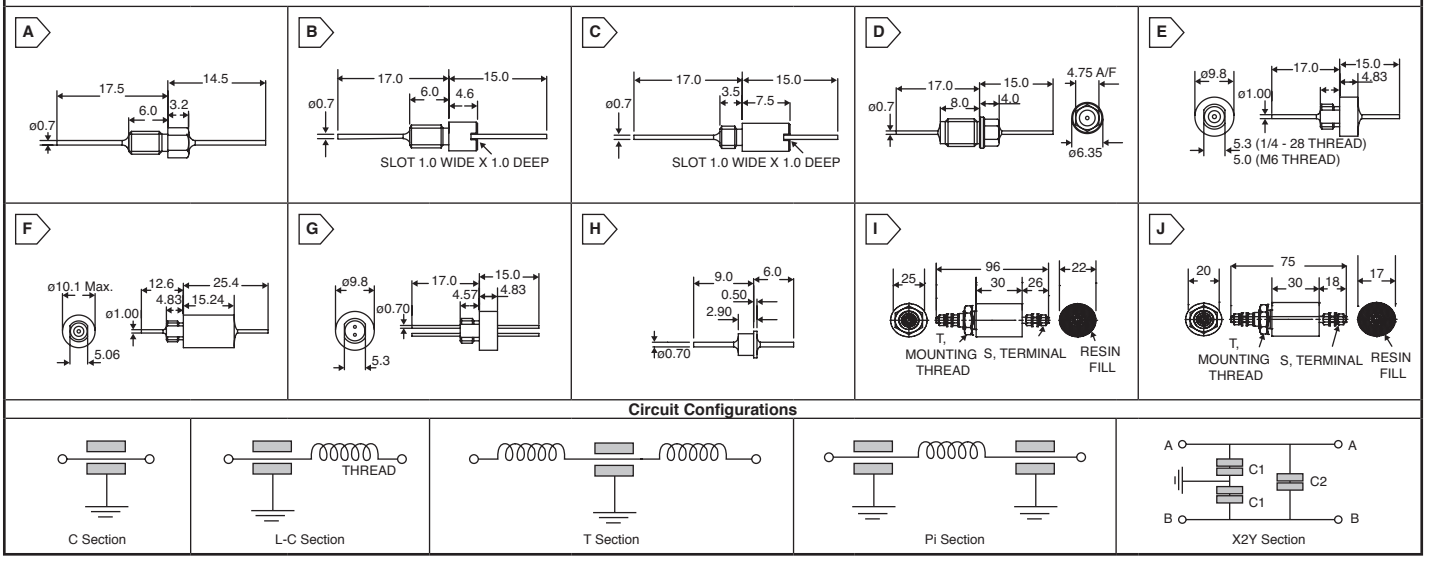
SYFER EMI Filters

RoHS Compliant **This product is RoHS compliant.**

DIMENSIONS: mm (in.)



Circuit Configurations

The SYFER range of EMI/RFI panel mount filters is extensive, covering both threaded and solder-in panel mounting versions. The threaded types are available in both metric and non-metric threads.

At the heart of every SYFER "SF" filter is a discoidal multilayer ceramic element, manufactured using a unique "Wet Process" . This gives a robust construction with higher capacitance values than traditional tubular types. Dielectric materials used include stable X7R types which ensures excellent insertion loss performance. Ultra stable C0G versions are available on request. Syfer offers one of the highest capacitance values per case size - C, LC section up to 3.3uF, Pi section up to 6.6uF and maximum voltage ratings up to 3kV d.c

RoHS Compliant

For quantities greater than listed, call for quote.

EMI POWER FILTERS

Utilising plastic film technology, which offers the advantage of being self-healing, the "SL" range includes high ac and dc working voltage options along with parts designed and tested to meet the rigorous demands of EN132400/EN60950 safety specifications.

RoHS Compliant

For quantities greater than listed, call for quote.

SYFER SMD EMI and X2Y Filters

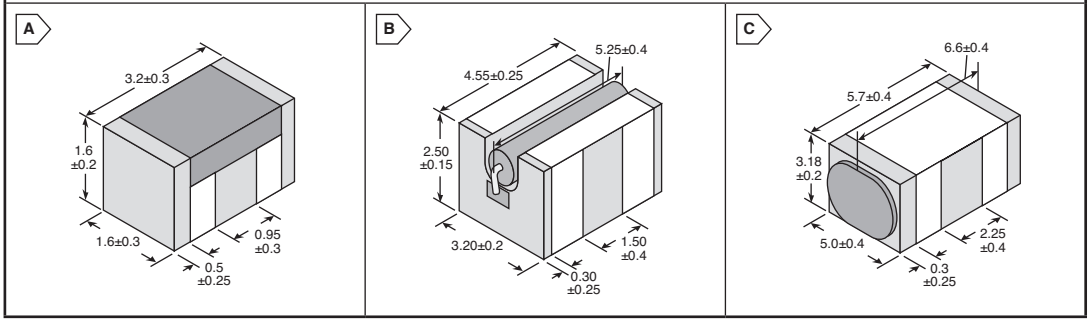
RoHS Compliant **This product is RoHS compliant.**

SMD EMI PI FILTERS

Features:
- Miniature SMD package
- X7R and C0G dielectrics
- EMI filtering performance up to 1GHz and higher
- Ideal for telecom, power supplies, and industrial equipment
- Also suitable for mil/aerospace applications

Specifications:
- Tolerance: 20%
- Temperature rating: -55°C to +125°C
- Rated current: 1Amp DC
- Ferrite inductance: 0.25uH(SBSP), 0.5uH (SBSG,SBSM)
- Max solder temperature: 220°C

DIMENSIONS: mm



SBSP Series (1 Amp)

For quantities greater than listed, call for quote.

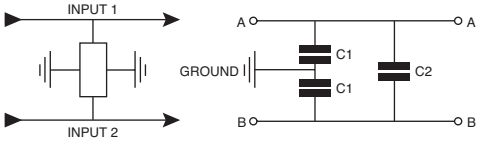
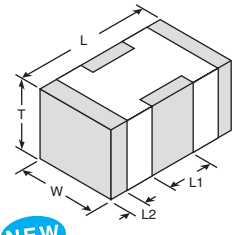
X2Y FILTERS

The Syfer X2Y Integrated Passive Component is a 3 terminal EMI chip device. The revolutionary design provides simultaneous line-to-line and line-to-ground filtering, using a single ceramic chip. In this way, differential and common mode filtering are provided in one device. Available in sizes from 0603 to 2220, these filters can prove invaluable in meeting stringent EMC demands.





Features:
- Replaces 2 or 3 capacitors with one device
- Matched capacitance line to ground on both lines
- Ultra low inductance due to cancellation effect
- Differential and common mode attenuation
- Effects of temperature and voltage variation eliminated
- Effect of ageing equal on both lines
- High current capability

Specifications:
- Dielectric: X7R or C0G
- Temperature rating: -55°C to 125°C
- Dielectric withstand voltage: 2.5 x Rated Volts for 5 secs.; Charging current limited to 50mA Max.
- Insulation resistance: 100Gohms or 1000s (whichever is the less)

Applications:
- Balanced lines and twisted pairs
- EMI Suppression on DC motors
- Sensor/transducer applications
- Wireless communications
- Audio amplifiers
- CANBUS systems

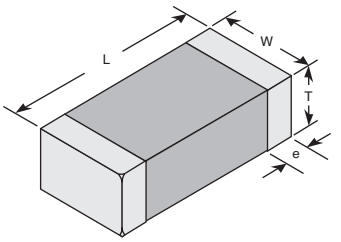
TAIYO YUDEN Ferrite Chip Beads

TAIYO YUDEN

RoHS Compliant This product is RoHS compliant.

FB SERIES M TYPE HIGH CURRENT

Features:
- Power supply units:
  - Withstand large current (allowable current: up to 6A)
  - Resistance to high energy
  - High reliability
- There are several variations of the FBMJ type
  - HS: for broadband applications
  - HM: for upper MHz range applications
  - HL: for GHz range applications
- The FBMH type is optimal for circiut designs which require high impedances and large currents to combat radiated noise on power lines, etc.



Specifications:
- Operating temperature: -40°C to 125°C (Including self-generated heat)

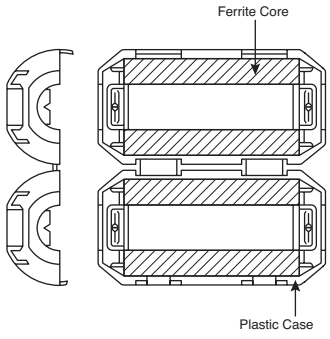
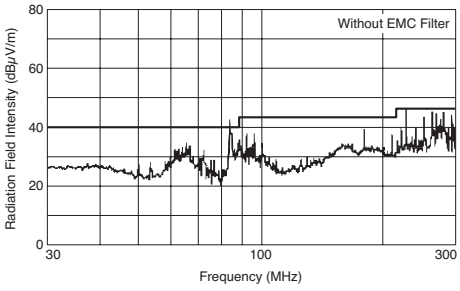
TDK ZCAT Snap-On EMI Clamp Filters

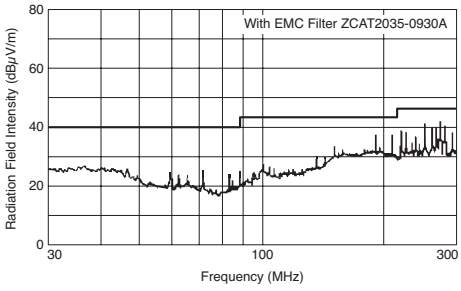
RoHS Compliant **This product is RoHS compliant.**

INTERNAL CONSTRUCTION



TYPICAL EMC SUPPRESSION EFFECTS - RADIATION LEVEL vs. FREQUENCY CHARACTERISTICS



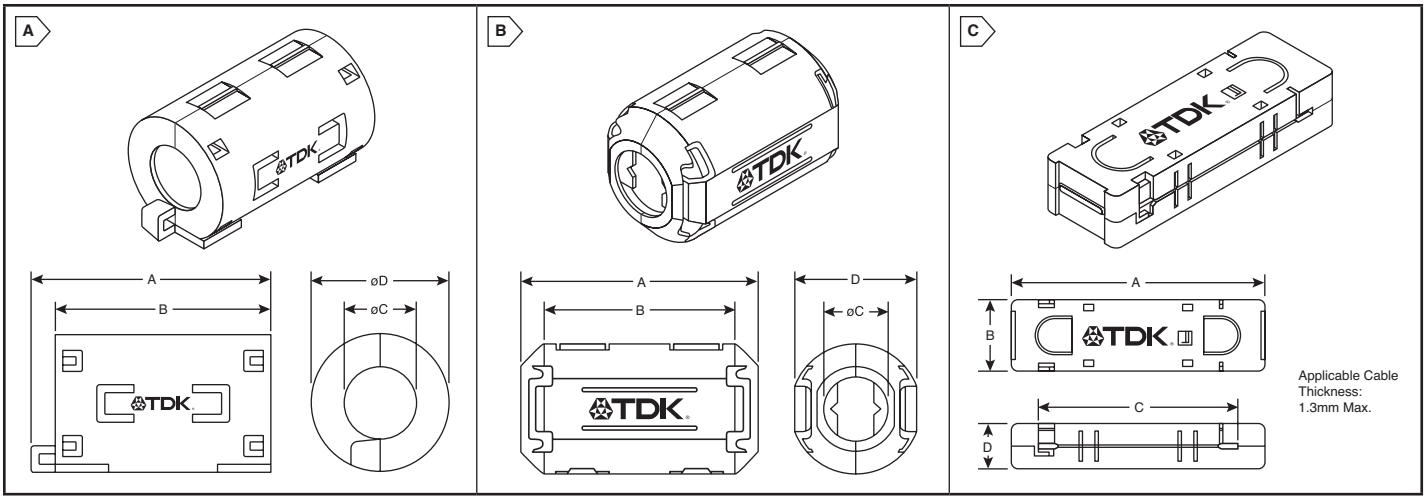


Features:

- Unique Plastic case ensures simple, convenient installation
- Includes a self-locking mechanism to prevent slippage on cables
- Ferrite core provides excellent absorption of high-frequency EMC
- Highly effective as countermeasure against common mode EMC without adverse affect on signal quality
- Large cores prevent saturation during large signal surges

Applications:

- Personal computers, word processors, monitors, hard disk drives, digital telephone systems, audio devices, electronics musical instruments, video games, copiers, and fax machines



ZCAT ROUND CASE - GRAY

TUSONIX EMI Filters and Feedthru Capacitors

RoHS Compliant **This product is RoHS compliant.**

TUSONIX
A Subsidiary of CTS Electronic Components

EMI/RFI FILTERS

Tusonix, Inc. manufactures thousands of EMC Products featuring an extensive line of EMI/RFI Filters and Capacitors. We combine Technology, Expertise, Versatility and Innovation to produce the industry's most complete line of ceramic EMI/RFI Filters. TUSONIX draws upon its 50+ years of manufacturing expertise and an accumulated base of ceramic dielectric technology to provide an ever expanding line of EMI/RFI Filters and Capacitors. Tusonix products not only set the industry standard but lead the way in the development of tomorrow's EMI Technology.

For quantities greater than listed, call for quote.

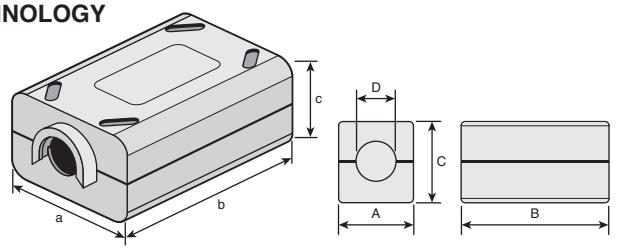
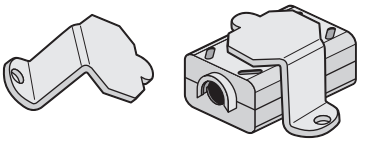
WURTH ELECTRONICS Snap-On Ferrite EMI Filters

STAR-TEC ROUND CABLE SNAP FERRITES WITH SAFETY KEY TECHNOLOGY

Features:
- Built in cable guide eases the cable assembling process
- Patented case design prevents air gaps for a perfect EMI suppression
- The security lock guarantees electromagnetic compatibility because only authorized persons can unlock the snap ferrite with the STAR-TEC key
- The innovative sleek design without sharp edges makes the STAR-TEC blend in on the cable
- The ferrite core is made of NiZn, a material which provides broadband suppression from 30MHz – 1.5GHz
- Material: plastic case PA 6, UL 94 V-0
- Operating temperature: -25°C to 105°C
- Reinforced hinge design out performs competition
- **Additional keys sold separately part # 710-74271**

Applications:
- Internal and external computer data and power cable
- Perfect for cables with difficult access because of easy installation and removal
- Reusable because of the key technology therefore perfect for test and measuring purposes





STAR-CLIP mounting bracket for STAR-TEC snap ferrites

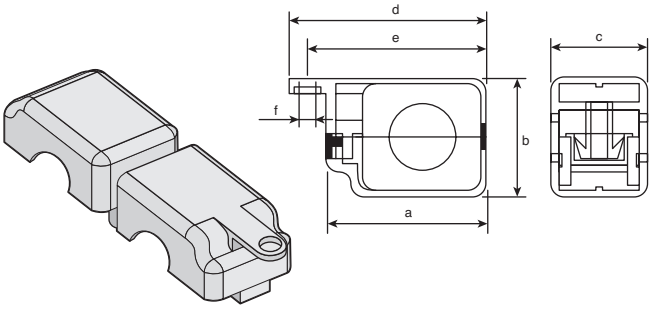
STAR-RING SNAP FERRITES WITH SAFETY KEY TECHNOLOGY

Features:
- The STAR-RING outperforms the competition due to its use of a patented no spring design which eliminates air gaps.
- Built in cable guide eases the cable assembling process
- Patented case design prevents air gaps for a perfect EMI suppression
- The security lock guarantees electromagnetic compatibility because only authorized persons can unlock the snap ferrite with the STAR-TEC key
- The innovative sleek design without any sharp edges makes the STAR-TEC blend in on the cable
- The ferrite core is made of NiZn, a material which provides broadband suppression from 30MHz – 1.5GHz
- Material: plastic case PA 6, UL 94 V-0
- Operating temperature: -25°C to 105°C
- Reinforced hinge design out performs competition.
- **Additional keys sold separately part # 710-74271**

Applications:
- Internal and external computer data and power cable
- Perfect for cables with difficult access because of easy installation and removal
- Reusable because of the key technology therefore perfect for test and measuring



For quantities greater than listed, call for quote.

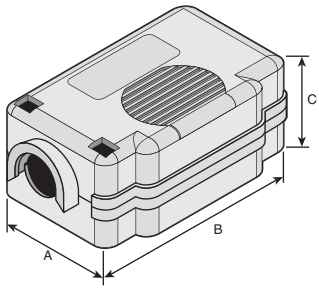
WURTH ELECTRONICS Ferrite EMI Cores and Ferrite Beads

STAR-GAP W/DEFINED AIR GAP

Features:
- Worldwide first split case ferrite with „defined air-gap“ (patent pending)
- Especially helpful for EMI problems in frequency range of 100MHz up to 2.5GHz
- Data signals up to 100MHz will not be effected
- Best performance (impedance) especially with 2 windings (2 cable through)
- Low magnetic saturation of the material because of high DC current apply and therefore only low reduction of impedance because of DC current
- Pre fixing and cable protection system makes it easier to assemble and save time
- UL 94 V-0 plastic material for the case working temperature: -25°C to 105°C
- Not possible to remove from the cable without the WE key
- Non visible locking in closed conditions

Applications:
- High speed data lines, especially LAN network CAT 5and higher
- Less interference to your electronic by wireless mobile phone radiations, bluetooth and wireless LAN
- Reduce disturbance by USB 2.0 and other fast digital signals
- Minimize the interference by fast circuits and switching power supply suppression of the harmonic waves and no damping for the signal below 100MHz
- Better performance for high DC current applications with interference problems like power supply, motor & drives and more



For quantities greater than listed, call for quote.

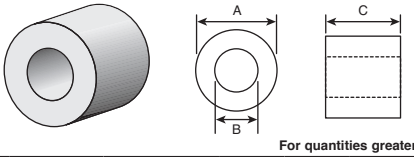
EMI SUPPRESSION TOROIDAL FERRITE BEADS

Features:
- Ferrite core made of NiZn, a material which works in a broadband frequency range
- Many different types and grades of material (NiZn) for the best possible interference suppression

Applications:
- Wires
- Coaxial cables
- Wire-wrapping cables
- Multiconductor wires
- E.g. of power supplies, data and Gauge signal lines



For quantities greater than listed, call for quote.

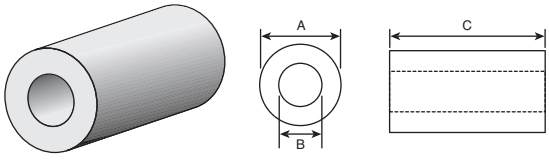
EMI SUPPRESSION AXIAL FERRITE BEADS

Features:
- Ferrite core made of NiZn, a material which works in a broadband frequency range
- Many different types and grades of materials (NiZn) for the best possible interference suppression
- Suitable for interference suppression within the HF and VHF range

Applications:
- Wires
- Coaxial cables
- Wire-wrapping cables
- Multiconductor wires
- E.g. of power supplies, data and Gauge signal lines



For quantities greater than listed, call for quote.

WURTH ELECTRONICS Ferrite Chip Beads

SMD EMI SUPPRESSION FERRITE BEADS WE-CBF

Features:
- The special SMD chip bead ferrites can be put directly on the printed circuit board
- They offer excellent anti-EMI properties and low DC-resistance
- Placed very close next to the interference source even with smallest size 0402,
- Maximal impedances at 660W can be reached

Applications:
- Reliable Ni-Sn electrodes
- Suitable for wave and reflow soldering as well as pasting
- Perfect as data lined filter and for uncoupling of distribution voltage
- High rated current up to 6A
- Highly extended spectrum

Dimensions: mm

AVX Inductors

RoHS Compliant **This product is RoHS compliant.**

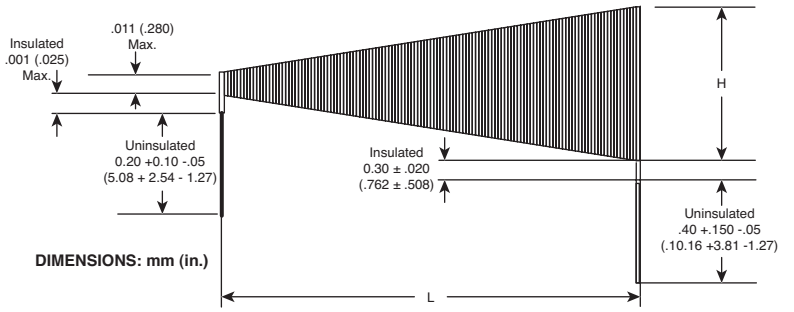
AVX A KYOCERA GROUP COMPANY

GL SERIES ULTRA BROAD BAND INDUCTORS

RoHS Compliant

Features:
- Ultra Broad Band Performance
- Ultra-Low Insertion Loss
- Excellent Return Loss Through 40GHz
- Flat Frequency Response
- Part to Part Performance Repeatability
- Rugged Powdered Iron Core
- Operating temperature: -400°C to + 85°C

Applications:
- Communication Customers
- Receiver Optical Sub-Assemblies
- Transimpedance Amplifier Customers
- Test Equipment Manufacturers



DIMENSIONS: mm (in.)

Inductance (μh)	L	H	# of Turns
2	0.102±0.002 (2.59 ± 0.051)	0.065±0.002 (1.65 ± 0.051)	46 Turns #44 AWG Cu
6	0.182±0.003 (4.62 ± 0.076)	0.073±0.002 (1.85 ± 0.051)	80 Turns #44 AWG Cu
11	0.182±0.003 (4.62 ± 0.076)	0.072±0.002 (1.83 ± 0.051)	110 Turns #47 AWG Cu

MULTILAYER ORGANIC INDUCTORS

RoHS Compliant

Features:
- High Q
- High SRF
- High Frequency
- Low DC Resistance
- Expansion Matched to PCB

Applications:
- Mobile communications
- Satellite Applications
- GPS
- Collision Avoidance
- Wireless LAN's

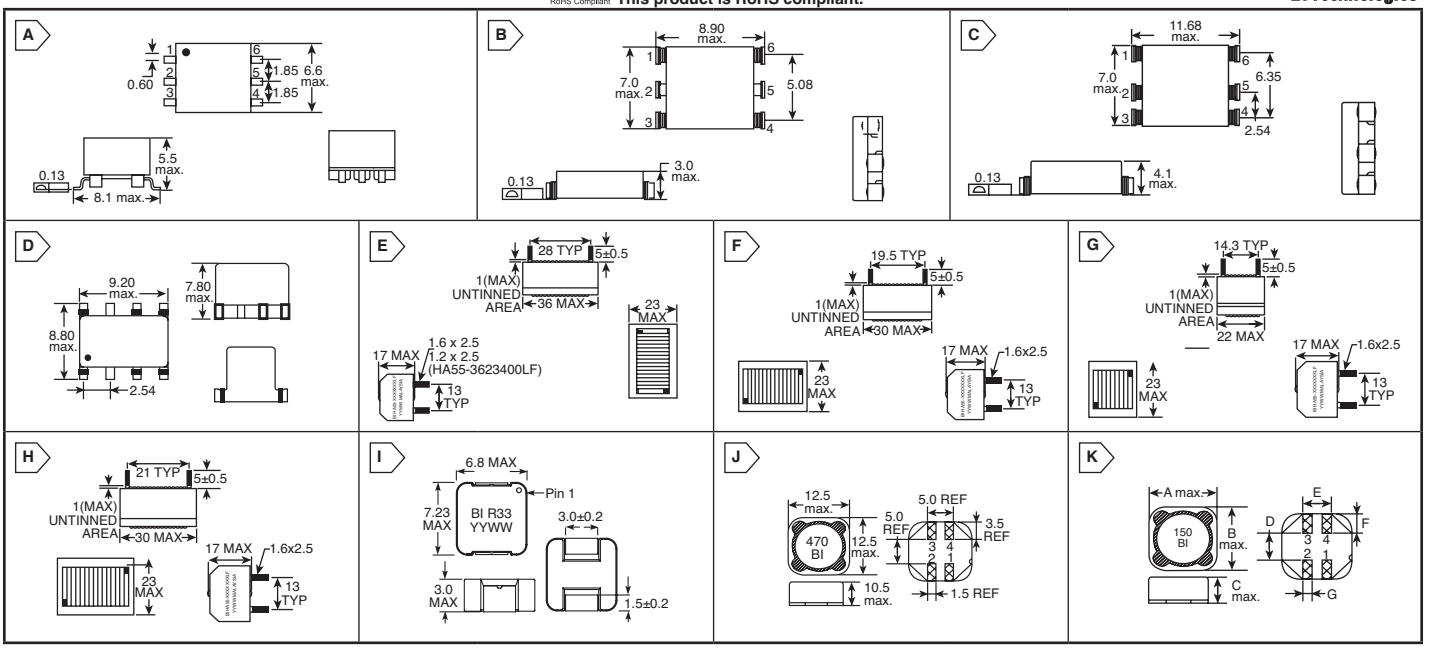
BI TECHNOLOGIES Power Inductors

RoHS Compliant This product is RoHS compliant.

TT electronics
BI Technologies



HM42 SERIES GATE DRIVE TRANSFORMER INDUCTORS

Features:
- Operating Temperature Range: -40 to +125°C
- Ambient Temperature Max.: +85°C
- 1500VDC Isolation between gate and drive
- Basic insulation 1500Vrms between primary and secondary

For quantities greater than listed, call for quote.

HA55 SERIES POWER INDUCTORS

Features:
- Operating Temperature Range: -40 to +155°C
- Ambient Temperature Max.: +85°C

Applications:
- Use as DC-DC converter and in high current applications. Suitable for industrial as well as automotive application.

For quantities greater than listed, call for quote.

HM78D SERIES SURFACE MOUNT COUPLED INDUCTORS

Features:
- Operating Temperature Range: -40 to +125°C
- Ambient Temperature Max.: +85°C
- Temperature Rise, Max.: +40°C
- Operating Frequency: Up to 3MHz

Applications:
- Ideal for SEPIC applications, high inductance, high efficiency and excellent current handling in rugged, low cost part
- Use as DC-DC converter and in applications like hand phones, CD/DVD player, digital camera, GPS system

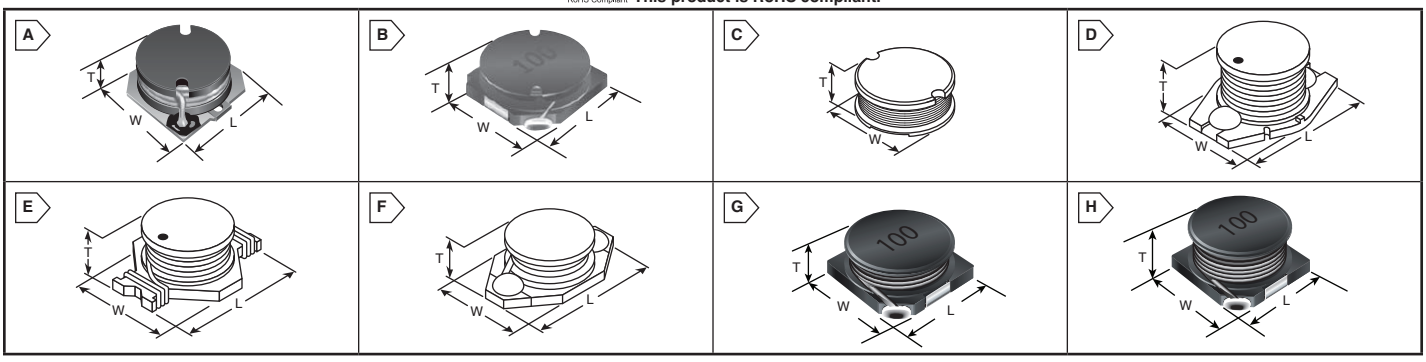
BOURNS SMD Power Inductors

BOURNS®

RoHS Compliant **This product is RoHS compliant.**



SDR SERIES LEAD FREE NON-SHIELDED POWER INDUCTORS

NEW PRODUCT

Applications:

- Input/output of DC/DC Converters
- Portable Communication Equipment
- Camcorders
- LCD TVs
- Car Radios

For quantities greater than listed, call for quote.

BOURNS Shielded SMD Power Inductors

BOURNS®

RoHS Compliant **This product is RoHS compliant.**

CHIP BEAD AND INDUCTOR KITS

Bourns Kits include surface-mount chip inductors, power chokes, chip beads, chip bead arrays, as well as radial-leaded and axial-leaded inductors. These components are used in computer, instrumentation, industrial, and medical applications.

For quantities greater than listed, call for quote.

SERIES: SRU1028, SRU1038, SRU1048, SRU1063, SRU2009, SRU2013, SRU3011, SRU3017, SRU3028

Applications:
- Input/output of DC/DC converters
- Power supplies for portable communication equipment, camcorders, LDS TVs, and car radios

Specifications:
- Test voltage: 1V
- Reflow soldering: 230°C, 50 sec. max.
- Operating temperature: -40°C to +125°C
- Storage temperature: -40°C to +125°C
- Resistance to soldering heat: 260°C for 10 sec.

For quantities greater than listed, call for quote.

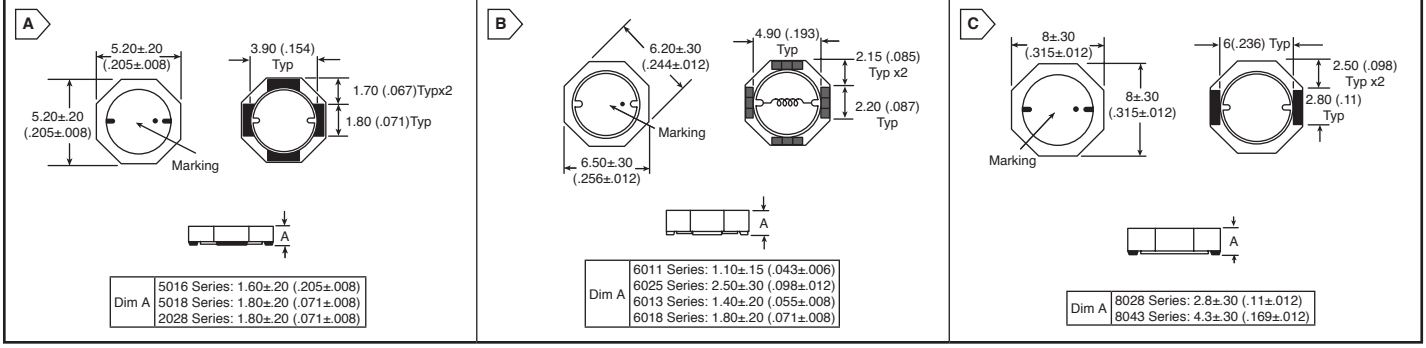
BOURNS Shielded SMD Power Inductors

BOURNS®

RoHS Compliant **This product is RoHS compliant.**

DIMENSIONS: mm (in.)



SERIES: SRU5016, SRU5018, SRU5028, SRU6011, SRU6013, SRU6018, SRU6025, SRU8028, SRU8043

Applications:
- Input/output of DC/DC converters
- Power supplies for portable communication equipment, camcorders, LDS TVs, and car radios

Specifications:
- Test voltage: 1V
- Reflow soldering: 230°C, 50 sec. max.
- Operating temperature: -40°C to +125°C
- Storage temperature: -40°C to +125°C
- Resistance to soldering heat: 260°C for 10 sec.

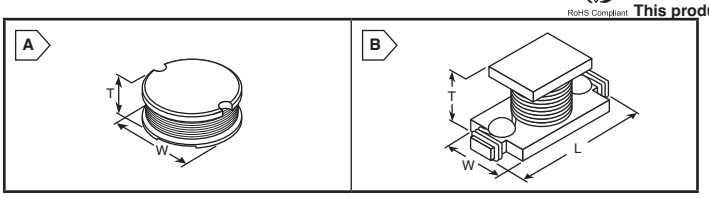
BOURNS SMD Power Inductors

BOURNS®

RoHS Compliant **This product is RoHS compliant.**



SDR SERIES LEAD FREE NON-SHIELDED POWER INDUCTORS

Applications:

- Input/output of DC/DC Converters
- Portable Communication Equipment
- Camcorders
- LCD TVs
- Car Radios

For quantities greater than listed, call for quote.

BOURNS SRR Series Shielded SMD Power Inductors

BOURNS®

RoHS Compliant This product is RoHS compliant.

SRR SERIES SHIELDED SMD POWER INDUCTORS

Specifications:

- Test Voltage: 1V
- Reflow Soldering: 230°C, 50 sec. max.
- Operating/Storage Temp.: -40°C to +125°C
- Resistance to solder heat: 260°C, 5 sec.

Applications:

- Input/output of DC/DC converters
- Power supplies for: Portable communication equipment
  Camcorders
  LCD TVs
  Car radios

For quantities greater than listed, call for quote.

BOURNS SRR Series Shielded SMD Power Inductors

BOURNS®

This product is RoHS compliant.

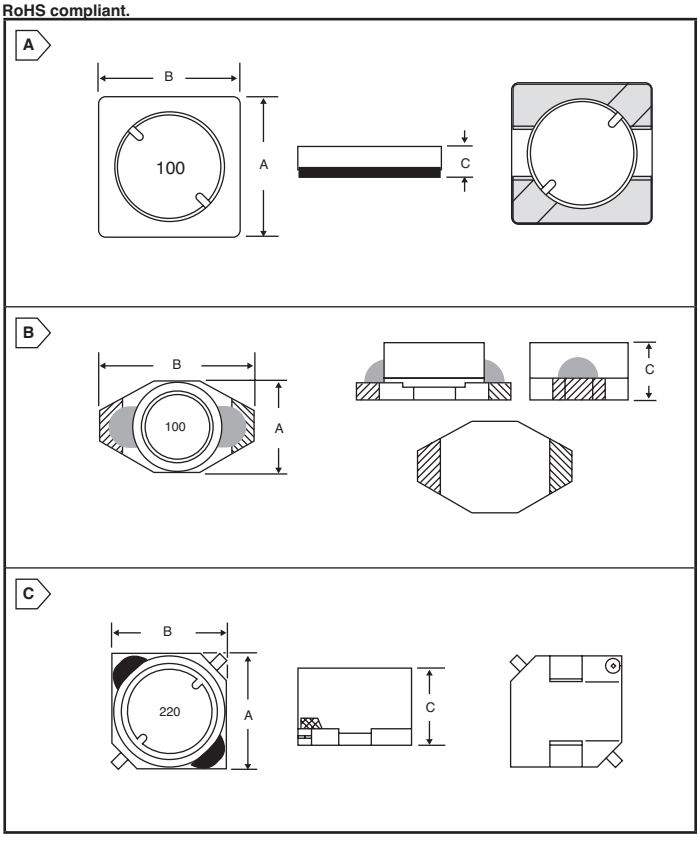
SRR SERIES SHIELDED SMD POWER INDUCTORS

Applications:

- Input/output of DC/DC converters
- Power supplies for: Portable communication equipment
  Camcorders
  LCD TVs
  Car radios

Specifications:

- Test voltage: 0.1V, 100 KHz
- Reflow soldering: 230°C, 50 sec. max.
- Operating/storage temperature: -40°C to +125°C
- Resistance to soldering heat: 260°C, 10 sec.



For quantities greater than listed, call for quote.

SRP SERIES SHIELDED POWER INDUCTORS

Features:
- Lead Free
- RoHS Compliant

Specifications:
- Test Voltage: 0.25V (1.0V for SRP1270 Series)
- Test Frequency: 100KHz
- Reflow Soldering: 230°C; 50 sec. max.
- Operating Temperature: -55°C to 150°C (temperature rise included
- Storage Temperature: -55°C to +150°C
- Resistance to Soldering Heat: +260°C for 10 sec.

Applications (Fig. A and B):
- Input/output fo DC/DC converters
- Power Supplies for:
  - Portable communications equipment
  - Camcorders
  - LCD TVs
  - Car audio systems

Applications (Fig. C):
- DC/DC converters
- Power Supplies for:
  - Portable communications equipment
  - Laptop computers
  - Camcorders, HDTV, car audio systems
  - Video game consoles

Specifications:

- Operating/Storage Temperature: -55°C to +125°C
- Reflow Soldering: 230°C, 50 sec. max.
- Resistance to Solder Heat: 260°C, 5 sec.

Materials:

- Base Material: Ceramic
- Terminal Electrode: Ag, Ni, Sn

✻Model Type: CE201210-	A Dim. mm (in.)
1N5D thru 82NJ	0.85 (0.033)
R10J thru R39J	1.00 (0.039)

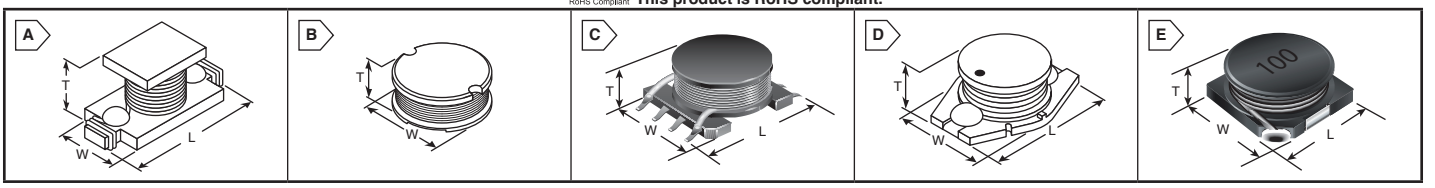
BOURNS SMD Power Inductors

BOURNS®

RoHS Compliant **This product is RoHS compliant.**



SDR SERIES LEAD FREE NON-SHIELDED POWER INDUCTORS

Applications:

- Input/output of DC/DC Converters
- Portable Communication Equipment
- Camcorders
- LCD TVs
- Car Radios

For quantities greater than listed, call for quote.

RoHS Compliant This product is RoHS compliant.

COLD CATHODE FLUORESCENT LAMP INVERTER TRANSFORMERS

Specifications:

- Transformers for use in CCFL power supplies
- Supply output current up to 30 milli-Amps
- Frequency range from 40 to 80KHz
- Deliver output power from 2.5 to 6 Watts
- Ferrite core material
- Operating ambient temperature range: 0°C to +70°C

RoHS Compliant

For quantities greater than listed, call for quote.

POWER INDUCTORS AND TRANSFORMERS

Specifications:

- OCTA-PAC's are designed around high frequency, low loss female core material
- ECONO-PAC's are a lower cost version of OCTA-PAC's offering high saturation flux density, Powder Iron core material
- OCTA-PAC PLUS's offer higher current ratings and higher saturation flux densities than OCTA-PAC and ECONO-PAC, Amorphous metal core material
- Secure 4 terminal mounting
- Inductor more versatile inductance combination by series or parallel connections
- Operating ambient temperature range: -40°C to +85°C

RoHS Compliant

OCTA-PAC®

For quantities greater than listed, call for quote.

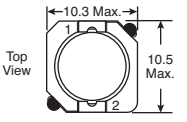
COILTRONICS® Low Profile Power Inductors

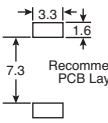
RoHS Compliant **This product is RoHS compliant.**

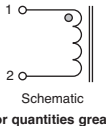
DR1030 SERIES

Features:
- 125°C maximum total temperature operation
- 10.3x10.5x3.0mm shielded drum core
- Ferrite core material
- Frequency Range up to 1MHz

Specifications:
- Storage Temperature Range: -40°C to +125°C
- Operating Temperature Range: -40°C to +125°C
- Solder Reflow Temperature: +260°C max. for 10 seconds max.







DIMENSIONS: mm

RoHS Compliant

For quantities greater than listed, call for quote.

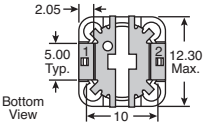
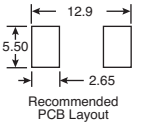
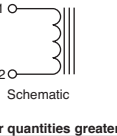
DR124 SERIES

Features:
- 125°C maximum total temperature operation
- 12.3x12.3x4.5mm shielded drum core
- Ferrite core material
- Frequency Range up to 1MHz

Specifications:
- Storage Temperature Range: -40°C to +125°C
- Operating Temperature Range: -40°C to +125°C
- Solder Reflow Temperature: +260°C max. for 10 seconds max.







DIMENSIONS: mm

RoHS Compliant

For quantities greater than listed, call for quote.

COILTRONICS® Shielded Power Inductors

RoHS Compliant **This product is RoHS compliant.**

DR SERIES - HIGH POWER DENSITY, HIGH EFFICIENCY, SHIELDED INDUCTORS

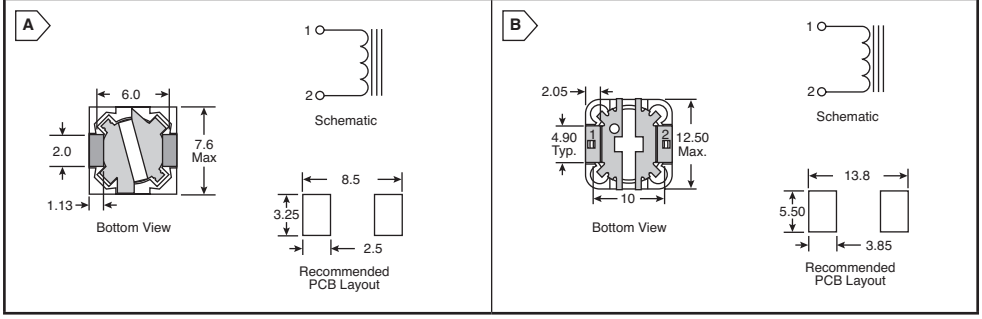
Features:
- 125°C maximum total temperature operation
- Four sizes of shielded drum core inductors
- Ferrite core material
- Magnetic shielding
- Secure mounting

RoHS Compliant

Specifications:
- Storage Temperature Range: -40°C to +125°C
- Operating Temperature Range: -40°C to +125°C
- Solder Reflow Temperature: +260°C max. for 10 seconds max.

Applications:
- Computer, DVD players, and portable power devices
- LCD panels
- DC-DC converters
- Buck, boost, forward, and resonant converters
- Noise filtering and filter chokes

DIMENSIONS: mm



For quantities greater than listed, call for quote.

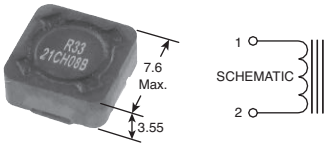
COILTRONICS® Automotive Power Inductors

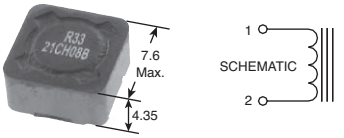
RoHS Compliant **This product is RoHS compliant.**

DIMENSIONS: mm

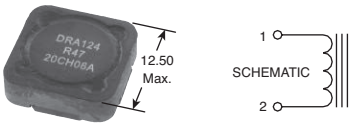
A



B



C



DRA SERIES

Features:

- 165°C maximum total temperature operation
- Five sizes of Automotive grade shielded drum core inductors
- Inductance range from 0.28uH to 1000uH
- Current range up to 56Amps
- Mechanical secure mounting for high shock and vibration environments
- Good thermal dispersion with thermal conductive epoxy
- Customized dual winding versions available upon request for SEPIC or Flyback configurations

For quantities greater than listed, call for quote.

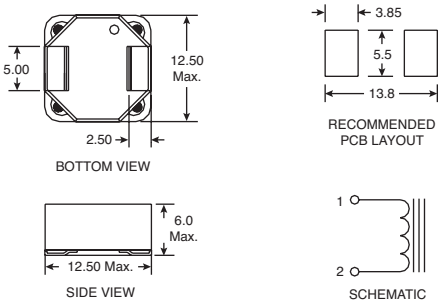
COILTRONICS® Automotive Rated Shielded Power Inductors

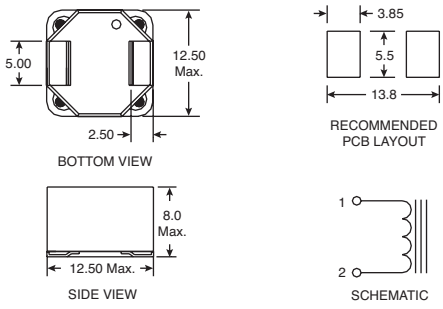
RoHS Compliant **This product is RoHS compliant.**

DIMENSIONS: mm

A



B



Features:
- 165°C maximum total temperature operation
- Five sizes of Automotive grade shielded drum core inductors
- Inductance range from 0.28uH to 1000uH
- Current range up to 56Amps
- Mechanical secure mounting for high shock and vibration environments
- Good thermal dispersion with thermal conductive epoxy
- Customized dual winding versions available upon request for SEPIC or Flyback configurations

Applications:
- Automotive Electronics (under the hood, interior/exterior)
- Telematics
- DC-DC converters
- Buck, boost, forward, and resonant converters
- Noise filtering and filter chokes

Environmental Data:
- Storage temperature range: -40°C to +165°C
- Operating ambient temperature range: -40°C to +165°C
- Solder reflow temperature: +260°C max. for 10 seconds max.
- Complies with AEC-Q200 standard

COILTRONICS® Power Inductors

RoHS Compliant **This product is RoHS compliant.**

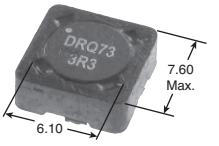
DUAL WINDING, SHIELDED POWER INDUCTOR/TRANSFORMERS

Features:
- 125°C maximum total temperature operation
- Dual winding inductors that can be used as either a single inductor or in a coupled inductor/transformer application
- Four sizes of shielded drum core inductors

Specifications:
- Storage Temperature Range: -40°C to +125°C
- Operating Temperature Range: -40°C to +125°C
- Solder Reflow Temperature: +260°C max. for 10 seconds max.

Applications:
- As a transformer: Sepic, flyback
- As an inductor: Buck, boost, coupled inductor
- DC-DC converters
- VRM inductor for CPU and DDR power supplies
- Input and output filter chokes

DIMENSIONS: mm



DRQ73 and DRQ74

MPA7030 SERIES, HIGH FREQUENCY HIGH CURRENT POWER INDUCTORS

Features:
- Halogen free
- 165°C maximum total temperature operation
- 7.6x7.0x3.0mm maximum surface mount package
- Magnetically shielded
- Rugged construction
- Handles high transient inrush current spikes
- Inductance Range from 1.5µH to 8.2µH
- Current range from 3.5 to 17.5Amps

For quantities greater than listed, call for quote.

MPA7030

HIGH FREQUENCY, HIGH CURRENT MINIATURE POWER INDUCTORS

Features:
- Halogen Free
- Magnetically Shielded
- Handles high transient inrush current spikes

Specifications:
- Storage Temperature Range: -40°C to +125°C
- Operating Temperature Range: -40°C to +125°C
- Solder Reflow Temperature: J-STD-020D Compliant

Applications:
- Handheld/Mobile Devices
- GPS/PDAs
- MP3 Players
- Notebook/Netbook

COILTRONICS® Power Inductors

RoHS Compliant This product is RoHS compliant.

HCM1103 SERIES HIGH CURRENT, HIGH FREQUENCY POWER INDUCTORS

Features:
- Power iron core material
- Magnetically shielded, low EMI
- High current carrying capacity, low core losses

Specifications:
- Operating Temperature Range: -55°C to +125°C

NEW PRODUCT

For quantities greater than listed, call for quote.

HCM0503 AND HCM0703 SERIES HIGH CURRENT POWER INDUCTORS

Features:
- Power iron core material
- Magnetically shielded, low EMI
- High current carrying capacity, low core losses
- Wide Frequency Range
- High Energy Density
- Good thermal dissipation
- Soft roll-off
- High Saturation Current

Specifications:
- Operating Temperature Range: -55°C to +125°C

NEW PRODUCT

For quantities greater than listed, call for quote.

HCF1007 SERIES HIGH CURRENT, HIGH FREQUENCY POWER INDUCTORS

Features:
- Ferrite core material
- Secure 3 terminal mounting
- High current carrying capacity, low core losses
- Controlled DCR tolerance for sensing currents

Specifications:
- Operating Temperature Range: -40°C to +125°C

For quantities greater than listed, call for quote.

SDH2812 SERIES LOW PROFILE, HIGH POWER, SHIELDED DRUM INDUCTORS

Features:
- Ferrite core material
- High power density, ultra-compact footprint
- Magnetically shielded, low EMI

Specifications:
- Operating Temperature Range: -40°C to +125°C

For quantities greater than listed, call for quote.

COILTRONICS® Uni-Pac™ SMT Power Inductors

RoHS Compliant **This product is RoHS compliant.**

Features:
- Miniature surface mount design
- Inductance range from 0.470uH to 1000uH
- Current range from 19.2 to .47 Amps
- Maximum power density
- Ideal for applications requiring low inductance and high current in a miniature package

Applications:
- DC-DC converters on board level and industrial products

Packaging:
- Supplied in tape and reel packaging, 900 (UP1B), 550 (UP2B), 450 (UP3B), and 275 (UP4B) per reel

Environmental Data:
- Storage temperature range: -40°C to +125°C
- Operating ambient temperature range: -40°C to +85°C
- Solder reflow temperature: +260°C max. for 10 seconds max.

COILTRONICS® Versa-Pac SMT Inductors & Transformers

RoHS Compliant **This product is RoHS compliant.**

Features:
- Six winding, surface mount devices that offer more than 500 usable inductor or transformer configurations
- High power density and low profile
- Low radiated noise and tightly coupled windings
- Power range from 1 Watt - 70 Watts
- Frequency range to over 1MHz
- 500 VAC Isolation
- Ferrite core material

Applications:
- Inductors: buck, boost, coupled, choke, filter, resonant, noise filtering, differential, forward, common mode
- Transformers: flyback, feed forward, push-pull, multipleoutput, inverter, step-up, step-down, gate drive, basedrive, wide band, pulse, control, impedance, isolation,bridging, ringer, converter, auto

NOTE: Base - The value for a single winding. There are 6 windings in each device.

Environmental Data:
- Storage temperature range: -55°C to 125°C
- Operating ambient temperature range: -40°C to +85°C
- Solder reflow temperature: +260°C max. for 10 seconds max.

Packaging:
- Supplied in tape and reel packaging, 600 (VP01), 300 (VP02), and 200 (VP03) per reel
- Supplied in bulk packaging (VP04 and VP05)

RoHS Compliant **This product is RoHS compliant.**

SMD SERIES B82554

- Enamel Copper Flat Wire Winding
- Magnetically Shielded Ferrite Core
- High Current Rating
- Low DC Resistance

For quantities greater than listed, call for quote.

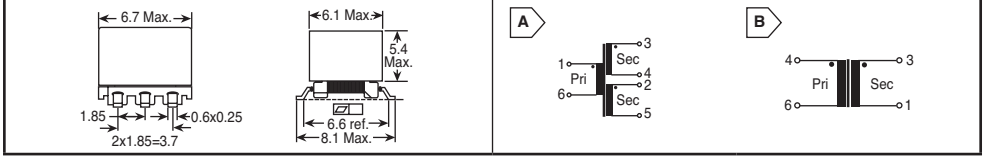
SMT GATE DRIVE TRANSFORMERS

Features:
- Low leakage inductance
- Low inter-winding capacitance
- High SRF value
- High isolation between primary and secondary side
- Footprint: 8.1x6.7mm

DIMENSIONS: mm



For quantities greater than listed, call for quote.

POWER INDUCTORS

SMD Series B82789N

- Current Compensated Double Choke with Ferrite Core
- BiFilar Winding
- Lead Free Tinned Terminals

Applications:
- Automotive
- Industrial
- Telecommunications

For quantities greater than listed, call for quote.

Chokes Series B82731T

- Current Compensated Double Choke with Closed E Core Ferrite Core
- 2 Section Winding
- High Resonant Frequency
- High Pulse Strength
- Lead spacing 10x10mm
- Lead free Pin Leads

For quantities greater than listed, call for quote.

Chokes Series B82732F

- Current Compensated Double Choke
- 4 Section Winding
- 14mm Height
- High Pulse Handling
- Industry best Inductance/rated current ratio
- Excellent diffential mode suppression

For quantities greater than listed, call for quote.

Series B82734

- Current Compensated Double Choke with Closed Rectangular Ferrite Core
- 2 Section Winding
- Low Leakage
- High Pulse Strength
- High Resonant Frequency

For quantities greater than listed, call for quote.

RING CORE DOUBLE CHOKES

Series B82721

- Current Compensated Ring Core Double Choke with Ferrite Core
- Polycarbonate Case
- Polyurethane Potting
- Sector Winding

Applications:
- Lamp ballasts
- Switch mode power supplies
- Washing machines

For quantities greater than listed, call for quote.

EPCOS SIMID Series SMD Inductors

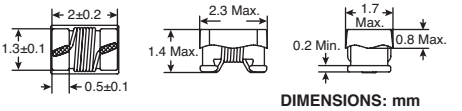
RoHS Compliant **This product is RoHS compliant.**

SIMID 0805-F SERIES

Features:
- Close inductance tolerance
- High resonance frequency
- Suitable for reflow (IR and vapor phase) and wave soldering

Construction:
- Cubic coil with ceramic or ferrite core
- Epoxy moulded flat top for vacuum pickup
- Wire welded to terminations

Applications:
- Antenna amplifiers
- DECT systems
- Mobile phones
- Keyless entry
- GPS



DIMENSIONS: mm

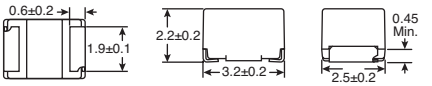
SIMID 1210-H SERIES

Features:
- Very high current handling capability
- Qualified acc. AEC-Q200
- Suitable for reflow soldering acc. JEDEC J-STD 020C

Construction:
- Ferrite drum core
- Laser-welded winding
- Flame-retardant encapsulation

Applications:
- Filtering of supply voltages, coupling, decoupling
- DC/DC converters, switch mode power supplies
- Automotive electronics
- Telecommunications



DIMENSIONS: mm

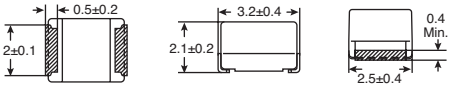
SIMID 1210-T SERIES

Features:
- High Q factor and L value
- High resonance frequency
- Suitable for reflow (IR and vapor phase) and wave soldering

Construction:
- Ceramic or ferrite core
- Laser-welded winding
- Flame-retardant encapsulation

Applications:
- Filtering of supply voltages, coupling, decoupling
- Antenna systems
- Automotive electronics
- Telecommunications



DIMENSIONS: mm

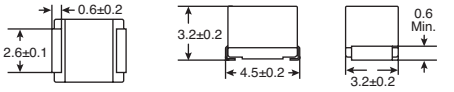
SIMID 1812-T SERIES

Features:
- High current handling capability
- Same measuring frequency for L and Q
- Suitable for reflow (IR and vapor phase) and wave soldering

Construction:
- Upright ferrite drum core
- Laser-welded winding
- Flame-retardant encapsulation

Applications:
- Filtering of supply voltages, coupling, decoupling
- DC/DC converters
- Automotive electronics
- Telecommunications



DIMENSIONS: mm

ICE COMPONENTS Transformers

RoHS Compliant This product is RoHS compliant.

ice components

CT02 SERIES SMT CURRENT SENSE TRANSFORMERS

Features:
- Smallest Footprint
- Hi-Pot tested at 1,500VAC
- Current Ratings to 18A
- Patent Pending

Applications:
- DC/DC Converters
- AC/DC Converters
- POL Converters

For quantities greater than listed, call for quote.

CT04 SERIES SMT CURRENT SENSE TRANSFORMERS

Features:
- Low Profile
- Full Selection of Turns Ratios
- Primary Rated for 20A
- Frequency Range up to 1MHz
- Suitable for Pick And Place Applications
- Withstands Solder Reflow

Applications:
- DC/DC Converters
- AC/DC Converters

For quantities greater than listed, call for quote.

CT06 SERIES CURRENT SENSE TRANSFORMERS

Features:
- Small Footprint
- Hi-Pot tested at 1,500VAC
- Current Ratings to 18A
- Patent Pending
- Meets basic creepage

Applications:
- DC/DC Converters
- AC/DC Converters
- POL Converters

NEW PRODUCT

For quantities greater than listed, call for quote.

X-COIL SERIES GATE AND SIGNAL TRANSFORMERS

Features:
- Small Footprint
- Low Profile
- Flat Top Surface Suitable for Pick-and-Place
- RoHS Compliant

Applications:
- Gate Drive Transformer
- Isolated Pulse and Signal Transformers
- DC/DC and AC/DC Converters

For quantities greater than listed, call for quote.

GT02 SERIES SMT GATE DRIVE TRANSFORMERS

Features:
- Low Profile - 3mm
- Designed for Frequencies from 75kHz to over 1MHz
- Suiteable for Pick and Place applications

Applications:
- Gate Drive Transformer
- AC/DC and DC/DC Converters
- Pulse/Signal Transformers

For quantities greater than listed, call for quote.

GT03 SERIES SMT GATE DRIVE TRANSFORMERS

Features:
- Meets medical VDE creepage/clearance
- Optimized for frequencies from 100kHz to 350kHz

Applications:
- Gate Drive Transformer
- AC/DC and DC/DC Converters
- Signal Transformer Across Isolation Barrier

For quantities greater than listed, call for quote.

ICE COMPONENTS Transformers and Inductors

RoHS Compliant **This product is RoHS compliant.**

GT04 SERIES SMT GATE DRIVE TRANSFORMERS

Features:
- Meets medical safety isolation requirements
- Designed for frequencies from 20kHz to 300kHz
- Available in UL Class F (155˚C) or Economical Class B (130˚C) Versions

Applications:
- Gate Drive Transformer
- Signal Transformer Across Isolation Barriers
- Off-Line AC/DC Converters
- High-Powered DC/DC Converters

NEW PRODUCT

DIMENSIONS: mm

I02 SERIES CURRENT POWER INDUCTORS

Features:
- High Saturation Current to 60A
- DCR as low as 0.60mΩ
- High Energy Storage in a Compact Package
- Lower DCR than similar Toroid Design

Applications:
- Desktop CPUs
- Servers
- VRMs
- DC/DC Converters

For quantities greater than listed, call for quote.

I03 SERIES CURRENT POWER INDUCTORS

Features:
- High Saturation Current to 50A
- DCR as low as 0.98mΩ
- High Energy Storage in a Compact Package
- Lower DCR than similar Toroid Design

Applications:
- Desktop CPUs
- Servers
- VRMs
- DC/DC Converters

For quantities greater than listed, call for quote.

I04 SERIES OUTPUT POWER CHOKES

Features:
- Designed for Use with Popular Flyback Controllers
- Cost Effective Toroid Design
- Low DCR to Minimize Losses
- Range of Inductance Values at Each Current Rating

Applications:
- 2nd Stage Output Filter for Offline Power Supplies

FASTRON transponder coils are optimized for Low Frequency RFID applications, especially in automotive subsystems and wireless data transmissions. They can be used as miniature SMD transponder antennae.

Specifications:
- Operating Temperature: -40˚C to +125˚C
- Core types: Ferrite and Ceramic/Ferrite
- Tolerance: 5% and 10%

Features:
- High Q
- Gold pad metallization
- For surface mount assembly
- Direct cross to Coilcraft (4408AF, 4513FP)

Applications:
- Access control and tracking devices
- Passive keyless entry/keyless go systems
- Antennas and wireless modules
- Low frequency RFID products
- TPMS with wake-up function

NEW PRODUCT

4408AF SERIES TRANSPONDER COIL - 5% TOLERANCE

MURATA SMD Inductors

RoHS Compliant This product is RoHS compliant.

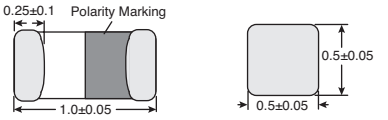
muRata Innovator in Electronics

LQG HIGH FREQUENCY MULTILAYER TYPE AIR CORE COIL

The LQG15HS series are chip inductors specifically designed for high frequency applications. The LQG15H series is designed to realize stable characteristics in high frequency range applying integrated multilayer process.

Applications:

- High frequency circuits of mobile phones such as PA, ANT, VCO, SAW, etc.
- Mobile phones such as GSM, CDMA, PDC, etc.
- "Bluetooth"
- W-LAN
- High frequency circuits in general



For quantities greater than listed, call for quote.

LQH SERIES CHOKE WINDING TYPE FERRITE CORE

The LQH31C series consists of miniature chip inductors with low DC resistance, high current capacity, and high impedance characteristics. It is suitable for use as choke coils in DC power supply circuits.

PLA10 SERIES - COMMON MODE CHOKE COILS

Features:

- Compact and lightweight
- Low profile in vertical core layout
- Both a standard winding type and a sectional winding for higher frequency noise is available

Specifications:

- Operating Temperature Range: -25°C to 60°C

✻ Safety standards: EN60065

For quantities greater than listed, call for quote

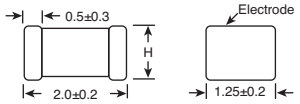
RoHS Compliant This product is RoHS compliant.

LQM SERIES MULTILAYER TYPE FOR CHOKE FERRITE CORE

The LQM21D series consists of magnetically shielded chip inductors. It has less than half the DC resistance of our conventional monolithic chip inductors as well as high inductance.

Inductance	Dimension of H
1.0 to 10μH	0.85±0.2
22 to 47μH	1.25±0.2

DIMENSIONS: mm



RoHS Compliant

For quantities greater than listed, call for quote.

LQW2UA SERIES HIGH FREQUENCY HORIZONTAL WIRE WOUND SMD INDUCTORS

LQW2UA series consists of air-core chip inductor using a alumina core as a bobbin.

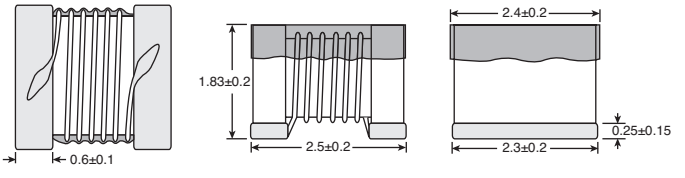
Features:

- Inductance: 12 to 4700nH (Wide inductance ranges)
- Because of the high self-resonant frequency, it can be used in high frequency range from several 10MHz to 3GHz.
- Tight inductance tolerance (+/-5%)
- It is easy to mount because the resin is coated on the upper surface.
- Reflow soldering methods can be employed.

Applications:

- Impedance Matching: Set Top Box
  Cable Modem

DIMENSIONS: mm



For quantities greater than listed, call for quote.

MURATA Common Mode Choke Coils

RoHS Compliant **This product is RoHS compliant.**

muRata Innovator in Electronics

PLY10 SERIES HYBRID CHOKE COIL

Features:
- PLY10 has both functions of a common mode choke coil and a differential mode choke coil in its compact body
- Low profile in vertical core layout
- PHY10 has the same pin layout as a general common mode choke coil which enables it to replace conventional components

✻ Safety standards: EN60065

Specifications:
- Operating Temperature Range: -25°C to 60°C

For quantities greater than listed, call for quote

PLY17 SERIES

Features:
- Integration of choke coil function to suppress differential mode/low and high frequency common mode noise.
- Low profile (H=<13mm)

Applications:
- For AC power supply, AC adapter
- Low-profile equipment such as lighting equipment FPD, Digital amplifier

Specifications:
- Operating Temperature Range: -25°C to 60°C

For quantities greater than listed, call for quote

PLT08C SERIES COMMON MODE CHOKE COILS (FOR DC LINE)

The PTC08C series is common mode choke coil for DC line. It is effective against the common mode noise that can cause radiative noise in power supply lines and interface lines. The high coupling factor enables effective suppression of common mode noise without appreciably altering the normal mode signal waveforms even when the signal and noise frequencies are close to each other.

Applications:
- For suppressing noise radiation from interface cables of digital equipment such as computers and computer peripherals
- For supressing noise radiation from the power supply cords of supply cords of digital equipment that uses adapters

Specifications:
- Operating Temperature Range: -25°C to 60°C

For quantities greater than listed, call for quote

PLT09H SERIES COMMON MODE CHOKE COILS (FOR DC LINE)

PLT09H seies is a common mode choke coil for DC lines. It is effective against the common mode noise that can cause radiative noise in power supply lines and interface lines. The additional normal mode inductance enables a high suppression effect to radiation noise.

Features:
- This is a wide frequency range type, suitable in applications ranging from a few MHz to several 100MHz

Applications:
- Noise suppression of SW power supply, DC-DC converter
- DC power lines in a AC adapter of portable equipment

Specifications:
- Operating Temperature Range: -40°C to +85°C

For quantities greater than listed, call for quote

DLP11TB SERIES - 1210 SIZE CHIP TYPE COMMON MODE CHOKE COILS

Features:
- Small size of 1.25x1.0mm is optimally suited to mobile devices.
- Cut-off frequency in the transmission characteristics (Sdd21) boosted to 8GHz or more to reduce the effects of noise on the signals.
- Operating temperature: -40°C to +85°C

Applications:
- USB 3.0 connectors featured in personal computers and in PC peripheral devices.

RoHS Compliant

DLP SERIES - COMMON MODE CHOKE COILS

DLP0NS Features:
- Small size: 0.85x0.65x0.45mm
- Enables noise suppression for differential signal line without distortion in high-speed signal transmission due to its line impedance matching.

DLP2AD Features:
- 2 components are included in 2.0x1.0mm size.
- Can suppress common mode noise without damage to signal wave.

DLP11SA and DLP11SN Features:
- Small size: 1.25x1.0x0.82mm
- Enables noise suppression for differential signal line without distortion in high-speed signal transmission due to its high coupling.

DLP31S Features:
- Small size: 3.2x1.6x1.15mm
- Suppresses high frequency noise that was unable to be suppressed with exisiting common mode choke coils.

DLP31D Features:
- 2 components included in 3.2x1.6mm size. Thin type: 1.15mm
- Can suppress common mode noise without damage to signal wave.

RoHS Compliant

For quantities greater than listed, call for quote.

DLW SERIES - WOUND TYPE

DLW5BS Features:
- High impedance
- Large rated current
- Does not damage high speed signal due to high coupling common mode choke coil.
- Rated Voltage: 50Vdc

DLW21 Features:
- Low profile
- Small size: 2.0x1.2x0.9mm
- Suitable for differential signal line like USB 2.0, IEEE1394 and LVDS.
- Rated Voltage: 50Vdc

DLW31 Features:
- Low profile
- Small size: 3.2x1.6x1.9mm
- Enables noise suppression for differential signal lines without distortion in high speed signal transmission due to its high coupling.
- Rated Voltage: 50Vdc

RoHS Compliant

For quantities greater than listed, call for quote.

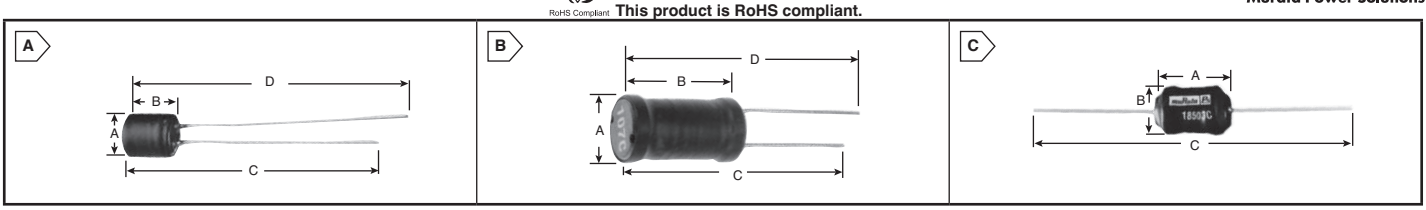
MURATA POWER SOLUTIONS Inductors

RoHS Compliant This product is RoHS compliant.

Murata Power Solutions



RADIAL LEAD INDUCTORS

- UL VW-1 rated sleeving
- Low DC resistance
- RoHS Compliant

1100R Series, Radial Lead

- Dimensions (mm): A-5.0, B-7.5, C-41.0, D-45.0

For quantities greater than listed, call for quote.

MURATA POWER SOLUTIONS Inductors

RoHS Compliant This product is RoHS compliant.

1400 SERIES BOBBIN INDUCTORS

- Low DC resistance
- Low temperature dependence
- Radial format
- PCB Mounting hole
- Operating temperature: -40°C to +85°C
- RoHS Compliant

✻ Dim: 29.8

RoHS Compliant

For quantities greater than listed, call for quote.

MURATA POWER SOLUTIONS Inductors

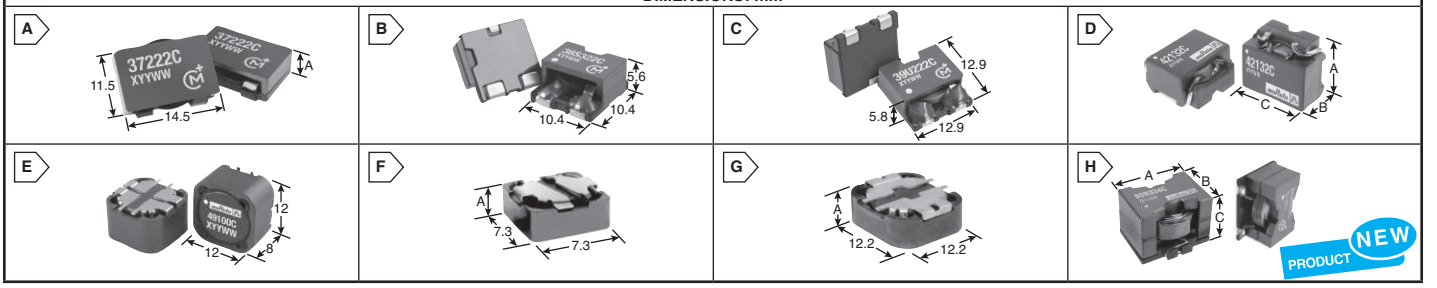
RoHS Compliant **This product is RoHS compliant.**

Murata Power Solutions

DIMENSIONS: mm



3700 SERIES FLAT COIL SMT POWER INDUCTORS

- High current, low DCR
- Pick & place compatible
- Backward compatible with Sn/Pb soldering systems

For quantities greater than listed, call for quote.

6000A SERIES HIGH-CURRENT SMT POWER INDUCTORS

- High energy storage, low resistance
- J-STD-020D.1 reflow
- Tape and reel packaging
- UL 94V-0 packaging materials

For quantities greater than listed, call for quote.

PANASONIC SMD Power Choke Coils

RoHS Compliant **This product is RoHS compliant.**

ETQ-P3W SERIES

Features:
- Low profile at 3mm height
- Low DC resistance (DCR) for high frequency
- Rated power range: 8.1A down to 3.8A for inductances ranging from 0.92μH to 4.2μH
- Metal composite core material
- Wirewound construction
- Shielded

Benefits:
- Linear inductance vs. current performance
- Structural integrity
- Low audible noise
- Vibration tolerant

Applications:
- DC-to-DC conversion
- Battery powered devices

Industries:
- Communications
- Industrial
- Computer
- Transportation

For quantities greater than listed, call for quote.

PCC-D124H SERIES

Features:
- High power, high inductance (No saturation performance limitation due to metal dust core) (17A to 32A/1.25μH to 0.32μH)
- Low loss due to low R_{DC} (using flat wire)
- Low buzz noise due to its gap-less structure
- Surface mount, low profile (H)3.9mm x (L)13.0mm x (W)12.9mm

Applications:
- DC-DC converter for CPU in PCs
- Thin on-board power supply modules for servers

For quantities greater than listed, call for quote.

PCC-F126F SERIES

Features:
- High Power (Isat 20A/100°C)
- Thin profile (5.7mm height)/SMD
- Low leakage flux

Applications:
- DC-DC converter for driving PCs at high speed
- On-board power supply module for DC-DC converters (10 to 40W)

For quantities greater than listed, call for quote.

PCC-D125H SERIES

Features:
- High power, high inductance (No saturation performance limitation due to metal dust core) (17A to 50A/2.12μH to 0.24μH)
- Low loss due to low R_{DC} (using flat wire)
- Low buzz noise due to its gap-less structure
- Surface mount, low profile (H) 4.9mm x (L) 13.0mm x (W) 12.9mm

Applications:
- DC-DC converter for CPU in PCs
- Thin on-board power supply modules for servers

For quantities greater than listed, call for quote.

PCC-M104L SERIES

Features:
- Small mounting size for multi-phase DC-DC converter circuits
- Small type (11.5x10.0xH4.0mm)
- High power (21A to 28A)
- Low loss (R_{DC}: 0.7mΩ to 1.56mΩ)
- Tighter DCR tolderance (±5% to ±10%)
- Suitable for high frequency circuit (up to 1MHz)
- Low buzz noise due to its gap-less structure

Applications:
- Servers, routers, DC-DC converters for driving CPUs
- Notebook PC power supply modules

For quantities greater than listed, call for quote.

RoHS Compliant **This product is RoHS compliant.**

SMD POWER CHOKE COILS

PCC-M125I Series

Features:
- High power (25A to 30A)
- Low loss (R_{DC}: 0.8mΩ to 1.1mΩ)
- Narrow R_{DC} tolerance (±5% to ±7%)
- Low profile (14.5x12.5xH5.0mm)
- High frequency (up to 1MHz)
- Low buzz noise due to its gap-less structure

Applications:
- Servers, routers, DC-DC converters for driving CPUs
- Notebook PC power supply modules

For quantities greater than listed, call for quote.

PCC-M0754M/M0854M/M1050M/M1054M Series

Features:
- High heat resistance: operation up to 150°C
- High reliability: high vibration tolerance in high temperature due to newly developed integral construction and sever condition of automotive application is cleared
- High bias current: excellent inductance stability by using ferrous alloy magnetic material
- Temp. stability: excellent inductance stability in wide temp. range
- Low buzz noise: new metal composite core technology
- High efficiency: low R_{DC} of winding and low eddy-current loss of the core

Applications:
- Noise filter for various drive circuitry requiring high temp. operation and peak current handling capability
- DC-DC converters

SMD CHIP CHOKE COILS

ELL - VEG/VFG-C/VGG Series

Features:
- Magnetically shielded structure
- Low DC resistance and large current capability
- Shock resistant

Applications:
- DC-DC converter circuitry for computer peripherals and cellular phones
- Chopper circuit decoupling chokes for DC-DC converter circuitry

Type	H
ELLVEG	1.0 max.
ELLVFG-C	1.2 max.
ELLVGG	1.5 max.

SMD CHOKE COILS

ELL-5PR Series

Features:
- Magnetically shielded structure
- Low DC resistance and large current capability

Applications:
- DC-DC converter circuitry for computer peripherals and cellular phones
- Chopper circuit decoupling chokes for DC-DC converter circuitry

ELL-6RH Series

Features:
- Thin (height 2.5 mm, 3.0 mm)
- Higher reliability in mounting by separating the user terminal and internal connection
- Large current capability

Applications:
- Video, Audio, Mobile communications, Electric battery driven equipment
- As a decoupling choke coil in DC-DC converters

Type	H
ELL6RH	2.5 ±.30
ELL6SH	3±.30
ELL6UH	5 max.

PANASONIC Fixed Inductors

Panasonic

RoHS Compliant This product is RoHS compliant.

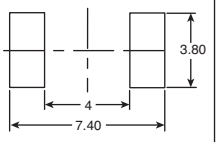
ELL-6SH SERIES - SMD CHOKE COILS

Applications:
- Video, Audio, Mobile communications, Electric battery driven equipment
- As a decoupling choke coil in DC-DC converters

Features:
- Thin (height 2.5mm, 3.0mm)
- Higher reliability in mounting by separating the user terminal and internal connection
- Large current capability

RoHS Compliant

Recommended land patterns in mm (not to scale)



Connections (Top View)

ELL-ATV SERIES - SMD CHOKE COILS

Applications:

- DC-DC converter circuitry for computer peripherals and cellular phones
- Chopper circuit decoupling chokes for DC-DC converter circuitry

Features:

- Magnetically shielded structure
- Low DC resistance and large current capability
- Available on tape and reel for automatic insertion

RoHS Compliant

PANASONIC Fixed Inductors

Panasonic

RoHS Compliant This product is RoHS compliant.

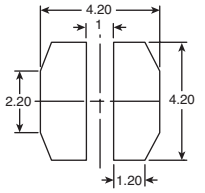
ELL-4FG SERIES - SMD CHOKE COILS

Applications:
- DC-DC converter circuitry for computer peripherals and cellular phones
- Chopper circuit decoupling chokes for DC-DC converter circuitry

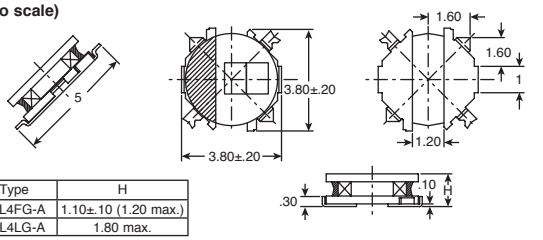
RoHS Compliant

Features:
- Magnetically shielded structure
- Low DC resistance and large current capability
- Shock resistant

Recommended land patterns in mm (not to scale)



DIMENSIONS: mm (not to scale)



Type	H
ELL4FG-A	1.10±.10 (1.20 max.)
ELL4LG-A	1.80 max.

For quantities greater than listed, call for quote.

ELJ-OE SERIES - 1608 CASE SIZE, LASER-CUT CHIP INDUCTORS

Features:

- Non polar product
- Laser-cut technology offering precision
- Unique Ceramic Core
- High Self Resonant Frequency (SRF)
- High Q devices in 0603 case size
- Capable of being re-flow or flow soldered
- Cost effective over wire-wound

HIGH POWER INDUCTORS

Features:

- Low DCR and large current capability, suitable for power circuitry
- Wire wound, resin molded chip inductor. (PC, PA, PB types)
- Unique Ceramic Core/Laser-cut technology (PF, PE type)
- Capable of being Re-fl ow or fl ow soldered
- Wide line-up from 1005 to 4532 case sizes

For quantities greater than listed, call for quote.

RoHS Compliant This product is RoHS compliant.

ELJ-PB SERIES - 1812 CASE SIZE, HIGH POWER

Applications:

- AV equipment, Wireless communication equipment and various types of general electronic equipment

RoHS Compliant

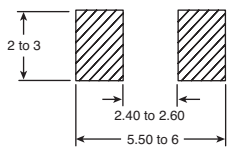
Features:

- Low DCR and large current capability, suitable for power circuitry
- Wire wound, resin molded chip inductor. (PC, PA, PB types)
- Capable of being Re-flow or flow soldered
- Wide line-up from 1005 to 4532 case sizes • Good for mounting

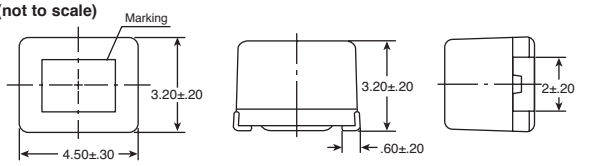
Specifications:

- Operating Temperature : –20°C to +85°C

Recommended land patterns in mm (not to scale)



DIMENSIONS: mm (not to scale)



For quantities greater than listed, call for quote.

ELJ-FC SERIES - 1008 CASE SIZE, GENERAL USE

Applications:

- AV equipment, Wireless communication equipment and various types of general electronic equipment

Features:

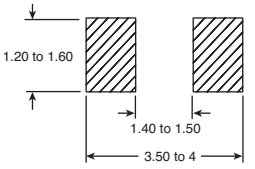
- General use wire wound, resin molded chip inductor
- Capable of being Re-fl ow or fl ow soldered
- Wide line-up from 2520 to 4532 case sizes
- Good for mounting

RoHS Compliant

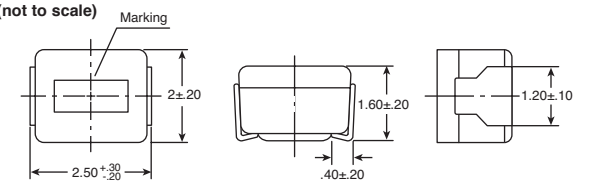
Specifications:

- Operating Temperature : –20°C to +85°C

Recommended land patterns in mm (not to scale)



DIMENSIONS: mm (not to scale)



For quantities greater than listed, call for quote.

RoHS Compliant This product is RoHS compliant.

ELJ-FC SERIES - 1008 CASE SIZE, GENERAL USE (CONT.)

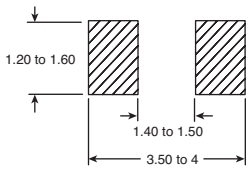
Applications:
- AV equipment, Wireless communication equipment and various types of general electronic equipment

Features:
- General use wire wound, resin molded chip inductor
- Capable of being Re-fl ow or fl ow soldered
- Wide line-up from 2520 to 4532 case sizes
- Good for mounting

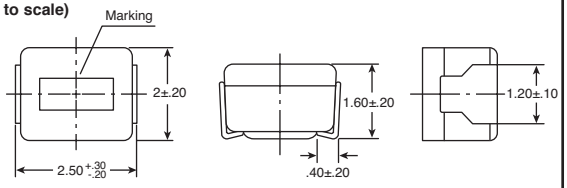
Specifications:
- Operating Temperature : –20°C to +85°C

RoHS Compliant

Recommended land patterns in mm (not to scale)



DIMENSIONS: mm (not to scale)



For quantities greater than listed, call for quote.

PANASONIC High Frequency Fixed Inductors

Panasonic

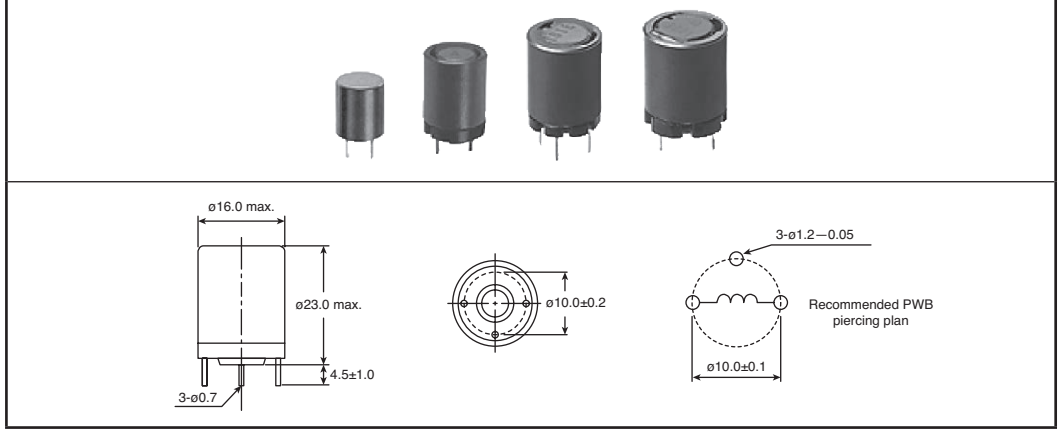
RoHS Compliant This product is RoHS compliant.

ELC SERIES CHOKE COILS - MAGNETIC SHIELD TYPE

Features:
- High-u and High Bm cores
- Wide inductor range
- Magnetic shield type

Applications:
- CTV, VCR, Audio, PC, Fax machines, PDP, Home applicance

DIMENSIONS: mm



For quantities greater than listed, call for quote.

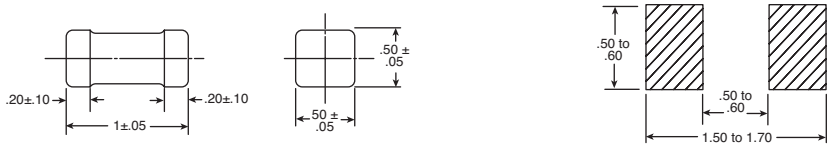
QF SERIES HIGH FREQUENCY HIGH Q - NON MAGNETIC CORE

Features:
- Non polarity product
- Good for mounting
- High self resonance frequency
- Capable of being Re-flow or flow soldered
- Unique Ceramic Core/Laser-cut technology

Specifications:
- Operating Temp: -20°C to +85°C

Recommended Applications:
- RF circuitry for cellular phones and wireless communication equipment

DIMENSIONS: mm



For quantities greater than listed, call for quote.

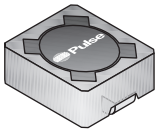
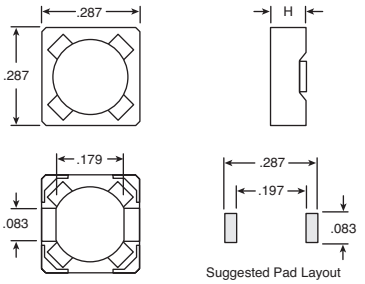
PULSE SMT Power Inductors and Shielded Drum Core

RoHS Compliant **This product is RoHS compliant.**

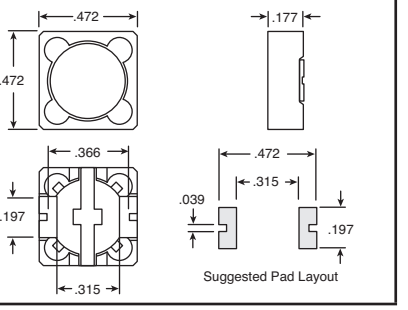
DIMENSIONS: in.



P1166, P1167



P1168, P1169



Pulse offers a complete range of power magnetics for DC-DC converter and switchmode designs. These magnetics include power inductors, power transformers, current sensors, gate drive transformers and common mode inductors.

Many parts are designed for low voltage, high current and high frequency applications. Pulse manufactures the broadest selection of packaging options from various through hole devices to the smallest available surface mount solution with a height of .071" (1.80mm).

Features:

- Low profile and suitable for compact surface area mounting
- Large permissible DC current
- Low DC resistance

Pulse P1166 SERIES

Height =.138"

For quantities greater than listed, call for quote.

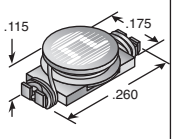
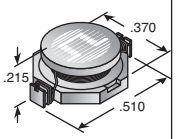
PULSE SMT Power Inductors

RoHS Compliant **This product is RoHS compliant.**

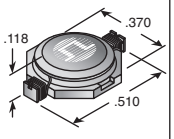
DIMENSIONS: in.



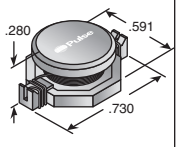
P0770



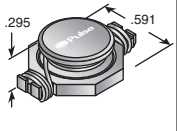
P0751/2



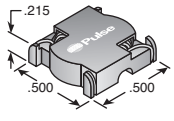
P0762



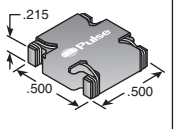
P0250



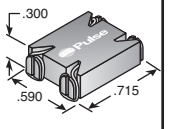
P1252



"Bobcat"



"Polecat"



"Tomcat"

Features:

- Reliable self-leads
- High energy storage and low DC resistance
- Ideal for DC/DC conversion in notebook computers
- Direct Coilcraft replacement
- PDA's, step-up or step-down converters

Specifications:

- Operating Temperature: -40°C to +85°C

CDRH6D38T SERIES

Specifications:

- Ferrite drum core construction
- Magnetically shielded
- Moisture Sensitivity Level: 1
- Halogen Free available
- Operating temperature range: -40°C to 125°C
- Solder reflow temperature: 260°C peak

CDRH8D43RT SERIES

Specifications:

- Ferrite drum core construction
- Magnetically shielded
- Moisture Sensitivity Level: 1
- Halogen Free available
- Operating temperature range: -40°C to 125°C
- Solder reflow temperature: 260°C peak

PRODUCT NEW

For quantities greater than listed, call for quote.

SUMIDA Power Inductors

RoHS Compliant **This product is RoHS compliant.**

CDEP134 SERIES

High current handling and low DCR are achieved in a small package with Flat Wire Technology. EMI Shielding is used to minimize crosstalk interference.

For quantities greater than listed, call for quote.

SUMIDA Power Inductors

RoHS Compliant **This product is RoHS compliant.**

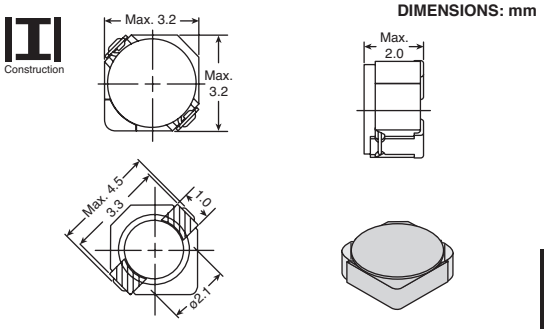
CDRH2D09 SERIES

Features:
- Measuring Freq. (L): 100KHz
- Tolerance of Inductance: 1.5μH-10μH ± 30% (N)

DIMENSIONS: mm



For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Sumida Part No.	Value (μH)	Current (mA)	Price Each 1	10	100	500
851-CDRH2D09NP-2R2MC	CDRH2D09NP-2R2MC	2.2	600	.94	.749	.685	.621

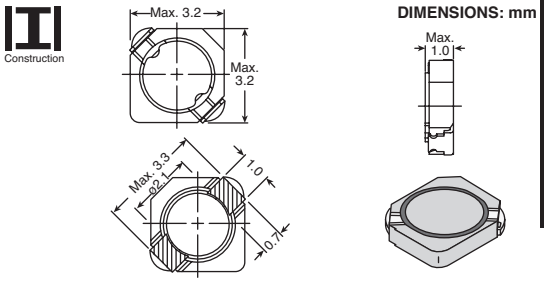
CDRH2D18 SERIES

Features:
- Measuring Freq. (L): 100KHz
- Tolerance of Inductance: 1.7μH-10μH ± 30% (N)

DIMENSIONS: mm



For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Sumida Part No.	Value (μH)	Current (mA)	Price Each 1	10	100	500

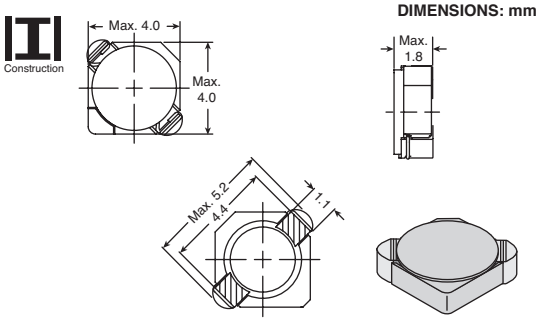
CDRH3D16 SERIES

Features:
- Measuring Freq. (L): 100KHz
- Tolerance of Inductance: 1.5μH-33μH ± 30% (N)

DIMENSIONS: mm



For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Sumida Part No.	Value (μH)	Current (mA)	Price Each 1	10	100	500
